LEE, *s.* [*lie*, Fr.] dregs or sediment of any liquor: seldom used in the singular. Among Sailors, that part which is opposite to the wind. A *lee-shore* is that on which the wind blows. To be under the *lee* of the shore, is to be close under the weather shore. A *leeward* ship, is one that is not fast by a wind, to make her way so good as she might. To lay a ship by the *lee*, is to bring her so that all her sails may lie against the masts and shrouds flat, and the wind to come right on her broadside, so that she will make little or no way.

LEECH, *s.* [*lec*, Sax.] a physician; a professor of the art of healing; whence we still use *cowleech* or *horseleech*. A kind of water serpent, used to draw blood in such cases where the lancet might not be safe, or where it might be dreaded too much by the patient.

LEE'CHCRAFT, *s.* the art of healing. "We *leechcraft* learn." *Davies*.

LEEDS, a town in the W. Riding of Yorkshire, situated in a vale which trade has rendered one of the most populous spots in England. It is the principal of the clothing towns in Yorkshire, and is particularly the mart for the coloured and white broad cloths, of which vast quantities are sold in its magnificent Cloth Halls. That called the Mixed-Cloth Hall, is a building of considerable extent, in which the cloth is placed on benches, for sale, every market-day; and the whole business is transacted within little more than an hour, without the least noise or confusion, and with a whisper only, the laws of the market being observed here with particular strictness. The White-Cloth Hall, is a similar

building. The manufactures that supply these two halls extend about 10 miles to the S. 15 to the S. W. and 8 to the N. and W. the mixed cloths being mostly made in the neighbourhood of the river Air, and the white cloths in that of the Calder. Leeds has a manufactory of Camlets, which has declined, and a flourishing one of carpets, resembling those of Wilts and Scotland. Here are also mills for the cutting of tobacco, and a great pottery, with several glass-houses. Within 3 miles of the town are numerous collieries. Of late years the town has been considerably enlarged; and some of the new parts are built in an elegant style. It is situated on the river Air, by which it communicates with all the various ramifications of the Grand Canal, and by which, in particular, it enjoys a very considerable trade in coals, from the inexhaustible stores in its neighbourhood, to York, Hull, &c. 24 miles W. S. W. of York, and 192 N. by W. of London. Markets on Tuesday and Saturday. Inhabitants, including the out-townships, in 1821, 83,853.

LEEK, *s.* [*leac*, Sax.] in Botany, the porrum.

LEEK, a town in Staffordshire, noted for a manufacture of buttons. By the intervention of a craggy mountain, at a considerable distance westward of the town, the sun sets twice in the evening at a certain time of the year; for after it sets behind the top of the mountain, it breaks out again on the northern side of it, which is steep, before it reaches the horizon in its fall. In its church-yard are the remains of a Danish cross, now upright, and 10 feet high from the ground, beneath which are three steps. In the neighbourhood are some extensive coal mines. It is situated in a barren country, among moorlands and rocky hills, some of which are of a most surprising height, without any turf or mould upon them, on the great road between Manchester, Stockport, and Macclesfield, to the N. W. and Derby, Leicester, &c. to the S. E. 18 miles N. of Stafford, and 155 N. N. W. of London. Market on Wednesday.

LEGGED, *a.* having legs; supported by legs.

LEGHORN, a handsome and regularly built town of Italy, in the late duchy of Tuscany, with an inward and outward harbour, in the Mediterranean. The Greeks and Armenians have churches of their own, and the Turks have a mosque. The Jews have a handsome synagogue here, as well as schools. Though subject to heavy imposts, they are very rich, and well protected. The inhabitants are computed at 50,000, among whom are 16,000 Jews. The streets are wide and straight, and almost all the houses are of the same height. There are so many canals, that some have given it the title of New Venice. Near the harbour is a large building, in which they shut up every night the Turkish and the galley slaves. At a little distance, on a single rock, forming a small island, is a light-house, where, every night, 30 burning lamps are contained in one lantern. The commodities imported hence by the English, in time of peace, are chiefly silk, wine, and oil. In 1741, this city suffered greatly by an earthquake. It is 45 miles S. W. of Florence, and 145 N. N. W. of Rome. Lat. 43. 34. N. lon. 10. 17. E.

LEGUMINOUS, *a.* [*legumineux*, Fr.] belonging to, or consisting of, pulse.

LEICESTER, the capital of Leicestershire, is an ancient place, and though declined from its former magnitude, is still large and populous, but not a handsome town. In the Saxon Heptarchy, it was the see of a bishop, and the chief city of the Mercian kingdom. It was at one time a most wealthy place, and, if we may believe Matthew Paris, had 32 parish churches. At present, it contains five churches, near one of which are the famous ruins of a Roman wall, composed of ragstone and Roman brick, and imagined to be a remnant of a temple of Janus, erected on the spot 2000 years ago. Here is also a Roman millary, (the oldest known in Britain, and containing the first inscription mentioned in this island,) which was found near Thurmaston, in 1771; it now forms the centre of an obelisk, in one of the principal streets, surmounted with a lamp. The hall and kitchen of its ancient castle, (a prodigious building, where the great duke of Lancaster held his court, who added 26 acres to it, which he inclosed with a brick wall,) are still entire. The former is lofty and spacious, and the courts of justice, at the assizes, are held in them. Here is also one of its gateways, with a very curious arch, the tower over which is now turned into a magazine for the county militia. Here is a very spacious market-place, with one of the largest markets in England for corn and cattle. The combing and spinning of wool into worsted, and manufacturing it into stockings by frames, is the chief business of the town and neighbourhood. In some years 100,000*l.* have been returned in these articles. Its fairs, which are upon a large scale, for sheep, horses for the collar, cattle, cheese, &c. are on May 12th, July 5th, October 10th, and December 8th. The number of inhabitants is 30,254. It is seated on the river Soar, which has lately been made navigable from Leicester to Loughborough, 24 miles S. by E. of Derby, and 98 N. N. W. of London. Market on Saturday.

LEICESTERSHIRE, a county of England, bounded on the N. W. and N. by Derbyshire and Nottinghamshire; on the E. by the counties of Lincoln and Rutland; on the S. E. and S. by Northamptonshire; and on the S. W. by Warwickshire. It extends about 38 miles from N. to S. and as many from E. to W. in the broadest part. It is divided into six hundreds, which contain 12 market towns, and 200 parishes, with a population, in 1811, of 150,419, and, in 1821, 174,571 inhabitants. The air is healthy, and the soil, in general, strong and stiff, composed of clay and marl. It affords great quantities of rich grazing land, and is peculiarly fitted for the culture of beans, for which it is proverbially noted. Toward the N. W. the Bardon hills rise to a great height; and in their neighbourhood lies Charnwood,

or Charly Forest, a rough and open tract. Farther to the N. W. are valuable coal mines. The N. E. parts feed great numbers of sheep, which are the largest, and have the greatest fleeces of wool, of any in England; they are without horns, and clothed with thick long flakes of soft wool, particularly fitted for the worsted manufactures. The E. and S. E. part of the county is a rich grazing tract. This county has been long famous for its large black dray-horses, of which great numbers are continually sent up to London, as well as for its horned cattle and sheep, which supply the London markets with the largest mutton; and its reputation has been much extended by the great skill of the late Mr. Bakewell, of Dishley, who bred every species of domestic quadrupeds to the utmost perfection of form and size. The manufacture of stockings is the principal one in this county. Its chief rivers are the Avon; the Soar, anciently the Leire; the Wreke; Anker; Swift; Eye; and Welland.

LEIGH, a town of Lancashire, of little or no account; for the market is almost come to nothing, and there are no fairs. It is 200 miles N. W. of London.

LEIGHTON-BUZZARD, a town of Bedfordshire, with a market on Tuesday. It is 41 miles N. W. of London.

LEINSTER, a province of Ireland, bounded on the E. and S. by St. George's Channel, on the W. by Connaught and Munster, and on the N. by Ulster. It is about 112 miles in length, and 70 in breadth. It contains 12 counties, and 992 parishes. The counties are, Carlow, Dublin, Kildare, Kilkenny, King's County, Longford, Lough, Meath, Queen's County, West Meath, Wexford, and Wicklow. It is the most level and best cultivated province in the kingdom; but in the early ages was almost one continued forest, the remains of which are still found in the trees which are dug out of the bogs. Dublin is the capital. The chief rivers are the Barrow, Boyne, Liffey, Neur, Urrin or Slane, May, and Inny. It is in general well cultivated; the air is temperate; and the soil fruitful in corn and pastures.

LEIPSIC, a rich, large, and celebrated town of Germany, in the circle of Upper Saxony, and in Misnia, or Meissen, with a castle and a famous university. It is a handsome place, neat and regularly built, and the streets are lighted in the night; it carries on a great trade, and has a right to stop and sell the merchandises designed to pass through it; and the country, 75 miles round, has the same privilege. There are three great fairs every year, at the beginning of the year, Easter, and Michaelmas, which last 15 days each. It is seated in a plain, between the rivers Saale and Mulde, near the confluence of the Pleyse, the Elster, and the Barde; 40 miles N. W. of Dresden. Leipsic is noted for being the scene of the bloody conflicts between the allied armies and the emperor Napoleon in October, 1813. Lon. 12. 21. E. lat. 51. 22. N.

LEISURELY, *ad.* deliberately; slowly; gradually.

LEITH, a sea-port of Scotland, on the frith of Forth, 2 miles N. N. E. of Edinburgh, of which it is the port. It is situated at the mouth of the river Leith, which forms the harbour, and divides the town into N. and S. Leith, which communicate by a draw-bridge. The commerce of Leith is very considerable. Its population in 1811 amounted to 20,363. Here are manufactures of ropes, sail-cloth, carpets, glass, soap, and candles, and several iron forges.

LEITRIM, a county of Ireland, in the province of Con-

naught, bounded on the N. by Donegal Bay, on the N. E. by Fermanagh, and on the S. E. by Cavan; by Longford on the S; Roscommon on the S. W.; and Sligo on the W. It is about 42 miles long, and from 6 to 17 broad; is a fertile, well-cultivated country, and though the northern parts (which however furnish food for great numbers of young cattle) are mountainous, yet the southern parts are level. It contains 21 parishes, but has few places of note. Leitrim, the county town, is pleasantly seated on the banks of the Shannon, 80 miles N. W. of Dublin.

LEVANT, *a.* [*levant*, Fr.] raising or making turbulent. Eastern. "Forth rush the *levant* and the *ponent* winds." *Par. Lost*.

LEVANT. This word properly signifies the EAST; but it is generally used, when speaking of trade, for TURKEY IN ASIA; comprehending Natolia, Syria, Palestine, Egypt, Barka, the island of Candia, and the adjacent parts. The LEVANT SEA means the eastern part of the Mediterranean.

LEVATOR, *s.* [Lat.] a surgeon's instrument, whereby the depressed parts of the skull are lifted up. In Anatomy, applied to those muscles which lift up or raise the parts to which they are fastened.

LEUCOPHLEGMACY, *s.* [*λευκός* and *φλέγμα*, Gr.] a kind of dropsy, consisting of a white flabby tumour all over the body.

LEUCOPHLEGOMATIC, *a.* [from *λευκός* and *φλέγμα*, Gr.] troubled with a leucophlegmacy, or white flabby tumor.

LEEVE, *s.* [Fr.] the time of rising. Figuratively, an assembly of persons meeting together in a great man's house, to pay him compliments at his rising.

LEVEL, *a.* [*læfel*, Sax.] even, or not having one part higher than another; in the same line with any thing else; equal in perfection or dignity. In Botany, applied to the branches or fruit-stalks when they grow to equal heights, so as to form a flat surface at the top, as in the flowers of the sweetwilliam.

To LEVEL, *v. a.* to make even, or without any inequalities, applied to surface. To make of the same height with any thing else; to make or lay flat; to reduce to a condition equal to that of another. Neuterly, to aim; to point a piece of ordnance in taking aim; to be in the same direction, or even with a mark; to aim or make attempts.

LEVEL, *s.* a plane; a surface without any inequalities. Figuratively, a rate, standard, or condition. "Above my ordinary *level*." *Dryd*. A state of equality. In Mechanics, an instrument used by masons to regulate their work. A

rule. The line of direction in which any piece of ordnance is placed.

LE'VEL, (BEDFORD) a tract of fenny land, consisting of about 300,000 acres, in the counties of Norfolk, Suffolk, Huntingdon, Northampton, Lincoln, Cambridge, and the Isle of Ely, which appear to have been dry land formerly, by the ruins of houses, large trees, &c. that have been found in several parts. After divers expensive attempts to drain these fens, in the reigns of Henry VI. and Charles I. William, duke of Bedford, and others, in 1649, undertook and completed it, so far as to bring about 100,000 acres of good land to use. In these fens are several decoys, where astonishing quantities of wild fowl are taken during the season. One of these, not far from Ely, generally sends 3000 couple weekly to London, and is let for 500l. a year.

LEVELLER, *s.* one who makes any thing even.

LEVELLING, *s.* the art or act of finding a line parallel to the horizon, at one or more stations, in order to determine the height of one place with respect to another, for laying grounds even, regulating descents, draining morasses conducting water, &c.

LEVELNESS, *s.* evenness, or equality of surface.

LEVEN. See LEAVEN.

LEVER, *s.* [*levier*, Fr.] in Mechanics, the second, if not the first, of the mechanical powers.

LEVIABLE, *a.* [from *levy*] that may be levied or forced to be paid.

LEVIATHAN, *s.* [*לִיָּאָן*, Heb.] the crocodile. Commentators are much divided in their opinions concerning this word, some making it the whale; but if we consider the description given of it in *Job* xli. we shall find criteria enough to restrain it to the crocodile.

To LEVIGATE, *v. a.* [*levig*, Lat.] to grind to an impalpable powder, between two stones; to mix liquors till they become smooth and incorporated.

LEVIGATION, *s.* the act of reducing hard bodies, such as coral, into a subtile powder, by grinding them on a stone.

LEVITE, *s.* [from *Levi*, Jacob's third son] one of the tribe of Levi, who was by inheritance an inferior kind of minister in the Jewish tabernacle and temple, having the care of the sacred utensils, and somewhat resembling in degree the deacons among Christians. A priest; used as a word of contempt, when applied to a Christian minister.

LEVITICAL, *a.* belonging to, or descended from, the Levites; exercised by, or confined to, the Levites.

LEVITICUS, *s.* a canonical book of the Scripture, being the third of the Pentateuch of Moses; thus called because it contains principally the laws and regulations relating to the priests, the Levites, and sacrifices.

LEVITY, *s.* [*levitas*, Lat.] lightness, or want of weight; inconstancy, or changeableness; unsteadiness; trifling gaiety; want of seriousness.

To LEVY, *v. a.* [*lever*, Fr.] to raise or bring together, applied to armies. To raise or collect money as a tax or fine. In Law, to pass; thus to *levy* a fine, is to pass a fine.

LEVY, *s.* the act of raising men or money. War raised.

LEWD, *a.* [*læuede*, Sax.] wicked, bad, or vicious. At present it is confined to signify lustful, or being lost to all sense of modesty.

LEWDLY, *ad.* wickedly or viciously. Lustfully; the last sense seems to be the only one in which it is used at present.

LEWDNESS, *s.* the quality of giving a loose to lust, or indulging such actions and inclinations as are inconsistent with modesty.

LEWDSTER, *s.* a lecher; one given to criminal pleasures.

LEWES, the principal town of Sussex, is a well-built, and ancient place, with about 6,500 inhabitants; and is seated on the river Ouse, which is navigable here for barges, 30 miles E. of Chichester, and 49 S. of London. It is finely situated on the declivity of a hill, on which are the remains of an ancient castle. It takes in the sea for 30 miles W. and an uninterrupted view of Banstead Downs, which is full 40 miles. On the river are several iron works, where cannon are cast for merchant ships, besides other useful works of that kind. The timber hereabouts is prodigiously large, and the soil is the richest in this part of England. Market on Saturday.

LE'WIS, one of the most considerable of the Western Islands of Scotland, which being connected by a narrow isthmus with Harris, forms but one island, which is about 40 miles in length, and 13 in its mean breadth. Like most of the Scottish isles, it is greatly intersected by arms of the sea. The country, in general, is wild, bleak, barren of wood, and little fitted for cultivation; the hills are covered with heath, which afford shelter for various sorts of game. The lakes and streams abound with salmon, large red trout, &c. The land animals here are similar to those found in the northern isles, and the fisheries on the coast are not inferior. Stornaway is the only town in Lewis. The island belongs to Ross-shire.

LEWIS D'ORE, *luce d'ore*, *s.* [Fr.] a golden French coin, valued at seventeen shillings English.

LEY, **LEE**, **LAY**, in composition of names, are derived from *leag*, Sax. and signify a field.

LE'YDEN, a city of Holland, supposed to be the same which Ptolemy calls *Lugdunum Batavorum*, seated in a country full of gardens and meadows, surrounded by ditches and canals, near the ancient bed of the Rhine, which now looks like a canal. It is about four miles and a half in circumference; and its ditches are bordered with rows of trees. It has eight gates, and contains 50 islands, and 145 bridges, the greatest part of which are made with free-stone. The public buildings are very handsome. There are several large hospitals, and an university, which has generally about 200 students, though there are but two colleges; for these scholars board in the town, and have no dress to distinguish them. The school consists of a large pile of brick building, three stories high. Adjoining to the school is the physic-garden, where the professor reads lectures in Botany. The library contains curious manuscripts; and the theatre for anatomy is the finest in Europe. Here are manufactures of the best cloths and stuffs in Holland, there being no less than 1600 workmen employed in them. On the 12th of Jan. 1807, a great part of Leyden was destroyed by the accidental explosion of 40,000lb. of gunpowder, and upwards of 5000 persons buried in the ruins, 500 of whom were dug out alive. It is 4 miles E. of the sea, and 20 S. W. of Amsterdam. Lat. 52. 8. N. long. 4. 28. E.

LI'ABLE, *a.* [*liable*, Fr.] obnoxious; subject to; not exempt from.

LIMA, a city of South America, capital of Peru, founded by Francis Pizarro in the beginning of the year 1535. It has an university, and gives its name to the principal audience of Peru. The streets are handsome and straight, but the houses are generally only one story high, on account of the earthquakes. However, they are pretty, and much adorned, having long galleries on the front. One part of the roofs is covered with coarse linen cloth, and the others only with reeds, which is not inconvenient, because violent rains are not known here; but the rich inhabitants cover theirs with fine mats, or beautiful cotton cloths. There are trees planted all round their houses, to keep off the heat of the sun. What the houses want in height, they have in length and depth; for some of them are 200 feet long, and proportionably broad, so that they have 10 or 12 large apartments on the ground floor. The royal square is very handsome; and in the middle is a fountain of bronze, adorned with the image of Fame, which spouts out water. On the E. and W. sides are the public structures, which are well built. The river which crosses Lima forms canals or streams, which run to most of the houses, and serve to water their gardens, &c. The city is about 4 miles in length and 2 in breadth, and is divided into 5 parishes. They make use of mules to draw their coaches, and of these there are about 5000. The churches and convents are exceedingly rich, and divine service is performed in them with a magnificence scarcely to be imagined. The ornaments, even on common days, exceed, in quantity and richness, those which many cities in Europe display on the most extraordinary occasions. Lima is the seat of the viceroy, whose office is generally triennial, and contains several courts, as that of the viceroy, of the archbishop, of the inquisition, of the consular or commerce, and of the wills. Earthquakes are here very frequent, and some have done this city a great deal of damage, particularly that in 1746, by which it was almost destroyed. The inhabitants are so rich, that when the viceroy, sent from Spain in 1682, made his public entrance into the city, they paved the streets he was to pass through with ingots of silver. It is said, that the inhabitants are very debauched, but, at the same time, extremely superstitious, having a

strong belief in the power of charms; that about a fourth part of the city consists of monks and nuns, who are not more chaste than the rest; that if any one happen to rival a monk, he is in danger of his life, for they always carry a dagger under their frocks; that the most profligate of them think they can atone for all their crimes, by hearing a mass, or kissing the robe of St. Francis or St. Dominic; and that then they return to their former practices. Lima is advantageously seated on the centre of the spacious, fertile, and delightful valley of Rimac, or Lima, the whole of which it commands without any difficulty, on a small river of the same name, near the sea. Lat. 12. 5. S. lon. 76. 24. W.

LIMATURE, *s.* [*limatura*, Lat.] filings of any metal; the particles rubbed off by a file.

LIMB, *s.* [*lim*, Sax. and Scot.] a member; a joint of any animal. An edge or border, used by philosophical writers, from *limbe*, Fr. or *limbus*, Lat. "At its outward limb, the red and yellow." *Newt. Opt.* In Botany, the upper part of a petal, in blossoms composed of more than one regular petal. Thus, in the wall-flower, the upper flat broad part of the petals is called the limb.

To LIMB, *v. a.* to assume limbs. To tear asunder; to dismember.

LIME, *s.* [*lim*, Sax.] any viscous substance; particularly applied to that which is laid on twigs, and catches or sticks to the wings and feet of birds that touch it, hence called *birdlime*. Matter from which mortar is made, so called because used in cement.

LIME, *s.* in Botany, called likewise the linden-tree; its wood is much used by carvers and turners. A species of lemon which grows in the West Indies, from *lime*, Fr.

To LIME, *v. a.* to smear with lime; to cement or unite as with mortar. To manure ground with lime. Figuratively, to entangle or ensnare. "Oh limed soul!" *Shak.*

LIMEKILN, *s.* a kiln where stones are burnt to lime.

LIMERICK, a city of Ireland, in the county of Limerick, and province of Munster, about 3 miles in circumference. Within a century it was reckoned the second city in the kingdom; at present it has lost its rank; not because it flourishes less, but because Cork flourishes more. It is divided into the Irish and English town; the latter, which is the most ancient, is situated on an island, formed by the river Shannon, and called King's Island. It has been dismantled about 30 years, and has increased prodigiously within that period by the addition of handsome streets and quays; and its commerce has kept pace with its size. The linen, woollen, and paper manufactures are carried on here to a great extent; and the exports of beef and other provision is considerable. It contains many hospitals, some handsome public structures, and about 5000 houses. The inhabitants are estimated at upwards of 40,000. The country around it is fertile and pleasant, but the air is rather moist. It is 50 miles S. S. E. of Galway, 50 N. of Cork, and 94 S. W. of Dublin.

LIMERICK, a county of Ireland, in the province of Munster, about 40 miles in length, and 23 in breadth, bounded on the N. and N. W. by Tipperary and Clare; on the W. by Kerry; on the S. by Cork; and on the E. by Tipperary. It contains 125 parishes, and about 170,000

inhabitants, and is a fertile and well-inhabited county, though the S. E. and S. W. parts are mountainous. The soil is particularly rich in pasture, the best cattle slaughtered at Cork being sent from this county. Several rivers water it, the principal of which are the Shannon and Maig.

LIMESTONE, *s.* the stone of which lime is made.

LI MEWATER, *s.* a liquor made by pouring boiling water on unslaked lime, and racking it off when settled.

LI MEWORT, *s.* a kind of pink.

LIMIT, *s.* [*limes*, Lat.] a bound; a border; the utmost extent of any place or space.

To LIMIT, *v. a.* [from *limes*, Lat.] to confine within certain bounds; to restrain. To circumscribe, or prescribe bounds to. "They tempted God, and limited the Holy One of Israel." *Psa. lxxviii. 41.* To restrain, or confine the sense, applied to words that have various significations.

To LIN, *v. a.* [*allinnan*, Sax.] to yield; to give over.

LINCHPIN, *s.* an iron pin that keeps the wheel on the axle-tree.

LINCOLN, formerly called *Nicol*, a city, the capital of Lincolnshire, is pleasantly seated on the side of a hill, on the Witham, which here divides itself into three small channels. It is much reduced from its former extent and splendour, (when it contained 52 parish churches, and was one of the most populous cities in England, according to Malmsbury, and a mart for all goods coming by land or water; but in 1811 contained only 8861 inhabitants,) and now consists principally of one street, above 2 miles long, well paved, and several cross and parallel streets, well peopled. Here are some handsome modern buildings, but more antique ones. The Romans' northgate still remains, under the name of New-port Gate. It is a vast semicircle of stones of very large dimensions, laid without mortar, and connected only by their uniform shape. Upon the whole, this city has an air of ancient greatness, arising, in a great measure, from the number of monastic ruins; most of which are now converted into stables, out-houses, &c. The cathedral, a stately Gothic pile, one of the largest in England, is its glory; it stands on so lofty a hill, that it may be seen 50 miles to the N. and 30 to the S. and is parti-

cularly admired for its interior architecture, which is in the richest and lightest Gothic style. The famous great bell, called Tom of Lincoln, requires, at least, 15 able men to ring it. The chief trade here is in coals brought by the Trent and Fossdyke; and oats and wool, which are sent by the river Witham. Here is a small manufacture of camlets. It is 32 miles N. E. of Nottingham, and 133 N. of London. Markets on Tuesday and Friday.

LINCOLNSHIRE, a county of England, bounded on the N. by the Humber, which divides it from Yorkshire; on the E. by the German Ocean; on the S. E. by the Wash and part of Norfolk; on the S. by Cambridgeshire and Northamptonshire; on the S. W. by Rutland; on the W. by the counties of Leicester and Nottingham; and on the N. W. by Yorkshire. It is 77 miles from N. to S. and 48 in breadth, where widest. It is divided into three parts, namely, Holland on the S. E.; Kesteven on the S. W.; and Lindsey on the N. It contains 30 hundreds, 1 city, 33 market towns, 630 parishes, and, in 1811, 237,891, and in 1821, 283,058 inhabitants. Its principal rivers are the Trent, Humber, Witham, Welland, Ancam, Nen, and Dun. The air is various, according to its three grand divisions. The soil in many places is very rich, the inland part producing corn in great plenty, and the fens cole-seed, and very rich pastures; whence their breed of cattle is larger than that of any other county in England, except Somersetshire; their horses are also excellent, and very large; their hunting hounds and hares are peculiarly noted for their extreme swiftness; and their sheep are not only the largest breed, but are clothed with a long thick wool, peculiarly fitted for the worsted and coarse woollen manufactures.

LINCTUS, *s.* [from *lingo*, Lat.] a medicine, so called because licked up by the tongue.

LINDEN, *s.* [*lind*, Sax.] the lime-tree.

LINE, *s.* [*linea*, Lat.] quantity extended in length only, without breadth or thickness; any extension, considered only with regard to length; a slender string; a thread extended as a guide or rule; the string that sustains the hook in angling; a lineament or mark in the face; a single row of letters written or printed from one margin to the other. Rank, in the army. A work thrown up, or a breach, applied to Fortification. Extension; a limit. In Geography, the equator, or equinoctial line. LISBON, anciently called Olisippo, and by the Moors Olisibona, the capital of Portugal, a large, rich, and celebrated city, one of the principal in Europe, with an university. The squares, public buildings, and palaces, were magnificent; but it was almost totally destroyed by an earthquake, on Nov. 1, 1755. The new town is much more handsome than the former: the plan is regular; the streets, some of which are more than three miles in length, and the squares, are spacious; and the buildings are elegant. The harbour will contain 1000 sail of ships, which may ride in the greatest safety; and the city, being viewed from the southern shore

of the river, affords a beautiful prospect, as the buildings gradually rise above each other, in the form of an amphitheatre. The number of inhabitants is estimated at 270,000, of which the negroes and mulattoes make a sixth part. They reckon here more than 20,000 houses, 40 parish churches, and 50 convents of both sexes. The patriarch, who is generally a cardinal, officiates here in greater pomp than the pope himself; and the rich ornaments of his church seem to have absorbed several years' revenue of the Brazils. It is remarkable, that the pipes of the organ, in the patriarchal church, are placed horizontally. Both the entrances to the harbour, close by the sea, are defended by two forts. Lisbon is seated on the river Tajo, 10 miles from the mouth of it, 178 W. by N. of Seville, and 255 S. by W. of Madrid. Lat. 38. 42. N. lon. 9. 9. W.

LISLE, a large and handsome city in the department of the North, one of the richest and most commercial in France, and, before the revolution, the capital of French Flanders. It is situated in a rich, marshy soil, surrounded with walls, and strongly fortified. The citadel is one of the best works of Vauban. They reckon 170 streets, 30 public places, about 8000 houses, and 60,000 inhabitants. The public structures are, the exchange, a general hospital, and a vast magazine. Here are various sorts of manufactures, but the principal trade is in camlets. It is seated on the river Deule, 14 miles W. of Tournay, and 130 N. of Paris. Lat. 50. 38. N. lon. 3. 4. E.

LI'SMORE, one of the Western Islands of Scotland, seated at the mouth of the bay of Lochyol, in Argyshire. It is 8 miles long and 2 broad, and the soil is pretty fertile. It was formerly the residence of the bishops of Argyle. Also, a borough of Ireland, in the county of Waterford. It stands on the Blackwater, 26 miles N. E. of Cork, and 31 W. S. W. of Waterford.

LITHOMANCY, *s.* [*λίθος* and *μαντεία*, Gr.] prediction, or the art of foretelling by stones.

LITHONTRIPTIC, *a.* [from *λίθος* and *τρίβω*, Gr.] medicines which have the power of dissolving the stone in the bladder or kidneys.

LITHOTOMIST, *s.* [from *λίθος* and *τέμνω*, Gr.] a surgeon who extracts the stone by cutting or opening the bladder.

LITHOTOMY, *s.* [from *λίθος* and *τέμνω*, Gr.] the art or practice of cutting for the stone.

LITHUANIA, or *Litwa*, a large country of Europe, between Poland and Russia. It is about 300 miles in length, and 250 in breadth, and is watered by several large rivers, the principal of which are, the Dnieper, Dwina, Niemen, Priecz, and Bog. It is a flat country, like Poland, and the lands are very proper for tillage. The soil is not only fertile in corn, but it produces honey, wood, pitch, and vast quantities of wool. They have also excellent little horses, which they never shoe, because their hoofs are very hard. There are vast forests, in which are bears, wolves, elks, wild oxen, lynxes, beavers, gluttons, wild cats, &c. and eagles and vultures are very common. In the forests, large pieces of yellow amber are frequently dug up. The country abounds with Jews, who, though numerous in every other part of Poland, seem to have fixed their head-quarters in this duchy. "If you ask for an interpreter," says Mr. Coxe, "they bring you a Jew; if you come to an inn, the landlord is a Jew; if you want post horses, a Jew procures them, and a Jew drives them; if you wish to purchase, a Jew is your agent; and this, perhaps, is the only country in Europe where Jews cultivate the ground; in passing through Lithuania, we frequently saw them engaged in sowing, reaping, mowing, and other works of husbandry." The peasants of this country are in a state of the most abject vassalage. The establishment of religion has heretofore been the Romish; but there are Lutherans, Calvinists, Socinians, Greeks, and even Turks, as well as Jews. It was formerly governed by its own dukes, but afterwards united with the kingdom of Poland; this union was ratified in the diet at Wilna, by a formal instrument, in the year 1401; and in 1569, the two countries were so united as to form but one state, under one prince. It was formerly divided into 9 palatinates, viz. Wilna,

Troki, Polotsk, Novogorodeck, Witepsk, Brzesk, Msczislaw, Minsk, and Livonia. In 1772, the empress of Russia forcibly compelled the Poles to cede to her all that part of Lithuania bordering on Russia, including about one-third of the country. This she erected into the government of Polotsk and Mohilof; and, in 1793, in conjunction with the king of Prussia, she extended her dominion over almost the whole of Lithuania. What is called Prussian, or Little Lithuania, about 100 miles in length, and 50 in breadth, was settled, in 1720, by Frederick William, with French, Franconian, and Swiss Protestants, by whose skill and industry this once desolate country has been extremely well cultivated. At present it is under Russia.

LITIGANT, *s.* [from *litigans*, Lat.] one engaged in a law-suit.

LITIGANT, *a.* [*litigans*, Lat.] engaged in a law-suit.

To **LITIGATE**, *v. a.* [*litigo*, Lat.] to contest in law. Neuterly, to manage a suit; to carry on a cause.

LITIGATION, *s.* [*litigatio*, Lat.] suit of law.

LITIGIOUS, *a.* [*litigieux*, Fr.] quarrelsome; wrangling; fond of going to law; disputable; controvertible.

LITIGIOUSLY, *ad.* in a quarrelsome manner; in a manner which shews a fondness of law-suits.

LITIGIOUSNESS, *s.* a wrangling disposition; a fondness for debate or law-suits.

LITTER, *s.* [*litere*, Fr.] a carriage borne by horses, containing a bed; the straw laid under animals or plants. A breed of young, generally applied to those of swine. Any number of things thrown carelessly or confusedly together.

To **LITTER**, *v. a.* to bring forth young, applied to swine. To cover with things in a confused and slovenly manner; to supply cattle with straw to lie on.

LITTLE, *a.* [compar. *less*, superlat. *least*; *lytel*, Sax.] small in quantity, quality, number, dignity, or importance.

LITTLE, *s.* a small space; a small part or portion; a slight affair; not much; scarce any thing. **SYNON.** The word *little*, sometimes signifies only want of bigness, and at other times want of greatness in every sense; whereas that of *small* is the opposite only to bigness, and supposes some kind of length.

LITTLE, *ad.* in a small degree or quantity, not much.

LITTLENESS, *s.* smallness of bulk or size; meanness; want of grandeur or dignity.

LITTORAL, *a.* [*littoralis*, Lat.] belonging to the shore.

LITURGY, *s.* [*liturgie*, Fr.] a form of prayer used in public worship. The English *liturgy* was first composed, approved, and confirmed in parliament, anno 1548, the offices for the morning and evening prayer being then in the same form as they stand at present, excepting that there was no confession and absolution, the office beginning with the Lord's Prayer. In the communion, the ten commandments were omitted; the offertory was made with bread and wine mixed with water; and in the prayer for Christ's church militant, thanks were given to God for his wonderful grace declared in his saints, in the Blessed Virgin, the patriarchs, prophets, apostles, and martyrs; and the saints departed were commended to God's mercy and peace; to this the consecratory prayer, now used, was joined as a part, only with some words now left out, petitioning that the bread and wine might be to us the body and blood of Jesus, the beloved Son, &c. In baptism, besides the form of the cross made on the child's forehead, another was made on his breast, with an abjuration of the devil to go out of him; after which the child was dipped three times in the font, if well, but otherwise sprinkled. Besides these, some other ceremonies

were omitted in the office for the sick, as is supposed, in 1551, when the form was altered at the solicitation of Calvin. The last review of the liturgy was in 1661, and the last act of uniformity, enjoining the observance of it, is 13 and 14 of Car. II. cap. 4.

LITUUS, *s.* [Lat.] in Medals, the staff used by augurs, in shape of a bishop's crosier.

To **LIVE**, (pronounced with the *i* short, as in *if* or *gift*) *v. n.* [*lyfian*, Sax.] to be in a state wherein the soul and body are united, and do operate together; to pass life in any manner with regard to habit, good or ill, happiness or misery; to continue in life. Followed by *with*, to converse or continue in the same house with another. To be supported; to feed.

LIVE, *a.* (the *i* pron. long, as in *time*) quick; having life; active. Burning, or not extinguished, applied to fire.

LIVELIHOOD, *s.* [from *lively* and *hood*] support of life; maintenance; sufficiency to supply the necessities of life.

LIVELILY, or **LIVELY**, *ad.* in a brisk, vigorous, and active manner. With a strong resemblance, applied to description or painting.

LIVELINESS, *s.* appearance of life; vivacity; activity; sprightliness.

LIVELONG, *a.* tedious; lasting; durable.

LIVELY, *a.* brisk; vigorous; gay; airy; vivacious; nearly representing life.

LIVER, *s.* one who is alive, or continues in life; one who lives in any particular manner with respect to virtue, vice, happiness, or misery. In Anatomy, a large and pretty solid mass, of a dark red colour, a little inclining to yellow, situated immediately under the diaphragm, partly in the right hypochondrium, and partly in the epigastrium: its use is to purify the mass of blood, by secreting the bilious humours it contains.

LIVER-COLOUR, *s.* a dark red colour.

LIVER-GROWN, *a.* having a great overgrown liver.

LIVERHEMP, *s.* a plant, called also hemp agrimony and water hemp.

LIVERPOOL, or *Leverpool*, a large, flourishing, and populous sea-port town of Lancashire, consisting of at least 15,000 houses, and (according to the census of 1811,) 94,376 inhabitants; although, so late as the year 1565, it was a mere fishing hamlet, having only 138 householders and cottagers; while 12 barks, containing 223 tons, and navigated by 75 men, made up the sum of its maritime riches, and formed the embryo of its present commercial greatness. Respecting the antiquities of this town, hardly any thing is known with certainty; the only monument of the kind now standing is an old tower near the lower end of Water-street, the remains of which were till lately used as a prison. The date of its erection is involved in obscurity; but it was long the residence of the earls of Derby. In 1644, this town, then in the hands of the commonwealth, was besieged by prince Rupert, nephew to king Charles I. and taken, after a vigorous defence of one month, during which they often repulsed the besiegers with great slaughter. It was not till the year 1699, that Liverpool became a distinct parish; for before that time it was only a hamlet to the parish of Walton, about three miles off, having only a parochial chapel of ease, the present church of St. Nicholas: it is now however become, with respect to extent of commerce, next to the metropolis; as, by estimates which have been made, it appears that Liverpool navigates one-twelfth part of the shipping, and has one-fourth of the foreign trade, of Great Britain; that it has one-half of the trade of London, and one-sixth of the general commerce of the kingdom. The slave trade, now happily abolished, formed a considerable

branch of the commerce of this port, and is computed to have employed one-fourth of the ships belonging to it. The trade to Ireland is very considerable; to which country and the Isle of Man several packets, adapted for passengers, sail almost daily; some ships are also sent to the Greenland whale fishery; the coasting trade hence to London employs a great number; and many good ships have been built here, some for the East India trade. Liverpool communicates, by the rivers Mersey and Irwell, with Manchester; and by the river Weaver with the heart of Cheshire, particularly the salt works of Northwich, Middlewich, Winsford, &c. The Sankey canal facilitates the conveyance of coal from Ravenhead, and the Duke of Bridgewater's canal communicates with the Birmingham, Worcester, Staffordshire, and Grand Trunk, to London. The Leeds canal unites Liverpool and Hull; and the Ellesmere canal communicates with the Dee and the Severn. The docks of Liverpool form a prominent feature of the town, and give this port a decided preference over most others in the kingdom: of these it has 14; six wet docks, in which the water is retained by large flood-gates, and the ships kept constantly afloat; three others, which are left dry at low water, and called dry docks; with five graving docks, in which vessels are repaired: there are also two docks for the use of the Duke of Bridgewater's flats. The construction of the wet docks is laborious and expensive; that called the Old Dock (the first made in Liverpool,) is 200 yards long, and about 80 wide; with flood-gates 23 feet high, and 34 wide. Its site was a *pool*, which tradition says was formerly frequented by a bird of the cormorant kind called a *liver*; and that hence the town was called *Liverpool*, and the liver adopted as its *crest*. The second-made was the Salthouse Dock, of an irregular form, but having a length of quay of 640 yards, with flood-gates of the same dimensions as those of the Old Dock. The next made was George's Dock, 250 yards long and 100 broad; with flood-gates 25 feet high, and 38 wide; at the expence of 21,000*l.* To which succeeded the King's Dock, 290 yards long, and 137 broad; with flood-gates 25 feet high, and 42 wide; and finished at the expence of 20,000*l.* Next, the Queen's Dock, 270 yards long and 130 broad: with a cast iron swivel bridge over the entrance; at the expence of 25,000*l.* Lastly, the Prince's Dock, 500 yards long, and 106 yards broad: this dock was opened on the day of the coronation of his Majesty in 1821. Each of these wet docks has a master, with an adequate salary, whose business is to superintend the management of the flood-gates, the docking and undocking of the ships at tide-time, &c. The docks have watch, scavengers, and lamps, distinct from those of the town; and the ships are secured against accident by the prohibition of fires, combustible materials, &c. under suitable fines. Liverpool has many public buildings; among which are the Exchange or Town-hall, first built in the year 1750, but the interior of which was destroyed by fire, in 1795; since which it has been rebuilt in an elegant style, and is now appropriated to the purpose of the judicial and other offices for the police of the town; contiguous to this are the Exchange Buildings, an extensive range, newly built by subscription; in the centre of which is erected a monument, commemorative of the victories and death of the gallant Nelson;—the prison, so large as to have at one time contained more than 2000 prisoners of war;—the Corn Exchange, in Brunswick-street;—the Custom House, centrally situated, but of mean appearance;—the Tobacco Warehouse, rented by government at 500*l.* per annum, and capable of containing 7000 hogsheads;—the Infirmary, first opened in 1749, and receiving about 1500 patients annually, besides relieving a great number of out-patients; the two wings of this elegant structure are used as a hospital, for the maintenance of decayed

seamen belonging to the town; contiguous to which is the Lunatic Hospital;—the Blue-coat Hospital, for 230 boys and 50 girls;—the Poor House, a neat building;—the Recovery Ward, for persons infected with fevers;—the Alms-houses, an asylum for poverty and old age; two Dispensaries, for supplying the afflicted poor with medicines and advice;—the School for the Blind, in which music, the making of baskets, floor-cloth, foot-bears, &c. have been successfully taught to this unfortunate class of beings;—there is also an institution for the restoring of drowned persons, and another called the Ladies' Charity, for the delivery and relief of poor married women in child-bed.—To these may be added the Theatre, in Williamson's Square, built in 1772, at the expense of 6000*l.* but since considerably enlarged;—the Music Hall, in Bold-street;—and the Wellington Assembly Rooms in Mount Pleasant-street; the covered market at the top of Shaw's Brow, and the new market in great Charlotte street, perhaps the finest in England, entirely inclosed and covered, 500 feet long, and lighted by 114 gas lamps. The coffee-houses and news-rooms are numerous; of which, the Exchange, Atheneum, Union, and Lyceum, deserve to be ranked among the first public buildings of the county. Liverpool has several churches, namely, St. Nicholas, or the Old Church, St. Peter's, St. Michael's, St. George's, St. Thomas's, St. Paul's, St. Anne's, St. John's, Trinity, St. James's, Christ Church, St. Mark's, St. Andrew's, St. Philip's, St. Luke's, All Saints, &c. some of which are neat, and others elegant; besides chapels belonging to the establishment, and one Scotch Kirk. The chapels belonging to different denominations of dissenters are numerous; of these are reckoned 5 Independent; 2 Presbyterian, or more properly Socinian; 1 Sandemanian; 4 Baptist; 6 Methodist; 1 Quaker's Meeting-house; with 5 Roman Catholic chapels, and one Jewish Synagogue. Liverpool is situated on the eastern bank of the river Mersey, and is 18 miles W. of Warrington, and 204 N. W. of London. Lat. 52. 32. N. lon. 2. 30. W. Markets on Wednesday and Saturday.

LIVERWORT, *s.* There is a beautiful flower of this name, which is called *hepatica* in Lat. from its resembling the lobes of the liver; besides which, there are two plants called *lichen*. That called *ash-coloured ground liverwort* is reckoned a great specific for curing the bite of a mad dog.

LIVERY, *s.* [from *livrer*, Fr.] in Law, the act of giving or taking possession; a release from a wardship; the writ by which possession is obtained; the state of being kept at a certain rate; clothes given to servants; any particular dress. *To stand at livery*, applied to horses, signifies to be kept in a public stable, where they are supplied with food.

LIVERYMAN, *s.* a servant who wears clothes of a particular colour, which are given him by his master. In London, a citizen who wears a gown at public cavalcades, and has a liberty of voting for the members that represent the city in parliament, &c.

LIVING, *s.* support; maintenance; livelihood; the benefice of a clergyman.

LIVING, *a.* [from *live*] in a state of motion or vegetation, alive, or enjoying life.

LIVINGLY, *ad.* in a living state.

LIVONIA, a province of the Russian empire, situated to the E. of the Gulf of Riga, which with that of Esthonia, has been reciprocally claimed and possessed by the three bordering powers of Russia, Sweden, and Poland, and, for more

than two centuries, was a constant source and perpetual scene of the most bloody wars. It was finally wrested from the Swedes by Peter the Great, and confirmed to the Russians by the peace of Nystadt, in 1721. It now forms the Russian government of Riga or Livonia, of which the town of Riga is the capital. It is about 250 miles from N. to S. and 150 from E. to W. The land is so fertile in corn, rye, and barley, that it is called the granary of the North. The fish that abound here are salmon, carp, pike, flat fish, and many others. In the forests are wolves, bears, elks, reindeer, stags, and hares. The domestic animals are very numerous; but the sheep bear a bad sort of wool, resembling goat's hair. Here are a great number of forests, which consist of birch-trees, pines, and oaks; and all the houses of the inhabitants are built with wood. They export vast quantities of flax, hemp, honey, wax, leather, linseed, skins, and pot ash. Peter the Great, perceiving the inhabitants did not like the change of sovereigns, compelled them to abandon their country, and drove many of them as far as the Caspian Sea; but being persuaded to recall them, most of them perished before the edict was published, so that he was obliged to re-people the country with other nations.

LIVRE, *s.* [Fr.] a French money of account, consisting of 20 sols, each sol containing 12 deniers; 10½*d.* sterling.

LIXIVIAL, *a.* [from *lixivium*, Lat.] impregnated with salt; like a *lixivium*; obtained by calcining vegetables, and mixing their ashes with water; belonging to ley.

LIXIVATE, or **LIXIVIOUS**, *a.* [*lixivieux*, Fr.] made from burnt vegetables, and extracted by lotion or washing.

LIXIVIUM, *s.* [Lat.] ley; water impregnated with salts, or ashes; a liquor which has the power of extraction.

LIZARD, *s.* [*lizarde*, Fr.] a small creeping creature, of a green colour, with four legs, resembling a crocodile; there are some in Arabia a cubit long. In America, they are eaten by the natives of Peru, as appears by Ullon's Travels.

LIZARD, the most southern promontory of England, which is not above 36 miles from the Land's End in Cornwall, and 12 S. of Helston. From hence the ships usually take their departure, when they are bound to the westward. On it are two lighthouses; and the Lizard point is in lon. 5. 12. W. lat. 49. 58. N.

LIZARDSTONE, *s.* a kind of stone.

LL.D. [*legum doctor*] an abbreviation, signifying doctor of the civil and canon laws.

LO! *interject.* [*la*, Sax.] look! see! behold!

LOACH, *s.* [*loche*, Fr.] a very dainty fish; he breeds and feeds in little and clear swift brooks or rills, and lives there upon the gravel, and in the sharpest streams: he grows not to be above a finger long, and no thicker than is suitable to that length; he is in the shape of an eel, and has a beard of wattles like a barbel: he has two fins at his sides, four at his belly, and one at his tail, dappled with many black or brown spots; his mouth barbel-like under his nose. This fish is usually full of eggs or spawn, and is by Gesner, and other physicians, commended for great nourishment, and to be very grateful both to the palate and stomach of sick persons; and is to be fished for with a small worm, at the bottom, for he seldom rises above the gravel.

LOAD, *s.* [*hlade*, Sax.] a burden; a weight, or lading; as much weight as any person or animal can bear. Figuratively, any thing that depresses, applied to the mind.

LOAD, (more properly *lode*) *s.* [*lode*, Sax.] the leading vein in a mine.

To LOAD, *v. a.* to put goods on board a ship, or burden on a man or a beast of carriage. Figuratively, to encumber or embarrass. To charge, applied to a gun, or other fire-arms. To make grievous.

LO'ADER, *s.* a person who puts the freight on board a ship, or a burden on a man, beast, or in a carriage.

LO'ADSMAN, *s.* [from *lædan*, Sax.] a pilot, or a person that conducts into, and out of harbours.

LO'ADSTAR, *s.* [more properly, as written by Mandeville, *lodestar*; from *lædan*, Sax. to lead] the polestar, so called from its leading and guiding manner.

LO'ADSTONE, *s.* [plural *lodestone*, or *loding stone*; from *lædan*, Sax. to lead, and *stone*] the magnet; a peculiarly rich iron ore, found in large masses, of a deep iron gray when fresh broken, and often tinged with a brownish or reddish colour: it is very heavy, and is remarkable for attracting iron, and giving it an inclination or direction towards the north.

LOAF, *s.* [plural *loaves*; *hlaf*, or *laf*, Sax.] a mass of bread baked; it is distinguished from a *cake* by its thickness. Any mass into which a body is wrought.

LOAM, *s.* [*laam*, Sax.] the common earth, consisting of clay with a mixture of sand in it; the black earth called mould; a reddish earth used in making bricks; a kind of mortar made of the best earth, by tempering it with water, straw, &c.

LO'CALLY, *ad.* with respect to place.

LOCA'TION, *s.* [*locatio*, Lat.] situation with respect to place; the act of placing; the state of being placed.

LOCH, *s.* [Scot.] a lake. In Medicine, a composition of a middle consistence between a syrup and a soft electuary, used in diseases of the lungs.

LO'CHIA, *s.* [*τὰ λόχια*, or *τὰ λοχεῖα*, Gr.] the evacuations consequent on a delivery.

LOCK, *s.* [*loc*, Sax.] an instrument with springs and bolts, used for the security of doors, drawers, &c. the part of a gun by which fire is struck; a quantity of hair or wool hanging together; a tuft or small quantity of hay. In a river, a place where the waters are confined by flood-gates, to swell and increase the natural depth and force of the stream, in order to render it navigable. A place where thieves carry or hide stolen goods. An hospital where none but persons affected with the venereal disease are admitted.

To LOCK, *v. a.* to shut or fasten the door, &c. by turning the key round in a lock. To lock up, to shut up, or confine; to close. Neuterly, to become fast by a lock; to unite by mutual insertion.

LO'CKER, *s.* any thing that is fastened with a lock; a drawer.

LO'CKET, *s.* [*loquet*, Fr.] a small lock; any catch or spring to fasten a necklace, or other ornament.

LO'CKRAM, *s.* a kind of coarse linen.

LO'CKRON, *s.* a kind of ranunculus.

LOCOMOTION, *s.* [*locus* and *motus*, Lat.] the power or action of changing place.

LOCOMO'TIVE, *a.* [from *locus* and *motus*, Lat.] changing place; having the power of moving from one place to another.

LOCOMOTIVITY, *s.* the power of changing place.

LO'CUST, *s.* [*locusta*, Lat.] an animal somewhat resembling a grasshopper, but considerably larger, and of a brownish colour, very destructive to vegetables, moving in herds, which are headed by a particular one of the species, and therefore not inelegantly compared to an army. According to the Scriptures, they are very numerous in the East; and Dr. Pocock informs us, in his Travels into Egypt, that they are eaten by the natives of those parts. Also a tree with butterfly-shaped blossoms, from whose empalement arises the pointal, which afterwards becomes a hard pod with one capsule, including roundish hard seeds, which are surrounded with a fungous stringy substance.

LOCUTION, *s.* [*locutio*, Lat.] the manner of speech used in any country.

LO'CUTORY, *s.* [*locutorium*, Lat.] a hall in religious houses, appointed for the meeting of monks, friars, &c. to converse together.

To LODGE, *v. a.* [*logian*, Sax. *loger*, Fr.] to supply with a house to dwell in for a certain time; to afford dwelling, or admit a person to lie or dwell in the same house. Figuratively, to place, fix, or plant. Neuterly, to take up residence for a night.

LODGE, *s.* [*logis*, Fr.] a small house in a park or forest; any small house or habitation.

LO'DGMENT, *s.* [*logement*, Fr.] accumulation, or the act of putting in a certain place. In Fortification, an encampment made by an army; the possession of an enemy's works.

LO'DGER, *s.* one who lives in an apartment hired in the house of another; one that resides any where.

LO'DGING, *s.* temporary habitation; rooms hired in the house of another; place of residence; harbour, or covert; convenience to sleep on.

LOFT, *s.* [*loft*, Brit.] a floor; the highest floor in a house; rooms in the highest part of a building.

LOFTILY, *ad.* on high; in a place at a distance from the ground upwards. Figuratively, in a proud, haughty manner; sublimely.

LOFTINESS, *s.* height or distance from the ground upwards; elevation; sublimity; pride or haughtiness.

LOFTY, *a.* high; at a distance from the ground; situated on high; sublime; elevated; proud; haughty. *SYNON.* *Lofty* seems to carry with it an idea of magnificence, which *high* does not; thus we say, a *lofty* room, the *lofty* cedar; but a *high* house, a *high* tree.

LOG, *s.* [*logge*, Belg.] a shapeless bulky piece of wood. Figuratively, a sluggish inactive person. In Hebrew measure, five-sixths of a pint. According to Dr. Arbuthnot, it was a liquid measure, the seventy-second part of the bath or ephah, and twelfth part of the hin. In Navigation, a small piece of timber, of a triangular form, having lead at one end to make it swim upright in the water, and a line fixed to the other with knots at about forty-two feet distance from each other; its use is to keep account, and make an estimate of a ship's way, by observing the length of line unwound in half a minute's time, the ship sailing the same number of miles in an hour, as the knots which are run out in half a minute.

LOGARITHMS, *s.* [*λόγος* and *ἀριθμός*, Gr.] certain artificial numbers proceeding in arithmetical progression, corresponding to as many others proceeding in geometrical proportion, and so fitted to the natural numbers, that if any two natural numbers are multiplied and divided by one another, the correspondent numbers answer all these conclusions by addition and subtraction; for instance,

0, 1, 2, 3, 4, 5, 6, 7, 8, 9, &c.

1, 2, 4, 8, 16, 32, 64, 128, 256, 512, &c.

Where the numbers above, beginning with (0), and arithmetically proportional, are called *logarithms*. Those now in use have 10 for the common ratio. They were invented by Napier, lord Marcheson, a Scotch baron, and afterwards completed by Mr. Briggs, Savilian Professor at Oxford.

LOG-BOOK, *s.* at Sea, is a book ruled and columned like the log-board. It is used to enter the log-board's account in every day at noon, with the observations then made, and from hence it is corrected and entered into the journals.

LOGGATS, *s.* the ancient name of a play or game now called kittle-pins.

LOGGERHEAD, *s.* [*logge*, Belg. and *head*] a person that is stupid, and of slow apprehension; a blockhead. *To fall to loggerheads*, or *go to loggerheads*, is a scuffle or fight without weapons.

LOGGERHEADED, *a.* dull; stupid; slow of understanding.

LOGIC, *s.* [*logica*, Lat.] the art of using reason well in our inquiries after truth, and our communication of it to others; a particular method of reasoning.

LOGICAL, *a.* belonging to, or taught in, logic; skilled in, or furnished with, logic.

LOGICALLY, *ad.* according to the rules of logic.

LOGICIAN, *s.* [*logicien*, Fr. from *λογικός*, Gr.] a professor of logic; a person skilled in logic.

LOGIST, *s.* [*logista*, Lat.] one skilled in computations and arithmetic.

LOGISTIC, *a.* [See *LOGIST*] in Arithmetic, applied to the doctrine of sexagesimal fractions, used by astronomers before the invention of logarithms. A curve, so called from its properties and uses in constructing and explaining the nature of logarithms.

LOG-LINE, *s.* [See *LOG*] in Navigation, a small line fasten-

ed to a piece of board, and having knots at certain distances, by which a ship's way is reckoned.

LOGOGRAPHY, *s.* [from *λόγος* and *γράφω*, Fr.] the art of printing with whole words, instead of single letters, attempted some years ago in this country, but disused, as being more troublesome than the usual mode.

LOGOGRIPE, *s.* a verbal intricacy; a kind of riddle. "*Logogripes* and curious palindromes."

LOGOMACHY, *s.* [*λογομαχία*, Gr.] a contention in words; a contention about words.

LOGWOOD, *s.* [*looghe*, Belg.] a wood of a very dense and firm texture, brought to us in thick and very large blocks or logs, and is the heart of the tree that produces it. It is very heavy, and remarkably hard, and of a deep strong red colour; has been long known to the dyers, who use it in colouring blue and black; and lately has been introduced into medicine, wherein it is found to be astringent.

LOHOCKS, *s.* [Arab.] medicines commonly called eclegmas, lambatives, or linctuses, generally used in disorders of the lungs.

LOIN, *s.* [*llwyn*, Brit.] the back of an animal as carved by a butcher. In Anatomy, the lower part of the spine of the back.

To LOITER, *v. n.* [*loteren*, Belg.] to linger; to make use of idle and lazy delays.

LOITERER, *s.* one who passes his time in idleness; one who is sluggish and dilatory.

To LOLL, *v. n.* to lean in an idle or lazy manner against any thing. To hang out, applied to the tongue of a beast.

LOLLARDS, a sect of Christians that rose in Germany about the beginning of the 14th century, so called from its author *Walter Lollard*. They rejected the mass, extreme unction, and penances for sins. Also a name of infamy given to Wickliff and his followers, from an affinity between some of their tenets and those of the *Lollards*, who in the reigns of Edward III. and Henry V. were accounted heretics.

LOLLARDY, *s.* the doctrine of Lollards.

LOMP, *s.* a kind of roundish fish.

LONDON, the metropolis of Great Britain, one of the largest and most opulent cities in the world, is mentioned by Tacitus as a considerable commercial place in the reign of the Roman emperor Nero. In its most extensive view, as the metropolis, it consists of *The City*, properly so called, the City of Westminster, which was once a mile from London, and the Borough of Southwark; besides the suburbs in Middlesex and Surry, within what are called the Bills of Mortality. London and Westminster are situated in Middlesex, on the N. side of the river Thames. Southwark is seated on the opposite bank in Surry. The extent of the whole from Limehouse and Deptford to Milbank and Vauxhall, is above 7 miles; but the greatest breadth does not exceed 3. With respect to the government of this metropolis, the city is divided into 26 wards, each governed by an alderman. From the aldermen the lord mayor is annually chosen. There are likewise 236 common councilmen, a recorder, two sheriffs, who are also sheriffs of Middlesex, and other officers. The government of Westminster is vested in the high steward, an under steward, and the high bailiff, all chosen also by the dean and chapter. The suburbs are under the jurisdiction of the magistrates of Middlesex. Among the public buildings, St. Paul's cathedral, as the most conspicuous, first claims attention. This beautiful, yet modest fabric, is 2292 feet in circumference, and 365 in height to the top of the cross. It is inferior to none in Europe, in magnificence and nobleness, except St. Peter's at Rome. Westminster Abbey is a grand specimen of Gothic architecture, said to have been founded by Sebert, king of

the East Saxons, in 610. Having been destroyed by the Danes, it was rebuilt by Edward the Confessor, in 1066. Henry III. pulled down the Saxon pile, and began to build the present structure in 1245. The work was carried on slowly by succeeding princes, and can hardly be said to have been finished before the time of Sir Christopher Wren, who built the two towers at the west end. It is 360 feet in length within the walls: at the nave it is 72 broad, and at the cross 195. The chapel of Henry VII. adjoining, Leland calls, "The Wonder of the World." St. Stephen's Walbrook, is a small church of exquisite beauty, the masterpiece of Sir Christopher Wren; perhaps Italy itself can produce no modern building that can vie with this in taste and proportion. Bow Church, in Cheapside; St. Bride's, in Fleet-street; St. Dunstan's in the East; and St. Martin's in the Fields; are, among the other churches, most distinguished for fine architecture. The parishes, in what are called the Bills of Mortality, amount to 146, namely, 97 within the walls, 16 without the walls, 23 out-parishes in Middlesex and Surrey, and 10 in the city and liberties of Westminster. With respect to palaces, the magnificence of royalty is not to be found in them. That of St. James was an hospital for leprous females dedicated to that saint. It was surrendered to Henry VIII. who erected on its site the present palace; of which it has been observed, that notwithstanding its mean exterior, it is the most commodious for the parade of royalty of any in Europe. He likewise laid out a large piece of ground adjoining into a park, and formed a canal and walks; calling it, in conformity to the name of the palace, St. James's Park. Charles II. enlarged and improved this spot, adorning it with plantations of trees; but a few years ago, it was improved in a still more beautiful degree. The Queen's Palace stands in the most favourable situation that St. James's Park could furnish. It was erected by the Duke of Buckingham, in 1703, and called Buckingham House, until it was purchased, in 1761, for the royal residence; at which time it acquired its present name. In 1775, parliament settled this house upon the queen, in case she should survive the king. Carlton House, the residence of the Prince Regent, the gardens extending to St. James's Park, is a stately building, on which vast sums have been expended; but it is not yet completed. The banqueting House, at Whitehall, was begun in 1619, from a design by Inigo Jones. It is only a small part of the vast plan of a palace, intended for the residence of the British monarchs, but left incomplete. Beside the royal palaces, there are many fine houses of the princes of the blood, and of the nobility and gentry. Westminster Hall, and some buildings appendant to it, contain the Houses of Lords and Commons, and the superior courts of justice. The great hall, in which are held the trials of peers, and of persons impeached before the lords, exceeds, in dimensions, any in Europe, which is not supported by pillars. Its length is 270 feet, the breadth 74, and the height in proportion. The Guildhall of the city, situated at the end of King-street, Cheapside, was built in 1431. Its great hall is 153 feet long, 50 broad, and 58 high. The front of this hall has been rebuilt in the Gothic style. Here the courts of King's Bench and Common Pleas hold sittings at Nisi Prius: here also the city elections are held, and all the business of the Corporation transacted. The Sessions House in the Old Bailey, in which the criminals of both London and Middlesex are tried, and the County Hall for Middlesex, on Clerkenwell Green, are noble structures. Of the buildings appropriated to the great national offices, military, naval, and fiscal, the most ancient is the Tower of London. It is surrounded by a wall and ditch, which also inclose several streets. The circumference is about a mile.

It was a palace during 500 years; the monarchs, on their accession to the throne, constantly holding their courts in this fortress: but after the accession of Queen Elizabeth, this custom ceased. The Horse Guards, an elegant structure, stands opposite the Banqueting House. The War Office is in this place, and here courts-martial for the army are held. The Ordnance Office, for the military department, is in St. Margaret's-street, Westminster. The Admiralty is a large structure, in which the higher departments of the business of the navy is transacted, and the lords of the admiralty have houses. The Navy, Navy Pay, and Victualling Offices, are in Somerset Place, a stupendous and magnificent structure, built on the site of the old palace, erected by the first Duke of Somerset, in the reign of Edward VI. It was begun during the American War, and was intended to bring into one spot the most considerable public offices; and, although not yet finished, it already contains, besides the offices above-mentioned, the following, namely, the auditors of imprest, clerk of the estreats, duchy courts of Lancaster and Cornwall, hackney coach, hawkers' and pedlars', horse duty, lord treasurer's, remembrancer's, lottery, pipe and comptroller of the pipe, salt, sick and hurt, signet, stage-coach duty, stamp, surveyor of crown lands, tax, and wine licence, offices. The king's barge-houses are comprehended in the plan, with a dwelling for the barge-master; besides houses for the treasurer, paymaster, and six commissioners of the navy; three commissioners of the victualling, and their secretary; one commissioner of the stamps, and one of the sick and hurt; with commodious apartments in every office for a secretary, or some other acting officer, for a porter, and their families. In the front, toward the Strand, which consists of a rich basement, supporting an excellent example of the Corinthian order, and containing a principal and attic story, are apartments for the Royal Academy, and the Royal and Antiquarian Societies. The grand entrance, by three lofty arches, leads into a spacious quadrangle, on each side of which, to the east and west, a street is to be formed, beyond which the wings are to be carried. The front to the Thames is erected on a noble terrace, 53 feet wide; and the building, when finished, will extend 1100 feet. This terrace, unparalleled for grandeur and beauty of view, is supported on a rough rustic basement, adorned with a lofty arcade of 32 arches, each 12 feet wide, and 24 high. The grand semicircular arch, in the middle of the basement, is that intended for the reception of the king's barges. The Treasury, which has a noble elevated front, is in St. James's Park; and what is called "The Cockpit," forms a part of this building, and is now the council chamber for the cabinet ministers. In the city is the Royal Exchange, originally built in 1567, by Sir Thomas Gresham. Being destroyed by the great fire in 1666, it was rebuilt in its present form, at the expence of 80,000*l*. In each of the principal fronts is a piazza, and in the centre an area. The height of the building is 56 feet, and from the centre of the south side rises a lantern and turret 178 feet high, on the top of which is a vane, in the form of a grasshopper, the crest of Sir Thomas Gresham. The inside of the area, which is 144 feet long and 127 broad, is surrounded by piazzas. The Bank of England, a magnificent building, is situated in Threadneedle-street. The Custom House, to the west of the Tower, is a large irregular pile, before which ships of 350 tons can lie, and discharge their cargoes. It was built in 1718, on the site of a former Custom House, destroyed by fire. The Excise Office, in Broad-street, is a building of magnificent simplicity, erected in 1768, on the site of Gresham College. The East India House, in Leadenhall-street, was built in 1726. The original front was very confined; but a new front, much

enlarged and improved, has been lately erected, richly furnished in respect to exterior decorations, architectural ornaments, some sculpture, &c. it has great extent in depth, and contains all the offices necessary for the transacting the business of a commercial company. The South Sea House, in Threadneedle-street, is a handsome building; but the General Post Office in Lombard-street is rather convenient than splendid. Of the structures which more particularly belong to the city, the most distinguished is the Mansion House, erected, in 1752, for the residence of the lord mayor: it is magnificent, but ponderous. The Monument is a grand fluted Doric column, 202 feet high, erected in commemoration of the great fire in 1666. The bridges are a great ornament to the metropolis. The most ancient, London Bridge, was begun in 1176, and finished in 1209. The length of it is 915 feet. The number of arches was 19, of unequal dimensions, and deformed by the enormous sterlings, and by houses on each side, which overhung in a terrific manner. These were removed in 1756, when the upper part of the bridge assumed a modern appearance; but the sterlings remain, though they so contract the space between the piers, as to occasion, at the ebb of tide, a fall of five feet, or a number of temporary cataracts, which have occasioned the loss of many lives. Westminster Bridge: the first stone was laid in 1739, the last in 1747; but on account of the sinking of one of the piers, the opening of the bridge was retarded till 1750. The whole is of Portland stone, except the spandrels of the arches, which are of Purbeck: it is 1223 feet in length; has 13 large, and two small semicircular arches; the centre one 76 feet wide. Blackfriar's Bridge, of nine elliptical arches; 995 feet long: it was completed in 1768. Vauxhall bridge, of nine arches of equal span, in squares of cast iron, on piers of rusticated stone; 809 feet long: the first stone of this bridge was laid in 1811, and was opened in 1816. The Strand, or Waterloo Bridge, entirely flat from one end to the other, and supposed to be the finest bridge in the world; it consists of 9 elliptical arches, each 120 feet span: it was opened in 1817. Lastly, the Southwark Bridge, between London and Blackfriars Bridge, of three arches, and built of iron: it was opened in March, 1819. In London are several museums. The British Museum, which is open to the public *gratis*, was founded by parliament in 1753, in pursuance of the will of Sir Hans Sloane, who directed his executors to make an offer to the public of his collection of natural and artificial curiosities and books, for the sum of 20,000*l*. and the noble building called Montague House, was purchased for their reception. At the same time were purchased the MSS. collected by Edward Harley, earl of Oxford. Here are likewise the collections made by Robert and John Cotton; and large sums have since been voted to augment this noble repository. George II. presented to it the libraries of the kings of England from the reign of Henry VII. His present majesty gave it an interesting collection of tracts published in the reigns of Charles I. and II. and a variety of antiquities, brought from Italy, were purchased by parliament, for 8410*l*. in 1762. Another Museum, consisting of anatomical preparations, and natural curiosities, collected by the late Dr. William Hunter, who built a spacious edifice for their reception, in Windmill-street, Haymarket, is now open to the public, and is to continue so for 30 years from the time of his death in 1783. Also, Week's Museum, Titchborne-street, Haymarket, for curiosities in mechanism: besides several others of inferior note. Of the inns of court, or societies for the study of the law, the principal are the Middle and Inner Temples, Lincoln's Inn, and Gray's Inn. These are very spacious, and have large gardens, which are open to

the public. The others are Clifford's Inn, Clement's Inn, Serjeant's Inn, New Inn, Lyon's Inn, Barnard's Inn, Furnival's Inn, and Staple's Inn. The College of Physicians, unfortunately hidden in Warwick-lane, was built by Sir Christopher Wren. Sion College, near London Wall, founded in 1603, by the Rev. Thomas White, is governed by a president, 2 deans, and 4 assistants; and all the clergy within the bills of mortality are its fellows. Here is a library for their use, and almshouses for 10 men and 10 women. The Society for the encouragement of Arts, Manufactures, and Commerce, have a handsome house in the Adelphi. Of public seminaries, the most distinguished are Westminster School, St. Paul's School, the Charter House, and Merchant Tailors' School. The places of diversion are numerous and magnificent. Of the halls of the city companies, the most distinguished in point of architecture are, Surgeon's Hall, in the Old Bailey; Goldsmith's Hall, Foster-lane; Ironmonger's Hall, Fenchurch-street; and Fishmonger's Hall, near London Bridge. The principal hospitals are Christ's Hospital, near Newgate-street, a royal foundation, for orphans and poor children; St. Bartholomew's Hospital, West Smithfield, another royal foundation, for the sick and lame; Bridewell, in Blackfriars, once a royal palace, but now a royal hospital, for the apprenticing of the industrious youth, and a prison for the dissolute; Bethlehem, in Moor-fields, another royal hospital, for lunatics; St. Luke's, in Old-street, also for lunatics; St. Thomas's, in the Borough, the fourth royal hospital, for the sick and lame; and for the same purpose are Guy's Hospital, adjoining; the London Hospital, in Whitechapel-road; the Middlesex Hospital, Berners-street; the Westminster Infirmary, Petty France; and St. George's Hospital, Hyde Park Corner. The Foundling Hospital, in Lamb's Conduit Fields; the Asylum, at Lambeth, for orphan girls; the Magdalen Hospital, in St. George's Fields, for penitent prostitutes; the Marine Society, in Bishopsgate-street; the Smallpox Hospital, at Pancras; the Lock Hospital, near Grosvenor Place; the Westminster Lying-in-Hospital, and many others for the same purpose, are also excellent institutions; and there are many dispensaries for distributing medicines to the sick, who keep to their houses, under the direction of a physician to each dispensary, and proper assistants. The prisons are numerous: the principal are, Newgate, a stupendous structure; the New Compter, Giltspur-street; the Fleet Prison, for debtors; the King's Bench, in St. George's Fields, for the same purpose; and a new county gaol (including a new sessions house) in Southwark. Some of the squares and streets in the metropolis are magnificent; and many of those which cannot boast of grandeur, are long, spacious, and airy. Portland Place forms, perhaps, the most magnificent street in the world; Stratford Place is truly elegant; and the Adelphi Terrace is the admiration of foreigners, for the noble view which it affords of the river, the bridges, and other public buildings, and of the fine hills beyond Lambeth and Southwark. The broad stream of the Thames flowing between London and Southwark, continually agitated by a brisk current or a rapid tide, brings constant supplies of fresh air, which no buildings can intercept. The country round, especially on the London side, is nearly open to some distance; whence, by the action of the sun and wind on a gravelly soil, it is kept tolerably dry in all seasons, and affords no lodgment for stagnant air or water. The cleanliness of London, as well as its supply of water, are greatly aided by its situation on the banks of the Thames; and the New River, with many good springs within the city itself, further contributes to the abundance of that necessary element. All these are advantages with respect to health, in

which the metropolis is exceeded by few. Its situation, with regard to the circumstance of navigation, is equally well chosen; had it been placed lower on the Thames, it would have been annoyed by the marshes, and more liable to the insults of foreign foes; had it been higher, it would not have been accessible, as at present, to ships of large burden. It now possesses every advantage that can be derived from a sea-port, without its dangers, and, at the same time, by means of its noble river, enjoys a very extensive communication with the internal parts of the country, which supply it with necessaries, and, in return, receive from it such commodities as they require. With the great article of fuel, London is plentifully supplied by sea from the northern collieries. Corn and various other articles are with equal ease conveyed to it from all the maritime parts of the kingdom, and great numbers of coasting vessels are continually employed for this purpose. London, therefore, unites in itself all the benefits arising from navigation and commerce, with those of a metropolis at which all the public business of a great nation is transacted; and is, at the same time, the mercantile and political head of these kingdoms. It is also the seat of many considerable manufactures; some almost peculiar to itself, as ministering to the demands of studied splendour and refined luxury; others in which it participates with the manufacturing towns in general; with this difference, that only the finer and more costly of their works are performed here. The most important of its peculiar manufactures is the silk weaving, established in Spitalfields by refugees from France. A variety of works in gold, silver, and jewellery; the engraving of prints; the making of optical and mathematical instruments, are likewise principally or solely executed here, and some of them in greater perfection than in any other country. The porter-brewery, a business of very great extent, is also chiefly carried on in London. To its port are likewise confined some branches of foreign commerce, as the vast East India Trade, and those to Turkey and Hudson's Bay. Thus London has risen to its present rank of the first city in Europe with respect to opulence; and nearly, if not entirely so, as to the number of its inhabitants. The residents in London, Westminster, Southwark, and all the out-parishes, according to the census of 1811, amount to 1,009,546; to which are to be added the seamen, &c. on the Thames, on an average, 40,464; making a total of 1,050,000. London is a bishop's see, and sends 4 members to parliament. To enumerate all the events by which this great capital has been distinguished would greatly exceed our limits; we shall only mention, therefore, the great plague in 1665, which cut off 90,000 people; and the dreadful conflagration in 1666, by which 13,000 houses were destroyed. Lat. 51. 31. N. Lon. (St. Paul's) 0, 5 $\frac{4}{6}$. W. from Greenwich.

LONDON, NEW, a sea-port of N. America, in the state of Connecticut. Its harbour is the best in Connecticut, and as good as any in the United States, and is defended by 2 forts. It is situated on the W. side of the Thames, near its entrance into the Sound, about 75 miles S. S. W. of Boston. Lat. 41. 25. N. lon. 73. 10. W.

LONDONDERRY, a county of Ireland, in the province of Ulster, 32 miles long, and 30 broad; bounded on the W. by Donegal, N. by the ocean, S. and S. W. by Tyrone, and E. by Antrim, and contains about 251,510 acres. It is a fruitful champaign country; and the greater part of it was given by James I. to an incorporated company of London merchants. The linen manufacture flourishes here. Its capital, Londonderry, contains 10,000 inhabitants, and is situated at the bottom of Lough Foyle. It has a good port, and a considerable trade. Lon. 7. 5. lat. 55. 4.

LONE, *a.* [contracted from *alone*] solitary, or without inhabitants; by one's self, or without company.

LO'NELINESS, *s.* want of inhabitants or buildings; want of company.

LO'NELY, *a.* without any inhabitants or buildings; solitary.

LO'NENESS, *s.* solitude; a place unfrequented, and void of buildings.

LO'NESOME, *a.* unfrequented; void of company, inhabitants, or buildings; dismal.

LONG, *a.* [*long*, Fr.] with some continuance, applied to time; dilatory. Of great extent in length; reaching to a great distance. In Botany, applied to the cup empalement of a flower, when it is equal in length to the tube of the blossom.

LONG, *ad.* to a great length or space. For some time, or a great while, applied to time. In the comparative, *longer*, it implies a greater space, or more time; and in the superlative, *longest*, the greatest space, or most time. After *not*, it implies soon. "Not long after there arose." Acts xxvi. 14. Followed by *ago*, at some period of time far distant. "Spread long ago." Tillots. All along, or throughout, when followed by a substantive. "Singeth all night long." Shak.

LONG, *s.* [from *gelang*, Sax.] by the fault; by the failure, "All this coil is long of you." Shak. This word, though much disused, is purely English.

To **LONG**, *v. n.* (*gelangen*, to ask, Teut.) to desire earnestly; to wish for with a continued and ardent desire.

LONGANIMITY, (the *g* pron. hard) *s.* [from *longanimitas*, Lat.] a disposition of the mind, which consists in bearing offences with patience.

LO'NGBOAT, *s.* the largest boat belonging to a ship.

LONGEVITY, (*g* pron. soft) *s.* [from *longævus*, Lat.] length of life; old age.

LONGFORD, a county of Ireland, in the province of Leinster, about 21 miles in length, and 14 in its greatest breadth; bounded on the W. by the river Shannon, on the E. and S. by West Meath, and on the N. and N. W. by Leitrim and Cavan. It contains 23 parishes, about 10,000 houses, and rather more than 50,000 inhabitants; and is a rich and pleasant country, in general flat, in some places apt to be overflowed by the Shannon, and towards the N. mountainous. A considerable quantity of linen is manufactured in this country, and large quantities of flax are sent to other parts. *Longford*, the capital of the above county, is seated on the river Cromlin, or Camlin, which falls into the Shannon a few miles below; and is 64 miles N. W. by W. of Dublin.

LONGIMANOUS, *a.* [*longimanus*, Lat.] having long hands, or a long reach.

LONGIMETRY, *s.* [*longimetrie*, Fr. from *longus*, Lat. and *μετρέω*, Gr.] the art or practice of measuring lengths.

LO'NGING, *s.* earnest desire; continual wish.

LO'NGINGLY, or **LO'NGLY**, (the *g* pron. hard) *ad.* with incessant wishes, and ardent desires.

LO'NGISH, (the *g* pron. hard) *a.* somewhat long.

LONG ISLAND, an island of the state of New York, separated from Connecticut by Long Island Sound, and divided into three counties, King's, Queen's, and Suffolk. It extends N. E. from New York about 140 miles, but is not more than 28 broad on a medium. Hence are exported to the W. Indies, &c. whale oil, pitch, pine boards, horses, cattle, flax-seed, beef, &c. The produce of the middle and western parts of the island, particularly corn, is carried to New York. This island, in 1790, contained 41,782 inhabitants.

LONGITUDE, *s.* [*longitude*, Fr. *longitudo*, Lat.] in its primary signification, length. In Astronomy, the distance of

a star from the first point of Aries forward. In Geography, the distance of a place from some of the first meridians. In Navigation, the distance of a ship or place, either E. or W. from each other. The finding the *longitude at sea* has perplexed mathematicians of all ages; and the parliament has promised a considerable reward for the invention.

LONGITUDINAL, *a.* [*longitudinal*, Fr.] measured by the length; lengthwise.

LONGSOME, *a.* tedious. Wearisome on account of its length, applied to time.

LONGSUFFERING, *a.* patient; not easily provoked.

LONGSUFFERING, *s.* patience under offences; clemency.

LONGTONGUED, *a.* loquacious.

LONGTOWN, a town in Cumberland, with a market on Thursday. It is seated on the borders of Scotland, 307 miles N. N. W. of London.

LONGWAYS, or LONGWISE, *ad.* in the direction of the length; lengthwise.

LONGWINDED, *a.* long-breathed; tedious.

LOO, *s.* [*loosen*, Belg.] a game of cards, wherein the knave of clubs is reckoned the highest, and secures success to the person who has it.

LOO'BILY, *a.* awkward; clumsy; clownish.

LOO'BY, *s.* [*llobe*, Brit.] a clumsy clown.

LOOE, EAST and WEST, two small fishing towns in Cornwall, separated from each other by a creek or river of the same name, over which there is a narrow stone bridge, of several arches, 16 miles W. of Plymouth, and 232 W. by S. of London. Each of them has a market on Saturday. They are supported chiefly by the pilchard fishery, and send together as many members to parliament as London. The river Looe is navigable for vessels of a hundred tons burden.

LOOF, *s.* [*lufan*, Sax.] the part of a ship aloft which lies before the chess-trees, as far as the bulkhead of the castle.

To LOOF, *v. a.* to bring the ship close to a wind.

LOO'FED, *a.* gone to a distance.

To LOOK, *v. n.* [*locan*, Sax.] to behold, to see, to view, to direct the eye towards any object; to seem or carry an air, mien, or appearance. "Looks very sullen." *Burnet*. To look after, to attend to; to take care of. To look for, to expect. To look into, to examine; to sift; to inspect closely, or observe narrowly. Used with *on*, to respect, regard, esteem, consider, view, or think. "I looked on Virgil as a succinct, majestic writer." *Dryd*. To look out, to search or seek; to be on the watch. "Bound to look out sharp." *Coll*.

LOOK, *interject*. [properly the imperative of the verb, and sometimes expressed by *look ye*] behold; see; look; observe.

LOOK, *s.* the air of the face, or cast of the countenance; the act of looking or seeing; the act of directing the eye towards.

LOOKER, *s.* a spectator; a beholder. *Looker on*, an idle or unconcerned spectator.

LOOKING-GLASS, *s.* a glass which represents the form of a person by reflection.

LOOM, *s.* a frame in which manufactures are woven. Also a bird as big as a goose, of a dark colour, dappled with white spots on the neck, back, and wings; each feather marked near the point with two spots: they breed in Farr Island. *Grew*.

TO LOOM, *v. n.* [*leoman*, Sax.] to appear at sea.

LOON, *s.* a lown; a sorry fellow; a scoundrel.

LOOP, *s.* [from *loopen*, Belg.] a thread or twist, &c.

doubled in such a manner that a string or lace may be drawn through it.

LOO'PED, *a.* full of holes resembling loops.

LOO'PHOLE, an aperture in a loop; a hole to give passage. Figuratively, any shift or evasion.

LOO'PHOLED, *a.* full of holes, openings, or void spaces.

LOORD, *s.* [*loerd*, Belg. a drone.] "Thou's but a lazy loord." *Spencer*.

To LOOSE, *v. a.* [*lesan*, Sax.] to unbind or untie any thing fastened; to relax, applied to the joints. To free from any obligation; to let go.

LOOSE, *a.* unbound; untied; not restrained, light, or confined. Wanton, or not restrained by the dictates of modesty. Diffuse, applied to style. Disengaged from any obligation, used with *from*, and sometimes *of*. To break loose, to get rid of any restraint by force.

LOOSE, *s.* liberty; freedom from any constraint; indulgence, used with *give*.

LOO'SELY, *ad.* in a manner that is not fast or firm, applied to any thing tied. Without any union or connection. Irregularly, or not restrained by the rules of chastity or virtue.

To LOO'SEN, *v. a.* to undo any thing that is tied; to be made less compact or coherent. To separate or divide; to free from restraint, or set at liberty. To remove any obstruction in going to stool; to cure of costiveness.

LOO'SENESS, *s.* the state of things which are moveable, and deprived of their firmness or fixedness. A disposition of mind, or a conduct, not restrained by any principle of law, chastity, morality, or religion, applied to the manners. In Physic, a habit of body wherein a person is obliged to go often to stool.

LOO'SESTRIFE, *s.* in Botany, a genus of plants of which there are several species; the yellow pimpernel of the woods, and the purple moneywort, belong to this genus.

LOO'VER, *s.* an opening for the smoke to go out at the roof of a house.

To LOP, *v. a.* to cut off the branches of trees. Figuratively, to cut off a part from any thing.

LOP, *s.* that which is cut from trees; a flea, from *loppa*, Swed. or *loup*, Scot.

LOPE, the old preterit of *leap*. "A naked swain—lope to a tree." *Spenser*.

LOPPED, *part. a.* in Botany, appearing as cut off with a pair of scissars; the leaves of the great bindweed are lopped at the base; the petals of the periwinkle are lopped at the end.

LOPPER, *s.* one that cuts branches from trees.

LOPPERED, *a.* coagulated; as *loppered* milk.

LO'QUABAR, or *Lochabar*, a county of Scotland, bounded on the N. by Inverness, on the E. by Badenoch and Athol, on the S. by Lorn, and on the W. by the Western Ocean. It is a mountainous country, and so barren, that it does not produce corn enough for the inhabitants; but there are large forests, a few mines of iron, and good pastures. The sea, the lakes, and the rivers, yield plenty of fish. In the eastern parts are two large lakes, one of which has the same name as the county, and is 16 miles in length, communicating with the Irish Sea by a long channel; the other is about 10 miles long, and communicates with it by a channel 3 or 4 miles in length.

LOQUACIOUS, *a.* [*loquax*, Lat.] full of talk; talking to excess; speaking, or vocal; babbling.

LOQUACITY, *s.* [*loquacitas*, Lat.] the quality of talking to excess.

LORD, *s.* [from *hlaford*, Sax. a giver of bread, alluding to the hospitality of our ancient nobles; it was afterwards

written *laford*, and thence contracted into *lord*, from *hlaf*, Sax. a loaf of bread, and *ford*, Sax. to supply] a person invested with sovereign power over others; a master. A tyrant or one who exerts his power to the distress of those that are subject to him. A title of honour given to those that are noble either by birth or creation, and invested with the dignity of a baron; by courtesy, it is applied to all sons of a duke or marquis, the eldest son of an earl, persons in honourable offices, and to one that has a fee, and consequently can claim homage of his tenants. In Scripture, it is peculiarly applied to God, and seems to be a translation of *JEHOVAH*, the incommunicable name of God. In the New Testament it is likewise given to Christ, who is co-equal with the Father as touching his Godhead.

To LORD, *v. n.* to exercise unbounded authority or power. To behave like a tyrant, used with *over*.

LORD HOWE'S GROUP, an extensive group of islands, in the South Pacific Ocean, discovered by Captain Hunter, in 1791, who, from the mast head, could distinctly descry 32 of them. They appeared thickly covered with wood, among which the cocoa nut was very distinguishable. The natives were of a dark copper colour; their hair tied in a knot on the back of the head; and they seemed to have some method of taking off the beard, for they appeared as if clean shaved. They had an ornament, consisting of a number of fringes, like an artificial beard, which they fasten between the nose and mouth, and close under the nose. To that beard hung a row of teeth, which gave them the appearance of having a mouth lower than their natural one. They wore a wrapper round their middle. Lat. 5. 30. S. long. from 159. 14. to 159. 37. E.

LORDING, *s.* a lord; used in contempt.

LORDLING, *s.* [diminutive of *lord*] a little, diminutive, or contemptible lord.

LORDLINESS, *s.* dignity; high station. Figuratively, pride or haughtiness.

LORDLY, *a.* becoming a lord, in a good sense. Proud, haughty, imperious, insolent, in a bad sense. Used adverbially, imperiously, proudly.

LORDSHIP, *s.* dominion; power; seigniority; domain; a title of honour given to a baron; a complimentary address to a judge, and some other persons in office.

LORE, *s.* [from *leran*, Sax.] lesson; doctrine; or instruction; workmanship.

LORETTO, a town of Italy, in the marquisate of Ancona. They pretend to shew here the Santa Casa, or house of Nazareth, in which Jesus was brought up; and say, that it was carried by angels into Dalmatia, and thence to the place where it now stands. This house is nearly 32 feet long, 13 wide, and 18 feet 9 inches in height, incrustated with marble, with inside walls of brick, and some pieces of stone intermixed. The inner part, or chapel, is very old, but it is surrounded by a marble wall, and within is a church built of freestone. A statue to represent Mary, the mother of Jesus, with the image of Christ, covered with diamonds, in her arms, stands upon the principal altar: it is of cedar-wood, 3 feet high; but the face can hardly be seen, on account of the smoke of the numerous lamps around it. She is clothed with cloth of gold, set off with jewels, with a triple crown on the head, and the infant is covered with a shirt, holding a globe in its hand, adorned with rich jewels. The sanctuary is perfectly crowded with 62 great lamps of gold and silver; one of the golden ones, which was presented by the Republic of Venice, weighs 37 pounds; there are also angels waiting upon the holy image, one of massive gold, and two of silver; and the walls are covered with plates of silver. Christiana, queen of Sweden, gave a crown of gold, worth about

100,000 crowns; and Isabella, infanta of Spain, sent a garment which cost 40,000 ducats. Lewis XIII. of France, and his queen, sent two crowns of gold, enriched with diamonds. Besides these crowns, they sent an angel of massy silver, holding in its hand the figure of the dauphin, of solid gold. The jewels of the Holy House, however, are nothing in comparison with the treasure; where the number, variety, and richness of the vestments, lamps, candlesticks, goblets, crowns, crucifixes, images, cameos, pearls, gems of all kinds, &c. is prodigious. Loretto was taken and plundered by the French in 1796. As for the town itself, exclusive of the chapel, it is neither very considerable nor very agreeable, nor does it contain above 300 inhabitants. Loretto is seated on a mountain, about 3 miles from the Adriatic, 10 S. E. of Ancona, and 112 N. E. of Rome. Lat. 43. 27. N. lon. 13. 40. E.

To **LORICATE**, *a.* [from *lorica*, Lat.] to plate over.

LORIMERS, or **LORINERS**, *s.* [*lormier*, Fr.] bridle-cutters; one of the city companies.

LORRIOT, *s.* a kind of bird.

LORRAIN, a province of France, abounding in all sorts of corn, wine, hemp, flax, rape-seed, game, fish, and, in general, all the necessaries of life. The air is thick and cold, but healthy; and its lakes abound in fish. Here are fine meadows and large forests, with mines of iron, silver, and copper, and salt-pits. The principal rivers are the Maese, the Moselle, the Seille, the Meurthe, and the Saare. Separated from Bar, it is about 30 leagues in length, and 23 in breadth. It now forms, with the duchy of Bar, the departments of Meuse, Meurthe, Moselle, and Vosges.

To **LOSE**, *v. a.* [preter. and passive *lost*; *leosan*, Sax.] to suffer the want of any thing a person was possessed of before; to mislay, or have any thing gone, so as it cannot be found again. Used with the reciprocal pronouns *himself*, &c. to bewilder; to be embarrassed in an inextricable manner. "Wherein the mind *loses* itself." *Locke*. To possess no longer, opposed to retain. "They *lost* their trade." To miss; to be unable to recover. Many more are *lost* than killed." *Clarendon*. Neuterly, to be beaten at any game or contest, opposed to *win*.

LOSEABLE, *a.* subject to privation.

LOSER, *s.* one that is deprived of any thing he was in possession of, by accident, fraud, gaming, or mislaying; one that sells for less than he buys.

LOSS, *s.* a diminution of a person's wealth or possessions by fraud, by accident, by mislaying so as not to be able to find again, and by selling for less than prime cost; any detriment sustained; throwing away.

LOST, *part.* and *a.* [from *lose*] not to be found; not to be perceived.

LOT, *s.* [*hlot*, Sax.] a die, or any thing used in determining a chance; a condition or chance, determined by lot; destiny, condition, circumstance, or state, assigned by Providence; a portion or parcel of goods; proportion of taxes. "To pay scot and *lot*." *SYNON.* *Lot* supposes distinction, and a method of decision; we attribute to it a hidden determination, which keeps us in doubt till the instant in which it shews itself. *Destiny* forms designs, dispositions, and connections: we attribute it to knowledge, will, and power; its virtues are determined and unalterable. *Lot* decides; *destiny* ordains.

LOTH, *a.* unwilling; disliking. See **LOATH**.

LOTHIAN, a district of Scotland, now divided into East, Mid, and West Lothian, or Haddingtonshire, Edinburghshire, and Linlithgowshire.

LOTION, *s.* [*lotio*, Lat.] a medicine compounded of aqueous liquids, and used to wash any part with.

LOTTERY, *s.* [*lotterie*, Fr.] a kind of public game at hazard, set on foot by authority, in order to raise money for the state, consisting of a number of blanks and prizes, which are determined by tickets put in two opposite wheels, and drawn by different persons, one of which contains all the numbers, and the other all the blanks and prizes; a game of chance; sortilege.

LOVAGE, *s.* a genus of plants, of which two are native in Britain, the Scotch sea-parsley, and the Cornwall saxifrage.

LOUD, *a.* [*hlud*, Sax.] noisy; striking the drum of the ear with great force; clamorous; turbulent.

LOUDLY, *ad.* with a great noise; with a great exaltation of voice; in a clamorous or turbulent manner.

LOUDNESS, *s.* that quality of sound which makes it to be heard at a great distance, and to strike the drum of the ear with great force.

To **LOVE**, (the *o* in this word, and its derivatives and compounds, is pronounced short) *v. a.* [*lufian*, Sax.] to regard with great desire and affection; to be pleased with; to be fond of.

LOVE, *s.* [*leof*, Sax.] the ardent desire of an object which seems amiable; gallantry; that passion which is excited at the sight of any object that appears amiable and desirable; it is divided into two species, viz. the love of friendship, and of desire; the one between friends, the other between lovers. When applied to the affection we should have towards our Creator, it is the whole man exerted in one desire. Figuratively, a lover; an object of love. A kind of thin silk, of a black colour, used for borders on garments during a person's wearing mourning.

LOVE-KNOT, *s.* a figure made of many twistings and circumvolutions, to denote the inextricable ardour of a person's affections.

LOVELILY, *ad.* in such a manner as to excite love.

LOVELINESS, *s.* qualities of mind or body which excite love.

LOUGH, *s.* [Irish] a lake; a large inland standing water; a long bay, or part of the sea that rises up a great way into the land. See **LOCII**.

LOUGHBOROUGH, a town in Leicestershire, with a considerable manufacture of stockings, and a very extensive business in the coal trade, produced by the new canals. It is seated on the river Soar, which runs here almost parallel with the Fosse, near the forest of Charnwood, 11 miles N. of Leicester, and 110 N. W. by N. of London. Market on Thursday. Inhabitants, 5400.

LOVING, *part.* kind; affectionate; expressing kindness and affection.

LOVINGKINDNESS, *s.* tenderness; favour.

LOVINGLY, *ad.* in a manner that shews great love, kindness, and affection.

LOUISBURGH, a town of N. America, capital of the Island of Cape Breton, subject to the English. It has an excellent harbour, about 6 miles in length, from N. E. to S. W. and more than half a mile in breadth, from N. W. to S. E. Its entrance is not above 1800 feet wide, and is formed by 2 small islands. In the N. E. part is a fine careening wharf, to heave down, very secure from all winds. On the opposite side are the fishing stages, with room for 2000 boats to cure their

fish; the cod being remarkably plentiful here, and, at the same time, better than any about Newfoundland. The fishery may in general, be continued from April to the close of December, when the harbour becomes impracticable, being entirely frozen, so as to be walked over. The town is about half an English mile in length, and 2 in circuit, built for the most part of stone, and laid out in broad and regular streets. At a little distance from the fort, or citadel, is a large parade, the inside of which is a fine square, near 200 feet every way. This island was taken by Admiral Boscawen and Lieutenant-general Amherst, June 27, 1758, and its fortifications since demolished. Lat. 45. 54. N. lon. 59. 54. W.

LOUIS D'OR, loo-ee-d'ore, *s.* [Fr.] a golden coin in France, valued at 20 shillings, or 24 livres. It is sometimes, though improperly, spelt **LEWIS D'OR**.

LOUISIANA, or *Missouri Territory*, a large country of N. America, estimated to extend 1400 miles in length, by 1100 in breadth, situated on both sides of the Mississippi, and bounded on the E. by Florida, on the S. by the Gulf of Mexico, on the W. by New Mexico, and on the N. by Indian nations. It is agreeably situated between the extremes of heat and cold; its climate varying as it extends towards the N. The southern parts, lying within the reach of the refreshing breezes from the sea, are not scorched like those under the same latitude in Africa; and its northern regions are colder than those of Europe under the same parallels, with a wholesome serene air. From the favourableness of the climate, two annual crops of Indian corn, as well as rice, may be produced; and the soil, with little cultivation, would furnish grain of every kind in the greatest abundance. The timber is as fine as any in the world; and the quantities of live oak, ash, mulberry, walnut, cherry, cypress, and cedar, are astonishing. The neighbourhood of the Mississippi, besides, furnishes the richest fruits in great variety; the soil is particularly adapted for hemp, flax, and tobacco; and indigo is at this time a staple commodity, which commonly yields the planter three or four cuttings a year. Whatever is rich and rare in the most desirable climates in Europe seems to be the spontaneous production of this delightful country. It is intersected by a number of fine rivers, among which are the Natchitoches, and the Adayes, or Mexicano. This country was ceded to the United States in 1803.

To **LOUNGE**, *v. n.* [*lunderen*, Belg.] to loiter; to live in an idle and lazy manner.

LOUNGER, *s.* an idler.

LOUSE, *s.* [plural *lice*,; *lus*, Sax.] a small insect which breeds on the bodies of men or animals, and are of different species: the head louse is generally sluggish; that of the body more transparent, and more nimble. This name is likewise applied to animals that resemble the former; hence we make use of the words, *book-lice*, *wood-lice*, &c.

To **LOUSE**, *louze*, *v. a.* to hunt for lice; to cleanse from lice.

LOUSEWORT, *s.* the name of a plant; called also rattle and coxcomb.

LOUSILY, *ad.* in a paltry, mean, base, and scurvy manner.

LOUSINESS, *s.* the quality of abounding in lice.

LOUSY, *a.* swarming or overrun with lice. Figuratively, mean; low born or bred; poor.

LOUT, *s.* [*loete*, old Dutch] a bumpkin; a mean, awkward, stupid, and clownish fellow.

To **LOUT**, *v. a.* [*hlutan*, Sax.] to bend the body by way of obedience; to make a bow.

LOUTH, a county of Ireland, in the province of Leinster, about 22 miles in length, and from 9 to 14 in breadth; bounded on the W. by Monaghan and Meath, on the N. by Armagh and Carlingford Bay, on the E. by St. George's Channel, and on the S. by Meath, from which it is parted by the river Boyne. It is the smallest county in the kingdom, but very fertile and pleasant, and contains 61 parishes, 11,500 houses, and about 57,700 inhabitants. Its chief towns are Dundalk, Carlingford, Drogheda, Ardee, and Dunleer.

LO'UTISH, *s.* clownish; awkward.

LO'UTISHLY, *ad.* after the manner of a clown, or an awkward ill-bred person.

LO'UVER, *s.* [from *l'ouvret*, Fr.] an opening for the smoke to go out at in the roof of a cottage.

LOW, *a.* [*lagur*, Isl.] applied to situation, implies comparison, and being nearer to the earth than something else; in this sense it is opposed to *high*. Applied to stature, measuring little, and opposed to *tall*. Applied to station or condition, mean, or not above the vulgar. Applied to price, not sold or purchased for much money; cheap. Applied to the mind, depressed or dejected. Applied to sound, scarce, audible. Applied to style or sentiment, mean, grovelling, vulgar, base, or dishonourable. In Medicine, to make use of abstinence. "To keep the body *low*." *Low in the world*, implies reduced, or in poor circumstances.

LOW, *ad.* not high, applied to situation. Cheap, or of low price, applied to value. Mean or base, applied to rank, circumstances, thoughts, or expressions. Applied to the voice, in such a manner as scarcely to be heard. In Chronology, applied to times approaching to our own. "In that part of the world which was first inhabited, even as *low* down as Abraham's time, they wandered with their flocks and herds." *Locke*.

To **LOW**, (*ow* pron. as in *now*) *v. n.* [*hlowan*, Sax.] to below, or make a noise, applied to that made by cows.

LOWBELL, *s.* [*lowe*, denotes a flame, in Scotland; and to *low*, to flame] a kind of fowling in the night, in which the birds are wakened by a bell, and lured by a flame into a net.

LOWE, *s.* [from the Sax. *hleaw*, or *hlaiw*, Goth.] signifies a hill, heap, tomb, or barrow, and is used in the names of places.

To **LOWER**, *v. a.* to humble; to bring down; to bring lower; to strike a flag by way of submission; to lessen the value or price of a thing; to make weaker by the addition of some weaker liquor. Figuratively, to depress or lessen a person's pride. Neuterly, to sink; to fall; to grow less. *SYNON.* We make use of the word *lower*, with respect to the diminishing the height of things, or to certain motions of a body: We *lower* a beam; we *lower* the sails of a ship; we *lower* a building; we *lower* the eyes, the head, &c.—We use the expression, *let down*, with regard to things made to cover others, and which, being lifted up, leave them uncovered: We *let down* the lid of a trunk; we *let down* the eyelids: we *let down* the lappets, or the gown.

LOWERMOST, *a.* [the superlative of *low*, which is thus compared, *low*, *lower*, *lowermost*] below all others in place, circumstances, or rank.

LOWESTOFFE. See **LESTOFF**.

LOWLAND, *s.* a vale, or plain; opposed to an eminence.

LOWLILY, *ad.* humbly; without pride; meanly.

LOWLINESS, *s.* a disposition of mind wherein a person thinks humbly of himself; meanness; want of dignity.

LOWLY, *ad.* in a humble manner; meanly; or without dignity.

LOWLY, *a.* humble; thinking modestly of one's self; of low rank; mean; wanting dignity.

LOWR, (*ow* is pron. as in *now*) *s.* cloudiness or gloominess, applied to the sky. An appearance of anger, applied to the countenance.

LOWRINGLY, (see preceding word) *ad.* with cloudiness or gloominess, applied to the sky. With an appearance or air of anger, applied to the countenance.

LOWSPIRITED, *a.* dejected; depressed; without vigour or vivacity; dull, melancholy, gloomy.

To **LOWT**, (*ow* pronounced as in *now*) *v. n.* to look sourly, surlily, or clownishly.

LOXODROMIC, *s.* [*λοξός* and *δρομος*, Gr.] the art of oblique sailing by the rhomb, which always makes an equal angle with every meridian; that is, when you sail neither directly under the equator, nor under one and the same meridian, but across them: hence the table of rhombs, or the transverse table of miles, with the table of longitudes and latitudes, by which the sailor may practically find his course, distance, latitude, or longitude, is called *loxodromic*.

LO'YAL, *a.* [Fr.] obedient or true to the duty owing to a prince. Figuratively, faithful in love, or true to a lover.

LO'YALIST, *s.* one who professes an inviolable adherence to a king: a term given to those who adhered to king Charles I.

LO'YALLY, *ad.* with inviolable adherence and fidelity to a king.

LO'YALTY, *s.* [*loyauté*, Fr.] firm and inviolable adherence to a prince. Figuratively, fidelity, or immoveable attachment to a lover.

LO'ZENGE, *s.* [*losenge*, Fr.] a figure consisting of four equal or parallel sides, two of whose angles are acute, and the other two obtuse, the distance between the two obtuse ones being equal to the length of one side. In Heraldry, a rhomb, or figure of four equal sides, but unequal angles, resembling a diamond on cards; in this all unmarried gentlewomen and widows bear their arms. In Medicine, a remedy made up into small flat pieces, sometimes cut in the form of a lozenge, to be held and chewed in the mouth till dissolved.

LU'BARD, *s.* [from *lubber*] a lazy, sturdy fellow.

LU'BER, *s.* [*lubbed*, fat, Dan.] a sturdy drone; an idle, fat, or bulky person.

LU'BERLY, *a.* lazy and bulky.

LU'BERLY, *ad.* in an awkward, lazy, and clumsy manner.

LU'BECK, a celebrated sea-port of Holstein, in Lower Saxony. It is a free imperial city, and was long the head of the famous Hanseatic League, and was formed here in 1164. It was likewise the most commercial city and powerful republic of the North. Its fleet set the northern powers at defiance, and rode triumphant in the Baltic. But Lubeck retains scarcely a shadow of its former power. The houses of Lubeck are built all of stone, in a very ancient style of architecture; the doors being so large as to admit carriages into the hall, which frequently serves for a coach-house. The walls of many houses bear the date of the 15th century, and, at that period, no doubt, the town was esteemed very beautiful. The streets are, for the most part, steep, as the city stands on the two sides of a long hill, the eastern part

extending towards the Wackenitz, as the western does towards the Trave. Here are 4 parochial churches, besides the cathedral. The town-house is a superb structure, and has several towers. In it is a large hall called *Haansesaal*, where the deputies of the Hans Towns used formerly to meet. Here is also a fine exchange, built in the year 1683. The inhabitants are all Lutherans, and there are 21 preachers, whose chief has the title of Superintendent. Here were formerly 4 convents: and in that of St. John there are still 22 Protestant girls, under the government of an abbess. That of St. Mary Magdalen is turned into an hospital; that of St. Anne is made a house of correction; and of the monastery of St. Catharine, they have made a handsome college. In the great hospital there is always a considerable number of poor men and women. Besides this, there are 14 other hospitals, 1 for lunatics, a pest-house, and 4 others for sick persons. Lubeck is seated at the confluence of the rivers Trave, (which is the largest,) the Steckenitz, another navigable stream, by which it communicates with the Elbe; and the Wackenitz, which issues from the lake of Ratzeburgh, and, after joining the Swartau, falls into the Baltic; by means of which several streams, long and flat-bottomed vessels pass from the Baltic into the German Ocean. 14 miles S. W. of the Baltic, and 40 N. E. of Hamburg. Travemunde is the port of Lubeck, to which it belongs, and is 12 miles N. N. E. of that city. In 1789, 951 ships sailed from this port. Lat. 53. 52. N. lon. 10. 44. E.

LUBRIC, *a.* [*lubricus*, Lat.] slippery or so smooth of surface that things would slip off with the least sloping; wanton.

To **LUBRICATE**, *v. a.* [from *lubricus*, Lat.] to make smooth or slippery.

To **LUBRICITATE**, *v. a.* the same as **LUBRICATE**.

LUBRICITY, *s.* [*lubricité*, Fr.] slipperiness or smoothness of surface; aptness to glide over any part, or to facilitate motion. Figuratively, uncertainty; slipperiness; instability. Wantonness; lewdness.

LUBRICOUS, *a.* [*lubricus*, Lat.] slippery; smooth; uncertain.

LUBRIFICATION, *s.* [from *lubricus* and *facio*, Lat.] the act of making smooth or slippery.

LUBRIFICATION, *s.* [*lubricus* and *fio*, Lat.] the act of rendering smooth, or so slippery as to render the motion easy.

LU'CCA, a town of Italy, capital of a duchy of the same name. It is about 3 Italian miles in circumference. The inhabitants, who are above 40,000, are considerable manufacturers of silk, and gold and silver stuffs; for this reason it is called *Lucca the Industrious*. The state palace is a large building, and includes the arsenal, which has arms for 20,000 men. The houses are handsome, and the streets broad and well paved, but most of them are irregular. It is seated in the middle of a fruitful plain, terminating in pleasant eminences, near the river Serchio, 10 miles N. N. E. of Pisa, 37 W. of Florence, and 155 N. by W. of Rome. Lat. 43. 50. N. lon. 10. 35. E.

LU'CCA, the duchy of, a small territory of Italy, lying on the Tuscan sea; about 40 miles in length, and from 10 to 20 in breadth. The soil does not produce much corn; but there is plenty of wine, oil, silk, wool, and chesnuts. Their oil, in particular, is in high esteem, but the poorer people receive part of their support from chesnuts, lupins, and French beans. The industry of the people, in improving to the best advantage every spot of their ground, is equally surprising and commendable. The government was aristocratical, and consisted of a gonfalonier, assisted by a council of 9 members; all of these, however, were changed every two months,

and were chosen out of the great council. This was composed of 240 nobles, elected every two years; but in the late revolutions of Italy, this government was subverted by the French. The number of inhabitants in the city, and the 150 villages belonging to it, is computed at upwards of 120,000. The revenues amount to about 30,000*l.* per annum.

LUCE, *s.* a pike full grown.

LU'CENT, *part.* [*lucens*, Lat.] bright; shining; darting rays. "In the sun's *lucent orb*." *Milton*.

LU'CERN, one of the 13 cantons of Swisserland, and the most considerable of them except Zurich and Bern. It is bounded on the E. and S. E. by the canton of Zug, Schweitz, and Underwalden; and on all the other sides by the canton of Bern. The inhabitants, who are Romanists, are under the spiritual jurisdiction of the bishop of Constance. It is about 30 miles in length, and 20 in its mean breadth. The soil is fertile, but unequal; the southern parts are mountainous, but without glaciers, and there is a very considerable exportation of cheese. The sovereign power of this republic resides in the council of 100, comprising the senate, or little council. The former is the nominal sovereign; but the power resides in the latter, consisting of 36 persons, who are formed into two divisions, which exercise the office by rotation. Although the government appears purely aristocratic, yet this aristocracy is restrained in divers respects; as, in the matter of making war or peace, concluding new alliances, acquiring new territories, or imposing new taxes, the consent of all the citizens must be obtained. The chiefs of the republic are two magistrates called *advoyers*.

LU'CERNE, *s.* a plant cultivated by our farmers in the manner of clover, and is the only plant whose hay is preferable to the saintfoin, for the fattening of cattle.

LU'CIA, *ST.* or *Alousie*, an island of the West Indies, about 22 miles in length, and 15 in breadth, affording, amongst other tropical productions, plenty of cocoa and fustic. It is very healthy, and exhibits a variety of hills, yet partly consists of very fertile plains, finely watered with rivulets, and furnished with timber fit for building houses and windmills, and often employed for that purpose both by the French and English planters. It is provided with several good bays and commodious harbours, the chief of which, called the *Little Carenage*, is reckoned the best in all the Caribbee Islands. In it are two remarkably round and high mountains, said to be volcanoes, by which this island may be known at a considerable distance. It was long considered as neutral by the English and French, till it was ceded to France by the peace of 1763. In 1777, it was taken by the English, but restored to the French by the peace of 1783. This island was taken by the English in the late wars, and is now a British colony, having been ceded to Great Britain by the treaty of Paris in 1814. It is about 70 miles N. N. W. of Barbadoes, and 38 S. W. of Martinique. Lat. 13. 25. N. lon. 60. 54. W.

LUKE, St. (one of the four Evangelists) a native, as is generally supposed, of Antioch, the metropolis of Syria, a

place renowned for this one peculiar honour, that the disciples of Jesus were here first called Christians. He was by profession, as appears from the mention made of him by St. Paul, a physician; and some will have him also to have been eminent for painting; but of this we have no accounts that can be depended on. He became afterwards an inseparable companion and fellow-labourer of the Apostle of the Gentiles in the ministry; attending him in all his travels, accompanying him in his dangerous voyage to Rome, and ministering to him in his necessities. There are different accounts concerning the countries where St. Luke afterwards preached the gospel: some say, that leaving St. Paul at Rome, he returned back into the East, and travelled through great part of it, preaching the gospel in Egypt, and the parts of Lybia, where he converted many to Christianity; but others think he did not wholly leave St. Paul till the latter had finished his course by martyrdom. Some again say, that he first preached the gospel in Dalmatia and Galatia, then in Italy and Macedonia, and that with great diligence and success. The ancients are not all agreed either concerning the time, or place, or manner of his death; of all which such various accounts are given, that it would be tedious here to insert them. He is universally acknowledged to have been the author of the gospel that goes under his name, and of the book of the Acts of the Apostles, both which he dedicates to Theophilus, whom some writers suppose to have been a person of some eminence, probably at Antioch, converted by St. Luke.

LUSATIA, a territory of Germany, bounded on the N. by the Mark of Brandenburg; on the E. by Silesia; on the S. by Bohemia; and on the W. by Meissen. It is about 28 leagues long and 15 wide, and is divided into the Upper and Lower. Upper Lusatia abounds in mountains and hills, in which are found many boggy and moorish tracts. The latter, on the contrary, has a great number of fine woods; the very great heaths themselves being provided with it, even to exuberance. In each of these marquisates, rye, wheat, barley, and oats, are cultivated; as also much buckwheat, together with pease, lentils, beans, and millet. The culture of flax is pretty considerable, and they make some white and red wine. The inhabitants of Lusatia enjoy an important means of subsistence, in the numerous and good manufactures of linen and woollen stuffs. These flourish principally in Upper Lusatia. The cloth manufactures are the oldest, having been in vogue, in several towns, so early as the 13th century. There are also good manufactures of hats, leather, paper, gunpowder, iron, glass, wax bleaching, black and fine dying, &c. &c. The most ancient inhabitants of this country were the Semnones, or Senones, a Suabian nation, who inhabited Upper Lusatia but, by their custom of wandering, gave place to the Wandalers; and these last again, by a like expedition, in the 17th century, to the Sorber Wends, a Sclavonian people. At present the towns are almost wholly peopled with German inhabitants, but, in the villages, a greater number of Wends than Germans are to be met with. The principal rivers are the Spree, the Black Elster, and the Pulsnitz. Upper Lusatia formerly belonged to Bohemia. Lower Lusatia, which

alone, till the 15 century, was called Lusatia, was erected into a marquisate, in the year 931, by Henry I. king of Germany. In the middle of the 16th century, they were both ceded to the elector of Saxony, in consideration of a large sum of money, which the elector had advanced to the emperor, in his war with the Bohemians, with the single condition, that the kings of Bohemia should retain the armorial bearings. The whole country is now divided between the king of Prussia and the elector of Saxony.

LU'THERAN, *s.* a person who professes the principles and doctrines of Martin Luther.

LU'THERAN, *a.* belonging to Luther.

LU'THERANISM, *s.* the doctrine of Martin Luther, a famous reformer in the 16th century, who reduced the number of sacraments to two, viz. Baptism and the Lord's supper, maintaining the mass to be no sacrament, and exploding the adoration of the host, auricular confession, meritorious works, indulgences, the worship of images, the fastings of the Romish church, monastical vows, and the celibacy of the clergy. He opposed the doctrine of free-will, holding absolute predestination.

LU'TON, a small town of Bedfordshire, noted for its manufactory of straw hats. In its church is a remarkable Gothic front, in form of a hexagon, open at the sides, and terminating in elegant tabernacle work. It is pleasantly seated among hills, on the river Lea, 20 miles S. of Bedford, and 31 N. by W. of London. A corn market on Monday.

LU'TTERWORTH, a town of Leicestershire, containing about 360 houses. Its rector, the famous reformer John Wickliff, died and was buried here, in the year 1385; but his bones were taken out of his grave and burnt, 40 years after, by order of the council of Constance. The pulpit in which he preached is still preserved in its church. The Roman Watling-street runs on the W. side of the town. It is situated on the little river Swift, (into which the bones of Wickliff were thrown after being burnt) in a fertile soil, and pleasant open country, 14 miles S. of Leicester, and 90 N. N. W. of London. Market on Thursday.

LU'XEMBURG, a grand duchy and Province of the Netherlands, lying in the centre of the forests of Ardennes, W. of the electorate of Treves, and S. of the territories of Liege, Limburg, and Juliers. In some places it is covered with mountains and woods; but it is, in general, fertile in corn and wine, and has a good breed of cattle, and all sorts of game. Here are also a great number of iron mines and founderies for cannon, which last constitute its greatest riches. It is watered by many small rivers, the principal of which are the Ourt, the Semois, the Lass, and the Chiers, which discharge themselves into the Meuse, with several others which flow into the Moselle. In the whole duchy, exclusive of the principal town, are twenty-three other small ones. Charles IV. emperor of the Romans, raised the county of Luxemburg, in 1354, to a duchy, but dying without heirs, it came by his will to Wenzel, son to the emperor Charles IV. king of the Romans and Bohemia, who, by way of mortgage, ceded to the princess Elizabeth, daughter to his brother John, duke of Gorlitz, (who first married Anthony duke of Burgundy, and afterwards John of Bavaria,) this duchy, in lieu of a dowry of 120,000 Rhenish florins, which he had promised to give her. In 1444, this princess ceded all her right in the duchy of Luxemburg to Philip duke of Burgundy. By the peace of the Pyrenees, France obtained the districts and towns of Thionville, Montmedy, Marville, Chevancy, Carignan, and Damvilliers. The king of the Netherlands has now the sovereignty of this country. Luxemburg, the capital, is 22 miles W. S. W. of Treves. Lon. 6. 14. E. lat. 49. 38. N.

LYMPHEDUCT, *s.* [*lymphe* and *ductus*, Lat.] a vessel which conveys the lymph.

LYNN REGIS or *King's Lynn*, a populous and flourishing town of Norfolk. The situation of this town, near the fall of the Ouse into the sea, after having received several other rivers, of which some are navigable, gives it an opportunity of extending its trade into eight different counties, by which many considerable cities and towns, viz. Peterborough, Ely, Stamford, Bedford, St. Ives, Huntingdon, St. Neots, Northampton, Cambridge, St. Edmundsbury, and the N. part of Bucks, as well as the inland parts of Norfolk

and Suffolk, are supplied with heavy goods, not only of home produce, as coals and salt from Newcastle, but also of merchandise, imported from abroad, especially wine, of which two articles, viz. coals and wine, this is the greatest port for importation of any place on all the eastern coast of England, and those wherein the Lynn merchants deal more largely than any town in England, except London, Bristol, and Newcastle. In return for this, Lynn receives back all the corn which the counties just mentioned produce, for exportation; and therefore sends more of it abroad than any port, except Hull. The foreign trade of the merchants here is very considerable, especially to Holland, Norway, and the Baltic, and also to Spain and Portugal, and formerly they drove a good trade to France, till it was turned off, by treaties on one hand, and prohibitions, high duties, &c. on the other, to Spain and Portugal. The harbour is safe when ships are in it, but difficult to enter, by reason of the many flats and shoals in the passage: but they are well buoyed, and good pilots are always ready. Its air is unwholesome, on account of its vicinity to the fens. The streets are narrow, but well paved, and it has a good market-place, and a noble old town-house and exchange. It is 102 miles N. by E. of London. Markets on Tuesday and Saturday. Inhabitants, 12,180.

LYNX, *s.* [Lat.] a wild beast, spotted all over its body, of a very quick and piercing sight.

LYONS, a large, ancient, and famous city, in the department of the Rhone and Loire, the most considerable in the kingdom, next to Paris, for beauty, commerce, and opulence, and is seated at the confluence of the rivers Rhone and Saone, by the side of two high mountains. It was founded about the year 42 B. C. by the Romans, who made it the centre of the commerce of the Gauls. About the year 145, it was totally destroyed by fire, but was rebuilt by the munificence of Nero. Many antiquities are still observed, that evince its Roman origin. Lyons was the see of an archbishop, and, before the revolution, contained about 160,000 inhabitants, upwards of 30,000 of whom were employed in various manufactures, particularly of rich stuffs of the most exquisite workmanship, in silk, gold, silver, &c. The houses in general are high and well built; it has 6 gates and 4 suburbs, 4 abbeys, 50 convents, 3 public schools, a college of physic, an academy of arts and sciences and belles lettres, a society of agriculture, and a veterinary school. Such was Lyons before the fatal year 1793, when the mischiefs of the revolution were poured upon this devoted city in all their horrors. In June 1793, the Lyonese revolted against the national convention, and sustained, with great bravery, an active siege of two months. But the inhabitants, who were both unused to arms, and very ill provided with the means of defence, as well as the necessaries of life, were obliged to surrender on the 8th of October following. In the siege, a great part of the city was reduced to ashes by an incessant bombardment; and, when taken, it became a prey to the merciless victors, who satiated their rage by barbarities for which language has no name. The miserable victims, who were too numerous for the individual operation of the guillotine, were driven in great numbers, with the most savage and blasphemous ceremonies, into the Rhone, or hurried in crowds to the squares, to be massacred by the more painful operations of fire-arms and artillery. It is supposed that not less than 70,000 persons in this unfortunate city alone were either put to death, or forced into exile. Lyons was a place of very great trade, which was extended not only through France, but to Italy, Switzerland, and Spain; and there are four celebrated fairs every year. It derives vast advantages from the rivers it

stands upon, and is 70 miles S. by W. of Geneva, and 220 S. E. of Paris. Lat. 45. 46. N. lon. 4. 55. E.

LYRE, *s.* [*lyre*, Fr. *lyra*, Lat.] a harp: the invention of this instrument is ascribed to Jubal by Barnes, who gives us the history of the variations it underwent from his time to that of Anacreon.

M.

M Is the 12th letter, and 9th consonant, of the English alphabet: it is pronounced by striking both lips together, whereby the breath is intercepted, and strongly forced through the mouth and nostrils jointly. It is one of those consonants called liquids, or half-vowels, and in English words never loses its sound. In the beginning of words it admits no consonant after it, except in some Greek originals, nor does it follow any in that case. In some words, the sound of *n* after it is lost, as in *autumn*, *solemn*, *condemn*, &c. As a numeral it stands for 1000, and with a dash over it, thus *M̄*, for a thousand thousand, or a million. In contractions of words, we find it thus, *M. A. magister artium*, master of arts; *MSS.* manuscripts. In physical prescriptions, it signifies *manipulus*, a handful; and at the end of a recipe, it means *mix*, mix or mingle.

MAC, *s.* an Irish word, signifying a son, and frequently begins surnames.

MACA'O, a town of China, in the province of Canton, seated in an island at the entrance of the river Tae. The Portuguese have been in possession of the town and harbour since the early part of the 17th century. The houses are low, but built after the same manner as in Europe. The Portuguese in this island are properly a mixed breed, having taken Asiatic women to their wives. Here is a Portuguese governor, as well as a Chinese mandarin. The former nation pays a tribute of 100,000 ducats for the liberty of chusing their own magistrates, &c. The city is defended by three forts, built upon eminences; the works are good, and well planted with artillery. Lat. 22. 4. N. lon. 113. 11. E.

MACARONI, *s.* [Ital.] an egregious fop.

MACARON, *s.* [*macarone*, Ital.] a confused heap; a huddle of several things together; a coarse, rude, clownish fellow. "To hear this *macaroon* talk on in vain." *Donne*. Hence the *macaronic style*, in Poetry, is a low style, wherein the language is designedly corrupted, and consists of a hodge-podge of different tongues. A kind of sweet biscuit made of flour, almonds, eggs, and sugar.

MACASSAR, a town and harbour on the S. W. coast of the island of Celebes, capital of the kingdom of the same name. The houses are all of wood, and supported by thick posts to preserve them from inundations; and they have ladders to ascend into them, which they draw up when they have entered. The roofs are covered with very large leaves, so that the rain cannot penetrate. It is seated near the mouth of a large river, which runs through the kingdom from N. to S. In the year 1814, it was taken by the British. Lat. 5. 9. S. lon. 119. 54. E.

MACAW, *s.* in Ornithology, the name of a large species of parrot, distinguished by the length of its tail. Also a

species of palm-tree, very common in the Caribbee Islands, where the negroes pierce the tender fruit, whence issues a pleasant liquor; and the body of the tree affords a solid timber, supposed by some to be a sort of ebony.

MA'CCLESFIELD, a large handsome town of Cheshire, with manufactures of cotton, mohair, twist, hatbands, buttons, and thread. Here are several mills for the winding of silk, and a considerable manufactory of mohair buttons. It is seated at the edge of a forest, of the same name, near the river Bollin, 36 miles E. of Chester, and 167 N. W. of London. Market on Monday. Inhabitants 12,299.

MACE, *s.* [*massa*, Lat.] an ensign of authority borne before magistrates, made of silver, and sometimes having an open crown at the top. A kind of spice, of a thin, flat, membranaceous substance, an oleaginous and yellowish colour, an extremely fragrant and agreeable smell, a pleasant but acrid and oily taste; being the second covering of the nutmeg, and used in medicine as a carminative, stomachic, and astringent.

MA'CEALE, *s.* ale spiced with mace.

MA'CEBEARER, *s.* one who carries the mace before a magistrate.

MACEDONIA, a province of Turkey, bounded by Rumania and Bulgaria on the E. the Archipelago and Thessaly on the S. Servia and Bulgaria on the N. and Albania on the W. The air is clear, sharp, and wholesome, and the soil is for the most part fertile. Salonichi (anciently Thessalonica) is the most considerable town.

To MA'CERATE, *v. a.* [*macero*, Lat.] to make lean; to wear away; to mortify; to steep a thing till it is almost dissolved, either with or without heat.

MACERATION, *s.* [*maceration*, Fr.] the act of wasting or making lean; mortification. In Medicine, an infusion, with or without heat, whereby the ingredients are intended to be almost dissolved.

MACHIAVELIAN, *a.* according to the principles of Machiavel; crafty, subtle, cunning.

MACHIAVELIANISM, *s.* the doctrine or principles laid down by Machiavel, in his *Prince*, or the practice of politics; or doing any thing to compass a design, without any regard to the peace or welfare of subjects, the dictates of honesty and honour, or the precepts of religion.

MACH'NAL, *ma-shee-nal*, *a.* [from *machina*, Lat.] relating to machines.

To MA'CHINATE, *mak-i-nate*, *v. a.* [*machinor*, Lat.] to plot, contrive, or devise.

MACHINATION, *s.* [*machinatio*, Lat.] a plot, artifice, or wicked contrivance.

MACH'NE, *ma-sheen*, *s.* [*machina*, Lat.] a contrivance or piece of workmanship, consisting of several parts, composed with art, and made use of to produce motion, so as to save either time or force; an engine.

MACH'NERY, *s.* any workmanship of a variety of parts; an engine, of which the several parts are set in motion by some principle contained in itself. In Poetry, that part which the deities, angels, or demons, perform. In theatrical exhibitions, the engines made use of to introduce persons, in a surprising manner, on the stage; or the contrivances made use of to shift the appearance of things, so as to cause astonishment.

MA'CHINIST, *s.* [*machineste*, Fr.] a constructor of engines or machines.

MACHY'NLETH, a town of Montgomeryshire, in N. Wales, with a market on Monday. It is 205 miles N. W. of London.

MA'CILENT, *a.* [*macilentus*, Lat.] lean.

MA'CKEREL, *s.* [*machereel*, Belg.] a well-known salt-

water fish, commonly in season in the months of May and June.

MA'CKEREL-BACK, *s.* a low word, applied to a person that is tall and slender.

MA'CROCOSM, *s.* [μακρὸς and κόσμος, Gr.] the great world, or universe, in opposition to the microcosm, the world of man.

MACTATION, *s.* [mactatus, Lat.] the act of killing for sacrifice. "A sacrifice or mactation."

MA'CUA, *s.* [Lat.] a spot. In Physic, any spot on the skin.

To MA'ULATE, *v. a.* [maculo, Lat.] to stain; to spot.

MACULATION, *s.* [maculatio, Lat.] a stain; a spot; a taint. "There's no maculation in thy heart." *Shak.*

MAD, *a.* [gemaad, Sax.] disordered in the mind, or deprived of the use of reason. Figuratively, enraged or hurried away by any violent and unreasonable desire.

To MAD, *v. a.* to deprive of reason; to raise to such a pitch of passion that a person is not under the government of reason; to make furious, or enrage. Neuterly, to run mad, or become furious.

MADAGA'SCAR, an island lying on the eastern coast of Africa, about 800 miles in length, and from 120 to 200 in breadth. The inhabitants in the interior are black. Their hair is long and curled, at least on the coasts; and there are some likewise of a yellowish complexion, who have neater features than the rest. The island is uneven and hilly, but the face of the country is one of the most agreeable in the world. It is extremely populous; yet they have no cities or towns, but a great number of villages, a small distance from each other. Their houses are huts, with doors so low, that a boy of 12 years old cannot enter them without stooping. They have neither windows nor chimneys, and the roofs are covered with reeds or leaves. Their furniture consists of a few baskets, to put their necessities in. There are a great many petty kings, whose riches consist in cattle and slaves, and they are often at war with each other. Great quantities of iron and steel are found throughout the island; as also three sorts of gold. The rivers and brooks are rich in various kinds of precious stones. The productions of the island are, the raven, a kind of palm-tree known only in Madagascar, the top of which is prepared and eaten like a cabbage palm, and of the ribs of its leaves they form the walls of their houses; rice, barley, sugar-canes, white pepper, ginger, cocoa-nuts, grapes, saffron, several kinds of gums, five different kinds of honey, and a variety of plants unknown to Europeans. Buffaloes run in herds, and there are great numbers of sheep, whose mutton is finely tasted, as well as goats, kids, and other kinds of useful quadruped animals, but neither elephants, tigers, lions, nor horses. Large crocodiles, monkeys, wild boars, cameleons, lizards, locusts, insects, birds, and fish, are numerous. The chief employment of the inhabitants is in building, in gold and iron works, making of earthenware, spinning, weaving, cordage, fishing, hunting, and mostly in agriculture. The language has a great affinity with the Arabic, the Arabs having made a conquest of the island about 300 years ago. The French have frequently attempted to settle here, but have always been driven hence. There are only some parts on the coasts yet known. Lat. from 12. 0. to 25. 30. S. lon. from 44. 30. to 50. 30. E.

MA'DAM, *s.* [ma dame, Fr. my lady] a term of compliment to women of every degree.

MA'DBRAIN, or MA'DBRAINED, *a.* disordered in mind; hot-headed.

MA'DCAP, *s.* a madman; a wild, hotbrained person.

To MA'DDEN, *v. n.* to become wild, furious, or mad. Actively, to make mad; to enrage, or make furious.

MA'DDER, *s.* a plant, with oval perennial leaves, smooth on the upper surface, and four at each joint of the stem; the blossoms are yellow. The great bastard and crosswort madder are species of goosegrass. The little field madder is a species of redwort.

MADE, *part. pret.* of MAKE.

MADEFA'CTION, *s.* [from *madefacio*, Lat.] the act of making wet.

To MA'DEFY, *v. a.* [*madefio*, Lat.] to moisten; to make wet.

MADE'IRA, an island of the Atlantic Ocean, principal of a group called the Madeiras, and subject to the Portuguese. The climate is more temperate than in the Canaries, and the soil more fertile in wine, sugar, fruits, &c. but less so in corn, though infinitely better watered with springs and rivers. Spring and autumn reign here together, and produce flowers and fruit throughout the year. It abounds in every kind of tropical and European fruits; as oranges of all sorts and dimensions, lemons of a prodigious size, bananas, citrons, peaches, nectarines, apricots, figs, plums, melons, apples, and strawberries, that grow wild in the mountains with astonishing profusion; grapes, which are as large as our common plums, and remarkable for their peculiar flavour. The oranges are of a sanguine red: this species is produced from the common orange bud, ingrafted on the pomegranate stock. There is likewise a kind of pear found here, not bigger than a walnut, and very crisp. The sugar-cane is also cultivated with success, though not in any considerable quantity. The cedar-tree is found in great abundance: it is extremely beautiful; most of the ceilings and furniture at Madeira are made of that wood, which yields a very fragrant smell. The dragon-tree is a native of this island, as are also mastic and other gums. Flowers nursed in the English green-houses grow wild here in the fields: the hedges are mostly formed of myrtles, roses, jessamine, and honeysuckle, in everlasting blossom; while the larkspur, the fleur-de-lys, the lupine, &c. spring up spontaneously in the meadows. There are very few reptiles to be seen in the island; the lizard is the most common. Canary-birds and goldfinches are found in the mountains; of the former, numbers are sent every year to England. But Madeira is principally celebrated for its excellent wine, which, moreover, keeps best in the hottest climate under the torrid zone. For this reason the inhabitants of the West India Islands, that can afford it, drink little else; and the Madeira wine that is brought to England is thought to be worth little, unless it have first made a voyage to the East or West Indies. These wines are of different kinds, differing both in taste, colour, and strength. The exports of this article, and the profits on it, are immense, and bring a large revenue to the king of Portugal. In Madeira are made the finest sweetmeats in the world; all kinds of fruits being here candied in the most exquisite perfection. Madeira is well watered and peopled; the inhabitants are good-natured, sober, frugal, and indolent. Funchal is the capital of this island, which is about 150 miles in circumference, and lies in 16 deg. W. lon. and 13 deg. N. lat.

MA'DELEY, a town in Shropshire, situated near the iron bridge in Colebrook Dale, 8 miles N. N. W. of Bridgenorth, and 143 N. W. of London.

MA'DEMOISELLE, *s.* a French appellative, given properly to the wives of gentlemen, but now generally to the younger and unmarried women.

MA'DHOUSE, *s.* a house where mad people are cured or confined.

MA'DID, *a.* [*madidus*, Lat.] wet, moist, damp.

MA'DLY, *ad.* in a furious, raging, or lunatic manner.

MA'DMAN, *s.* a person deprived of the use of reason.

MA'DNEP, *s.* a plant of which there are two sorts, one called cow's parsnep, and the other with narrow leaves called the jagged madnep.

MA'DNESS, *s.* a disordered understanding; the state of a person out of his senses; fury, wildness, or rage.

MADRA'S, or *Fort St. George*, called by the natives *China-patam*, a fort and town of the peninsula of Hindoostan, on the coast of Coromandel, built in the reign of Charles II. by order of the English East India Company, under the superintendence of Sir William Langhorn; some writers, however, assert, that it was first settled in 1640, and afterwards enlarged in the reign of Charles II. It is the principal settlement of the English on the E. side of the peninsula, and is a fortress of very great extent, including within it a regular well-built city. It is close on the margin of the sea, from which it has a rich and beautiful appearance; the houses being covered with a stucco called chunam, which in itself is nearly as compact as the finest marble, and, as it bears as high a polish, is equally splendid with that elegant material. There is a second city, called the Black Town, nearly 4 miles in circuit, separated from Madras by the breadth of a proper esplanade only. Madras, in common with all the European settlements on this coast, has no port for shipping; the coast forming nearly a straight line; and it is incommoded also with a high and dangerous surf. The citadel here, which was planned by Mr. Robins, and is situated in the Middle of the White, or English Town, is one of the best fortresses in possession of the British nation. The town is also encompassed with a strong wall, of the same stone with which the citadel is built, defended by batteries, bastions, half-moons, and flankers; the whole mounted with upwards of 200 pieces of cannon and mortars. Opposite the west gate of the citadel are barracks, and a convenient hospital for the company's soldiers; and at the other end of the barracks is a mint, where the company coin gold and silver. Madras was first settled by the English in 1640, and greatly enlarged in the reign of Charles II. It was taken by the French in 1746, but restored by the treaty of Aix-la-Chapelle. Lat. 13. 5. N. lon. 80. 30. E.

MA'DRID, the capital of Spain, in New Castile, situated on the Manzanares, the banks of which, in the environs, afford an agreeable shade, coolness, and verdure. It was formerly an obscure place, belonging to the archbishop of Toledo; but the purity of the air engaged Charles V. and his successors, to chuse it for their residence. It is seated in a large plain, surrounded by high mountains, but has no wall, rampart, or ditch. The houses are all built with brick, and the streets are long, broad, and straight, and adorned at proper distances with handsome fountains. There are above 100 towers or steeples, in different places, which contribute greatly to the embellishment of the city. The royal palace is built on an entrance, at the extremity of the city. The finest square in Madrid is the Placa Mayor, which is spacious and regular, surrounded with 136 houses, five stories high, and of an equal height. Every stage is adorned with a handsome balcony, and the fronts are supported by columns, forming a piazza round the square. Here the market is held, and here they had their famous bull-fights. However, it is observable, that the very finest houses have no glass windows, they being only lattices. The Parade, which is the public airing place, is shaded with regular rows of poplar trees, and is watered with 23 fountains. Here the stately Spaniards make the most brilliant display of their finery. Philip II. built a large and magnificent bridge over

the river; which river being exceedingly small, has occasioned a great many jokes. The city of Madrid contains 15 gates, 18 parishes, 35 convents of monks, and 31 of nuns; 39 colleges, hospitals, or houses of charity, 7398 dwelling-houses, and about 160,000 inhabitants. There are four academies in Madrid; the Academy of Belles Lettres; the Academy of Spanish Historical Monuments; the Academy of the Fine Arts, Painting, Sculpture, and Architecture; and the Academy of Medicine; which last is held in no great esteem. Lat. 40. 25. N. lon. 3. 32. W.

MA'DRIER, *s.* in War, is a thick plank, armed with iron plates, having a cavity sufficient to receive the mouth of the petard when charged, with which it is applied against a gate, or other thing intended to be broken down.

MA'DRIGAL, *s.* [*madrigal*, Span. and Fr.] originally a pastoral; at present, a little amorous poem or song, containing a certain number of unequal verses, not confined either to the scrupulous regularity of a sonnet, or the subtilty of an epigram, but consisting of some tender and delicate, yet simple thought properly expressed.

MA'DWORT, *s.* a plant with purple blossoms; called also small wild bugloss, great goosegrass, and German madwort.

MA'ELSTROM, a very extraordinary and dangerous whirlpool on the coast of Norway, in lat 68. deg. N. Of the situation of this whirlpool we have the following account from Jonas Ramus: "The mountain of Helfeggen, in Lofoden, lies a league from the island of Ver, and betwixt these two runs that large and dreadful stream, called Moskoestrum, from the island Moskoe, which is in the middle of it, together with several circumjacent isles, as Ambaaren, half a quarter of a league northward, Ifesen, Hoeholm, Kieldholm, Suarven, and Buckholm. Moskoe lies about half a quarter of a mile south of the island of Ver; and betwixt them these small islands, Otterholm, Flimem, Sandflesen, and Stockholm. Betwixt Lofoden and Moskoe, the depth of the water is between 36 and 40 fathoms; but on the other side, toward Ver, the depth decreases so as not to afford a convenient passage for a vessel, without the risk of splitting on the rocks, which happens even in the calmest weather. When it is flood, the stream runs up the country between Lofoden and Moskoe with a boisterous rapidity; but the roar of its impetuous ebb to the sea is scarce equalled by the loudest and most dreadful cataracts, the noise being heard several leagues off, and the vortices or pits are of such extent and depth, that if a ship comes within its attraction, it is inevitably absorbed, and carried down to the bottom, and there beat to pieces against the rocks; and when the water relaxes, the fragments thereof are thrown up again. But these intervals of tranquillity are only at the turn of the ebb and flood, in calm weather, and last but a quarter of an hour, its violence gradually returning. When the stream is most boisterous, and its fury heightened by a storm, it is dangerous to come within a Norway mile of it; boats, ships, and yatches having been carried away, by not guarding against it before they were within its reach. It likewise happens frequently, that whales come too near the stream, and are overpowered by its violence, and then it is impossible to describe their howlings and bellowings, in their fruitless struggles to disengage themselves. A bear once attempting to swim from Lofoden to Moskoe, with a design of preying upon the sheep at pasture in the island, afforded the like spectacle to the people; the stream caught him, and bore him down, while he roared terribly, so as to be heard on shore. Large stocks of firs and pine trees, after being absorbed by the current, rise again, broken and torn to such a degree as if bristles grew on them. This plainly shews the bottom to

consist of craggy rocks, among which they are whirled to and fro. The stream is regulated by the flux and reflux of the sea; it being constantly high and low water every six hours. In the year 1645, early in the morning of Sexagesima Sunday, it raged with so much noise and impetuosity, that on the island of Moskoe, the very stones of the houses fell to the ground."

MA'ESTRICHT, a large, ancient town of the Netherlands, formerly belonging to the duchy of Lorrain. It was afterwards united to the duchy of Brabant, although insulated in the bishopric of Liege. The town-house and other public buildings are handsome, and the place is so well defended by detached bastions, horn-works, entrenchments, numerous redoubts, ravelins, a good covered way, &c. that it is justly reckoned one of the strongest fortresses in Europe. Near it are large stone quarries, in which are subterraneous passages of great extent, capable of containing 40,000 persons. It is seated on the river Maese, which separates it from Wyck, and with which it communicates by a handsome bridge, 46 miles E. of Brussels. It was, till lately, capital of the department of the Lower Meuse. Lat. 50. 51. N. lon. 5. 46. E.

MAGAZINE, *s.* [*magazine*, Fr.] a store-house; generally applied to an arsenal, or place wherein military stores are laid up; a miscellaneous pamphlet, so called from a periodical miscellany, or collection of various pieces, generally published monthly.

MAGE, *s.* [*magus*, Lat.] a magician.

M'AGDALEN, *s.* a name applied to a penitent prostitute. Magdalen-houses, or hospitals, are places set apart for the reception of such. It is supposed, however, by some, that there is not sufficient authority from the history of Mary Magdalen in Scripture to apply this epithet.

MA'GDEBURG, a large, well-built, and trading town of Lower Saxony, capital of a duchy of the same name. In the cathedral is a superb mausoleum of Otho the Great. The cathedral square is ornamented with large elegant houses, and its area is well paved. Here are different manufactories of cotton and linen goods, stockings, hats, beautiful leather gloves, tobacco and snuff; but the principal are those of woollen and silk. It is happily situated for trade, having an easy communication with Hamburg by the Elbe, and lying on the road between Upper and Lower Germany. It was taken by storm, in 1631, by the imperial general Tully, who burnt the town, and massacred the inhabitants, of whom only 800 escaped out of 40,000; and many young women plunged into the Elbe to escape violation. It is strongly fortified, having, among other works, a citadel seated on an island in the river Elbe, and is 120 miles S. E. of Hamburg. Lat. 52. 11. N. lon. 11. 45. E.

MA'GDEBURG, a duchy in Lower Saxony, about 60 miles in length and 30 in breadth, lately subject to the king of Prussia. In 1703, it contained 35 towns and 431 villages. It produces fine cattle, and the country affords several mines of pit-coal; and the salt springs are so rich, that they are able to supply all Germany with that commodity.

MAGE'LLAN, a famous straight of South America, discovered in 1520 by Ferdinando Magellan, a Portuguese in the service of Spain. It has many safe harbours in it, with narrow entrances, and vast large bays, sheltered so closely on all sides by high mountains, that ships may ride safely in them without the least anchor. The Spaniards call the country to the N. of the Strait, Terra Magellanica, and reckon it part of Chili. They had a fort and garrison upon this straight, but the men all perished through cold and want of provisions.

MA'GGOT, *s.* [*magrod*, Brit.] a small kind of worm

of a whitish colour, found in nuts, &c. which turns into a fly. Figuratively, a whimsey; caprice; an odd fancy.

MA'GGOTTINESS, *s.* the state of having, or abounding, with maggots.

MA'GGOTTY, *a.* full of maggots. Figuratively, whimsical; capricious; fantastical; fanciful. **SYNON.** *Fantastical*, implies a rambling from true taste, through excess of delicacy, or an unseasonable search after something better. *Whimsical*, means an affectation of singularity. By *maggotty* is understood a great inconstancy, or sudden change of taste. *Fanciful*, implies a certain revolution of humour, or a particular way of thinking.

MA'GI, *s.* [Persian] a title given to the ancient philosophers among the Persians, who were the chief personages in the kingdom, and had the whole management of public affairs.

MA'GIC, *s.* [*magicus*, Lat.] in its primary sense, the doctrine of the ancient magi among the Persians; the knowledge of the secret operations of the powers of nature, or a science which teaches to produce surprising and extraordinary effects. A correspondence with bad spirits, by means of which a person was able to perform surprising things; sorcery.

To **MAGNIFY**, *v. a.* [*magnifico*, Lat.] to make great; to extol with praise; to exalt; to elevate or raise higher in esteem. In Optics, to make a thing appear larger than its real apparent size.

MAGNITUDE, *s.* [*magnitudo*, Lat.] greatness, applied to size; comparative bulk; size. Grandeur or sublimity, applied to sentiment.

MAGPIE, *s.* a bird partly-coloured with black and white, sometimes taught to talk. Figuratively, a person who talks to excess.

MAHO'GANY, *s.* a well-known wood, in great esteem for its beauty and durability, the produce of a species of the cedar-tree, brought from Honduras and other parts.

MAHOMETANISM, *s.* the system of religion broached by Mahomet, and still adhered to by his followers. See **ALCORAN**.

MAHRA'TTAS, the name of two large states of India, which derive their name from Mahratt, an ancient province of the Deccan. They are called the Poonah, or Western Mahrattas; and the Berar, or Eastern. Collectively, they occupy all the southern part of Hindoostan Proper, with a large proportion of the Deccan. Malwa, Candeish, Visiapour, and part of Orissa; the principal parts of Berar, Guzerat, and Agimere; and a small part of Dowlatabad, Agra, and Allahabad; are comprised within their extensive empire, which extends nearly from sea to sea, across the widest part of the peninsula; and from the confines of Agra northward, to the river Kistna southward; forming a tract of about 1000 miles long, and 700 broad. The western state, the capital of which is Poonah, is divided among a number of chiefs, or princes, whose obedience to the paishwa, or head, like that of the German princes to the emperor, is merely nominal at any time; and, in some cases, an opposition of interests begets wars, not only between the members of the empire themselves, but also between the members and the head. Nagpour is the capital of the Eastern Mahrattas. Both these states, with the Nizam of

the Deccan, were in alliance with the English East India Company, in the war against the late Tippoo Sultan, from whose territories, on the termination of the war, they have all gained great acquisitions.

MAID, or **MAIDEN**, *s.* [*mæden*, Sax.] a virgin; a woman-servant. A fish, a species of skate.

MAIDEN, *a.* consisting of virgins; fresh; new; unused; unpolluted.

MAIDEN, *s.* an edged instrument formerly used in some countries, particularly Scotland, for the beheading of criminals. It appears to have been revived in the machine used by the French, and called the guillotine.

MAIDENHAIR, *s.* in Botany, a genus of the ferns. The great golden maidenhair is a species of the hairmoss.

MAIDENHEAD, or **MAIDENHOOD**, *s.* the state or condition of a maid or pure virgin; virginity. Figuratively, newness; freshness; an unpolluted state.

MAIDENHEAD, anciently *South Ealington*, a town of Berkshire, seated on the Thames, on the great western road, carrying on a great trade in malt, meal, and timber, in their barges, to London. It is 12 miles E. by N. of Reading, and 26 W. of London. Market on Wednesday.

MAIDENLIP, *s.* an herb.

MAIDENLY, *a.* like a maid; modest; gentle; timorous.

MAIDMARIAN, *s.* a kind of dance, so called from a buffoon dressed like a man, who plays tricks.

MAIDSERVANT, *s.* a woman or female servant.

MAIDSTONE, a considerable borough of Kent, which contains 9443 inhabitants. It is a large place, consisting of four principal streets, which intersect each other at the market-cross, with a jail and county hall. In the ancient Britons' time, it was reckoned their third chief city, having been a station of the Romans. By means of the Medway, it enjoys a brisk trade in exporting timber, flour, apples, nuts, and other commodities of the county, particularly hops, of which there are numerous plantations around it, as well as orchards of cherries. Here are likewise some capital paper-mills, and a manufactory of linen thread, originally introduced by the Flemings. The tide flows quite up to the town, and brings up barges of 50 or 60 tons. It is seated on the river Medway; 9 miles S. of Rochester, 20 W. of Canterbury, and 34 S. E. by E. of London. Market on Thursday, and another market on the second Tuesday in every month.

MAJESTIC, or **MAJESTICAL**, *a.* august; noble; great; stately; pompous; sublime; elevated or lofty.

MAJESTICALLY, *ad.* with dignity or grandeur; with loftiness of style or sentiments.

MAJESTY, *s.* [*majestas*, Lat.] greatness; dignity; power or sovereignty; the title given to kings and queens.

MAIL, *s.* [*maille*, Fr.] a coat of steel net-work worn for defence; an armour; a bag or postman's bundle of letters.

To **MAIL**, *v. a.* to arm, or dress in a coat of mail; to cover as with armour.

To **MAIM**, *v. a.* [*mehaigner*, old Fr.] to cut off any member; to hurt or wound.

MAIM, *s.* the act of cutting off a limb, or disabling a person by a blow.

MAIN, *a.* [*magne*, old Fr.] principal or chief; vast; gross, or containing the chief part.

MAINLAND, *s.* the continent.

MAINLAND, an island of Scotland, and one of the Shetland isles, being the principal of them, is 60 miles

long, and 10 or 12 broad. It is pretty fertile and populous, and the seas abound with excellent fish. Lerwick is the capital.

MAINLY, *ad.* chiefly or principally; greatly or powerfully; hugely; mightily.

MAINMAST, *s.* the chief or middle mast of a ship.

MAINPERNABLE, *a.*ailable.

MAINPERNOR, *s.* a person to whom one in custody is delivered, upon his becoming bound for his appearance; a surety or bail.

MAINPRISE, (the *s* is pronounced like *z*) *s.* [*main* and *pris*, Fr.] in Law, the receiving a person into friendly custody, who otherwise must have gone to prison, on security given that he shall be forthcoming at a certain time or place appointed. It differs from *bail*, because a person is in this case said to be at large from the day of his being mainprised until the day of appearance; but where a person is bailed till a certain day, he is in law always accounted to be in the ward of his bail till that time, who may, if he please, keep him under confinement.

To MAINPRISE, *v. a.* to receive a person into friendly custody, by giving security for his appearance at a certain time appointed.

MAINSAIL, *s.* the sail of the mainmast.

MAINSHEET, *s.* the sheet or sail of the mainmast.

To MAINTAIN, *v. a.* [*maintenir*, Fr.] to preserve or keep; to defend or hold out; to vindicate or justify; to support or keep up; to supply with the conveniences of life; to assert positively.

MAINTAINABLE, *a.* defensible; justifiable.

MAJORCA, an island belonging to Spain, in the Mediterranean sea, between Ivica and Minorca, the largest of those anciently called *Beleares*, about 50 miles in length and 35 in breadth. It is mountainous in the N. and W. parts, but fertile, producing corn, oil, honey, saffron, cattle, fish, rabbits, partridges, deer, wild fowl, horses, &c. The whole island is encompassed with watch-towers. It is temperate and wholesome, but the excessive heat frequently occasions a scarcity. It has no considerable rivers, though there are a great many fine fountains and wells, and several good harbours. The inhabitants are robust, lively, and good sailors. The capital city bears the same name as the island.

MAJOR-DOMO, *s.* [Ital.] one who occasionally holds the place of the master of a house; a master of a family.

MAJOR-GENERAL, *s.* a general officer of the second rank, who receives the general's orders, gives them to the

majors of brigades, and commands on the left when there are two attacks at a siege.

MAJORITY, *s.* [*majoritas*, Lat.] the state of being greater; the greater number; full age; office of a major; ancestry.

MAIZE, *s.* Indian corn, formerly the principal grain in many of the American states.

To MAKE, *v. a.* [preter. and participle passive *made*; *macan*, Sax.] to create; to form of materials; to compose; to do, perform, practise, to use; to cause to have any quality, or bring into any state. To compel, or force, followed by a verb. "*Made to rise.*" Locke. To sell, so as to gain. "*He makes five marks.*" Shak. To make away, to kill or destroy. "*Make away his brother.*" Shak. MAKEPEACE, *s.* one who reconciles persons at variance; a peacemaker.

MAKEWEIGHT, *s.* any thing thrown in to make up weight.

MALA'CCA, called by the ancients the *Golden Chersonesus*, a large peninsula in Asia, bounded on the N. by Siam; and on all other sides by the ocean; about 500 miles in length, and from 60 to 150 in breadth. It produces few commodities for trade, except tin and elephants' teeth; but there are a great many excellent fruits and roots, which yield good refreshment for strangers that call here. The pineapple is the best in the world, and the manjostain is a delicious fruit, in the shape of an apple, whose skin is thick and red. The rambostan is of the size of a walnut, with a very agreeable pulp; and the durian, though it has not a pleasant smell, yet it has a very delicious taste. They have plenty of cocoa-nuts, whose shells will hold an English quart; besides lemons, oranges, limes, sugar-canes, and mangoes. There is but little corn, and sheep and bullocks are scarce; but pork, poultry, and fish, are pretty plentiful. The religion of the natives is a mixture of Mahometanism. Their language is peculiarly soft, and is as common in the Indies as the French is in Europe, being very easily acquired, because it has no inflections either in nouns or verbs. The interior inhabitants, who are for the most part savages, have abandoned themselves, with desperation, to the most ferocious habits, taking delight in doing mischief to their neighbours. The Dutch have been masters of the town of Malacca, situated on the S. W. coast, since 1640, when they took it from the Portuguese, after a six months' siege. While in possession of the latter, it was famous all over India and Europe; being, after Goa and Ormuz, by far the richest city in the

Indies, and a great market for all the different commodities produced in Japan, China, Formosa, Tonquin, Cochin-China, Giam, Lucon, Amboyna, &c. During the late war, it was attacked and taken by the English. Lat. 2. 12. N. lon. 104. 12. E.

MA'LACHI, Ma-la-ki, a canonical book of the Old Testament, and the last of the twelve lesser prophets. This prophet distinctly pointed out the Messiah, who was suddenly to come to his temple, and to be introduced by Elijah the prophet, that is, by John the Baptist, who came in the power and spirit of Elias, or Elijah.

MA'LACHITE, Ma-la-kite, *s.* a stone, sometimes entirely green, but lighter than the nephritic stone, so as to resemble the leaf of the mallow, *μαλάχη*, Gr. from whence it has its name.

To MALA'XATE, *v. a.* [*μαλάσσω*, or *μαλάττω*, Gr.] to soften or make soft any body.

MALAXATION, *s.* the act of softening.

MALDEN, anciently *Camelodunum*, a populous town of Essex, the first Roman colony in Britain, and the seat of some of the old British kings, situated near the confluence of the Chelmer with the Blackwater. Vessels of 400 tons burden come up to the haven to unload; the colliers, however, lie in deep water below the town, and the coals are fetched up in lighters. Malden carries on a considerable trade in corn, coals, iron, wine, brandy, rum, deals, and chalk rubbish. The custom of Borough English is kept up here. It is 10 miles E. of Chelmsford, and 37 N. E. of London. Market on Saturday.

MA'LDIVE ISLANDS, a cluster of islands said to be 1 in number, S. W. of Cape Comorin, in the Indian Sea. The northernmost is in lat. 7. 6. N. lon. 73. 4. E. The principal of them, called Male, about a league and a half in circumference, is the most fertile, and the residence of the prince; it is situated nearly in the centre. These islands are small, and mostly uninhabited. The inhabitants are a mixture of Arabs and Indians of Malabar. They supply vessels with sails and cordage, cocoa-nuts, oil, honey, dry fish, tortoise shell, and especially cowries.

MALE, *a.* [*male*, Fr.] belonging to the he-sex, opposed to female; the he of any species.

MALL, *s.* [*malleus*, Lat.] a stroke or blow. "Give that reverend head a mall." *Hudib.* A mallet. A walk where they formerly used to play with malls and balls, (and then pronounced *mell*) whence the *mall* in St. James's Park, and *Pall-mall* near his majesty's palace at St. James's. In this last sense the word is derived from *moll*, Isl. a walk paved with shells.

To MALL, *v. a.* to beat or strike with a mall. See MAUL.

MA'LLARD, *s.* [*malart*, Fr.] the drake or male of the species of wild ducks.

MALLEABILITY, *s.* the quality of bearing to be beaten, and spreading under the strokes of the hammer.

MA'LEABLE, *a.* [*malleable*, Fr.] capable of enduring the strokes of a hammer, and being variously formed thereby.

MA'LEABLENESS, *s.* the quality of being hammered into various forms.

To MA'LEATE, *v. a.* [from *malleus*, Lat.] to hammer; to forge or shape by the hammer.

MA'LLET, *s.* [*malleus*, Lat.] a wooden hammer.

MALLING, a town in Kent with a market on Saturday. It is 6 miles W. of Maidstone, and 29 E. by S. of London.

MALLOWS, *s.* [*mælewe*, Sax.] There are several species of this plant; the small, dwarf, common, vervain, and musk mallows, are the only species native in England, properly so called. The sea-tree mallow, is a species of the *lavatera* of Linneus.

MALMSBURY, originally *Maidulphsburgh*, and by corruption Malmsbury; in an ancient manuscript, however, called *Adhelmsbirig*, an ancient town in Wiltshire, which drives a considerable trade in the woollen manufacture. It was long famous for its abbey, which flourished in great wealth, exceeding all in the county in size, revenues, and honour. Its abbot was mitred, and sat in parliament. The memory of Aldhelm, its first abbot, the favourite of the great Saxon king Athelstan, and whom he procured to be canonized after his death, is still kept up by a meadow near this town, called *Aldhelm's Mead*. King Athelstan amply endowed the abbey, granted the town large immunities, and chose it for his burying-place; he was buried accordingly under the high altar of the church, and his monument still remains in the nave of it. It is pleasantly situated on the river Avon, which almost surrounds it, and over which it has six bridges, 26 miles E. by N. of Bristol, and 95 W. of London. Market on Saturday.

MALMSEY, *s.* [so called from *Malvasia*, where it is produced] a luscious wine; sack.

MALO, ST. a sea-port in the department of Ille and Vilaine, on a small island, united to the main land by a narrow mole or causeway, 6 or 700 yards in length: it has a large well-frequented harbour, but difficult of access, on account of the rocks that surround it, and is a rich trading place, strong by nature and art towards the sea, and defended by a citadel. It is 206 miles N. W. of Paris. Lat. 49. 39. N. lon. 1. 57. W.

MALPAS, a town of Cheshire, with a market on Monday. It is 12 miles S. E. of Chester, and 166 N. E. of London.

MALPLAQUET, a village of the late Austrian Hainault, famous for the dearly purchased victory, gained Sept. 11th, 1709, by the allies under the duke of Marlborough and prince Eugene, over the French, commanded by the marshals Villars and Boufflers. The confederates took 40 colours and standards, 16 pieces of artillery, and a great number of prisoners. It is 8 miles S. E. of Mons.

MALT, *s.* [*mealt*, Sax.] barley steeped in water till it sprouts, and then dried in a kiln.

MALTA, an island in the Mediterranean, between Africa and Sicily, 20 miles in length, and 12 in its greatest breadth. It was anciently little less than a barren rock; but such quantities of soil have been brought from Africa and Sicily, that it is now become fertile. It has excellent vines, lemons, fruits, cotton, plenty of honey, good pastures, considerable fisheries, sea-salt, and a profitable coral fishery. However, they sow but little corn, because they purchase it cheap in Sicily; and the island is deficient in wood. The number of inhabitants is variously estimated at from 60 to 90,000, who speak a corrupt Arabic, and, in the towns, Italian. After the taking of Rhodes, the emperor Charles V. gave this island to the knights of St. John of Jerusalem. It was attacked by the Turks in 1565, who, after many dreadful assaults, from the 18th of May to the 13th of September, were obliged to abandon the enterprise, after having expended 78,000 great shot, and lost about 24,000 men. The Christians lost about 5000 men. The whole of this island is extremely well fortified. Malta was taken by Bonaparte on his way to

Egypt, in 1798, but was afterwards retaken by the English, and still remains in their possession, though by the articles of the peace, in 1802, it was to have been restored to the knights of St. John of Jerusalem. It is about 60 miles S. S. W. of Cape Passaro, in the island of Sicily. Lat. 35. 54. N. lon. 14. 34. E.

MALTMAN, or **MALTSTER**, *s.* one who makes or deal in malt.

MALTON, a borough town in the North Riding of Yorkshire, seated on the river Derwent, which was made navigable to the Ouse, by an act in the 1st of Queen Anne. It is composed of two towns, the New and the Old; containing about 5000 inhabitants. It is 18 miles N. E. of York, and 213 N. by W. of London. Markets on Tuesday and Saturday.

MAN, *s.* [plural *men*; *man*, *mon*, Sax.] a human being; a male, opposed to a woman. A person full grown, opposed to a boy. A rational creature, opposed to a beast. Used, in a loose sense, for *any one*. "A man would expect to find." *Addis.* A moveable piece of wood, used in playing at chess or draughts. A male servant, of *mona*, Span. a slave. A *man of war*, is a ship of war.

To **MAN**, *v. a.* to furnish, supply, or guard with men. Figuratively, to fortify or strengthen.

MAN, an island in the Irish Sea, W. of the coast of Cumberland, about 30 miles in length, and from 8 to 15 in breadth. It contains 17 parishes, called kirks, and the chief towns are Ramsay, Douglas, and Peel. The soil varies in different tracts, yet produces more corn than is sufficient to maintain the natives. The air, which is sharp and cold in winter, is healthy, and the inhabitants live to a very great age. The commodities of this island are black cattle, wool, fine and coarse linen, hides, skins, honey, tallow, and herrings. The frosts here are short, and the snow, especially in lands near the sea, lies not long on the ground. Their cattle and horses are small, and they have badgers, foxes, eagles, and mottled hawks. Here are several quarries of stone and thin blue slate, and some mines of lead, copper, and iron. Thin oat cakes are the common bread of the inhabitants. About the rocks of the island breed an incredible manner of all sorts of sea-fowl, and especially on the

Calf of Man, an island 3 miles in circuit, before the S. promontory of Man, and separated from it by a channel 2 furlongs broad. On this little island 5000 young puffins are generally taken every year. The bishop is nominated by the duke of Athol, as heir of the eldest branch of the Stanleys, earls of Derby; but the sovereignty of the island was purchased by the English government in 1765, whereby a free trade was permitted with England, and an entire stop put to the clandestine trade which they carried on, with prodigious success, with England and Ireland. He was formerly reckoned a baron, but does not sit in the house of peers, although he is allowed the highest seat in the lower house of convocation. The language is a dialect of the Erse. In its civil government, the island is divided into six sheedings, each having its proper coroner, who is entrusted with the peace of his district, and acts in the nature of a sheriff. It is 12 miles S. E. of Scotland, 30 N. of Wales, 35 W. of England, and 40 E. of Ireland.

To **MA'NACLE**, *v. a.* to chain the hands; to shackle.

MA'NACLES, *s.* [*manicles*, Fr.] chains for the hands; shackles.

To **MA'NAGE**, *v. a.* [*menager*, Fr.] to conduct or carry on; to train a horse to graceful airs; to govern; to rule or make tractable; to husband, or make the best of. Neuterly, to superintend or transact.

MANCHE, *s.* [Fr.] in Heraldry, a sleeve.

MA'NCHESTER, (anciently a Roman station called *Man-cunum*) a large, populous, manufacturing town of Lancashire, containing, with Salford, &c. upwards of 150,000 inhabitants. Manchester has been the scene of some remarkable events, in the disputes between Charles I. and his parliament. It is a place of great antiquity, and in the time of Camden was famous for its population, market, and manufactures of stuffs; but it is now principally conspicuous as the centre

of the cotton trade, an immense business, extending, in some or other of its operations, from Furness (where great cotton spinning-mills have been established) to Derby north and south, and from Leeds to Liverpool east and west. The labours of a very populous neighbourhood are collected at Manchester, whence they are sent to London, Liverpool, Hull, &c. These consist of a great variety of cotton, silk, linen, and mixed goods, fitted for every market, both at home and abroad, and spreading over a great part of Europe, America, and the coast of Guinea, and bringing back vast profits to the country. To such perfection has the machinery for the spinning of cotton been brought here, that of one pound of that material 300 hanks of yarn have been spun, each hank containing 840 yards in length, making in the whole 252,000 yards, (upwards of 143 miles long!) The average number of hanks to the pound, however, is supposed to be 100, and the spindles employed in the whole town is stated to be 1,515,500, each producing on an average 10 hanks per week, and making an annual aggregate of 377,411,164 miles, sufficient to form a piece of muslin, five quarters wide, that would encompass the planet we inhabit! The manufacture of ticking, tapes, filleting, and other small wares, of silk goods, and of hats, is also carried on at Manchester; from which various sources of wealth it has attained greater opulence than any other trading town in England. Its buildings (especially the more modern ones) are on a proportional scale of size and elegance. Its chief ornaments are, the Collegiate Church, a venerable pile, with a handsome tower, 8 capital bells, and a set of chimes; having a warden, four fellows, two chaplains, and two clerks:—contiguous to this is Chetham's Hospital, (commonly called the College,) for clothing, educating, and apprenticing 80 boys; to which is also attached a public library, containing 15,000 volumes.—Also the Infirmary, Dispensary, Lunatic Hospital and Asylum, Lying-in-Hospital, House of Recovery for patients afflicted with fevers, and two Poor Houses, are charities highly honourable to the town, and beneficial to their objects. Here is a large prison called the New Bailey. This town abounds with libraries, and literary and philosophical institutions, some of which have attained considerable celebrity. Manchester is governed by a headborough, (called the borough-reeve,) and two constables chosen annually from the most respectable inhabitants, by a jury impannelled by the steward, at the Michaelmas court leet, which is held by the lord of the manor. There are here reckoned 12 churches, and several chapels, of the established religion, and a great number of chapels belonging to every denomination of dissenters. By the river Irwell, over which it has a very ancient stone bridge, it has a communication with the Mersey, and all the late various extensions of inland navigation. It is situated upon the rivers Irk, Medlock, and Irwell, about 7 miles from the junction of the latter with the Mersey, and 185 (by Congleton) N. N. W. of London.

MA'NCHE, *s.* a small loaf of fine bread.

MANCHINEE'L, *s.* [*manchinella*, Span.] a tree which is a native of the West Indies, and grows to the size of an oak; its wood is of a beautiful grain, will polish well, and last long, and is therefore much esteemed; in cutting down these trees, the juice of the bark must be burnt out before the work is begun; for it will raise blisters on the skin, and burn holes in linen; and if it should fly into the eyes of the labourers, they are in danger of losing their sight. The fruit is of the colour and size of the golden pippin; many Europeans have suffered, and others lost their lives, by eating it. The leaves abound with juice of the same nature; cattle never shelter themselves, and but few

vegetables grow, under their shade; yet goats eat this fruit without injury.

To MA'NCIPATE, *v. a.* [*mancipo*, Lat.] to enslave, bind or tie, used with *to*. Seldom used.

This, in 1738, was confirmed to them by treaty, and a distinct portion of land allowed them for their residence; but as their friendship was never sincere, a general revolt took place in 1795, which (by help of blood-hounds!) was quelled in the following year, the when 600 of them were transported to Halifax in North America.

MARQUESAS, a group of islands in the South Sea, first discovered by Mendana, a Spaniard, in 1595. They are 5 in number, and named St. Christiana, Magdalena, Dominica, St. Pedro, and Hood. Captain Cook lay some time at the first of these, in 1774. The natives are of a tawny complexion, but look almost black, from being punctured over the whole body. They go almost naked, having only a small piece of cloth, perfectly resembling that made by the people of Otaheite, round their waist and loins. Their beard and hair are of a fine jet black, like those of the other natives of the torrid zone. The island, though high and steep, has many valleys, which widen towards the sea, and are covered with fine forests to the summits of the interior mountains. The products of these islands, are bread-fruit, bananas, plantains, cocoa-nuts, scarlet beans, paper mulberries, of the bark of which their cloth is made, causerinas, with other tropical plants and trees, and hogs and fowls. They have also plenty of fish. Captain Foster says, he never saw a single man deformed, or even ill-proportioned, among the natives; all were strong, tall, well-limbed, and active in the highest degree. Their arms were clubs and spears; and their government, like that of the Society Islands, monarchical. But they were not quite so cleanly as the inhabitants of the Society Islands. The drink of the

Marquesans is purely water, cocoa-nuts being rather scarce. Their music, musical instruments, dances, and canoes, resemble those of Otaheite. Lat. 9. 55. S. lon. 139. 9. W.

To **MARRY**, *v. a.* [*marier*, Fr.] to join a man and a woman together, so that they may cohabit lawfully during life; to dispose of in marriage; to take a husband or wife. Neuterly, to enter into the state of marriage.

MARS, *s.* in the Solar System, is one of the superior planets. His distance from the sun is computed to be near 145 millions of miles, and by proceeding at the immense rate of about 55,000 miles every hour in his orbit, goes round him in 686d. 22h. 18m. 27 $\frac{1}{10}$ s. which is his periodic revolution. He moves from one fixed star to the same again in 686d. 23h. 30m. 43 $\frac{1}{10}$ s. and from aphelion to aphelion in 686d. 23h. 57m. 57s. the former being called his sidereal, the latter his anomalistic period. His synodic revolution, or space of time between each of his conjunctions with the sun, is completed in 779d. 22h. 28m. 26s. at a mean rate. His diameter is 5340 miles, and by moving at the rate of 680 miles an hour at his equator, makes a complete turn round his axis in 24h. 39m. 22s. which is easily deducible from dark spots on his disk. His year consists of 668 $\frac{1}{2}$ of such days. Dr. Herschel has determined the obliquity of his ecliptic to be 28° 42', only 5° 14' greater than the Earth's; and also that his polar diameter is somewhat shorter than his equatorial, the former being to the latter as 98 to 103, or as 1272 to 1355. His solid contents is about $\frac{30}{1000}$ of the earth's, and density $\frac{12.2}{1000}$ of the same. The place of his aphelion, anno 1800, was in 20° 24' 14" of Virgo, and ascending node in 18° 10' of Taurus; the motion of the former being 1° 51' 40", and of the latter 1° 6' 40", in 100 years. The inclination of his orbit to the plane of the ecliptic, or his greatest heliocentric latitude, is 1° 51'; but his greatest geocentric latitude, on account of his proximity to the earth, amounts sometimes to 4° 45'. His eccentricity is 14,208 of those parts of which the earth's distance from the sun is 100,000 and the greatest equation of his orbit 10° 41' 47". On account of his great eccentricity, the length of time he is retrograde in a synodic revolution varies from 59 to 83 days, the arc of retrogradation in the former case, as the

planet is in perihelio, being about 10°, and in the latter about 19°. Besides those dark spots on his disk from which the time of his rotation on his axis is determined, former astronomers have taken notice of very large bright ones about both his poles; and these observations have now been confirmed by Dr. Herschel, who has likewise discovered that the centres of them are nearly in his poles, and that they cover very great portions of his polar regions. His other observations concerning these spots, and other peculiarities of this planet, are expressed in the following words: "The analogy between Mars and the Earth is perhaps by far the greatest in the whole Solar System. Their diurnal motion is nearly the same, the obliquity of their respective ecliptics not very different: of all the superior planets he is by far the nearest alike to that of the Earth; nor will the length of the Martial year appear very different from what we enjoy, when compared to the surprising duration of the years of Jupiter, Saturn, and Georgium Sidus. If then we find that the globe we inhabit has its polar regions frozen, and covered with mountains of ice and snow that only partly melt when alternately exposed to the sun, I may well be permitted to surmise, that the same causes may probably have the same effect on the globe of Mars; that the bright polar spots are owing to the vivid reflection of light from frozen regions; and that the reduction of those spots is to be ascribed to their being exposed to the sun. In the year 1781, the south polar spot was extremely large, which we might well expect, as that pole had but lately been involved in a whole twelvemonth's darkness and absence of the sun; but in 1783, I found it considerably smaller than before, and it decreased continually from the 20th of May, till about the middle of September, when it seemed to be at a stand. During this last period the south pole had already been above eight months enjoying the benefit of summer, and still continued to receive the sunbeams, though, towards the latter end, in such an oblique direction as to be but little benefited by them. On the other hand, in the year 1781, the north polar spot, which had then been its twelvemonth in the sunshine, and was but lately returning into darkness, appeared small, though undoubtedly increasing in size." It has probably a considerable atmosphere; for besides the permanent spots on its surface, Dr. Herschel has often perceived occasional changes of partial bright belts, and also once a darkish one in a pretty high latitude; alterations which we can attribute to no other cause than the variable disposition of clouds and vapours floating in the atmosphere of the planet. Among Chemists, it denotes iron, as supposed to be under the influence of that planet. With Astrologers, it is the producing cause of wars, troubles, &c. In the Heathen Mythology, the god of war.

MARS, **MARSH**, or **MAS**, in the names of places, are derived from *merse*, Sax. a fen or watery place.

MARSEILLES, a flourishing sea-port in the department of the Mouths of the Rhone, formerly an episcopal see. It was so celebrated in the time of the Romans, that Cicero styled it the Athens of Gaul, and Pliny called it the Mistress of Education. It is seated on the Mediterranean, at the upper end of a gulf, covered and defended by many small islands, and is divided into the Old Town or the City and the New Town. The armoury contains arms for 40,000 men. Here is also a large arsenal, well stored with all the implements for building and fitting out the galleys; but the harbour is not deep enough for men of war. The inhabitants are estimated at 90,000. With respect to commerce, Marseilles has been eminent since the days of antiquity, and has been sometimes called Europe in Miniature, on account of the variety of dresses and languages. In 1649, the plague

raged with great violence in Marseilles, and with still greater in 1720, 1721, and 1722, when it carried off 50,000 of the inhabitants. During this last dreadful visitation, M. de Belfunce, (the "Marseilles good bishop," celebrated by Pope) the canon Bourgeret, the magistrate Moustier, and the commandant Langeron, by their intrepid and indefatigable humanity, did the most signal honour to themselves and to human nature. Marseilles is 18 miles N. W. of Toulon, and 362 S. by E. of Paris. Lat. 43. 18. N. long. 5. 27. E.

MARSH, *s.* [*merse*, Sax.] a fen, bog, swamp, or tract of land abounding in water.

MARSHFIELD, a town of Gloucestershire, with a market on Tuesday, seated on the Coteswold hills, 11 miles E. of Bristol. It is distant 102 miles W. of London.

MARSHAL, *s.* [*mareschal*, Fr.] the chief officer of an army. See MARESCHAL. An officer who regulates combats in the lists; any one who regulates the rank or order at a feast or other assembly; one who puts things or persons in proper order; an harbinger, or one who goes before a prince, to give notice of his coming, and prepare for his reception.

To MARSHAL, *v. a.* to place in proper ranks or order; to lead as an harbinger.

MARSHALLER, *s.* a person that puts things in order.

MARSHALSEA, *s.* a prison in Southwark, belonging to the marshal of the king's household.

MARSHALSHIP, *s.* the office of a marshal.

MARSH CISTUS, *s.* the wild rosemary.

MARSHLOCKS, *s.* an herb, the same with the purple marsh cinquefoil.

MARSHMALLOWs, *s.* a plant with simple downy leaves, and purplish white blossoms; found in flower, in salt marshes, in August.

MARSHMOSS, *s.* in Botany, a kind of moss, of which there are not less than 21 kinds native in England.

MARSHWORT, *s.* a plant with oblong egg-shaped leaves and white blossoms, called also the round-leaved water pimpernel.

MARSHY, *a.* boggy; wet; produced in marshes. *SYNON.* Marshy lands are those that lie low, and are watery; boggy lands are those where there are many quagmires.

MART, *s.* [contracted from *market*] a place of public traffic, or trade. Figuratively, a bargain, whether purchase or sale. *Letters of mart*, see MARK.

To MART, *v. a.* to trade; to buy or sell.

MARTEN, or MARTERN, *s.* [*mart*, Fr.] a large kind of weasel, whose skin or fur is much valued; a kind of swallow that builds in houses, from *martelet*, Fr.

MARTIAL, *a.* [*martialis*, Lat.] warlike; brave; given to war; having a warlike show; used in war. In Chemistry, having particles or properties of iron, from *Mars*, the chemical word for iron. Borrowing qualities from the planet *Mars*, applied to Astrology.

MARTIALIST, *s.* a warrior; a fighter.

MARTINET, or MARTLET, *s.* [*martinet*, Fr.] a kind of swallow. In Heraldry, they are represented without feet, and used as a difference or mark of distinction for younger brothers, to put them in mind that they are to trust to the wings of virtue and merit, in order to raise themselves, and not to their feet, they having little land to set their feet on.

MARTINETs, *s.* small lines fastened to the leetch of a sail, to bring that part of the leetch next to the yard-arm close up to the yard, when the sail is to be furled.

MARTINGAL, *s.* [*martingale*, Fr.] a broad leather thong or strap fastened at one end to the girths, under the belly of a horse, from whence it passes between his fore legs, and is fas-

tened at the other end to the noseband of the bridle, to hinder a horse from rearing.

MARTINICO, a considerable island of the West Indies, about 44 miles in length, and 120 in circumference. There are three high mountains, with numerous hills of a conical form, and several rivers and fertile valleys, but they will not bear either wheat or vines; however, the former is not much wanted, for those that are born here prefer cassava to wheat bread. It possesses many natural advantages, and in particular, its harbours afford a certain shelter from the hurricanes. It exports sugar, cocoa, cassia, ginger, cotton, indigo, chocolate, aloes, pimento, tobacco, molasses, preserved fruits, &c, is extremely populous, and has several safe and commodious harbours. The principal places are Fort-Royal, Fort St. Peter, Fort-Trinity, and Fort-de-Mouillage. In 1794, this island was taken by the English, under Sir J. Jervis and Sir C. Grey. It was again taken by the English in 1809; but restored by the treaty of Paris, in 1814. Fort Royal is in lat. 14. 44. N. lon. 61. 11. W.

MARTINMAS, *s.* the feast of St. Martin, Nov. 11th.

MARTYR, *s.* [*μάρτυρ*, Gr.] in its primary sense, a witness; in its secondary sense, a witness of the truth of Christianity; but as the witnessing of the truth was, at first, generally attended with persecution and death, the word is now applied to those only who die in attesting the truth of any doctrine.

To MARTYR, *v. a.* to put to death for resolutely maintaining any opinion.

MARTYRDOM, *s.* the act of putting to death for resolutely and immoveably maintaining any opinion; the act of enduring death, in attestation of the truth of an opinion or fact; the honour of a martyr.

To MARTYRIZE, *v. a.* to offer as a sacrifice.

MARTYROLOGIST, *s.* a writer of martyrology.

MARTYROLOGY, *s.* [*martyrologium*, low Lat.] a register, a catalogue of martyrs; a history of martyrs.

MA'VEL, *s.* [*marveille*, Fr.] a wonder; any thing that raises w. or astonishment.

To MA'VELE, *v. n.* to wonder or be astonished.

MARVELLOUS, *a.* [*marveilleux*, Fr.] capable of exciting wonder or astonishment; strange; surpassing credit. Used substantively, to express any thing exceeding natural power, opposed to *probable*.

MARVELLOUSLY, *ad.* in a strange, extraordinary, and wonderful manner.

MARVELLOUSNESS, *s.* the quality which excites wonder and astonishment.

MARY, daughter of Henry VIII. succeeded to the throne of England on the death of Edward VI. which happened July 6, 1553. There were great struggles made at first by the dukes of Northumberland, Suffolk, and others, in favour of Lady Jane Grey; but that party being quashed, Mary was crowned October 1; and the parliament, which the court had taken care, by all manner of artifices, and even violence, in managing the elections and returns, to have at their devotion, met on the 10th. As to the lords, though they had most of them professed the Protestant religion in the reign of Edward, the greatest part of them appeared zealous Catholics under queen Mary. This parliament immediately repealed the divorce of the queen's mother; by which they a second time declared the princess Elizabeth illegitimate. Then they made void all the laws concerning religion, restored the mass, and brought all things back to the state they were in at the latter end of Henry VIII's reign, Gardiner not thinking it advisable as yet to proceed any further: but the queen was impatient to have the pope's full power, and the nation re-united to the holy see. A marriage being in treaty between the emperor's son, Philip

of Spain, and Queen Mary, the house of commons addressed the queen upon it; at which being offended, she dissolved the parliament. When the parliament was sitting, the convocation decided in favour of transubstantiation, after a sham disputation between the Protestant and Popish clergy; in which the former, who were but six in the house, were run down with numbers and noise, for want of argument. The treaty of marriage between Philip and Mary was signed Jan. 12, 1554. As soon as it was published, murmurs and complaints were every where heard against it; and an insurrection soon broke out, of which the marriage was either the real or the pretended cause. It was concerted between the duke of Suffolk, Sir Thos. Wyatt, and Sir Peter Carew; but it was soon quelled. On Feb. 12, Lady Jane Grey was beheaded, behaving with the utmost resignation and fortitude, after she had seen the headless body of her husband carried along by her from the same execution. And nine days after, the duke of Suffolk, her father, underwent the same fate. In the mean time, Brent, one of Wyatt's captains, was hanged, with 58 of his men; after which, 600 prisoners were brought before the queen, with ropes about their necks, and received her pardon. Wyatt, on his trial, accused the Princess Elizabeth as an accomplice in his conspiracy; but, finding he must die, he cleared her of all on his second examination, as also at the place of execution. However, his accusation occasioned the princess to be sent to the Tower, where she endured a long and severe confinement, and was afterwards removed a prisoner to Woodstock. A parliament was now to be procured, which should approve of the queen's intended marriage, and restore the pope's authority, both of which the major part of the nation was against; and a great many of those who were for the Roman Catholic religion, thought that the pope's authority was by no means necessary to the church. The parliament, meeting on April 2, approved the treaty of marriage between the queen and Philip, who arrived at Southampton, July 19; and they were married by Gardiner on the 25th, Philip being 29 years old, but Mary 38. The same day they were proclaimed king and queen of England, France, and Naples, with other titles. Care was taken, by the articles of marriage, that Philip should have no share in the government of England. The parliament meeting again Nov. 11, Pole was at last sent over, in quality of the Pope's legate, and arrived the 24th. He opened his legation before the king, queen, and both houses of Parliament, telling them, the design of it was to bring back the straying sheep to the fold of Christ. On Nov. 29, the grand work of reconciling the kingdom to the pope was effected. Popery being now fully established, the spirit of it soon appeared in the most violent and bloody persecution against the Protestants. Pole was for reducing them by gentle means, without any force or corporal punishments; but Gardiner's violent counsels were most agreeable to the court, and the rest of the bishops. It was therefore resolved to leave to him the business of extirpating heresy; which he afterwards transferred to Bonner, bishop of London, who was, if possible, more furious and bloody than himself. The first sacrifice of popish zeal and bigotry was Hooper, who had been bishop of Gloucester; and before the end of the year no less than 67 persons were burnt. The so-much-expected deliverance of the queen, which had elated the Romish party to the highest degree, proved only a false conception, which cast them down as much. And king Philip now despairing of issue by his queen, whereby he hoped to have united the monarchies of Spain and England, and growing weary of her, as she was neither young nor handsome, left England on Sept. 4th, to the no small mortification of the queen. Soon

after, Gardiner, bishop of Winchester, died. On March 21, 1555, Cranmer was burnt, and 85 perished in the flames under Bonner's management, who discovered on these occasions more than brutal cruelty. Pole succeeded Cranmer in the archbishopric of Canterbury. The following year 79 Protestants underwent the same fiery trial; nor could the dead escape the effects of popish malice. The bones of Fagius and Bucer were dug up and burnt at Cambridge, after they had been ridiculously cited before the commissioners to give an account of their faith. Whilst the queen and court were wholly intent upon these violent methods for suppressing heresy, they suffered themselves to be seduced by Spanish counsels to a rupture with France. They gained a great victory over the French at St. Quintin; but at the same time they lost Calais, which this nation had been in possession of ever since the reign of Edward III. the duke of Guise making himself master of it in the beginning of the year 1558; as also of Guisnes, and the castle of Hames, which were the only remains of the English conquests in France. The loss of Calais occasioned great uneasiness and murmurings among the people; and the queen herself was so sensibly touched with it, that she told those about her, "That she should die; and if they would know the cause, they must dissect her after her death, and they should find Calais at her heart." She died Nov. 17, 1558, in the forty-third year of her age, when she had reigned five years, four months, and eleven days. In the four years in which the persecution lasted, near 300 persons were put to death, viz. one archbishop, four bishops, 21 divines, eight gentlemen, 84 artificers, 100 husbandmen, servants, and labourers, 26 wives, 20 widows, nine virgins, two boys, and two infants; besides which, several died in prison, and many were whipt, or otherwise cruelly treated. The characteristics of Mary were bigotry and revenge; add to this, she was proud, imperious, froward, avaricious, and wholly destitute of every agreeable qualification.

MARYLAND, one of the United States of America, lying about the N. end of Chesapeak Bay, which divides it into two parts, called the eastern and western shores; bounded on the N. by Pennsylvania, on the E. by the state of Delaware, on the S. E. and S. by the sea and Virginia, and on the W. by the interior country of America. It is 174 miles long, and 110 broad. It is divided into 18 counties, 10 of which are on the western and 8 on the eastern shore of the Chesapeak. The exports are wheat and tobacco, (which are the staple commodities) timber, hemp, flax, and barrelled pork, there being vast numbers of swine, which run wild in the woods, feeding on the mast or nuts of various kinds of trees. The number of inhabitants in 1820 was 407,300. The chief towns are Annapolis and Baltimore. The climate of this province, which in most respects resembles Virginia, is generally mild and agreeable.

MARYPORT, a town in Cumberland, situated at the mouth of the Ellen. It has 80 or 90 sail of shipping, from 50 to 300 tons burden; some of which sail up the Baltic for timber, flax, iron, &c. The coal and coasting trade and ship-building are carried on pretty extensively, and lately an extensive cotton manufactory has been erected. Here is a furnace for cast iron, and one of the finest glass-houses in the British dominions. The inhabitants amount to about 3000. It is 7 miles N. W. of Cockermouth, and 310 N. N. W. of London. Market on Friday.

MASBROUGH, a village in Yorkshire, on the river Don, adjoining the Bridge of Rotherham. Here are considerable iron works, where all sorts of hammered and cast iron goods are made, from the most trifling article to a large cannon, of which great quantities are exported.

MA'SCULINE, *a.* [*masculus*, Lat.] male; resembling a man; bold. In Grammar, the gender appropriated to the male kind, though not always expressing sex.

MA'SCULINELY, *ad.* like a man; boldly.

MA'SCULINENESS, *s.* the quality by which a person resembles a man, applied by way of reproach to women. The figure or behaviour of a man.

MASH, *s.* [*masche*, Belg.] the space between the threads of a net, generally written *mesh*. Any thing mingled or confused together, from *mischen*, Belg. A mixture for a horse.

To **MASH**, *v. a.* [*mascher*, Fr.] to beat or bruise into a confused mass; to mix water and malt together in brewing.

MA'SHAM, a town in Yorkshire, with a market on Wednesday. Distant 223 miles from London.

MASK, *s.* [*masque*, Fr.] a cover over the face to disguise it; a pretext, or subterfuge. A dramatic piece in a tragic style, without attention either to rule or probability.

To **MASK**, *v. a.* [*masquer*, Fr.] to disguise or cover with a mask. Figuratively, to cover or hide under some pretence.

MA'SKED, *a.* covered or concealed.

MA'SKER, *s.* one who exhibits in a mask.

MA'SON, *s.* [*maçon*, Fr.] one who builds in stone. A free or accepted mason, is one who belongs to the society of Free Masons, of which there have been great numbers in every part of the civilized world, and are of great antiquity.

MA'SONRY, *s.* [*maçonerie*, Fr.] the craft or performance of a mason.

MASORA, *s.* a term in the Jewish theology, signifying a work on the Bible, performed by several learned rabbins, to secure it from any alterations which might otherwise happen. These rabbins are called Masorites.

MASQUERA'DE, *s.* [*mascara*, Arab.] a diversion or public assembly, wherein the company is masked and disguised; a disguise.

To **MASQUERA'DE**, *v. n.* to go in disguise; to assemble in masks and other disguises.

MASQUERA'DER, *s.* a person in a mask.

MASS, *s.* [*masse*, Fr.] a body; a lump; a large quantity; bulk; a vast body; an assemblage of several things, forming one confused and distinct body; a gross body; the general. In Divinity, this word originally implied only a festival, and was in this sense used in the word *Christmas*, long before the introduction of the sacrament of the mass; but at length it was used to signify the Eucharist, and is at present appropriated to the office of public prayers, used by the Romish church in the celebration of the Eucharist.

To **MASS**, *v. n.* to celebrate mass. Actively, to thicken; to strengthen.

MASSACHU'SETTS, one of the United States of North America, bounded on the N. by New Hampshire and Vermont; on the W. by New York; on the S. by Connecticut, Rhode Island, and the Atlantic Ocean; and on the E. by that ocean and the Bay of Massachusetts. It is 120 miles long and 50 broad; and is divided into 11 counties. It produces Indian corn, flax, hemp, hops, potatoes, beans, peas, fruits, &c. Iron has been found in immense quantities; as likewise copper ore, black lead, alum, slate, &c. This state owns more than one-third part of the trade and shipping belonging to the United States. The negro trade was prohibited by law in 1778. The number of inhabitants, in 1810, was 700,745. Here are 265 towns, the principal of which are Boston and Salem. They have manufactures of leather, linen, and woollen cloth, and plenty of beef, pork, fowls, and fish.

MA'SSACRE, *s.* [*massacre*, Fr.] the crime of killing great numbers of persons without any distinction, and not in a condition to defend themselves; carnage; murder.

To **MA'SSACRE**, *v. a.* [*massacrer*, Fr.] to butcher; to destroy great multitudes.

MA'SSICOT, *s.* [*Fr.*] ceruse calcined by a moderate degree of fire; of this there are three sorts, arising from the different degrees applied in the operation. *White massicot* is of a yellowish white, and is that which has received the least calcination; *yellow massicot* has received more; and *gold-coloured massicot* still more.

MA'SSINESS, *s.* weight, bulk, or solidity.

MA'SSIVE, *a.* [*massif*, Fr.] heavy; bulky; solid.

MA'SSIVENESS, *s.* the quality of being weighty, bulky, and solid.

MA'SSY, *a.* weighty, bulky, solid.

MAST, *s.* [*mât*, Fr. *mæst*, Sax.] the post standing upright in a ship or vessel, to which the yards and sails are affixed; the fruit of the oak or beech tree.

MA'STED, *a.* carrying or furnished with a mast.

MA'STER, *s.* [*magister*, Lat.] a person who has servants under him; a ruler; a chief or head; a possessor; the commander of a trading vessel; an officer on board a ship of war; a person subject to no control; a teacher, or instructor; a young gentleman; a title of respect; a person eminently skilled in any trade or science; a title of dignity at the universities.

To **MA'STER**, *v. a.* to rule, govern, or keep in subjection; to conquer; to perform with skill; to overcome any difficulty, or accomplish any design.

MA'STERDOM, *s.* dominion or rule.

MA'STER-HAND, *s.* one eminently skilled in any profession.

MA'STER-JEST, *s.* a principal jest.

MA'STER KEY, *s.* a key which can open many locks that have different wards.

MA'STERLESS, *a.* wanting a master or owner; not to be governed; unsubdued.

MA'STERLINESS, *s.* eminent skill.

MA'STERLY, *a.* suitable to or becoming a master; artful; showing great skill; imperious; with the sway of a master. Adverbially, with the skill of a master.

MA'STERPIECE, *s.* a capital performance; a chief or eminent excellence.

MA'STERSHIP, *s.* dominion; rule; power; a perfect work; a curious and capital performance; skill; knowledge; superiority, or pre-eminence.

MA'STER-STROKE, *s.* a stroke or performance that shows great skill.

MA'STERWORT, *s.* a plant, whose root is used in medicine.

MA'STERY, *s.* dominion; rule; superiority, or pre-eminence; skill.

MA'STFUL, *a.* abounding in mast or fruit, applied to the oak or beech trees.

MASTICA'TION, *s.* [*masticatio*, Lat.] the act of chewing. "In birds there is no *mastication*." RAY.

MA'STICATORY, *s.* [*masticatoire*, Fr.] a medicine to be chewed, but not swallowed.

MA'STICH, *mas tik*, *s.* [*mastic*, Fr.] in the *Materia Medica*, is a solid resin, of a pale yellowish white colour, brought principally from the island of Chios, in drops and tears, as it naturally forms itself in exuding from the tree, about the bigness of a pea. It is detergent, astringent, and stomachic; very good in inveterate coughs, and against spitting of blood; assists digestion, and stops vomiting. Externally, it is used in plasters to the regions of the stomach and intestines.

MA'STIFF, *s.* [plural *mastives*; for all nouns ending in *f* or *fe* in the singular, change into *ves* in the plural; *mastin*,

Fr.] a large-sized dog, generally used as a guard in houses and yards.

MA'STLESS, *a.* without masts.

MA'STLIN, *s.* [from *mesler*, Fr.] mixed corn, consisting of wheat and rye.

MAT, *s.* [*meatte*, Sax.] a texture of sedge, flags, or rushes. In a ship, plats made of fine nets and thrums, to keep the cordage fast.

To MAT, *v. a.* to cover with mats; to twist, interweave, or join together like a mat.

MATACHIN, *s.* [Fr.] an old dance.

MATADORE, *s.* [*matador*, Span.] a murder; the three chief cards at quadrille, so called from the advantage they have over the contrary party, and winning such a number of pieces out of the pool, which on that account are called *matadores* likewise.

MATCH, *s.* [*meche*, Fr.] a small piece of deal dipt in brimstone; any thing that catches fire, particularly applied to a kind of rope slightly twisted, and prepared to retain fire, used in discharging guns, &c. A game; any mutual contest; from *μάχη*, Gr. a fight. One equal to contest or fight with another. One that suits or tallies with another from *maca*, Sax. A marriage; one to be married.

To MATCH, *v. a.* to equal; to shew any thing equal or like to; to suit or proportion; to marry, or give in marriage. Neuterly, to be married; to suit; to tally.

MATCHABLE, *a.* suitable; resembling perfectly; fit to be joined.

MATCHLESS, *a.* without an equal; not admitting comparison.

MATCHLESSLY, *ad.* in a manner not to be equalled.

MATCHLESSNESS, *s.* the quality of not admitting an equal, or a comparison.

MATCHMAKER, *s.* one who is instrumental to a person's marriage; one who makes matches to burn.

MATE, *s.* [*maet*, Belg.] a husband or wife; a companion, whether male or female; the male or female of animals; one that sails in the same ship; one that eats at the same table; one that is the second in rank.

To MATE, *v. a.* to match or marry; to be equal to. To crush; to confound, from *matter*, Fr. or *matar*, Span.

MATERIA-MEDICA, *s.* comprehends all the substances either used in medicine in their natural state, or which afford preparations that are so; these belonging partly to the animal, partly to the vegetable, and partly to the fossil kingdom.

MATERIAL, *a.* [*matériel*, Fr. *materialis*, Lat.] consisting of matter, opposed to spiritual. Important; momentous; essential.

MATERIALIST, *s.* one who denies the existence of spirit.

MATERIALITY, *s.* [*matérialité*, Fr.] corporeity; material existence, opposed to spirituality.

To MATERIALIZE, *v. a.* to regard as matter.

MATERIALLY, *ad.* in the state of matter; essentially, or importantly.

MATERIALNESS, *s.* the state of consisting of matter. Figuratively, the quality of being important or essential.

MATERIALS, [not used in the singular; *matériaux*, Fr.] the substance of which any thing is made.

MATERIATE, or MATERIATED, *a.* [*materiatus*, Lat.] consisting of matter.

MATERIATION, *s.* [*materiatio*, Lat.] the act of forming matter.

MATERNAL, *a.* [*maternus*, Lat.] motherly; becoming or belonging to a mother.

MATERNITY, *s.* [*maternité*, Fr.] the character or relation of a mother.

MATFELON, *s.* the great knapweed.

MATGRASS, *s.* the small matweed; a kind of grass.

M. B. an abbreviature for *medicina baccalaureus*, or bachelor of physic.

M. D. an abbreviature for *medicina doctor*, or doctor of physic.

ME, the oblique case of the pronoun I. It is used sometimes ungrammatically for *I*; as, *methinks*, instead of *I think*.

MEAD, *s.* [*medd*, Brit.] a drink made of honey and water, called likewise *metheglin*.

MEAD, or MEADOW, *s.* [*mæde*, Sax.] ground somewhat watery, not ploughed, and covered with grass and flowers. *Mead* is a word chiefly poetical.

MEADOWBOUTS, *s.* a plant with kidney-shaped leaves and yellow blossoms; called also marsh marigold. The flowers, gathered before they expand, and preserved in salted vinegar, are a good substitute for capers. The juice of the petals boiled with a little alum, stains paper yellow. The remarkable yellowness of butter in the spring is supposed to be caused by this plant; but cows will not eat it unless compelled by extreme hunger, and then, Boerhaave says, it occasions such an inflammation that they generally die.

MEADOWGRASS, *s.* the grass that grows in meadows; the reed meadowgrass is found in marshes, and on the banks of rivers.

MEADOWPINK, *s.* a name for the campion cuckoo flower.

MEADOWRUE, *s.* the thalictrum of Linneus; the mountain, lesser, and common meadowrue, are the species found in England.

MEASLES, *s.* [*messelen*, Belg.] a cutaneous disease, consisting in a general appearance of eruptions, not tending to a suppuration, of the nature of flea-bites, which come out the fourth day after a person is taken ill, and disappear the fourth day after their coming out; so that the distemper bears a near resemblance to the small-pox. A disease in swine, appearing in red spots upon their skin.

MEASLY, *a.* scabbed with the measles.

MEASURABLE, *a.* such as may be measured or computed. Figuratively, moderate, or in a small quantity.

MEASURABLENESS, *s.* the quality of being capable of measure.

MEASURABLY, *ad.* in such a manner as may be measured; moderately.

MEASURE, *s.* [*mesure*, Fr.] that by which the quantity or extent of any thing is found; the rule by which any thing is adjusted or proportioned; proportion, or settled quantity; a sufficient quantity; motion regulated by musical time; the cadence or time observed in poetry, or dancing; syllables limited to certain numbers composing a verse; metre; a tune. To have hard measure, is to be hardly dealt by.

To MEASURE, *v. a.* [*mesurer*, Fr.] to compute the quantity or extent of any thing by some settled rule. To comprehend. "Great are thy works, Jehovah.——What thought can measure thee?" *Par. Lost*. To adjust or proportion; to allot or distribute.

MEASURELESS, *a.* not to be measured or comprehended.

MEASUREMENT, *s.* the act of finding the quantity or extent of any thing.

MEASURER, *s.* one that distributes things in proper quantities.

MEAT, *s.* [*mete*, Sax.] flesh to be eaten; food in general.

SYNON. By *meat* is understood any kind of food; but *flesh* signifies only the natural composition of an animal.

MEATED, *a.* fed; foddered; applied to cattle.

MEATH, EAST, a county of Ireland, in the province of Leinster, 30 miles from N. to S. and from 25 to 35 from E. to W. bounded on the N. by Cavan and Louth, on the E. by the Irish Channel, on the S. by Kildare and Dublin, and on the W. by Longford and West Meath. It contains 147 parishes, about 22,468 houses, and 112,400 souls, and is a fine champaign country, abounding with corn, and fattening numerous flocks and herds. The bogs are neither numerous nor extensive. Much coarse linen is made in this county. Trim is the county town.

MEATH, WEST, a county of Ireland, in the province of Leinster, bounded on the W. by Longford and Roscommon, on the N. by Longford and Cavan, on the E. by Meath and Kildare, and on the S. by King's County. Its greatest length is 38 miles; its greatest breadth 21. It is divided into 59 parishes, and about 70,000 inhabitants; and besides Lough Ree, formed by the Shannon on the western extremity, it is watered by a number of other agreeable lakes; as, the Loughs Leign, Derrivarah, Iron, Ennel, Drin, and Bannan Annagh, the rivers Inny, Brosna, &c. Here is a great proportion of grass land, yet more corn is raised than serves for the consumption of the inhabitants. The chief town is Mullingar, where the second great fair in the kingdom for wool is held.

MEATHE, *s.* [*medd*, Welsh.] drink; properly of honey.

MECCA, a city of Hedjas in Arabia, seated on a barren spot, in a valley, surrounded by little hills, about a day's journey from the Red Sea. It has neither walls nor gates, but the buildings are better here than in any other town of Arabia. What chiefly supports it, is the annual resort of a great many thousand pilgrims at a certain season of the year; for, at other times, the shops are scarcely open. The inhabitants are poor, very thin, lean, and swarthy. The hills about the town are numerous; all consist of a blackish rock; and some of them are half a mile in circumference. The town has plenty of water, and yet little garden-stuff; but there are several sorts of good fruit, as grapes, melons, water-melons, and cucumbers. Numbers of sheep are brought thither to be sold to the pilgrims. Mecca stands in a very hot climate, and the inhabitants usually sleep on the tops of their houses, for the sake of coolness. Among its edifices, the most remarkable is the famous Kaba, or House of God, held in high veneration by the Arghars, even before the days of Mahomet, and is said to have been Abraham's house of prayer. The Kaba is a square tower, covered on the top with a piece of black, gold-embroidered, silk stuff. It has 42 doors, and resembles in its form, the Royal Exchange, but is nearly ten times as large. The ground in the middle, or area, is mostly covered with gravel. There are cloisters all round, and in the sides are cells for those that live a monastic life. The arcades round the square are said to be magnificent, and are illuminated with a vast number of lamps, and candlesticks of gold and silver. In the Kaba is a singular relic, the famous black stone, said to have been brought from heaven by the angel Gabriel, which every Mussulman must kiss, or at least touch, every time he goes round the Kaba. Here is also the well of Zemzen, said to have been that where Hagar quenched the thirst of Ishmael. Lat. 21. 45. N. lon. 40. 55. E.

MEDINA, a city of Hedjas, in Arabia Deserta, celebrated for being the burial place of Mahomet. It is of moderate extent, is walled round, and has a large mosque, but nothing like the temple at Mecca. In one corner is a place, 14 paces square, with great windows, and brass gates, and in the middle is the tomb of Mahomet, inclosed within iron rails, hung with curtains, and surrounded by a vast number of lamps. The tomb is not exposed to any, except the 40 eunuchs who guard it, and light the lamps. It is placed between two other tombs, in which rest the ashes of the two first caliphs. The story of its being suspended in the air by a loadstone is now well known to be a fable. Provisions are brought to this place out of Nubia, across the Red Sea, in odd sort of vessels, whose sails are made of mats. It is called the City of the Prophet, because here he was protected by the inhabitants when he fled from Mecca; and here he was first invested with regal power. The time of his death was in 637; but the Mahometan epoch begins in 622, from the time of his flight. It is seated on a sandy plain, abounding in palm-trees, 176 miles N. N. W. of Mecca. Lat. 24. 20. N. lon. 39. 33. E.

MEDITERRANE, **MEDITERRANEAN**, **MEDITERRA'NEOUS**, *a.* [from *medius* and *terra*, Lat.] surrounded with land; inland, remote from the sea. "If we respect the *mediterraneous* mountains." Burnet.

MEDITERRANEAN, the name of the sea between Asia, Africa, and Europe, communicating with the ocean by the Straits of Gibraltar, and with the Black Sea by the Dardanelles, the Sea of Marmora, and the Strait of Constantinople. Its name, signifying *Middle of the Earth*, was given to it by the ancients, who were then acquainted with

little more of the surface of the globe, than the regions which encompass it. There is no tide in it, or at least so small that it is scarcely perceptible. Some have puzzled themselves by endeavouring to find out the cause of its keeping to the same level; but the evident reason is its evaporation by the sun, and the particles carried off by the blowing of the winds. It contains many islands, several of them large, as Majorca, Corsica, Sardinia, Sicily, Candia, and Cyprus. The eastern part of it borders on Asia, and is sometimes called the Levant Sea.

MEDIUM, *s.* [Lat.] any thing that intervenes or comes between; the middle place or degree. In Mechanical Philosophy, that space or region which a body passes in its motion towards any point. In Arithmetic, a number equally distant from each extreme. Any thing used in ratiocination, in order to a conclusion; the middle term in an argument, by which propositions are connected.

MERCURIFICATION, *s.* the act of mixing or incorporating with quicksilver.

MERCURY, *s.* [*mercurius*, Lat.] in the Solar System, is the nearest planet to the sun. It is from its proximity to the sun that he is so seldom within the sphere of our observation, being lost in the splendour of the solar brightness; yet he emits a very bright white light. This planet is oftener seen in those parts of the world which are more southward than that which we inhabit, and oftener to us than those which live nearer the north pole; for, the more oblique the sphere is, the more parallel with the horizon is the planet's path in the zodiac. His mean distance from the sun is 387 of those parts of which the earth's distance is 1000, and therefore in English miles about 37 millions. His periodic, sidereal, and synodic revolutions are 87d. 23h. 14m. 25²/₁₀s; 87d. 23h. 15m. 37s.; and 115d. 21h. 3m. 22¹/₂s. respectively. His hourly motion in its orbit is about 110,000 miles. His rotation round his axis, and consequently the length of his day, is at present unknown to us. His diameter is 3264 miles, and therefore his solid contents about $\frac{7}{100}$ of the earth's. The inclination of his orbit, or his greatest heliocentric latitude, is 7°; but his greatest geocentric latitude, on account of his much greater nearness to the sun than to the earth, is only about 5°. His eccentricity is 796 of those parts of which the earth's distance from the sun is 10,000, and the greatest equation of his orbit 23° 40' 49". The place of his aphelion (1800) was in Sagittarius 14° 31' 53", and ascending node in 15° 58' 45" of Taurus; the annual motion of the former being 67", and of the latter 45". Being an inferior planet, he is never seen in opposition to the sun, as he never recedes from him more than about 28°, and in some of his revolutions scarcely 18°; the former taking place when he is in his aphelion, and the latter when he is in his peri-

helion at the time of his greatest elongation. The number of days he is retrograde in a synodic revolution is about 22, in which time the arc of retrogradation is from 9° to 16° , according to his position with respect to his perihelion or aphelion at the time. Mercury changes his phases, like the Moon, according to his various positions with regard to the earth and sun; except only, that he never appears quite full, because his enlightened side is never turned directly towards us, unless when he is so near the sun as to be lost to our sight in his beams: and as his enlightened side is always towards the sun, it is plain that he shines not by any light of his own; for, if he did, he would constantly appear round. The best observations of this planet are those made when he is seen in the sun's disk, called his *transit*; for, in his inferior conjunction, he sometimes passes before the sun like a little black spot, eclipsing a small part of the sun's body, only observable with the telescope. Such phenomena can only happen when the planet is in or near one of his nodes at that time, which is about the beginning of May and November; for the sun's place in the ecliptic must be the same, or nearly the same, with the planet's ascending or descending node. Dr. Halley has given us several periods from which the times that these phenomena happen may be calculated; and as they are curious appearances which seldom occur, we will note down the times of 26 that happen in 201 years, as deduced from his periods, corrected by observations on the several transits that have happened since the discovery of telescopes.

A Table of the several Transits, for this and the next Century, at the Ascending Node, in November, N. S.

Those transits that may be seen from beginning to end, in London, are marked with two asterisks, but those that may be seen only in part are marked with one. The third column of the tables denotes the distance of the planet's centre from the sun's, either N. or S. at the time of the middle; and the last, the semiduration of Mercury's centre upon the sun's disk. If you subtract the semiduration of any particular transit noted in the table, from its middle time, the remainder will give the time of the planet's central ingress; and, by adding to it, you will have that of his central egress. The duration of a central transit at the ascending node is 5h. 31m. and at the other node about 8h. 1m. The duration of ingress or egress, in the former case, amounts to about 1½ min. and in the latter to about 3 min. Mr. Cassini, from the duration of the egress of the transit of Nov. 3d, 1697, found Mercury's apparent diameter to be about 11", from which he deduced his diameter at the other node to be almost 13½"; but later, and probably more accurate observations, have determined that the apparent diameter of this planet at the ascending node does not exceed 9".—In Mythology, a deity held to be the messenger of the other gods, to preside over eloquence and trade, to be the inventor of music, the interpreter of the will of the other deities, and the son of Jupiter and Maia. In Chemistry, quicksilver. In Heraldry, purple. In Botany, a genus of plants, of which two kinds are native in England; there is also a kind of blight that goes by this name. Figuratively, sprightliness; a newspaper; a carrier of newspapers.

ME'RCY, s. [*merci*, Fr.] the act of passing by crimes without punishing them; unwillingness to punish; the act of pitying and pardoning offenders; pardon.

MERCY-SEAT, s. in the Mosaic institution, was the covering of the ark of the covenant, in which the tables of the law were deposited: it was of gold, and at its two ends were fixed the two cherubim of the same metal, which, with their wings extended forwards, seemed to form a throne for the Majesty of God, who in scripture is represented as sitting between the cherubim, and the ark was his footstool; it was from hence that God gave his oracles to Moses, or to the high priest who consulted him.

MERE, a. [*merus*, Lat.] entire; only; exclusive of all other persons or things; simple.

MERE, or MER, whether in the beginning, middle, or end of the names of places, is derived from *mere*, Sax. a pool or lake.

MEXICO, *NEW*, a large country of North America, bounded on the W. by the Gulf of California; its other limits are uncertain. The soil and climate are as rich, plentiful, and temperate, as any country of America, or any other part of the world. It is inhabited by a great number of people, whose languages and customs are very different; some wander about, and others dwell in towns and villages. The chief divisions are New Mexico, Proper, New Leon, New Navarre, and California; the principal Spanish colonies are St. Barbe, and Santa Fé, the capital town.

MEXICO, or *New Spain*, a country of North America, including, in its largest sense, all that extensive peninsula situated between Louisiana and unknown countries on the N. and Terra Firma, in South America, and on the S. but the audience of Mexico contains only the provinces of Mexico Proper, Meducacan, Guasteca, Tlascala, Guaxaca, Tabasco, and Yucatan. It is washed on the E. by the Atlantic Ocean; and on the S. and W. by the South Sea, and is above 2000 miles in length, and from 60 to 600 in breadth. It is divided into 23 districts or provinces, the principal of which is that of Mexico Proper, and contains mines of gold and silver, of the latter of which they count above a thousand, besides mines of iron, copper, lead, alum, crystal, vitriol, precious stones, marble, &c. The soil produces Indian corn, cabbage-trees, cocoa-nuts, vanillas, plantains, pine-apples, cochineal, cotton, and several other fruits, gums, and drugs, proper to the climate. Before the Spaniards came here, they had a sort of dogs that did not bark, but howled like wolves; gray lions, less formidable than those of Africa; and also small tigers, bears, though uncommon, elks or moose-deer, pecaries, warres, beavers, opossums armadilloes, guanoes, flying-squirrels, racoons, crocodiles, manattes or

sea-cows, monkeys, parrots, macaws, pelicans, cormorants, and a great variety of other birds, snakes, scorpions, and other insects. The Spanish clergy are very numerous, and there are a great number of convents. In general, it is a mountainous country, intermixed with many rich valleys; but the highest mountains are near the coast of the South Sea, many of which are volcanoes. The eastern shore is a flat level country, full of bogs and morasses, overflowed in the rainy season, which is at the same time as our summer. This province is vastly populous, and the original natives in general pass their lives in easy circumstances. In some places, the collection of the public revenues, and the exercise of the police, are deposited in the hands of their chiefs; and among the inferior orders of Indians, many are admitted to offices in the church, army, and magistracy, in all the principal Spanish towns. The revenues of the crown arise from a fifth part of the gold and silver, and from the duties and customs, as well as from the lands held of the crown.

MEXICO, a city of North America, capital of the province of that name. It was a flourishing place before the Spaniards entered the country, and is seated on several islands in a salt-water lake, to which there is no entrance but by five causeways, three of which are about two miles in length. Mexico was taken by Ferdinand Cortez, in 1521, after a siege of three months. As the Mexicans defended themselves from street to street, it was almost ruined, but afterwards rebuilt by the Spaniards. It now contains about 35,000 houses, built of stone and brick, with a suburb of 3000 houses, inhabited by the native Americans, 29 churches, and 22 monasteries and nunneries. It is the usual residence of the viceroy, whose employment continues three years, and has a royal audience, an university, and the tribunal of the inquisition. All the streets are straight, and exactly disposed in point of regularity, and it is remarkable for having neither gates, walls, nor artillery. The revenue of the cathedral amounts to nearly 80,000*l.* a year, out of which the archbishop receives annually 15,000*l.* besides vast sums that arise by perquisites. Mexico enjoys a prodigious commerce, being the centre of all the trade carried on between Spanish America and Europe, and Spanish America and the East Indies. An incredible number of horses and mules are employed in transporting goods from Acapulco to Vera Cruz, and from Vera Cruz to Acapulco. Hither all the gold and silver is brought to be coined; here the king's fifth is deposited; and all that immense quantity of plate wrought which is annually sent to Europe. This place was overflowed by an inundation in October 1629, in which 40,000 persons were drowned. This obliged the Spaniards to make a great conduit through a mountain, in order to empty the lake; which, being done, part of the town became seated on dry land. Mexico is supplied with fresh water by an aqueduct of three miles in length. The Spaniards do not make a tenth part of the inhabitants, the others being negroes, mulattoes, native Americans, and a mixture of them all. It is 130 miles W. by N. of Vera Cruz, and 250 N. E. by N. of Acapulco. Lat. 19. 54. N. lon. 99. 36. W.

MEZE'REON, *s.* in Botany, the daphne of Linneus.

MEZZOTINTO, *s.* [Ital.] a kind of graving upon copper, invented by prince Rupert, which receives its name from resembling painting, and is performed by marking the plate in furrows or crosslines; after which they are rubbed down with a burnisher or scraper, according to the depth or lightness of the shades required.

MIDDLESEX, a county of England, bounded on the N. by Hertfordshire, on the E. by Essex, on the S. by Surry and a corner of Kent, and on the W. by Buckinghamshire. It is one of the least counties in England, being only about 22 miles in length, and 14 in breadth, but is much the richest and most populous, and pays more taxes than any ten beside. It contains 7 market-towns, and about 200 parishes, without including those of London and Westminster. The air is healthy; but the soil in general being a lean gravel, it is naturally a district of little fertility, though, by means of the vicinity of the metropolis, many parts of it are converted into rich beds of manure, clothed with almost perpetual verdure. There are still however, very extensive tracts of uncultivated heath. Besides the Thames, the Lea, and the Coln, Middlesex is watered by several small streams, one of which, called the New River, is artificially brought from Amwell, in Herts, for the purpose of supplying London with water. Indeed, the whole county may be considered as a demesne to the metropolis, the land being laid out in gardens, pastures, and inclosures of all sorts, for its

convenience and support. Middlesex, in 1811, had a population of 953,276 souls, which increased in 1821, to 1,144,531.

MILAN, a city of Italy, and capital of a duchy of the same name. It was the ancient capital of Lombardy,

and is the largest city of Italy, except Rome. It is seated in a pleasant plain between the rivers Adda and Tesin. It is about 10 miles in circumference, and is called by the Italians, Milan the Great. Here are 22 gates, 230 churches, 90 convents, 100 religious fraternities, 120 schools, and about 250,000 inhabitants. Broad and straight streets are but few in comparison to the narrow and crooked; and the many paper windows, or glass and paper panes intermixed, even in the finest palaces, have a mean appearance. The governor's palace, or the old regency-house, is the most stately and spacious. The cathedral is a grand structure, being 500 feet long, 200 broad, and 400 high. It stands in the centre of the city, and, next to St. Peter's at Rome, is the largest in Italy. This vast fabric is entirely built of solid white marble, and is supported by 50 columns, said to be 84 feet high. The 4 pillars under the cupola are 28 feet in circumference. The college of St. Ambrose has a library, which, beside some thousands of manuscripts, contains 45,000 printed volumes. In it is an academy of painting. The most considerable commerce of the inhabitants is in grain (especially rice,) cattle, and cheese, which they export; and they have manufactures of silk and velvet stuffs, stockings, handkerchiefs, ribbons, gold and silver lace, and embroideries, woollen and linen cloths, glass, and earthenware in imitation of China. Here are several rivers and canals. It is 65 miles N. of Genoa, 145 N. N. W. of Florence, and 270 N. W. of Rome. Lat. 45. 28. N. lon. 9. 16. E.

MILBORN-PORT, a borough of Somersetshire, surrounded in a manner by Dorsetshire. The inhabitants are about 1100. It is no market-town, though it appears in Domesday-book to have had a market once, and 56 burgesses. It is seated on a branch of the river Parret, 2 miles from Sherborn in Dorsetshire.

MILFORD, a town of Pembrokeshire, situated on the N. coast of Milford Haven, 6 miles W. N. W. of Pembroke, and 6 S. S. W. of Haverfordwest. A new quay has been lately built here, and a considerable number of new buildings erected, by a commercial company of Quakers from America. Distant from London 270 miles.

MILFORD HAVEN, a deep inlet of the Irish Sea, on the coast of Pembrokeshire, universally allowed to be the

best harbour in Great Britain, and as safe and spacious as any in Europe. It has 16 deep and safe creeks, 5 bays, and 3 roads, all distinguished by their several names, in which 1000 sail of ships may ride in perfect security, and at sufficient distance from each other. There is no danger in sailing in or out with the tide, by day or night, from whatever point the wind may happen to blow; and if a ship in distress comes in, without either anchor on cable, she may run on shore on soft ooze, and there lie in safety till she is refitted. The spring tide rises in this harbour 36 feet, so that ships may at any time be laid ashore. The breadth of the entrance, between rock and rock, is but 200 yards at high water, and 112 at low water. One great advantage attending this harbour is, that a ship may be in or out of it in an hour's time, and in 8 or 10 hours may be on the coast of Ireland, or off the Land's End; they may also get out to the W. much sooner than from either Plymouth or Falmouth. The parliament, on April 14th, 1759, granted 10,000*l.* for fortifying this harbour. A packet sails from hence for Waterford four times a week.

MOLU'CCAS, or *Spice Islands*, a cluster of small but valuable islands in the Eastern Ocean, lying mostly within sight of each other. The principal are Ternate, Amboyna, Tydore, Machian, Timor or Motyr, Bachian, Bourso, and Ceram. They are situated to the E. and S. of Celebes. Their coasts are rendered very dangerous by sands and shelves. They produce neither corn, rice, nor cattle, except goats; but they have oranges, lemons, coarse tobacco, and, above all, nutmegs, cloves, and other spices. Here are parrots of extraordinary beauty, and many birds of paradise. They have large snakes which are not venomous, but very dangerous lizards, or land crocodiles. The Dutch, who drove out the Spaniards and Portuguese, keep out all other European nations, being jealous of their spice trade. The natives are Pagans, but there are many Mahometans. All the particular kings of these islands are subject to the king of Ternate, who is in alliance with the Dutch. Most, if not all of them, were reduced by the English in the late wars. The chief settlement is at Amboyna.

MOME, *s.* a dull, stupid, dronish fellow.

MOMENT, *s.* [momentum, Lat.] consequence, importance, or weight; force, or acting power; an invisible particle of time. **SYNON.** *Moment, instant.* A moment is not long; but an instant is still shorter. The word *moment* has a signification more extended. It is taken sometimes for time in general, and is used in a figurative sense. That of

instant is more contracted; it marks the shortest duration of time, and is never used but in the literal sense.

MOMENTALLY, *ad.* for a moment.

MOMENTANEOUS, *a.* [*momentaneus*, Lat.] lasting but a moment.

MOMENTARY, *a.* done in, or lasting a moment.

MONGREL, *a.* [from *mang*, Sax.] of a mixed breed.

MONGULS, a people who inhabit a country to the N. of China. They assume to be of the same original as those who accompanied Tamerlane in the conquests of India, Persia, and other countries, and called, in most histories, Moguls. The country is very little known, except that part of it which the caravans pass through in travelling from Russia to China. The Monguls dwell in tents, or little moveable houses, and live entirely on the produce of their cattle, which are horses, camels, cows, and sheep. They exchange their commodities for rice, sugar, tea, tobacco, cotton cloth, and several sorts of household utensils; not having the use of money. The religion of the Monguls of the West, is that of the Dalay-Lama, which is full of ceremonies not unlike popery.

MONITION, *s.* [*monitio*, Lat.] an information or hint; instruction or advice.

MONITOR, *s.* [Lat.] one who warns of faults, or informs of duty; one who gives useful hints. In Schools, applied to a scholar commissioned by the master to take notice of the behaviour of his school-fellows.

MONMOUTH, the county town of Monmouthshire, pleasantly seated at the confluence of the rivers Wye, Mynnow, and Frothy, which almost surround it. It is a large handsome town, and carries on a considerable trade with Bristol by the Wye. In its once stately castle, the remains of which shew it to have been very strong, Henry V. from hence called Henry of Monmouth, the conqueror of France, was born. It is 21 miles W. by S. of Gloucester, and 128 W. by N. of London. A plentiful market for corn and provisions on Saturday. Fairs on Whitsun-Tuesday, September 4th, and November 22d.

MONMOUTHSHIRE, a county of England, bounded on the N. by Herefordshire and Brecknockshire; on the E. by Gloucestershire; on the S. E. by the Severn; on the W. by the counties of Brecknock and Glamorgan. Its extent from N. to S. is about 28 miles, and from E. to W. 20. It is divided into 6 hundreds, and contains 7 market-towns, 127 parishes, and, according to the census of 1821, 71,833 inhabitants. The air is temperate and healthy, and the soil fruitful, though mountainous and woody. The hills feed sheep, goats, and horned cattle, and the valleys produce plenty of grass and corn. Beside the Wye, the Mynnow, and the Rhyney or Rumney, this county has almost peculiar to itself the river Usk, which divides it into two unequal portions, the eastern and largest part of which is a tract, fertile, on the whole, in corn and pastures, and well wooded. It abounds in lime-stone, which is burnt on the

spot, for the general manure of the country. The smaller western portion is mountainous; and in great part unfavourable for cultivation; whence it is devoted to the feeding of sheep. It has several long narrow valleys, watered by streams that fall into the Bristol Channel. All the rivers above mentioned, particularly the Wye and Usk, abound with fish, especially salmon and trout. Monmouthshire was formerly reckoned one of the counties of Wales; and, from the names of its towns and villages, its mountainous rugged surface, as well as its situation beyond the Wye, which seems to form a natural boundary between England and Wales in this part, it certainly partakes most of the character of the latter country, though since the reign of Charles II. when it was added to the Oxford circuit, it has been considered as an English county. The people use the Welsh language, but the English tongue is coming into use. The manufacture of this county is flannels.

MONSTROUSNESS, *s.* the quality which renders any thing or action shocking, irregular, or enormous.

MON'TANT, *s.* [Fr.] a term in fencing.

MONT BLANC, a mountain of the Alps in Savoy, so called from its white appearance. It is 15,362 feet above the level of the sea, and supposed to be the highest in Europe. The French gave the name of this mountain to the conquered duchy of Savoy, as a new department of France.

MONTERO, *s.* [Span.] a horseman's cap.

MON'TETH, *s.* [from the name of the inventor] a vessel in which glasses are washed.

MONTGOMERY, the county-town of Montgomeryshire, a small neat town, with a rich soil, but little trade. The reliques of its castle, which stand on a projecting ridge of a great height and steepness, and towards the end are quite precipitous, impend in a picturesque manner over the town, but are now very small. It is pleasantly seated on a rocky hill, near the Severn, 26 miles S. W. by W. of Hereford, and 161 N. W. of London. Market on Tuesday.

MONTGOMERYSHIRE, a county of North Wales, bounded on the N. by Merionethshire and Denbighshire; on the N. E. and E. by Shropshire; on the S. by Radnorshire; on the S. W. by Cardiganshire, and on the W. by part of Merionethshire. It extends 33 miles from N. to S. and about 24 from E. to W. and is divided into 7 hundreds, which contain 6 market towns, 47 parishes, and, according to the census of 1821, 59,899 inhabitants. The air is pleasant and salubrious; and the country in general mountainous, but fertile, (the S. S. E. and N. E. parts are extremely so, being much more level,) and agreeably interspersed with valleys, hills, meadows, and corn-fields. The hilly tracts are almost entirely sheep-walks; and the flocks, like those of Spain, are driven from distant parts to feed on them during summer. This county also affords mineral treasures, particularly lead, and it abounds with slate and lime; but there is no coal. Its principal rivers are the Severn, Vyrnew, and Tannat, which are remarkable for their great variety of fish, and for salmon in particular.

MONTH, *s.* [mona, Sax. the moon] a space of time measured by the revolution of the sun or moon, and reckoned the 12th part of the year. A *lunar month*, is the space between the two conjunctions of the moon with the sun, or between two moons. A *solar month*, the space of time wherein the sun revolves through one entire sign of the ecliptic. The *calendar months* consist unequally of thirty and thirty-one days, except February, which in leap years has twenty-nine, but in other years twenty-eight days.

MONTHLY, *a.* continuing or performing in a month; happening every month.

MONTHLY, *ad.* once in a month.

MONTOIR, *s.* [Fr.] In Horsemanship, a stone as high as the stirrups, which Italian riding-masters mount their horses from, without putting their foot in the stirrup.

MONTPELLIER, a large and beautiful city of France, in the department of Herault. Before the revolution, here was an university, with a celebrated school of medicine, founded by physicians who were expelled from Spain in the year 1180. The scarlet gown of that witty philosopher, Rabelais,

with which doctors of physic are or were invested here at taking their degrees, has long since ceased to be an original, the students having, from time to time, cut off little slips; so that the robe now, or lately used, is, at least, the third or fourth substitute. Also a botanic garden, the first established in Europe, and an academy of sciences. The town-house is remarkable for its halls, which are embellished with fine paintings. It has many fine houses, and several stately edifices, but the streets are narrow. The number of inhabitants is computed at 50,000, who trade in verdigrise, which is the principal manufacture, wool, wine, aqua-vitæ, Hungary and cinnamon waters, capillaire, essence of bergamot, &c.; also in carpets, dimities, fustians, and silk-stockings. These commodities are sent by the canal, to Cettè, which is the sea-port of Montpellier. The air is extremely healthy, and a great number of persons flock hither, from all parts, to recover their health. Montpellier is pleasantly seated upon a hill, by the river Lez, 5 miles from the Mediterranean, 27 S. W. of Nismes, and 212 S. by E. of Paris. Lat. 43. 36½. N. lon. 3. 57. E.

MONTROSE, a town of Angus-shire, containing about 9000 inhabitants. At high water it is almost surrounded by the sea. The harbour is a fine semicircular bason, with a handsome stone pier: and a great number of trading vessels belong to this port. The buildings are neat, and many of them in the modern taste. The most remarkable are the town-house, the presbyterian church, and an elegant episcopal chapel. A great quantity of malt is made here; and there are manufactures of sail-cloth, linen, coloured and white thread, brown sheeting, Osnaburghs, and cotton stockings; as also a tannery, and rope-works. The salmon fisheries on the N. and S. Esk form a valuable branch of commerce. Montrose is seated on a gentle eminence, in a peninsula, formed by the estuary of S. Esk (over which a new bridge has been lately erected) and the German Ocean, 70 miles N. E. of Edinburgh.

MONTSERRAT, a well-watered fruitful island in the West Indies, discovered, in 1493, by Columbus, and so named by him from its resemblance to a mountain of that name in Spain. It is about nine miles in length, and as much in breadth, and is divided into two parishes. The mountains are covered with cedar, cypress, the iron-tree, with other woods, and some odoriferous shrubs. As to soil, animals, and commerce, Montserrat is much the same as the other Carribee islands. It is possessed by the English, and is 30 miles S. W. of Antigua. Lat. 16. 49. N. lon. 62. 27. W.

MONUMENT, *s.* [*monumentum*, Lat.] any thing by which the memory of persons or things is preserved.

MONUMENTAL, *a.* preserving the memory or remembrance; belonging to a tomb raised in honour of the dead.

MOOD, *s.* [*modus*, Lat.] in Logic, the regular determination of propositions according to their quantity or quality, *i. e.* their universal or particular affirmation or negation. In Music, manner or style. In Grammar, the different changes a word undergoes, to signify the various intentions and affections of the mind. Temper of mind; state of the mind as affected by passion; anger; rage; from *mod*, Sax. *moed*, Belg. *mod*, Goth. An habitual temper of mind.

MOODY, *a.* angry, or out of humour; mental; intellectual; belonging to the mind.

MOON, *s.* [*mona*, Sax.] in the solar system, is a satellite or secondary planet of the Earth, considered as a primary one, about which she revolves in an elliptic orbit, at the distance of about 240,000 miles, at a mean rate. Next to the Sun, she is the most splendid and shining globe in the heavens: and by dissipating, in some measure, the darkness of the night, subdividing the year into months, and regulating

the flux and reflux of the sea, she not only becomes a pleasing but a welcome object; affording much for speculation to the contemplative mind, and of real use to the navigator, the traveller, and the husbandman. That the moon appears so much larger than the other planets, is owing to her vicinity to us; for to a spectator in the sun she would be scarcely visible, without the assistance of a telescope. Her distance is but small from us, when compared with that of the other heavenly bodies; which is easily proved from her very great horizontal parallax, which amounts sometimes to 61' 25". If the moon were a body possessing native light, we should not perceive any diversity of appearance; but as she shines entirely by light received from the sun, and reflected by her surface, it follows, that, according to the situation of the beholder with respect to the illuminated part, he will see more or less of her reflected beams, for only one half of a globe can be enlightened at once. Hence, while she is making her revolution round the heavens, she undergoes great changes in her appearance. In every revolution of the moon about the earth, she turns once round upon her axis, and therefore always presents the same face to our view; and as, during her course round the earth, the sun enlightens successively every part of her globe only once, consequently she has but one day in all that time, and her day and night together are as long as our lunar month. As we see only one side of the Moon, we are therefore invisible to the inhabitants on the opposite side, unless they take a journey to that side which is next to us, for which purpose some of them must travel more than 1500 miles. And as the earth, from one half of the Moon, is never seen, so, from the middle of the other half, it is always seen overhead, turning round almost thirty times as quick as the Moon does. To her inhabitants, the earth seems to be the largest body in the universe, her apparent diameter constantly occupying from 1° 47' 46" to 2° 2' 50" of the lunar celestial regions. Her periodic, sidereal, and synodic revolutions, are respectively, 27d. 7h. 43m. 4½s.; 27d. 7h. 43m. 11½s.; and 29d. 12h. 44m. 3s. Her diameter is 2171 miles; her surface about $\frac{3}{4}$ of the earth's; and her solid contents $\frac{1}{4}$ of the same. The Moon's apogee is not fixed in any particular point of the ecliptic, but makes a complete revolution, according to the order of the signs, in 3231d. 8h. 34m. 57½s. as measured by the equinoxes, but from one fixed star to the same again in 3232d. 11h. 14m. 31s. Her nodes also have a revolution, contrary to the order of the signs, in 6798d. 4h. 52m. 52½s. according to the equinoxes, but in 6803d. 2h. 55m. 18½s. as measured by the stars. The inclination of her orbit to the ecliptic varies from 4° 59' to 5° 17½'. It is greatest of all at those new or full Moons that happen at the nodes, but least of all at those that happen 90° from them. The mean inclination is 5° 8' 46". The Moon's apparent diameter varies according to her horizontal parallax. Her greatest diameter 33' 34" takes place when she is in perigee at the time of full Moon, and the least 29' 25" when she is in apogee at the time of the change. The Moon's horizontal parallax bears a constant proportion to her apparent diameter, and may be found at any time by multiplying it by $1\frac{82+8}{10000}$. The mean eccentricity of her orbit is $\frac{5+1}{10000}$ of her mean distance from the earth, and the greatest equation of her orbit 7° 39'. As the Moon is a dark body of itself, and has no light but what she receives from the sun, it is evident that when she is at full, and in the ecliptic, or nearly so, the interposition of the earth must prevent her at that time from being illuminated, causing what we usually term an eclipse of the Moon. But when the Moon, at the time of her change, is in the plane of the earth's orbit, or nearly so, her interposition between us and the sun must conse-

quently hide the sun from our view, whilst she is in that position, causing what we improperly call an eclipse of the sun, for it is the earth that is really obscured. Eclipses of the sun, at any particular place, happen much more seldom than those of the Moon; for those of the latter, on account of her real deprivation of light, are visible to every part of this globe of which she is above the horizon; but those of the former, on account of the smallness of the Moon's body compared to the earth's, are visible to those parts only between which and the sun she is interposed; so that there may be an eclipse of the sun at Edinburgh, and not the least indication of one at London. If the sun at the time of the change be within about 17° of either of the lunar nodes, there will be an eclipse of the sun to some part of the earth; and if, at the time of the full, he is within about 12° , the Moon will be eclipsed. The greatest eclipses of the Moon take place when she is in one of her nodes at the time of the opposition; but the greatest eclipses of the sun in England only happen when the Moon has considerable north latitude, and the sun at the same time above the horizon; though, when he is posited in one of the nodes at that time, the eclipse remains longest upon the earth, which is about 5h. 51m. The longest duration of an eclipse of the Moon is 3h. 58m. nearly. The face of the Moon is greatly diversified with inequalities, and parts of different colours, some brighter and some darker than the other parts of her disk. When viewed through a telescope, her face is evidently diversified with hills and valleys; and the same is also shewn by the edge or border of the Moon appearing jagged about the confines of the illuminated part of her disk, when the Moon is either horned or gibbous. That the spots in the Moon, which are taken for mountains and valleys, are really such, is evident from their shadows; for, in all situations of the Moon, the elevated parts are constantly found to cast a triangular shadow in a direction from the sun; and, on the contrary, the cavities are always dark on the side next the sun, and illuminated on the opposite one; which is exactly conformable to what we observe of hills and valleys on the earth; and, as the tops of these mountains are considerably elevated above the other parts of her surface, they are illuminated when they are at some distance from the confines of her enlightened hemisphere; from which circumstance a mean of determining their heights is afforded. The observations of Mr. Schroeter concerning the lunar mountains, are as follow: "The most lofty mountain on the surface of our globe is supposed to be Chimboraco, which is not 20,000 feet in height; but there are many in the Moon which are much higher; that which is distinguished by the name of Leibnitz, is not less than 25,000 feet. This elevation will appear more extraordinary if compared with the Moon's diameter, of which it is $\frac{1}{184}$; whereas Chimboraco is not above $\frac{1}{1017}$ of that of the earth; thus considered, the lunar mountains are near five times as high as any on our globe." As the Moon has on her surface mountains and valleys, in common with the earth, some astronomers have discovered a still greater similarity, viz. that some of these are really volcanoes, emitting fires as those of the earth do. An appearance of this kind was discovered some few years ago by Don Ulloa, in an eclipse of the sun. It was a small bright spot like a star near the margin of the Moon, and which he at that time supposed to be a hole or valley, with the sun's light shining through it. Succeeding observations, however, have induced astronomers to attribute appearances of this kind to the eruption of volcanic fire; and, on the 19th of April, 1787, Dr. Herschel discovered three volcanoes in the dark part of the Moon; two of them seemed to be almost extinct, but the third shewed an actual eruption of

fire, or luminous matter, resembling a small piece of burning charcoal covered by a very thin coat of white ashes; it had a degree of brightness about as strong as that with which such a coal would be seen to glow in faint day-light. The adjacent parts of the volcanic mountain seemed faintly illuminated by the eruption. A similar eruption appeared on the 4th of May, 1783. On the 7th of March, 1794, a few minutes before eight o'clock in the evening, Mr. Wilkins, of Norwich, an eminent architect, observed with the naked eye, a very bright spot upon the dark part of the Moon: the whole time he saw it, it was a fixed steady light, except the moment before it disappeared, when its brightness increased; he conjectures that he saw it above five minutes. The same phenomenon was observed by Mr. T. Stretton, in St. John's-square, Clerkenwell, London. *Phil. Trans.* 1794. On the 13th of April, 1793, and 5th of Feb. 1794, M. Piazz, astronomer-royal at Palermo, observed a bright spot upon the dark part of the Moon. Several other astronomers have observed the same phenomenon. See *Memoirs de Berlin*, for 1778. There is scarcely any doubt now remaining in the philosophic world, that the Moon is a *habitable globe*. The most accurate observations that have been made with the most powerful telescopes, have confirmed the opinion. The Moon seems, in almost every respect, to be a body similar to our earth; to have its surface diversified by hill and dale, mountains and valleys, rivers, lakes, and seas.—Figuratively, a month. In Fortification, something resembling a crescent or half-moon: this word is generally used in composition, either in the last sense, or for something belonging to the Moon.

MOON-BEAM, *s.* a ray of light darting from the moon.

MOON-CALF, *s.* a monster; a false conception; a dolt; a stupid fellow.

MOONEYED, *a.* having eyes affected by the revolutions of the moon. Figuratively, dim-sighted; purblind.

MOON-FISH, *s.* a kind of fish, so called because the tail fin is shaped like a half moon, by which, and his odd trussed shape, he is sufficiently distinguished.

MOONLESS, *a.* not enlightened by the moon.

MOONLIGHT, *s.* the light afforded by the moon.

MOONLIGHT, *a.* enlightened by the moon. "The moonlight shade." *Pope*.

MOONSHINE, *s.* the light or lustre of the moon. In burlesque, a month.

MOONSHINE, or MOONSHINY, *a.* [both from a corruption of *moonshining*] during the shining of the moon; by means of moonlight. "You moonshine revellers." *Shak.*

MOONSTRUCK, *a.* lunatic; affected by the moon.

MOON-TREFOIL, *s.* a plant, so called on account of the shape of its fruit.

MOONWORT, *s.* in Botany, a kind of fern.

MOOR, *s.* [*moer*, Belg.] a marsh, fen, or tract of low watery land. A negro or black; from *maurus*, Lat.

To MOOR, *v. a.* [*morer*, Fr.] to fasten a vessel by anchors or other means. Neuterly, to be fixed or stationed.

MOORCOCK, *s.* the male of the MOORHEN.

MOORGAME, *s.* red game; grouse.

MOORISH, *a.* fenny; marshy; watery.

MOORLAND, *s.* a marsh, or watery ground.

MOORSTONE, *s.* a species of granite.

MOORY, *a.* marshy; fenny; watery.

MOOSE, *s.* the large American deer.

To MOOT, *v. a.* [*motian*, Sax.] in Law, to plead a mock cause; to state a point of law, or argue a case, by way of exercise, for a degree of barrister in the inns of court, called to argue a moot. A moot case, or point, such as may admit dispute.

MOOTED, *a.* plucked up by the roots.

MOOTER, *s.* one that argues a moot.

MOP, *s.* [moppa, Brit.] pieces of cloth, or locks of wool, fixed to a long handle, used in washing floors.

To MOP, *v. a.* to rub with a mop.

To MOPE, *v. n.* to be stupid; to be drowsy, spiritless, inactive, or dull; to be in a constant day-dream. Actively, to make one spiritless or delirious.

MOPE-EYED, *a.* blind of one eye.

MOPPET, or MOPSEY, *s.* a doll made of rags; a fond name for a child.

MOPUS, *s.* [a cant word from *mope*] a drone; a dull or inactive person.

MORAL, *a.* [moral, Fr.] relating to the actions or conduct of life, or that which determines an action to be good or virtuous; reasoning, so as to promote or instruct in virtue; popular, or generally admitted in the usual occurrences or life. A *moral impossibility* is a very great or insuperable difficulty, opposed to a natural impossibility. A *moral certainty* or *assurance*, implies a very strong probability, and is used in contradistinction to mathematical probability. In Logic, a *moral universality* is, when the predicate agrees to the greatest part of the particulars contained under the universal subject.

MORAL, *s.* morality, or the practice of the duties of life; doctrine, or instruction, drawn as a corollary from a fable.

To MORAL, *v. n.* to moralize; to make moral reflections.

MORALIST, *s.* one who teaches the duties of life.

MORALITY, *s.* [moralité, Fr.] the doctrine of morals, or the art of living well and happily; ethics.

To MORALIZE, *v. a.* [moraliser, Fr.] to apply to the conduct or regulation of our actions; to explain in such a manner as to convey some practical truths. Neuterly, to speak or write on moral subjects.

MORALIZER, *s.* one who moralizes.

MORALLY, *ad.* in the ethical sense; according to the common occurrences of life; according to the rules of virtue.

MORALS, *s.* [without a singular] the practice of the duties of life; behaviour with respect to others.

MORA'SS, *s.* [morais, Fr.] a fen; a bog or tract of land abounding in water.

MORAVIA, *The Marquisate of*, a province of Germany, surrounded by Silesia, Bohemia, and Austria, and divided into six circles. It is partly mountainous and woody, and partly champaign, with many morasses, bogs, and lakes; and has constantly remained annexed to the crown of Bohemia. It takes its name from the river Morava, or Moraw, which runs through it; it is very fertile and populous; and hence the Unitas Fratrum, or Brethren, called Moravians, take their name, their doctrines having been early promulgated here. Olmutz is the capital.

MORBID, *a.* [morbidus, Lat.] diseased, opposed to healthy.

MORBIDNESS, *s.* the state or quality of being diseased.

MORBI'FIC or MORBI'FICAL, *a.* [the last word is seldom used; *morbifique*, Fr.] causing diseases; injurious to health.

MORBO'SE, *a.* [morbosus, Lat.] proceeding from disease; unhealthy.

MORBO'SITY, *s.* diseased state.

MORDA'CIOUS, *a.* [mordax, Lat.] biting; apt to bite.

MORDA'CITY, *s.* [mordacité, Fr. *mordacitas*, Lat.] a biting, stinging quality.

MORDICANT, *a.* [mordicant, Fr.] biting; acrid.

MORDIFICATION, *s.* the act of corroding or biting.

MORE, *a.* [the comparative of *some*, *many*, or *much*, superlative *most*] greater in number, quantity, or degree.

MORE, *ad.* to a greater degree. Longer, applied to time. Again, or a second time. Used as a particle to form the comparative degree before adjectives, which, for the length of their syllables, or want of harmony, would not admit the addition of *er*.

MORE'A, formerly called *Peloponnesus*, a peninsula in the southern part of Greece, to which it is joined by the Isthmus of Corinth, lying between the Gulfs of Lepanto and Engiä. It is 180 miles in length, and 130 in breadth. The air is temperate, and the soil fertile, excepting the middle, where there are many mountains. Its present name is said to be derived from *morus*, a mulberry-tree, from the great number of mulberry-trees it produces. It is watered by several rivers, of which the Alpheus, the Vasili, Potamo, and Stromio, are the chief. It is divided into four districts. The sangiac of the Morea resides at Modon.

MORE'L, *s.* a plant; likewise a species of large cherry.

MORELAND, *s.* [morland, Sax.] a mountainous or hilly country.

MOREO'VER, *ad.* besides or beyond what has been mentioned. *SYNON.* *Furthermore* is properly used, when there is need only to add one more reason to those before mentioned. Its intent is to multiply, and has no relation but to number. *Moreover*, is in its right place, when used to add a reason of a different kind to those that went before. Its chief office is to add, with a particular respect to diversity. *Besides* is used with propriety, when we would strengthen, by a new reason, the force of those that were sufficient of themselves. Its principal office is to enhance by abundance.

MORE'SK-WORK, *s.* in Carving or Painting, consists of several pieces in which there is no perfect figure, but a wild representation of birds, beasts, &c.

MORETON, a town of Gloucestershire, which has a market on Tuesday. It is seated on the Fosse-way, 29 miles E. S. E. of Worcester, and 82 W. N. W. of London.

MORETON-HAMSTEAD, a pretty large town of Devonshire, with a woollen manufacture. It is seated on a hill near Dartmoor, 14 miles S. W. of Exeter, and 185 W. by S. of London. A noted market for yarn on Saturday.

MORI'GEROUS, *a.* [morigerus, Lat.] dutiful, obedient, complaisant.

MOR'ION, *s.* [Fr.] a helmet; an armour for the head.

MORI'SCO, *s.* a dancer of the morris or moorish dance.

MOR'KIN, *s.* in Hunting, a wild beast that has died through sickness or mischance.

MORLA'CHIA, a mountainous country chiefly in the N. part of Dalmatia, the inhabitants of which are called Morlacks, or Morlacchi, and subject to Austria. They inhabit the pleasant valleys of Koter, along the river Kerha, Cettina, Narenta, and among the inland mountains of Dalmatia. "Friendship," says the Abbé Fortes, "is lasting among the Morlacchi. They have even made it a kind of religious point, and tied the sacred bond at the foot of the altar." The Slavonian ritual contains a particular benediction, for the solemn union of two male or two female friends, in the presence of the congregation. He was present at the union of two young women, who were made *Posestrems*, in the church of Perussich. "The satisfaction," he continues, "that sparkled in their eyes, when the ceremony was performed, gave a convincing proof, that delicacy of sentiment can lodge in minds not formed, or rather not corrupted, by society which we call civilized. The male friends thus united are called *Probratimi*, and the females *Posestrems*, which mean half-brothers and half-sisters.

MORLAIX, a considerable sea-port in the department of Finisterre, with a tide harbour. The Notre-Dame church is a singular structure, and the hospital is very handsome; the inhabitants carry on a considerable trade in linen, hemp, and tobacco. It is seated on a river of the same name, 30 miles N. E. of Brest.

MORMO, *s.* [*μορμω*, Gr.] a bugbear, or something used to frighten persons.

MORN, *s.* [*marne*, Sax.] the first part of the day from sunrise to noon. Seldom used but by poets.

MORNING, *s.* [*morgen*, Teut.] the first part of the day, from the appearance of light till twelve o'clock at noon. Used in composition for any thing belonging to, or used in, the morning; as,

MORNING-GOWN, *s.* a loose gown worn before one is formally dressed.

MORNING-STAR, *s.* the planet Venus, so named when she appears in the morning.

MOROCCO, an empire of Africa, comprehending a considerable part of the ancient Mauritania, bounded on the W. by the Atlantic Ocean, on the E. by Algiers and Biledulgerid, on the N. by the Mediterranean, and on the S. by Zahara. Its greatest length is about 450 miles; and, where widest, about 390. The territories of Morocco are formed by the union of several small kingdoms, anciently limited to a single province, and perpetually at variance with each other, till, at last, they were all subdued, and united under one sovereign by the sharifs. The S. part of the empire contains the kingdom of Suz, Tarudant, Morocco Proper, Tasiletz, and Segilmessa; and on the N. part, those of Fez, Mequinez, and Tremecen; but the latter having been conquered by the Turks of Algiers, is now a part of that regency. The air of the country is very pure, and pretty temperate, especially to the N. of Mount Atlas. The soil, though sandy and dry on the western coast, is exceedingly fertile; the land containing within itself salts sufficient to make it fruitful. The increase of corn is often as sixty to one. The fruits, such as vines, figs, melons, apricots, apples, pears, olives, and the prickly pear, or Barbary fig, the palm-tree, as well as the pastures, are excellent, but dates ripen with difficulty; and indeed the country, &c. is not properly cultivated, as two-thirds at least of it lie waste. Acorns, which taste like chesnuts, salt and wax, abound here. The humidity of the atmosphere is so corrosive, that it quickly covers with rust iron, steel, metals, and even the keys and scissors carried in the pocket. The Moors make food of the locusts; prodigious quantities of them are brought to market, salted and dried like red herrings. The inhabitants are Mahometans, of a tawny complexion, robust, and very skilful in managing a horse and wielding a lance. There are two sorts of inhabitants; the Arabs, who dwell in moveable villages, composed of about 100 tents, and the Bereberies, or Brebes, who are the ancient inhabitants, and dwell in cities and towns. There are a great number of Christian slaves, and some merchants upon the coast, besides a multitude of Jews, who carry on almost all the trade, especially by land with the negroes, to whom they send large caravans, who travel over vast deserts, almost destitute of water. They carry with them woollen manufactures, silk, salt, &c. and, in return, have slaves, gold, and elephants' teeth. Out of the slaves the emperor recruits his cavalry. They also send large caravans to Mecca every year, partly out of devotion, and partly for trade, consisting of several thousand camels, horses, and mules. Their commodities are woollen manufactures, Morocco leather, indigo, cochineal, ostrich feathers, salt, and wax; in return for which they have silks, muslins,

calicoes, coffee, and drugs. In the deserts are lions, tigers, leopards, and serpents of several kinds. The fruits are dates, figs, grapes, almonds, lemons, oranges, melons, pomegranates, apples, pears, &c. They have also flax and hemp, but little timber. The naval force consists chiefly of rovers, who now and then take large prizes, especially those belonging to Sallee. The emperor is absolute, his will being a law, and he often exercises great cruelties. He can bring 100,000 men into the field, half of which are foot, and half horse; but they are poorly armed, and know but little of the art of war.

MOROCCO, the capital of the kingdom of Morocco, seated in a beautiful plain, planted with palm trees, formed by a chain of mountains on the N.; having Mount Atlas, from which it is distant about 20 miles, on the S. and E. Though one of the capitals of the empire, (for there are three, Morocco, Mequinez, and Fez,) it has nothing to recommend it but its great extent, and the royal palace. It is inclosed by remarkably strong walls, built of tabby, the extent of which still exists entire, and supposes a city which might contain 300,000 souls; they are flanked by square towers, and surrounded by a wide and deep ditch. The mosques are more numerous than magnificent. The streets are narrow, dirty, and irregular, and many of the houses uninhabited, and falling to ruin. M. Chenier doubts whether Morocco contains 30,000 inhabitants, even when the court is there. The Jews, who are pretty numerous here, have a separate town, walled in, and under the charge of an alcade appointed by the emperor. They have a market of their own; and when they enter the Moorish town, market, or palace, they are compelled to be barefooted. It has two gates, which are regularly shut every evening at nine o'clock, after which no person can enter or depart, till they are opened the next morning. The palace is a very extensive and solid building, with gates composed of Gothic arches, embellished with ornaments in the Arabian taste. Within the walls are various courts and gardens, elegantly laid out by European gardeners. Lat. 31. 12. N. lon. 6. 45. W.

MOROCCO, or **MARROQUIN**, *s.* the skin of a goat, or some animal resembling it, dressed in sumac or galls, and coloured of any colour at pleasure, much used in book-binding. The name is derived from the kingdom of Morocco, whence it is supposed the manner of preparing these skins was first borrowed. We have Morocco skins brought from the Levant, Barbary, Spain, Flanders, and France, in all different colours.

MOROSE, *a.* [*morosus*, Lat.] sour of temper; not easily pleased, and soon disgusted.

MOROSELY, *ad.* sourly; peevishly.

MOROSENES, *a.* sourness; peevishness.

MOROSITY, *s.* [*morositas*, Lat.] sourness or peevishness.

MORPETH, a town of Northumberland, seated on the river Wansbeck, 28 miles N. of Durham, and 291 N. by W. of London. A good market on Saturday for corn, cattle, and provisions, and a very large one on Wednesday for live cattle. Fairs on Wednesday, Thursday, and Friday, before Whitsunday; and the Wednesday before July 22.

MORPHEW, *s.* [*morphée*, Fr. *morfea*, Ital.] a scurf on the face.

MORRIS, or **MORRIS-DANCE**, *s.* [for *Moorish*, or *Morisco dance*] a kind of dance in which the person jingles bells sewed to his clothes; practised by the Moors, and resembling the Pyrrhic dance mentioned by classic authors.

MORROW, *s.* [*morgex*, Sax.] the day after the present day. *To-morrow*, an adverbial expression, implying on the day after the present. It is sometimes used as a substantive. "*To-morrow is the time.*" *Spect.*

MORSE, *s.* [*phoca*, Lat.] a sea-horse.

MORSEL, *s.* [*morsellus*, low Lat.] a small piece; a piece fit for the mouth; a mouthful; a meal; a small quantity.

MORSURE, *s.* [*morsura*, Lat.] the act of biting.

MORT, *s.* [*morte*, Fr.] in Hunting, a tune sounded at the death of game. A great quantity, from *morgt*, Isl. great; a low word. A salmon in its third year.

MORTAL, *a.* [*mortalis*, Lat.] subject to death; destructive, or causing death; human, or belonging to man. "*Mortal taste.*" *Par. Lost.* Excessive; violent. "*A mortal fright.*" *Dryd.* The last sense is low.

MORTAL, *s.* a man or human being.

MORTALITY, *s.* subjection to death; the state of being subject to death. Figuratively, death. "*Gladly would I meet mortality my sentence.*" *Par. Lost.* Human nature. "*Mortality cannot bear it.*" *Dryd.*

MORTALLY, *ad.* irrecoverably; so as to be doomed to death; extremely; excessively.

MOSA'BIQUE, a kingdom of Africa, having Quiloa on the N, the ocean on the E. the river Zambeze on the S. and Monoemugi on the W. In 1497, Vasques de Gama landed on the coast of Mosambique; after a short stay he seized the town of Mosambique, and the Portuguese have kept possession of it ever since. The air is unwholesome, and nothing but its extensive trade induces the Portuguese to remain here.—*Mosambique* is the capital of the above kingdom. It is the same to the Portuguese as the Cape of Good Hope was to the Dutch; for which reason there is generally a strong garrison, but the governor is changed every three years. Its trade consists of gold, elephants' teeth, and slaves. Lat. 15. 5. S. lon. 40. 10. E.

MOSCHA'TEL, *s.* [*moschatellina*, Lat.] a plant with green blossoms, and reddish berries, found in woods and shady places, flowering in April and May.

MOSCHETTO, *s.* a kind of gnat very troublesome in the West Indies.

MOSCOW, a large city of the Russian empire, capital of the government of Moscow, and formerly of the whole empire. It may be considered as a town built upon the Asiatic model, but gradually becoming more and more European; exhibiting, in its present state, a motley mixture of discordant architecture. It is distributed into five divisions, viz. 1. Kremlin; 2. the Khitaigorod, or the Chinese Town; 3. The Bielgorod, or White Town; 4. Semlainogorod; 5. The Sloboda, or suburbs; which form a vast exterior circle round all the other parts, and are invested by a low rampart and ditch. These suburbs contain, besides buildings of all kinds, corn-fields, much open pasture, and some small lakes, which give rise to the Neglina. Moscow exhibits an astonishing degree of extent and variety, irregularity and contrast. The streets, in general, are very long and broad. Some of them are paved; others, particularly in the suburbs, are formed with trunks of trees, or are boarded with planks like the floor of a room. Wretched hovels are blended with large palaces; cottages of one story stand next to the most stately mansions; many brick structures are covered with wooden tops; some of the wooden houses are painted; others have iron doors and roofs. Numerous churches appear in every quarter, built in a peculiar style of architecture; some with domes of copper, others of tin, gilt, or painted green, and many roofed with wood. Moscow is certainly the largest town in Europe; its circumference, within the rampart that incloses the suburbs, being 26 miles; but it is built in such a straggling manner, that its population corresponds in no degree with its extent. It has, however, been pretty well ascertained; it contains, within the ramparts, 300,000 souls. It is still the most populous city in the empire, notwithstanding the residence of the court is at Petersburg. The places of public worship in Moscow, including chapels, amount to above 1000; of these, 484 are public churches, 199 of which are of brick, stuccoed or white-washed; and the others of wood, painted red. Some of the bells are of a stupendous size; they hang in belfreys detached from the church, are fixed immoveably to the beams, and are rung by a rope tied to the clapper. It has always been esteemed here a meritorious act of religion to

present a church with bells; and the piety of the donor has been measured by their magnitude. Accordingly, Boris Godunuf, who gave a bell of 288,000 pounds to the cathedral of Moscow, was the most pious sovereign of Russia, till he was surpassed by the empress Anne, who presented a bell that weighs 432,000 pounds, and is the largest in the known world. Among the public institutions in Moscow, is the Foundling Hospital, endowed in 1764, by Catharine, and supported by voluntary contributions; to encourage which, she granted to all benefactors some valuable privileges, in proportion to the extent of their liberality; and, it is remarkable, that a private merchant, named Dimidof, has expended on this charity 200,000*l*. The gardens hereabouts yield the famous transparent apple, called by the Russians Naliwi, with variety of other fruits. Moscow is the centre of the inland commerce of Russia, particularly connecting the trade between Europe and Siberia. The navigation to this city is formed solely by the Moskva, which rises near Ruza, and falling into the Occa, near Colomna, communicates, by that river, with the Volga. But as the Moskva is navigable in the spring only, upon the melting of the snows, the principal merchandise is conveyed upon sledges in winter. This city is 460 miles S. E. of Petersburg, and 1200 N. by E. of Constantinople. Lat. 55. 45½. N. lon. 37. 51. E.—Moscow, in Sept. 1812, was, after a bloody battle, entered by the French grand army, commanded by the Emperor Napoleon, with the hopes of finding winter-quarters. But the Russians, intent on the ruin of their opponents, and submitting to a sacrifice unexampled in history, set the city on fire in a thousand places, and the greatest part of it was consumed, with their sick and wounded, to the number, according to the French account, of 20 or 30,000. The invaders preserved the Kremlin; but this afterwards shared the same fate; for when necessity compelled the French to retreat, they blew it up. A great part of this city has been since rebuilt in an improved style.

NAME, *s.* [nama, Sax. naem, Belg.] denotes a word whereby men have agreed to express some idea; or which serves to signify a thing or subject spoken of. This the grammarians usually call a noun, though their noun is not of quite so great an extent as our *name*. Names are either proper or appellative. Proper names are those which represent some individual thing or person, so as to distinguish it from all other things of the same species; as *Cicero*, which represents a certain orator. Appellative names are either called christian, as those given in baptism, or surnames; the first imposed for the distinction of persons, answering the Roman *Prænomen*; the second for the distinction of families, answering to the *Nomen* of the Romans, and the *Patronymicum* of the Greeks. Figuratively, reputation or character. Renown; honour or glory; memory or remembrance. Power given to a person to act for another. Appearance, or an assumed character. "In the *name* of Brook."

To NAME, *v. a.* [nāman, Sax.] to apply a word constantly to distinguish a person or thing from others; to mention the word applied to any being; to specify or distinguish by mentioning the word applied to express any person or idea; to utter or mention. *SYNON.* We *name*, to distinguish in conversation; we *call*, as for help, when wanted.

NA'MELESS, *a.* [namleas, Sax.] having no word by which it may be expressed; one whose name is not known or expressed.

NA'MELY, *ad.* [naemlick, nahmlich, Belg.] particularly; especially; to mention by name.

NA'MER, *s.* one that calls or knows any person or thing by name.

NA'MESAKE, *s.* one that has the same name with another.

NA'MPTWICH, a large well-built town of Cheshire, with very regular streets, and manufactures of cotton (lately established) and of shoes. It is seated on the river Weever, near the Chester canal, which is finished here with a handsome broad basin, forming a kind of harbour. Here are salt-springs, which lie on the banks of a fresh-water stream, from which they make great quantities of fine white salt. The principal dairies of Cheshire are about this town. It is a great thoroughfare to Ireland, and is 26 miles S. E. of Chester, and 164 (by Stafford) N. W. of London. A large market on Saturday, for corn, cattle, &c.

NAMUR, a city of the Netherlands, said to take its name from an ancient idol called *Nam*, supposed to be Neptune. It has, or had, a very strong castle, built on the opposite side of the Sambre, on a sharp rock, and defended by Fort William, and many other considerable forts, so as to be supposed almost impregnable. It is seated at the confluence of the Meuse and Sambre, 25 miles S. W. of Liege. Lat. 50. 28. N. lon. 4. 53. E.

NA'NCI, a large and handsome city of France, capital of the department of Meurthe. It contains about 34,000 inhabitants, and is divided into the Old and New Town, which are separated by a canal. The first, though irregularly built, is rich and populous, and contains the palace of the ancient dukes of Lorraine. The New Town, whose streets are as straight as a line, was already one of the finest in Europe, before the magnificent works with which Stanislaus I. titular king of Poland, and duke of Lorraine, enriched it. Before the revolution, it had an university, an academy of sciences, and a medical college. It is situated near the river Muerte, 10 miles E. of Toul, and 20 S. of Metz. Lat. 48. 42. N. lon. 6. 17. E.

NANKING, or *Kiangnin*, a city of China, capital of the province of the Kiangnan, and formerly the imperial city. It is the largest city in China, being 17 miles in circumference, and about 3 miles distant from the great river Yan-tise Chiang, from which canals are cut, so large, that vessels may enter the town. This place is greatly fallen from its ancient splendour; for it had a magnificent palace, not a vestige of which is now to be seen, as well as temples, tombs of the emperors, and other ancient monuments. A third part of the city is desolate, but the rest is extremely populous, well inhabited, and full of business. The streets are narrow but handsome and well paved, and on each side are shops neatly furnished. The public buildings are mean, except a few temples, the city gates, and the famous tower of porcelain, 200 feet high, and divided into 9 stories, by projections, &c. covered with green varnished tiles. They have several manufactures in silk and wool. The number of the inhabitants is said to be 1,000,000, without comprehending the garrison of 40,000 men. Here the physicians have their principal academy. It is 500 miles S. S. E. of Peking. Lat. 32. 43. N. lon. 118. 53. E.

NANTES, an ancient and pretty large city in the department of Lower Loire. It is one of the most considerable places in France, and contains the richest merchants. The bridges over the river Loire, in which are some islands, are almost a league in length. The suburbs are so large, that they exceed the city. The inhabitants are computed at 75,000. Before the revolution, here was an university, a society of agriculture and arts, and a school of anatomy and surgery; and merchants also had commonly, on their own account, more than 120 ships for Guinea, the French West India islands, Spain, and the Spanish colonies; indeed this port, in respect of the slave trade, might, before that time, be considered as the Liverpool of France. Vessels were fitted out here for the cod fishery in North America; and Nantes had a considerable share in the commerce with the United States. A great quantity of salt is made in the territory of Nantes, both at the Bay of Bourgneuf and in the salt marshes of Guerande and Croisie. Large vessels can come no higher than Paimbœuf, which is some miles below Nantes. It is 37 miles S. W. of Angers, and 217 S. W. of Paris. Lat. 47. 14. N. lon. 1. 28. W.

NAP, *s.* [*hnæppan*, Sax.] a slumber; short sleep; the soft or downy part of woollen cloth above the surface. In Botany, the catmint.

To **NAP**, *v. n.* to sleep; to be drowsy; to be in a state of seeming security.

NAPE, *s.* the joint of the neck behind.

NAPHTHA, *s.* [*νάφθα*, Gr. *naptha*, Lat.] a very pure, clear and thin mineral fluid, of the bituminous kind, of a very pale yellow, with a cast of brown; it is found floating on the waters of springs, and is mostly used externally in paralytic cases.

NAPKIN, *s.* linen used at table to lay in the lap, and wipe the hand.

NAPLES, a kingdom of Italy, bounded on the N. W. by the Ecclesiastical State; on the S. W. by the Mediterranean; and on the E. by the Adriatic. Its greatest length, from N. W. to S. E. is upwards of 300 miles, and from N. E. to S. W. from 96 to 100; its breadth is variously estimated at from 90 to 30. It is divided into 12 provinces, namely, Terra-di-lavora, which was the ancient Campania Felix, and of which the city of Naples is the capital; Principato Citeriore and Ulteriore (hither and farther;) Molise; Basilicata; Calabria Citeriore and Ulteriore; Abruzzo Citeriore and Ulteriore; Capitanata; Terra di Bari; and Terra di Otranta; the last three forming the ancient Apulia (now called Puglio) on the E. side of the kingdom.—The climate is extremely hot in summer; but the most disagreeable part of the climate is the firoco, or S. E. wind which is very common in spring, and is still more relaxing. In winter there is seldom any ice or snow, except on the mountains. On account of its fertility, the country has been termed a terrestrial paradise; it abounds with all sorts of grain, the finest fruits, and vegetables of all kinds, with rice, flax, oil, wine, saffron, and manna; poultry, game, and fish, are also plentiful and cheap. It affords also alum, vitriol, sulphur, rock-crystal, marble, and several sorts of minerals, together with fine wool and silk. Besides these products, waistcoats, caps, stockings, and gloves, are also made of the hair or the filaments of a shell-fish, which are warmer than those of wool, and of a beautiful glossy green. The principal mountains are the Apennines, which traverse it from N. to S. and the celebrated volcano, Mount Vesuvius. One of the greatest inconveniences to which this kingdom is exposed, is earthquakes, which the eruptions of Mount Vesuvius contribute, in some measure to prevent. The established religion is the Romish; and the clergy and convents possess two-thirds of the whole kingdom; but the Jews are allowed to settle here. The inhabitants of this country have, at all times, borne but an indifferent character among other nations; gluttony is here a predominant vice, while instances of ebriety are said to be comparatively rare. In the female sex, the passion for finery is almost superior to any other; and chastity is not accounted the characteristic virtue of the country. In 1734, the Spaniards made themselves masters of Naples and Sicily, for the Infant Don Carlos; and in 1736, the emperor, by a formal instrument, ceded both these kingdoms to his heirs male and female. But in the beginning of the year 1806, this family was expelled by the French, who invaded the kingdom with a powerful army, with the avowed intention of transferring the Neapolitan throne to a French prince. Accordingly, after the subjugation of the country, Joseph Bonaparte was created king of Naples—but resigned the kingdom to Murat, the brother-in-law of the French emperor, in June 1808; who was expelled by the Austrians in May, 1815, and the ancient dynasty restored by the allied powers.

NAPLES, the capital of the above kingdom, is one of the finest cities in the world, is the see of an archbishop, the seat of an university, and is defended by thick walls

which surround it, regular bastions, strong towers, deep ditches, and fortified castles. It is about 15 miles in circumference, and has seven large suburbs, containing together 400,000 inhabitants. The palace-royal is a spacious and convenient building; but the most magnificent are the cathedral, and the chapel of St. Januarius, where they pretend the blood of that saint is preserved. The air of Naples is serene and healthy, and the winter mild. The harbour is capable of containing 500 vessels, which may ride with safety. It is 108 miles S. E. of Rome. Lat. 40. 50 $\frac{1}{2}$. N. lon. 14. 24. E.

NA'RWHALE, *s.* a species of whale.

NA'RNA, a town of Ingria, in Russia, in the government of Revel. The houses are built of brick, stuccoed white; and it has more the appearance of a German than of a Russian town. In the suburbs, called Ivangorod, or John's Town, the stupendous remains of an ancient fortress, built by Ivan Vassilievitch the Great, impend, in a picturesque

manner, over the steep banks of the river. The principal exports from it are hemp, flax, timber, and corn. Near it is the celebrated spot where Charles XII. of Sweden, in his 19th year, gained a complete victory over the Russian army in 1703. It is situated on the river Narova, 8 miles from its mouth, in the Gulf of Finland, 68 miles S. W. of Petersburg. Lat. 59. 23 $\frac{1}{2}$. N. lon. 28. 27. E.

NA'SAL, *a.* [from *nasus*, Lat.] belonging to the nose. In Grammar, pronounced through the nose.

NEGRO, *s.* [Span.] a blackmoor.

NEGROLAND, or *Nigritia*, a country of Africa, which lies between 18 deg. W. and 15 deg. E. longitude, and between 10 deg. and 20 deg. of N. latitude, the great river Niger running through it. It is bounded by Zaara, or the Desert, on the N. by unknown countries on the E. by Guinea on the S. and by the Atlantic Ocean on the W. The Europeans have settlements on the coast, where they barter European goods for slaves, gold dust, and elephants' teeth.

NEGROPONT, an island of Turkey in Europe, near 100 miles long, and from 8 to 16 broad. It abounds exceedingly in corn, wine, oil, fruits, flesh, fish, and fowls, and provisions are very cheap. It has a Greek archbishop's see. The captain-bashaw resides here, who commands the whole island. The bridge reaches from the city to the continent, across the Strait of Negropont, the irregularities of which has baffled the researches of both ancients and moderns, to account for it satisfactorily. In the first eight days of the month, viz. from the 14th to the 20th, and also in the three last days, the tide is regular both in its ebb and its flood; but on the other days, the ebb and flood return 10, 11, 12, 13, and even 14 times within 24 or 25 hours. Lat. 38. 30. N. lon. 24. 8. E.

To NEIGH, *v. n.* [*hnægan*, Sax.] to make a noise like a horse or mare.

NEIGH, *s.* the noise made by a horse.

NEIGHBOUR, *s.* [*nehgebur*, Sax.] one who lives near to another; one familiar to another; any thing situated near or next to another; intimate; confidant. In Divinity, one partaking of the same nature, and therefore entitled to good offices.

NEIGHBOURLY, *ad.* in the manner of a neighbour; in a social and civil manner.

NEITHER, *conj.* (sometimes pronounced *nither*, and by others *nêther*; *nawther*, Sax.) not either. When used in the first branch of a negative sentence, it is answered by *nor*.—"Fight *neither* with small *nor* great." 1 Kings xxii. 31. Sometimes it is used as the second branch of a negative sentence; as, "Ye shall *not* eat of it, *neither* shall ye touch it." Gen. iii. 3. Sometimes it follows a negative at the end of a sentence, and often, though not grammatically, yet emphatically, after another negative. "Men come not to the knowledge, till they come to the use of reason, *nor* then *neither*." Locke.

NEITHER, *pron.* not either; not one nor the other; not this nor that.

NEPOTISM, *s.* [*nepotisme*, Fr.] fondness for nephews. This word is chiefly used to express the extravagant power given by the ruling popes to their nephews, or other relations, in ecclesiastical affairs.

NERVE, *s.* [*nervus*, Lat. *nerf*, Fr.] in Anatomy, a round, white, long body, like a cord, composed of several threads or fibres, deriving its origin from the brain or spinal marrow, and distributed through all parts of the body, serving as the organ of sensation or motion, and supposed by some anatomists to contain a juice called the animal spirits, or some electrical fluid, by means of which the impression of objects is conveyed instantaneously to the brain, or the soul resident therein. A sinew or tendon. In Poetry, any thing which gives strength, or is essential.

NERVELESS, *a.* faint; without strength; weak.

NERVOUS, *a.* [*nervosus*, Lat.] well strung; strong; vigorous; relating to the nerves; having its seat in the nerves. Having weak and disordered nerves, in medical cant.

NE'SCIENCE, *s.* [from *nescio*, Lat.] ignorance; the state of not knowing. "Sat down in a professed *ne-science*." Glanville.

NESS, a termination, added to an adjective, by means of which it is changed to a substantive, signifying state or quality in the abstract. Thus *good* is changed into *goodness*. [When used at the ends of the names of places, it is derived from *nese*, Sax.] a nose, promontory, or headland; as, *Inverness*.

NEST, *s.* [Sax.] a bed or repository formed by a bird or fowl, for laying, hatching, and feeding her young in; any place where animals are produced; the young of a nest. A receptacle, or place of residence. "A nest of rogues." A collection of drawers, boxes, or pockets, that communicate with each other, or belong to the same frame.

To NEST, *v. n.* to build nests.

NE'STEGG, *s.* an egg, left in the nest to keep the hen from forsaking it.

To NE'STLE, *v. n.* to settle, harbour, or lie close and snug like birds in a nest. Actively, to house, as in a nest; to cherish, as a bird does her young in a nest. "She like his mother nestles him." *Chapman.*

NE'STLING, *s.* a bird just taken out of the nest.

NET, *s.* [net, Sax.] a texture woven or knit with large interstices, or meshes, used as a snare for birds, fishes, &c. Any thing made with interstitial vacuities.

NET, or NEAT, *a.* in Commerce, something pure, and unadulterated with any foreign mixture. *Net Produce*, a term used to express what any commodity has yielded, all tare and charges deducted.

NETHER, *a.* [neother, Sax.] lower, opposed to upper; situated in a lower place, or in the infernal regions.

NE'THERLANDS, anciently called Belgia, but since denominated Low Countries, or *Netherlands*, from their low situation, are situated between 2 and 7 deg. of E. lon. and between 50 deg. and 53 deg. 30 min. of N. lat. They consisted formerly of 17 provinces; 10 of which are called the Austrian and French Netherlands, and the other 7 the United Provinces. They were, by the late revolutionary war, attached to the French empire; but by the treaty of peace in 1814, were dissevered, and are now under the sovereignty of the Prince of Orange.

To NETTLE, *v. a.* to sting, irritate, or provoke.

NETWORK, *s.* the work with which a net is made; any thing made with interstices resembling the meshes of a net.

NEVER, *ad.* [nafre, Sax.] at no time, either past, present, or to come; in no degree. "Never the worse." None, or not a single one. "He answered him to *never* a word." *Matt.* xxvii. 14. Johnson observes, that this word is used in a form of speech, which, though handed down by the best writers, and but lately censured, is justly reckoned a solecism; as in, "He is mistaken, though *never* so wise."—which should properly be expressed: "He is mistaken, though *ever* so wise." Or else by supplying the ellipsis, thus; "He is mistaken, though there *never* was a person so wise." In this sense, it should be remarked, it always includes a comparison, and is followed by *so*.

NEVERTHELESS, *ad.* notwithstanding.

NEUFCHÂTEL, a country of Switzerland, having Franche Comte on the W. Basle on the N. and Bern and Friburg on the E. and S. It is about 40 miles long, and 20 broad. The air is healthy and temperate, but the soil is not every where alike fertile; it produces however a good deal of wine, both white and red. The religion is Protestantism, except two small villages, where that of the church of Rome is observed. *Neufchattel*, the capital of the above country, is situated at the end of the lake of the same name. It is 25 miles W. of Bern. Lat. 47. 5. N. lon. 7. 0. E.

NIGH, (the *gh* in this word and its following derivatives is mute in pronunciation; as *nī*, *nīly*, &c.) *prep.* [nyh, Sax.] not far from. **SYNON.** I will leave it to the decision of the curious, whether or no the word *near* is not a corruption of *nigher*, the comparative of *nigh*. Be this as it may, *near*, in my opinion, implies a less distance than *nigh*. Thus I should say, When we come *nigh* to such a place, we shall be *near* home: The *nigher* the enemy, the *nearer* the danger. As a farther proof of this, speaking of the close ties of kindred, we use the word *near* in preference to that of *nigh*, as implying a less distance or greater degree of consanguinity between the two persons. Thus, my brother's child is my *near* relation, or is nearly related to me.

NIGH, *ad.* at no great distance; a place not far off.

NIGH, *a.* near, at no great distance. Allied closely by blood, applied to kindred.

NILE, a great river of Africa, with rises in the mountains of Abyssinia, called the *Mountains of the Moon*, near the village of Geesh, in lat. 10. 59. N. lon. 36. 55. E. In some parts of this river there are rocks, whence the water falls several feet, and these are called the cataracts of the Nile. It overflows regularly every year, from the 15th of June to the 17th of September, when it begins to decrease. The fertility of Egypt depends upon the overflowing of the Nile; and they reckon it will be a bad year when it is less than 14 cubits, and above 18; but that 16 is the proper height; and when this happens, they make public rejoicings throughout the Delta. This inundation of the Nile is caused by the periodical rains which fall every year between the tropics, and more particularly in Abyssinia.—Off the mouth of this river, August 2, 1798, Sir Horatio (afterwards Lord) Nelson, took, or destroyed, a French fleet of 13 sail of the line and 2 frigates. The British fleet consisted of thirteen 74 gun ships and one of 50 guns; in the French line of battle were one of 120 guns, L'Orient, Adm. Brueys, burnt and blown up; 3 of 80 guns, 9 of 74, and 4 frigates. The French armament was directed against Egypt, where Bonaparte had previously landed with a considerable military force.

NORFOLK, a county of England, in the bishopric of Norwich, bounded on the north and east by the German ocean; by Suffolk on the south; and by Cambridgeshire and Lincolnshire on the west. It is divided into 30 hundreds, has 33 market-towns, the city of Norwich its capital, and 660 parishes, and sends 12 members to parliament. The number of its inhabitants is 133,076 males, and 153,906 females. No county has a greater share of river and sea navigation. The manufactures of Norfolk are chiefly worsted, woollens, and silks. Its principal rivers are the Great Ouse, Nen, Little Ouse, Waveney, Yare, and Bure.

NORREY, or **NORROY**, *s.* the title of the third king at arms. His jurisdiction lies on the N. side of the river Trent.

NORTH, *s.* [*north*, Sax.] one of the four cardinal points. The point opposite to the sun when he is in the meridian.

NORTH, *a.* situated to the north; northern.

NORTHALLERTON, a town in Yorkshire, which sends two members to parliament, and has a market on Wednesday. Distant 224 miles from London.

NORTHAMPTON, the county-town of Northamptonshire, with a market on Saturday. It has several churches, and the great one, called Allhallows, stands in the middle of the town, and is adorned with a handsome portico. It was in a great measure destroyed by a fire in 1765, but was soon rebuilt, with a handsome spacious market place; and, in general, is a well-built handsome town, where the assizes are kept, as well as the quarter-sessions, and sends two members to parliament. It has the title of an earldom, a good free-school, two alms-houses, an infirmary, and a gaol. It had, in 1811, 8427 inhabitants: and is 66 miles N. W. by N. of London.

NORTHAMPTONSHIRE, an inland county, bounded on the E. by Huntingdonshire, with a part of Bedfordshire and Buckinghamshire; on the N. by Leicestershire and Rutlandshire; on the W. by Warwickshire, and on the S. by Oxfordshire and Buckinghamshire. It contains 136 parishes, 13 market towns, and sends 9 members to parliament. The principal rivers are, the Ouse, the Nen, the Welland, the Cherwell, and the Larn. It is a healthful sporting country, containing a great number of gentlemen's seats; and the soil is fertile in corn and grass. Its inhabitants in 1821, 162,483.

NORTHING, *s.* in Navigation, the difference of latitude which a ship makes in sailing towards the north.

NORTH STAR, *s.* the polestar, or the last star in the constellation named the Little Bear.

NORTHUMBERLAND, a county of England, 74 miles in length and 45 in breadth, bounded on the E. by the ocean; on the W. by Cumberland and part of Scotland; on the S. by the county of Durham, and on the N. by the river Tweed, which separates it from Scotland. It contains 460 parishes, 12 market-towns, and sends six members to parliament. The air is sharp, and very cold in the winter, from the snow lying on the tops of the hills, which are at a distance from the sea. But the land on the sea-coast is plain and fruitful, and the great plenty of coals that this county produces is generally known. This county is well watered by rivers, the principal of which are the Tyne, Tweed, Coquet, and Alne. Alnwick is the county town. This county contained in 1821, 198,965 inhabitants.

NORTHWARD, *a.* towards the north.

NORTHWARD, or **NORTHWARDS**, *ad.* towards the north.

NORTHWEST, *s.* the point, or rhumb, in the middle between the north and west.

NORTHWICH, a town in Cheshire, having a market on Friday. It is seated at the conflux of the rivers Dane and Weaver, and is chiefly celebrated for its brine pits and lucrative salt pits. The stratum of salt lies about 40 yards deep, and some of them are hollowed into the form of a temple. The descent is through a dome, the roof supported by rows of pillars about two yards thick, and several in height; and when illuminated by a sufficient number of candles, they make a most magnificent appearance. The fossil salt is generally yellow, and semipellucid, sometimes debased with a dull greenish earth; and is often found, but in small quantities, quite clear and colourless. It is 174 miles N. W. of London.

NORTHWIND, *s.* the wind that blows from the north.

NORTON, or **Chipping-Norton**, a town of Oxfordshire, with manufactures for horse clothing and harrateens. It is situated on the great post road between Worcester and Oxford, 12 miles S. W. of Banbury, and 73 N. W. of London. Market on Wednesday.

NORWAY, a country of Europe, situated between 4 and 30 degrees E. lon. and between 58 and 72 deg. N. lat. bounded by the Atlantic ocean on the N. and W.; by Sweden, Lapland, and other provinces of Sweden, on the E.; and by the sea called Categate and Schagdrac on the S. It is a cold barren country, till lately subject to Denmark; but in January, 1814, was ceded by treaty to Sweden.

NORWICH, an ancient, large, and populous city of Norfolk, seated on the river Yare, which runs through it, and is navigable hence to Yarmouth without locks. It has a stately ancient castle, on a hill, which commands a fine view of the city: this castle is the shire-house of the county, and the county gaol; the assizes for the city being held at the Guildhall. Norwich has a good public library, a city and county hospital, a lofty market-house of free-stone, and a bridewell built of flints, remarkable for being beautifully cut into regular little squares, without any visible cement. It had formerly 58 parochial churches, besides monasteries; and has now 36 churches, besides the cathedral, chapels, and dissenting meeting-houses. It is computed that stuffs, such as damasks, camlets, black and white crapes, to the amount of 700,000l have sometimes been manufactured here in a year. Norwich has 12 gates, 6 bridges over the Yare, about 9000 houses, and 50,000 inhabitants. It is well supplied with provisions, and is 43 miles N. of Ipswich, and 109 N. E. by N. of London. Markets on Wednesday, Friday, and Saturday.

NOSE, *s.* [*næsa*, or *nosa*, Sax.] that part of a human body which is prominent in the middle of the face, and is the organ of smelling, and the emunctory of the brain. The end of any thing which is perforated or hollow. "The nose of a bellows." Scent, or the power of distinguishing or discovering by the smell. "We are not offended with a dog for having a better nose than his master." Collier. To lead by the nose, signifies to drag by force, alluding to the manner of leading a bear, by means of a ring fixed to his nose; to have so much influence over a person as to make him do what you please. To thrust one's nose into the affairs of another, is to concern ourselves with the affairs of others without being invited, or to be officious, or a busy body. To put one's nose out of joint, is to deprive us of the affections of another.

NOSEGAY, *s.* a bunch of flowers.

NOSELESS, *a.* without a nose; having no smell.

NOSE, *noz-zle*, *s.* [a diminutive of *nose*] the extremity

of a thing which is hollow; as, "the *nosle* of a pair of bellows.

NOSTRUM, *s.* [Lat. it is our own] a medicine not made public with respect to its ingredients.

NOT, *ad.* [*ne aught*, Sax. *niet*, Belg.] a particle used in denoting denial and refusal; in a negative proposition it is placed in the first branch, and is answered by *nor*. **SYNON.** *Not* barely expresses the negation; *no* strengthens, and seems to affirm it. The first often denies the thing in part only, or with limitation; the second denies it always absolutely, wholly, and without reserve. Thus we say, he has *not* money, he has *not* patience; meaning he is not overburdened with either: but when we say he has *no* money, he has *no* patience, we would be understood to say he has none at all. It is on account of this limitation that the word *not* is generally used in company with those words that mark either the degree, or quality, or quantity; such as **MUCH**, **VERY**, **ONE**, and the like. There is *not*, commonly, *much* money to be found in the possession of men of letters. The major part of those who frequent divine service are *not very* devout. It often happens that he, who has *not one* single penny in his pocket, is *much* happier than many rich men.

NOTIONALLY, *ad.* in idea; mentally.

NOTIONALITY, *s.* an empty or groundless opinion.

NOTORIETY, *s.* [*notoriété*, Fr.] the quality of being universally known, used in a bad sense.

NOTORIOUS, *a.* [*notorius*, Lat.] publicly known; evident; generally in a bad sense.

NOTORIOUSLY, *ad.* in a public, evident, or open manner.

NOTORIOUSNESS, *s.* the quality of being universally or generally known.

NOTTINGHAM, the county-town of Nottinghamshire, takes its name from the Saxon, Snottengaham, or house of Dens, so called from the spacious vaults dug in the rock, in which the ancient Britons are supposed to have resided. It is pleasantly seated on a rocky eminence, above the meadows bordering the Trent; on the highest part of which stands the castle, a large, elegant, and noble palace, belonging to the duke of Newcastle, with a most extensive prospect. It is a large, populous, and handsome town, with a spacious market-place, and considered as one of the principal seats of the stocking manufacture; particularly of the finer kinds, as those of silk and cotton. It has also a manufactory of glass and coarse earthenware, and a considerable trade in malt. It contained in 1811, 34,253 inhabitants, and is 16 miles E. of Derby, and 123 N. by W. of London. Markets on Wednesday and Saturday. Fairs on Friday after January 13th, May 7th, Thursday before Easter, and October 2d.

NOTTINGHAMSHIRE, a county of England, bounded on the N. by Yorkshire and Lincolnshire; on the E. by the latter county; on the S. by Leicestershire; and on the W. by Derbyshire. Its greatest length is 43 miles; its greatest breadth about 20. It is divided into 8 hundreds, and contains 13 towns, 168 parishes, and had in 1821, 186,873 inhabitants. The principal rivers are the Trent and Idle. Almost the whole of the middle and western parts of the county were formerly occupied by the extensive forest of Sherwood, which is the only royal forest N. of the Trent; but the wood has in many parts been cleared, and the extent of the forest much contracted. The chief products of this county are corn, malt, pit-coal, of which there is great plenty, and a kind of stone somewhat like alabaster, but not so hard, which, when burnt, makes a plaster harder than that of Paris, with which the inhabitants generally plaster the floors of their upper rooms instead of boarding them. Their other commodities are malt, wool, liquorice, wood, fish, and fowl. Their manufactures chiefly consist in frame-work knitting, glass, and earthenware. The principal town is Nottingham.

NOTWHEAT, *s.* a kind of unbearded wheat.

NOTUS, *s.* [Lat.] the south wind.

NOTWITHSTANDING, *conj.* without any hinderance or obstruction. "Their gratitude made them, *notwithstanding* his prohibition, proclaim the wonders." *Decay of Piety*. Although. "Notwithstanding it will weaken him." *Addison*. Nevertheless, however. "They that honour the law, are *notwithstanding* to know." *Hooker*.

O'TAHEITE, one of the Society Islands in the S. Pacific Ocean, about 90 miles in circumference, first discovered to the English by Capt. Wallis, in 1767, who called it George the Third's Island. Captain Cook, in the *Endeavour*, came hither in 1769, to observe the transit of Venus, and visited it

twice afterwards. It consists of two peninsulas, great part of which is covered with woods and forests, consisting partly of bread fruit trees, palms, cocoa-nut trees, plantains, bananas, mulberries, sugar-canes, and others peculiar to that climate. The people have mild features, a pleasing countenance, and are gentle, good-natured, and hospitable. The houses of the natives consist only of a roof, thatched with the long prickly leaves of the palm nut tree, and supported by a few pillars made of the bread fruit tree. The cloth of the natives is made of the fibrous bark of the mulberry-tree, which is beaten with a kind of mallet; and a glue, made of the hibiscus esculentus, is employed to make the pieces of bark cohere together. Some of these pieces are 2 or 3 yards wide, and 50 yards long. It is remarkable, that though the natives of this island far excel most of the Americans, in the knowledge and practice of the arts of ingenuity, yet they had not invented any method of boiling water; and, having no vessel that could bear the fire, they had no more idea that water could be made hot, than that it could be made solid. The only quadrupeds found upon the island were hogs, domestic dogs, and rats, which the inhabitants suffer to run about at pleasure, without ever trying to destroy them. Otaheite lies in about 18 deg. S. lat. and 150 deg. W. lon. Christianity has lately been introduced here to a considerable extent.

OXFORD, the capital of Oxfordshire, with two markets, on Wednesday and Saturday. It is a city, a bishop's see, and an university; and, besides the cathedral, has 13 parish churches. It is seated at the confluence of the rivers Isis and Cherwell, on an eminence almost surrounded with meadows, except on the E. side. The whole town, with the suburbs, is of a circular form, three miles in circumference. It consists chiefly of two spacious streets, which cross each other in the middle of the town. The university contains 20 colleges and five halls, several of which stand in the streets, and give the city an air of magnificence. In the halls the students live, either wholly or in part, at their own expence. The colleges are, University, Baliol, Merton, Exeter, Oriel, Queen's, New, Lincoln, All Souls, Magdalen, Brazen Nose, Corpus Christi, Christ Church, Trinity, St. John Baptist's, Jesus, Wadham, Pembroke, Worcester, and Hertford. The halls are Alban, Edmund, St. Mary's, New Inn, and St. Mary Magdalen. Among the libraries in the university, the most distinguished are, the Bodleian, founded by Sir Thomas Bodley; those of All Souls College, Christ Church, Queen's, New College, St. John's, Exeter, and Corpus Christi. Among other public buildings are, the Theatre, the Ashmolean Museum, the Clarendon Printing-house, the Radcliffe Infirmary, and a fine Observatory. Oxford has lately been embellished with a noble market-place and a magnificent stone bridge. It is governed by a mayor and aldermen, in subjection to the chancellor and vice-chancellor of the university. It sends four members to parliament, two for the university and two for the city. It contains about 14,000 inhabitants, and is 54 miles W. by N. of London.

P.

P Is the fifteenth letter, and eleventh consonant, of our alphabet; and is formed by a slight compression of the anterior part of the lips, as *pull*, *put*, *pot*, and has nearly the sound of *b*. When *p* stands before *s* or *t*, its sound is lost; as in *psalms*, *pseudo-prophets*, *Ptolemy*, *ptisan*, &c. When it stands before *h*, it has the sound of *f*; as in *physic*, *philosopher*, *phosphorus*, and in most other words; but in *phthisic*, and some Greek words, the *ph* is not pronounced. Used as a numeral letter, it stood for 400, but with a dash on the top, thus, *P̄*, for 400,000. Among medical writers it stands for *pugil*, or the eighth part of a handful. In Italian music it stands for *piano*, or soft, and shews that the force of the voice or instrument is to be lessened. *PP* implies *piu piano*, more soft, and *PPP* *pianissimo*, the softest possible. *P. M.* in Astronomy, stands for *post meridiem*, or afternoon.

PARALLACTIC, PARALLACTICAL, *a.* belonging to a parallax.

PARALLAX, *s.* [παράλλαξις, Gr.] with Astronomers, is of several kinds. *Diurnal Parallax*, is the difference between the true place of a celestial body as seen from the earth's centre, and its apparent one as seen from her surface. It is greatest of all in the horizon, and then called the *horizontal*

parallax; but it decreases gradually as the body ascends above the horizon, called its *parallax in altitude*, till it vanishes in the zenith. The parallax of a star in a vertical circle changes its place with regard to the other circles of the sphere, and makes its visible longitude, latitude, and right ascension, different from the true ones; and hence arise what is termed *parallax in latitude, longitude, or right ascension*. The diurnal parallax always makes the object to appear lower than its true place; and according to the number of times the planet or star's distance from the earth is increased, so many times less will be the parallactic angle. The *parallax of the grand orb*, or the *annual parallax*, called by Ptolemy *prostaphæresis orbis*, and by Copernicus, *commutation*, is the angle under which the semidiameter of the earth's orbit appears, when viewed from a superior planet or star.

PARIS, the capital of France, one of the largest, finest, and most populous cities of Europe. The river Seine, which crosses it, forms three small islands, called the Island of Louviers, the Notre Dame, and the Palace, which last is the ancient city of Paris. The inhabitants are computed to be 600,000. It is two leagues in diameter, and six in circumference, including the suburbs. It is supposed to contain 875 streets, and 24,000 houses, among which are many of five, six, and even seven stories. There are nine principal bridges in Paris, two of which occupy the whole breadth of the Seine; namely, the Pont Neuf, and the Pont Royal. The public fountains are very numerous, and on some of them is displayed very elegant sculpture. The public places, squares, &c. are also numerous and elegant, among which may be noticed the Place-de-Lewis XV. of an octagon form, in which was an equestrian statue, in bronze, of that monarch. This square, lately called the Place-de-la-Revolution, was the fatal scene of the execution of the unfortunate Lewis XVI. and afterwards of his unhappy consort, Marie Antionette; the former on the 21st of January, and the latter on the 16th of October, 1793. The cathedral of Notre-Dame, a Gothic structure, is one of the largest in Europe, and contains 45 chapels. The four principal palaces are the Louvre, the Thuilleries, the Palais Royal, and the Luxemburgh. The garden of the Thuilleries, in front of the palace, and on the banks of the Seine, is unquestionably the finest public walk in Paris. The Palais-Royal, in the interior, has been embellished with many beautiful buildings, with shops, coffee-houses, and a garden, which render it like a perpetual fair,

and one of the most pleasing walks in the city. The gardens of the palace of Luxemburgh also form a fine promenade. The Botanical garden includes the productions of every climate. In the Louvre is the central museum of arts, in which were deposited the finest collection of paintings and statues in the world; but the principal of them were returned, at the peace of 1815, to the places from whence they had been taken. The hospitals and charitable institutions of Paris are numerous, and supported by the government. Outside the Barriere d'Enfer are the Catacombs, the entrance to which is 50 feet deep; they consist of many excavations, that extend several miles in every direction. The principal cavern contains upwards of 2,800,000 skulls, with other bones in proportion. Before the Revolution, Paris was the see of an archbishop, and contained 51 parish-churches, 21 parochial, 17 collegiate churches; among which were 13 chapters, 40 chapels, 3 abbeys, 22 priories, and 50 convents for men, ecclesiastical and secular; 7 abbeys, 6 priories, and 53 convents for women; 12 seminaries and 16 hospitals, 6 of which were appropriated to deserted children. Paris is 245 miles S. E. of London, 625 N. W. of Vienna, and 630 N. E. of Madrid. Lat. 48. 50.1. N. Difference of longitude of the observatories of Greenwich and Paris, from many astronomical observations, is 2. 20. the latter being to the east. This city was taken by the allied armies on the 31st of March, 1814, and again in July, 1815.

PAUL, *St.* formerly named *Saul*, was of the tribe of Benjamin, a native of Tarsus in Cilicia, a Pharisee by profession; first a persecutor of the church, and afterwards a disciple of Jesus Christ, and one of the Apostles. He was a Roman citizen, because Augustus had given the freedom of Rome to all the freemen of Tarsus, in consideration of their firm adherence to his interests. His parents sent him early to Jerusalem, where he studied the law under Gamaliel, a famous doctor. As to the manner of his conversion, and his indefatigable labours afterwards in propagating the gospel, we must refer the reader to the account given of him in the *Acts of the Apostles*, and his own epistles. After St. Paul was delivered from his imprisonment at Rome, he proceeded in his travels, but to what part of the world is not certain: some say he went to Spain; and others, that he passed over to Britain. But however this be, he went a second time to Rome. Here he is made close prisoner, and tried for his life by Helius Cæsaræanus, whom he calls *the lion*. This man, Nero, at his departure into Greece, had left invested with exorbitant powers which he exercised afterwards in as exorbitant a manner. At his trial he complains of Alexander the coppersmith's malice, and of being deserted by his friends; and presently after it, the second epistle to Timothy was written, in which there are several presages of his approaching martyrdom. This crown he obtained the year following, together with St. Peter, though not by the same kind of death; for St. Paul, as a Roman citizen, could not be crucified, and therefore was beheaded with a sword. His body was buried in the *Via Ostiensis* near Rome, where a stately church was built, to the honour of his memory, by Constantine the Great, which was afterwards enlarged and beautified by order of the succeeding emperors.

PE'LEW, or PALOO ISLANDS, [so called on account of the vast number of palm-trees which are seen on their coast, and appear like masts of ships at a distance, *palos* in Spanish signifying a mast] are situated between 5 and 9 degrees N. latitude, and 130 and 136 degrees of E. longitude. They were, without doubt, first discovered by the Spaniards; but there is reason to suppose, that no European ever landed upon them before the crew of the Antelope, an English East India packet, commanded by Captain Henry Wilson was wrecked there in the night between the 9th and 10th of August, 1783. The crew, to their unspeakable comfort, found the island peopled with a race who were simple in their manners, delicate in their sentiments, and exceedingly friendly in their disposition. The natives are of a deep copper colour, and wear no kind of clothing. The captain's brother was deputed to wait upon the king; and while he was before his majesty, he accidentally pulled off his hat, whereupon the king and the gazing spectators were struck with amazement, as if they imagined (and no doubt they did) that his hat formed a part of his head. They had not the least idea of the nature of powder and shot, and were greatly astonished when they beheld its effects. Captain Wilson, while in the territories of the king of Pelew, was invested by his majesty with the highest order of the

bone. The king of the island entertained so good an opinion of the English, that upon their departure, he permitted his second son, prince Lee Boo, to accompany them in their voyage. The youth arrived with them in England, where in December, 1784, he died of the small pox. He was buried in Rotherhithe church-yard, where a monument was erected to his memory at the charge of the East India Company.

PERU, a large country of S. America, bounded on the N. by Popayan, on the W. by the S. Sea, on the S. by Chili, and on the E. by a ridge of prodigious high mountains, called the Cordilleras-de-los-Andes, being about 1800 miles in length from N. to S. and 125 in breadth from E. to W. between the Andes and the S. Sea; but in other places it is much broader, and, according to some, 500 miles. It never rains in this country, and they hardly know what thunder and lightning are, unless towards the tops of the above mountains; all the tops of these mountains are covered with snow to a very great height, and there are several volcanoes, which burn continually. The best houses in this country are made of a sort of reeds like bamboo canes, and covered with thatch, or palm-leaves. Peru is inhabited by the Spaniards, who conquered it, and the native Americans. These last, who live among the forests, form as it were so many small republics, which are directed by a Spanish priest, and by their governor, assisted by other original natives that serve as officers. They have no distrust, for they leave the doors of their huts always open, though they have cotton, calabashes, and a sort of aloes, of which they make thread, and several other small matters which they trade with, and which might be easily stolen. They go naked, and paint their bodies with a red drug, called rocu. Their skins are of a red copper colour; and they have no beards nor hair on any part of their bodies, except their heads, where it is black, long, and coarse. Those that are not much exposed to the weather are of a lighter colour than the rest. They have a great number of fruits, plants, and trees, not known in Europe; however, some of their physical drugs are brought over, which are of excellent use, and are well known in druggists' shops, particularly the Jesuit's bark, and Peruvian balsam. The country is divided into five great audiences. We hardly need take notice of the mines of gold and silver, and the prodigious riches that are brought from thence, because they are so generally known.

PETER, *ST.* As it is not necessary to recite, we therefore omit, so much of the history of this great apostle as is related in the Gospels and the Acts, and shall only mention what is said of him by profane authors. The particulars of St. Peter's life are little known, from the 51st year of the vulgar æra, in which the council of Jerusalem was held, till his last journey to Rome, which was some time before his death. Being soon thrown into prison, it is said he continued there nine months; at last he was crucified at Rome, in the Via Ostia, with his head downwards, as he himself had desired of his executioners; this he did out of humility, as thinking it too great an honour to suffer in the same manner as his master Christ had done. His festival is celebrated with that of St. Paul on the 29th of June. St. Peter died in the 66th year of the vulgar æra, after having been bishop at Rome, (as some writers affirm) 24 or 25 years. His age might be about 74 or 75 years.

PETERBOROUGH, a town or city of Northamptonshire,

with a bishop's see, and a market on Saturday. It is not a large place; for it has but one parish church besides the cathedral, which was formerly a monastery, and is a majestic structure. It sends two members to parliament. It contains about 11,000 inhabitants, and is 38 miles S. of Boston, and 77 N. by W. of London.

PETERSBURGH, a large handsome city of Russia, in Ingria, built by Peter the Great, czar of Muscovy, in 1703, and is the metropolis of the whole empire. It is of prodigious extent, and contained not long ago 60,000 houses, great and small. There are built here many palaces, a college, a military school, and an exchange. Trade flourishes greatly here, because it is the seat of the emperors, and because foreigners have the same privileges as the natives of the place. All religions are tolerated; and there are packet boats, by which intelligence is conveyed to different places. The inhabitants also carry on a trade with the Chinese and Persians. They have woollen and linen manufactures here, paper-mills, powder-mills, places for preparing saltpetre, brimstone, and laboratories for fire-works. Here are also yards for making ropes, cables, and tackling for ships; a foundery, where cannon and mortars are cast; as also a printing-house. Some streets of this city are regular and well-built; and among the most elegant structures may be reckoned the great chancellor's house, that of the vice-chancellor, and some others. They are mostly brick, plastered over; and though the climate is so very cold, yet they have more windows than they generally have in England. There are 20 Russian churches, and 4 Lutheran, besides those of the Calvinists, Dutch, English, and Roman Catholics; and the inhabitants now reckoned at 280,000, most of whom came to settle here from other countries, there being not many original Russians among them. It is 425 miles N. W. of Moscow, 1000 N. N. E. of Vienna, 800 N. E. of Copenhagen, 500 N. E. of Stockholm, and 1350 N. E. of Paris. Lat. 59. 56. N. lon. 30. 19. E.

PHILADE'LPHIA, the capital of Pennsylvania, and till lately of all the United States of North America, is situated on a neck of land at the confluence of the rivers Delaware and Schuylkill. The length of the city from E. to W. that is, from the Delaware to the Schuylkill, upon the original plan, is 10,300 feet, and the breadth N. to S. is 4837 feet. Only a part of the plot covered by the city charter, is yet built upon. The circumference, however, of that part, if we include Kensington on the N. and Southwark on the S. is about 5 miles. Market Street is 100 feet wide, and runs the whole length of the city from river to river. Near the middle of it, it is intersected at right angles by Broad Street, 100 feet wide, running nearly N. and S. quite across the city. Between the Delaware and Broad Street, are 10

streets, nearly equidistant, running parallel with Broad Street; and between Broad Street and the Schuylkill, are 9 streets, equidistant from each other. Parallel to Market Street are 8 other streets, running E. and W. from river to river, and intersecting the cross streets at right angles. All these streets are 50 feet wide, except Arch Street, which is 65 feet wide, and all the streets which run N. and S. except Broad Street, are also 50 feet wide. There were 4 squares of 8 acres each, one at each corner of the city, originally reserved for public uses; and in the centre of the city, at the intersection of Market Street and Broad Street, is a square of 10 acres, reserved, in like manner, to be planted with rows of trees for public walks. Most of the houses have a small garden and orchard; and from the river are cut small canals, equally agreeable and beneficial. The wharfs are also fine and spacious; the warehouses large, numerous, and commodious; and the docks for ship building well adapted to their purposes. This city was founded in 1682, by the celebrated William Penn, a quaker, who, in 1701, granted a charter, incorporating the town under the government of a mayor, recorder, &c. In 1792, Philadelphia contained 5000 houses, in general handsomely built of brick, and 40,000 inhabitants. The population has since much increased, and in 1820 it amounted to 136,293 souls. Philadelphia is 97 miles S. W. of New York, and 118 N. of the entrance of the Delaware into the Atlantic ocean. Lat. 39. 57. N. lon. 75. 14. W.

PHILIPPINE, or *Manilla Islands*, a very large group of islands in the Eastern Indian sea, first discovered by Magellan in 1521. The air is very hot and moist, and the soil fertile in rice, and many other useful vegetables and fruits. The trees are always green, and there are ripe fruits all the year. There are a great many wild beasts and birds, quite unknown in Europe. The inhabitants are not all of one original. The principal of these islands are Manilla, or Leuconia, and Mindanao, whose capital towns have the same names. In the year 1564, Don Louis de Valasco, viceroy of Mexico, sent Michael Lopez Delagaspes thither with a fleet from Mexico, and a force sufficient to make a conquest of these islands, which he named the Philippines, in honour of Philip II. then on the throne of Spain. They have ever since remained subject to that crown. Lat. from 6. 30. to 18. 15. N. lon. from 113. 13. to 127. 13. E.

PLYMOUTH, a large and populous sea-port of Devonshire, from a mere fishing town is become one of the largest in the county, and one of the chief naval magazines in the kingdom, owing to its excellent port or harbour, which is capable of containing safely 1000 sail. There are, properly speaking, however, three harbours, viz. Catwater, Sutton Pool, and Hamoaze. The first is the mouth of the Plym, and affords a safe and commodious harbour for merchant ships, but is seldom entered by ships of war. The second is frequented by merchant ships only, and is almost surrounded by the houses of the town. The third inlet, which is the mouth of the Tamar, is the harbour for the reception of the British navy. The Breakwater, a vast undertaking, to restrain the force of the sea, was completed by Rennie, at the expence of a million of money. Plymouth is defended by a fort on St. Nicholas Island, and other forts, mounted with near 300 guns, and particularly by a citadel, called the Haw, which overlooks the town, and is a good land mark for mariners. What is called **THE DOCK**, is a separate town, situated about two miles up the Hamoaze, and is now nearly as large as Plymouth itself. Here are docks, wet and dry, built in the reign of William III. and others, which have been built since, hewn out of a mine of slate, and lined with Portland stone. It has a good pilchard fishery, drives a considerable trade to the Straits, and to Newfoundland, and is seated between the

mouths of the rivers Plym and Tamar, 43 miles S. W. of Exeter. It is 210 miles W. by S. of London. Lat. 50. 22. N. lon. 4. 10. W. Markets on Monday, Tuesday, and Saturday.

POLAND, a country of Europe, bounded on the W. by the Baltic Sea, Brandenburg, and Silesia; on the S. by Hungary, Transylvania, and Moldavia; and on the N. by Prussia, Courland, Livonia, and Russia. The government of Poland was monarchical and aristocratical; and the affairs of the kingdom were for some years in a very distracted situation. Various disturbances took place soon after the election of the late king Stanislaus, in the year 1764, and almost a civil war, which was the occasion of introducing the troops of Russia, Prussia, and Austria. The partition of Poland was first projected by the king of Prussia. Polish, or Western Prussia, had long been an object of his ambition; it lay between his German dominions and Eastern Prussia, and, while possessed by the Poles, cut off, at their will, all communication between them. By political management he brought over Russia and Austria to his scheme. By the first dismemberment, in 1772, the portion taken by Russia was the largest, the Austrian the most populous, and the Prussian the most commercial. The population of the whole amounts to near five millions of souls. Western Prussia was the greatest loss to Poland, as the navigation of the Vistula was made to depend entirely on the king of Prussia. In the year 1793, a second partition took place. Some attempts were made by a few patriotic noblemen to deliver their country from its oppressors, and they were at first successful: but their commander, the brave Kosciusko, being taken prisoner, and his army defeated, no further efforts were made. Kosciusko was carried to Russia, and kept in prison until the emperor Paul came to the throne, when he was liberated, and arrived in England in 1797, from whence, after a very short stay, he sailed for America. The king of Poland resigned his crown at Grodno, in the year 1795. After that the country underwent a farther partition, till it was entirely swallowed up by the rapacity of the dividers of the spoil. Poland therefore remained a country indeed, but no nation; and the indignant Pole, in reviewing its past history and present state, might exclaim with a sigh, "Such things were." In 1806 the French obtained possession of the Prussian part of Poland, and by the treaty of Tilsit

it was given to Saxony, to be held under the title of the Duchy of Warsaw. Thus it remained till 1815, when the congress of Vienna united it to the empire of Russia, with the exception of the duchy of Posen, restored to Prussia; and the emperor has, to his other titles, taken that of king of Poland, since it came under his dominion, he has framed it a new constitution, giving it legislative powers, a senate, and a body of representatives. The air is generally cold, and they have but little wood; however, it is so fertile in corn in many places, that it supplies Sweden and Holland with large quantities. There are extensive pastures, and they have a large quantity of leather, furs, hemp, flax, salt-petre, honey, and wax. They have also some mines of lead, iron, quicksilver, vitriol, and sulphur. There are three universities, at Cracow, Wilna, and Koningsburgh; two archbishoprics, and fifteen bishoprics. The principal rivers are the Nieper, the Vistula, the Bug, the Niemen, the Neister, and the Bog. Cracow is the capital town, but Warsaw was the general residence of the king.

as being the vicegerent of God; the immediate successor of St. Peter; endowed with infallibility; and invested with the keys of heaven and hell. A fish, likewise called a ruffe, resembling a perch in shape, but never grows bigger than a gudgeon.

POPE, *The Territories of*, in Italy. It is commonly called the Territory of the Church, and depends upon the holy see, the pope being lord both in spirituals and temporals. It is about 400 miles in length on the coast of the Adriatic Sea, from the kingdom of Naples to the territory of Venice. It is more narrow from N. to S. being not above 80 miles in breadth from the Gulf of Venice to the Tuscan Sea. The pope's territories are divided into 12 provinces, which are separated by the Appennine Mountains, some being to the E. and some to the W. of them; their names are as follow; the campagna di Roma, the provincia del Patrimonio, the duchy of Castro, the province of Orvieto, the Perugino, the duchy of Speleto, the province of Sabina, the marche of Ancona, the duchy of Urbino, Romagna or Romandiola, the Bolognese, and the Ferrarese. The pope is a sovereign prince, but not content with that, pretends to be vicar of Jesus Christ upon earth. His ministers of state in church affairs are 70 cardinals, being the number of the 70 disciples of our Saviour. These cardinals elect the Pope, which election is determined by the plurality of voices; but then he that is chosen must have two thirds of the votes for fear of a schism. Formerly when the pope died, the cardinals were liable to be solicited to follow the views of particular persons, which caused the election to be put off for a long time; but they have now remedied this inconvenience, and have built a palace for that purpose, called the Conclave. Therefore, as soon as the pope is dead, the cardinals are obliged to repair thither immediately, and to continue shut up till they have chosen another. The election of the new Pope is immediately followed by his coronation, and this ceremony is performed in the Lateran church, where they put a triple crown on his head. The provinces which depend on the holy see are governed by legates; but, besides the 12 above mentioned, there is one at Avignon in France, and another at Benevento in the kingdom of Naples. Rome is the capital. There are few countries where the pope has not ambassadors, who are called Nuncios; there is generally one at Vienna, Paris, Lisbon, Madrid, Warsaw, Swisserland, Venice, Brussels, and Cologne; and these nuncios are cardinals. They have the title of Legates-a-Latere. The title given to the Pope is, His Holiness, and the cardinals have that of Eminence. It has been computed, that the revenue which the Pope receives amounts to above 20 millions sterling. The Roman Catholic religion is the only one allowed throughout the Pope's dominions. The Pope's relations are called his Nephews; and the custom of enriching them, Nepotism. In 1798, this state was taken possession of by the French, who erected it into a republic, and afterwards into a kingdom. They forced the late Pontiff into an exile, in which he ended his life; and though his successor, Pius VII. was restored to a degree of secular power by the government of France, and the Romish religion re-established in that country; yet Bonaparte afterwards deprived the Pope of all his territory, because he refused to declare war against England, and under a pretext that the States of the Church had been granted by Charlemagne for the prosperity of the Roman religion, and not for the assistance of Heretics!—But the restoration of the Bourbon family to the French throne, has reinstated the Pope, and sent his oppressor into exile! *Sic transit gloria mundi!*

PORTREEVE, *s.* the chief magistrate of a corporation in former times.

PORT-RO'YAL, a sea-port town of Jamaica, an island of the West Indies. In 1692 it was reduced from a very flourishing condition to a heap of ruins by an earthquake. In 1702 it was destroyed by fire; in 1722 by an inundation of the sea; and in 1744 it was considerably damaged by a hurricane. Port Royal is built on a small neck of land which jets out several miles into the sea, and is guarded by a very strong fort, which has a line of near 100 pieces of cannon, and a good garrison of soldiers: 1000 ships may ride in the harbour with safety. It is 6 miles S. E. of Kingston. Lat. 18. 0. N. lon. 76. 40. W.

PO'RTSEA, an island between Chichester bay and the harbour of Portsmouth, in Hampshire. It is a low tract of considerable extent, separated from the mainland on the N. by a creek, over which are two bridges, one for the entrance, and the other for the departure of passengers. At the S. W. extremity of it is the town of Portsmouth.

PO'RTSMOUTH, a town of Hampshire, situated on the island of Portsea, justly considered as the most regular fortress in Britain. The least number of men continually employed in the rope-yard, &c. is 1000. The docks and yards

resemble distinct towns, &c. under a government separate from the garrison. Here is also a fine arsenal for laying up the cannon. The harbour is one of the finest in the world, as there is water sufficient for the largest ships; and is so very capacious, that the whole English navy may ride here in safety. The principal branch runs up to Fareham; a second to Portchester; and a third to Portsea Bridge. Besides these branches, there are several rithes, or channels, where the small men of war ride at their moorings. Opposite the town is the spacious road of Spithead, where the men of war anchor when prepared for actual service. It has one church and two chapels, one in the garrison, and one in a part of the town called the Common, for the use of the dock. The town and parish contain about 39,000 inhabitants. It is 20 miles S. E. of Winchester, and 70 S. W. of London. Lat. 50. 47. N. lon. 1. 1. W. Markets on Tuesday, Thursday, and Saturday.

PO'RTUGAL, the most western country of Europe, about 310 miles in length, and 150 in breadth. It is bounded on the W. and S. by the ocean, and on the E. and N. by Spain. Though Spain and Portugal are in the same climate, yet the air of the latter is much more temperate than that of the former, on account of the neighbourhood of the sea. Corn is not very plentiful in this country, because the inhabitants are not much addicted to husbandry; for this reason they import Indian corn from Africa, which is made use of by the peasants instead of wheat. There are a great number of barren mountains, and yet they have plenty of olives, vineyards, oranges, and lemons, as also nuts, almonds, figs, and raisins. They have some horned cattle, whose flesh is generally lean and dry. The principal rivers are, the Tagus, the Duero or Douro, the Guadiana, the Minho, and the Munda or Mondego. Portugal is divided into six provinces, namely, two in the middle, called Estramadura and Beira; two on the N. which are Entre Minho e Douro and Tralos-Montes; also two on the S. called Alentego and Algaw. The principal business of the Portuguese is trade. The government is monarchical; but the authority of the king is bounded by the fundamental laws of the kingdom, for he cannot raise any more taxes than were settled in 1674, nor can he appoint a successor when there is any failure in the royal line. No other religion is allowed here but the Roman Catholic. In 1580, there was a failure in the royal line, and Philip II. of Spain got possession of the throne; in 1640 there was a revolution, and John Duke of Braganza obtained the crown, whose descendants enjoyed it till Nov. 1807; when the French government having sent an army to occupy the country, the prince regent, with a number of his adherents, sailed to the Brazils. The French have since been expelled; and in 1820, a popular constitution was framed by the people; which the king was compelled to accept, who has since returned to Lisbon, the capital.

PRAGUE, the capital of Bohemia. It contains three towns, viz. the Old, the New, and the Little Town, and is about 15 miles in circumference, built upon seven hills, and containing about 90,000 inhabitants. There are about 100 churches here, besides an incredible number of palaces. Its university is frequented by a great number of students. The Jesuits had a magnificent college; and the Jews nine synagogues, till they disoblged the king of Prussia, who drove many thousands of them from the town. Prague has suffered frequent devastations from war: it was taken by storm in November 1741, for the elector of Bavaria, then emperor; but marshal Belleisle was obliged to leave it in December 1742. The king of Prussia bombarded and took the city in 1744, making the garrison, consisting of 16,000 men, prisoners of war; but he was obliged to abandon it the same year. In 1757 the king of Prussia again besieged it, but his efforts proved ineffectual. It is 158 miles S. E. of Berlin, 75 N. E. of Ratisbon, and 235 N. W. of Vienna. Lat. 50. 53. N. lon. 14. 30. E.

PRESBURG, or *Posen*, a free and royal city, capital of Lower Hungary: like Vienna, it has suburbs much larger, and more magnificent, than itself. In this city the states of Hungary have held their assemblies, since 1723, and in the cathedral the sovereign is crowned. The Lutherans form a church here. Presburg is pleasantly seated at the foot of a mountain, on the Danube, 32 miles E. S. E. of Vienna. Here peace between France and Austria was signed, Dec. 27, 1805. Lat. 48. 8. N. lon. 17. 16. E.

PRESBYTER, *s.* [Lat.] in the primitive Christian church, was an elder, one of the second order of ecclesiastics; the other two being bishops and deacons.

PRESBYTERIANS, *s.* a sect of Protestants, so called from their maintaining that the government of the Church appointed by the New Testament, was by presbyteries; that is, by presbyters and ruling elders, associated for its government and discipline. The *Presbyterians* affirm, that there is no order in the Church, as established by Christ and his apostles, superior to that of presbyters; that all ministers being ambassadors, are equal by their commission; and the elder or presbyter, and bishop, are the same in name and office;

for which they allege *Acts* xx. 28, &c. The only difference between them and the Church of England, relates to discipline and church government. Their highest assembly is a synod, which may be provincial, national, or œcumenical; and they allow of appeals from inferior to superior assemblies; according to *Acts* xv. 2, 6, 22, 23. The next assembly is composed of a number of ministers and elders of a congregation, associated for governing the churches within certain bounds. This authority they found upon *Acts* xi. 30. and xv. 4, 6, &c. The lowest of their assemblies, or presbyteries, consists of the ministers and elders of a congregation, who have power to cite before them any member, and to admonish, instruct, rebuke, and suspend him from the eucharist. They have also a deacon, whose office is to take care of the poor. Their ordination is by prayer, fasting, and imposition of the hands of the presbytery. This is now the discipline of the Church of Scotland.

PRUSSIA, a kingdom of Europe, bounded on the N. by the Baltic and Samogitia, E. by Lithuania, S. by Poland, and W. by Brandenburg and Pomerania. It is a very fertile country, producing a great deal of timber, flax, hemp, and corn; and the sea, rivers, and lakes, supply them with great plenty of fish. Prussia also abounds with flocks and herds, and fine horses. Its chief commodities are wool, honey, wax, pitch, pit-coal, hops, and buck-wheat. Here is plenty of game; as, hares, elks, deer, roe-bucks, and wild boars; but the forests are, at the same time, infested with lynxes, wolves, foxes, bears, wild asses, and uri, a species of buffalo. The hides of these last, which are extremely thick and strong, are sold to foreigners at a great price. Here is neither salt, wine, nor minerals, but yellow amber (for the sake of procuring which the Romans penetrated into and subdued this country) is found in great quantities on the Samland shore. There are several large lakes, besides the rivers Vistula, Pregel, Memel, &c. About four months of the year are temperate, warm, and pleasant; but the autumns are often wet, and the air in winter is cold, piercing, and severe. The manufactures in glass, linen, cloth, metals, &c. are rapidly increasing. The inhabitants are a mixture of native Prussians (who appear to be genuine Germans) Lithuanians, and Poles. The Teutonic order had sovereignty in Prussia about 300 years; after which Prussia Proper was added to the dominion of the electoral house by Brandenburg, and in 1704 it was raised to a kingdom of the Elector Frederick, who with his own hands put the crown on his head, and on that of his consort, at Konigsburgh. From the unsuccessful war with the French in 1807, Prussia

was deprived of its usurpations in Poland, and some of its German territory; but by the treaty of Paris in 1814, considerable additions were made to the kingdom. Berlin is the capital of the German dominions, and Königsburgh of the Prussian.

Q.

Q Is a consonant, the sixteenth letter of the English alphabet, called *keu*, from the French *queue*, or tail, it being as O with a tail to it. In the Gothic alphabet it is in the form of an O, with a dot in the middle. Though it had

a place in the Saxon alphabet, yet they generally substituted *cw* in its room, spelling *cwellan*, Sax. to quell or kill, in that manner. The *q* is never sounded alone, but in conjunction with *u*, as in *quibble*, *quarrel*, *quiet*, *quote*, &c. and never ends any English word. As a numeral, Q stands for 500; and with a dash over it thus, *Q̄*, for 500,000. Used as an abbreviate, *q* stands for quantity, or quantum. Thus, among physicians, *q. pl.* is *quantum placet*, as much as you please; and *q. s.* *quantum sufficit*, *i. e.* as much as is necessary.—Q. E. D. among Mathematicians, is *quod erat demonstrandum*, *i. e.* which was to be demonstrated; and Q. E. F. *quod erat faciendum*, *i. e.* which was to be done. Q. RHODE ISLAND, one of the United States of North America, bounded on the N. and E. by Massachusetts, on the S. by the Atlantic, and on the W. by Connecticut. These limits comprehend what has generally been called Rhode Island and Providence Plantations. It is as healthful as any part of North America. Providence and Newport are the chief towns. Inhabitants, 80,000.

RHODES, an island of the Mediterranean Sea, about 40 miles long, and 15 broad. The air is good, and the soil fertile, but not well cultivated. It is supposed by some that this island was peopled by Dadanim or Rodanim, the grandson of Japhet; but others are of opinion, that it was peopled by the posterity of Shem, who dwelt on the adjacent continent, and that it received its name from the vast quantity of roses which grew on it. Its principal town, of the same name, is still a place of note. This island was famed for the Colossus, or image of Apollo, which was fixed at the mouth of the harbour of Rhodes: it was 70 cubits high, and its parts in proportion, few men being able to grasp its thumb. It was begun by Charles of Lindus, and was finished by Laches; it cost about 300 talents, and contained about 720,000 pounds weight of brass. This famous statue was erected about Anno Mundi 3716; and after standing 60 years, was thrown down by an earthquake. About 894 years after, Mauvias, the 6th caliph of the Sa-

racens, sold it to a Jew, who loaded 900 camels therewith. This island has been under the dominion of several masters. The Apostle Paul touched at this place as he went to Jerusalem, Anno Domini 60. The present inhabitants are generally Greeks, who are very poor, and greatly oppressed. The town of Rhodes is situated in lat. 36. 24. N. lon. 28. 25. E.

RHOMBIC, *a.* shaped like a rhombus.

RHOMBOIDAL, *a.* approaching in shape to a rhombus.

RHOMBOIDES, *s.* [ῥομβοειδής, from ῥόμβος, and εἶδος, Gr.] a quadrangular figure, having its opposite sides and opposite angles equal. In Natural History, a kind of mussel-fish; a turbot fish. In Surgery, a pair of muscles of the shoulder-blade, so called from their figure.

RHOMBUS, or RHOMB, *s.* [rhombe, Fr. ῥόμβος, Gr.] in Geometry, a quadrangular figure, having two opposite angles acute, and two obtuse.

RHONE, one of the largest rivers in France, which, rising among the Alps in Switzerland, passes through the lake of Geneva, visits that city, and then runs S. W. to Lyons; where, joining the Saone, it continues its course due S. passing by Orange, Valence, Viviers, Avignon, and Arles, and falls into the Mediterranean a little above Marseilles, by several mouths.

RICHARD I. (surnamed *Cœur-de-lion*) Richard staid above a month in France, after his father Henry II.'s death, so well was he assured of the disposition of the people of England, and that nothing would be attempted there to his prejudice; though in his father's life-time he had, or pretended to have, some fears and jealousies on account of his brother, prince John. The first thing he did was to have an interview with Philip; when he thanked him for his late protection, and did homage to him for his French provinces. On the 20th of July 1189, he received the ducal crown of Normandy at Roan, and was girt with the ducal sword, according to the custom of investiture. The first order he sent to England, where he was obeyed as if he had been already crowned, was to set his mother queen Eleanor at liberty, who had been 16 years in confinement. He also entrusted her with the administration during his absence, and empowered her to release what prisoners she pleased; she was too sensibly affected with her long confinement, not to exercise with pleasure this power given her by her son; who having settled his affairs in France, came to London, and was crowned by Baldwin, archbishop of Canterbury, on Sept. 3. 1189. The ceremony was disturbed by the massacre of some Jews, who pressing to see the solemnity, the people fell furiously upon them, and killed several of them. But the king having caused a strict inquiry to be made, some of the ringleaders in this barbarous action were deservedly put to death. It must be observed that ever since the taking of Jerusalem by the Saracens, the people breathed nothing but revenge against the enemies of Christ; and this made them take this opportunity of falling upon the poor Jews, though they had no hand in that revolution in Palestine. Their not being Christians was enough: and the cruel example of the Londoners was followed by several other great towns, especially at York, where 500 Jews, besides women and children, having fled into the castle to avoid the fury of the rabble, the high-sheriff required them to deliver it up; and upon their refusal, the people drew up in a body, and attacked the castle. The Jews offered a great sum of money to go off with their lives, but, notwithstanding, the people would give them no quarter. And so, rather than fall into the hands of the uncircumcised Christians, every master of a family cut his wife and children's throats first, then dispatched his servants, and ended with the slaughter of himself. A new crusade for the recovery of Jerusalem from the Infidels, had been resolved between Philip of France and king Henry, in which Richard was to bear a part; but their private quarrels had put a stop to the undertaking. And now Philip and Richard being at perfect amity, they resumed the design according to both their vows. King Richard's thoughts were wholly taken up with this affair from his very accession; whether for the sake of glory or religion, let the reader judge. As he designed to make as great a figure as possible in this expedition, it was necessary he should carry with him a numerous army; to maintain which, he stuck at no methods to raise money. Besides the late king's treasure, amounting to above 100,000 marks, which he wholly applied this way, he sold almost all the crown lands, of which the bishops and abbots were the chief purchasers. For 10,000 marks he delivered up Berwick and Roxborough to the king of Scotland, and discharged him and his successors from the homage his father had imposed. When complaints were made to him of these measures, he said, he would sell London itself, could he find a chapman able to purchase it. He got a power from the pope to dispense with those who repented of their vow, as having too hastily engaged in the crusade; and as there were many of this sort, he raised great sums by this means. He also

extorted money from the richest of his subjects, by borrowing of those against whom he could have no handle, and laying such as had any ways made themselves obnoxious under a necessity of saving themselves harmless by making him presents. Whilst he was by these and other methods heaping up money, the clergy did all they could to procure him soldiers, and the army soon became very numerous. Having made these extraordinary preparations for his voyage, he gave the regency, during his absence, to Longchamp, his high chancellor, who was also bishop of Ely, and the pope's legate, joining with him the bishop of Durham. As to his brother prince John, he would not let him have any share in the government, for fear of giving him an opportunity to act against him: but, to make him easy, he invested him with the earldom of Cornwall, Dorset, Somerset, Nottingham, Derby, and Lancaster; and gave him in marriage Avisa, heiress of the house of Gloucester, his second cousin. All things being settled, king Richard passed over into France about the beginning of the year 1190, and the two armies of France and England, making together above 100,000 men, joined at Vezelai towards the end of June, according to agreement. The two monarchs marched together as far as Lyons, where parting, Philip proceeded for Genoa, and Richard for Marseilles, to meet his fleet; both being to join again at Messina in Sicily, the general rendezvous of the Croises. Philip soon arrived there; but Richard (whose fleet had been separated by a storm, and were some time before they joined again,) not till towards the end of September. Here a quarrel soon arose between Richard and Tancred king of Sicily, who having detained the queen dowager, Richard's sister, in prison, set her at liberty on his arrival, and sent her to him. But Richard, not satisfied with this, demanded the dower assigned her by William II. her husband. Tancred being very backward to comply with this demand, Richard seized on a castle and monastery near Messina, and Tancred in return ordered matters so, that the inhabitants of Messina, taking the advantage of some disorder there, expelled the English out of their city. Richard, enraged at this, attacked the city with such fury, that he became master of it the first assault. Upon this, Tancred thought fit to satisfy all Richard's demands, and a treaty was concluded between them. But as nothing but force had brought Tancred to comply, he now endeavoured to sow dissension between Richard and Philip. The latter had already looked with a jealous eye on Richard's visible superiority, and was of himself but too much disposed to fall out with him. Both sides being exasperated, Philip peremptorily demanded of Richard to consummate his marriage with the princess Alice, his sister; and Richard as peremptorily refused it, saying, he could not marry a princess, by whom the king his father had had a son, offering to prove it by witnesses; and though this point, being of so tender a nature, was dropt, yet this and some other disputes had so exasperated their minds, that they were never more friends. However, this did not hinder them from pursuing their voyage. Philip set sail first about the end of March, 1191, Richard staying for the arrival of Eleanor, his mother, who was bringing along with her Berenguella of Navarre, whom he had espoused. They soon arrived, and Eleanor returning home, leaving Berenguella with the queen dowager of Sicily, king Richard put to sea with a gallant fleet, about a fortnight after Philip's departure, taking the two princesses along with him. This fleet met with a violent storm between Cyprus and Rhodes, which drove part of them on the coast of Cyprus; where Isaac, king of the island, a prince of a very bad character, imprisoned the English that had escaped the shipwreck, and seized their effects. King Richard, provoked at

this barbarity, as soon as the scattered fleet was joined, landed his men, and attacked Isaac so furiously, that he was forced to abandon the shore. The king of England pursuing this advantage, with ease made himself master of the city of Lemisso; and soon after Isaac and his only daughter were made prisoners. He entreated king Richard not to put him in irons; who granted his request so far, that instead of iron, he ordered him to be bound with silver fetters. The conquest of the whole island soon followed, which Richard gave some time after to Guy of Lusignan, the last king of Jerusalem, whose family enjoyed it near 200 years. Before Richard left Cyprus, he consummated his marriage with the princess Berenguella. Whilst the king was making himself famous by these great actions abroad, Longchamp, the regent, abused his power at home to such a degree, that his colleague, the bishop of Durham, and the six counsellors the king had appointed to assist them, complained to prince John, and got him to join with them in order to depose him; which they effected, and conferred the regency on the archbishop of Roan, till the king's pleasure should be known. John was glad of this opportunity of having a hand in the administration, and improved it so as to make a strong party for the crown, in case his brother died during his expedition, in prejudice of his nephew Arthur, duke of Bretagne, son to his elder brother Geoffrey. To return to the affairs of Palestine: Acon, or Ptolemais, had been besieged by some Christian princes a whole year. When Philip of France arrived, he continued the siege, but with little success. King Richard arrived afterwards, and carried it on so vigorously, that, in spite of all the attempts of the sultan Saladin to raise it, the city at length surrendered upon articles, July 12, 1191. And now the Christian army expected to march towards Jerusalem; but the dissension between the two kings, which broke out afresh, occasioned chiefly by Philip's envying Richard's glory, and the superiority he had obtained by the number and good condition of his troops, and his personal valour, proved an obstacle to the design. Philip finding himself very weak after a violent fit of sickness, and being impatient to go and take possession of Artois, which was fallen to him by the death of the earl of Flanders, quitted Palestine, and returned home, leaving 10,000 of his men under the command of the duke of Burgundy. Soon after his departure, Richard and Saladin exhibited a spectacle of horror, by putting the prisoners to death each had in his power, which were some thousands. This was occasioned by Saladin's refusing to perform the articles of the surrender of Acon, upon which Richard is thought to have begun with beheading the Turkish prisoners, and Saladin, by way of reprisal, did the same by his Christian captives. After this, Richard resolved to besiege Ascalon; and as he was marching towards it with that design, Saladin posted himself advantageously in the way, with an army of 300,000 men. Here a great battle ensued, which was fought on Sept. 7, 1191. Richard attacked the Saracens, so much superior to him in number, with such undaunted valour and resolution, that he in the end entirely defeated them, leaving 40,000 dead on the field of battle. After which he repaired the maritime cities of Ascalon, Joppa, and Cesarea, which Saladin had abandoned, after having demolished their walls. Then he marched towards Jerusalem, and in his way took the great Babylon caravan, consisting of 3000 loaded camels, and 4000 horses or mules, and guarded by 10,000 horse. By this capture he made himself master of an inestimable booty. After which he continued his march towards Jerusalem, and from a hill had a prospect of the city; but want of forage obliged him to put off the siege. In the mean time, the duke of Austria,

with the Germans, and the duke of Burgundy, with the French, deserted him, and the Italian troops under the marquis of Montserrat refused to serve any longer. These things, together with the diminishing of his own troops by sickness and battles, the fear of Philip's attacking his dominions in his absence, and the news of what his brother John was doing in England, made Richard resolve to return home. But before his departure he caused Henry, earl of Champaign, to be elected general of the forces that were to be left behind in Palestine, and concluded a truce with Saladin for three years. Thus ended the famous crusade, which drained England and France of men and money, and after all proved of but very little advantage to the eastern Christians. Richard embarked for England towards the end of the year 1192, and meeting with a storm, was forced on the coast of Istria, and from thence between Aquileia and Venice. Whether by mistake, or otherwise, he entered the territories of the duke of Austria, whom he had affronted at the siege of Acon, and took the road to Vienna. Though he travelled in the disguise of a pilgrim, as did also his attendants, he was however at last accidentally discovered to the duke of Austria, and seized at a village near Vienna. The emperor Henry VI. demanded this royal prisoner of the duke, who delivered him up, upon assurance given him that he should have a good share in his ransom. The news of the king's imprisonment quickly reached England, and caused the greatest consternation among his friends, whilst prince John took this opportunity to endeavour to wrest the crown from his brother, but was prevented by the diligence of the queen his mother, and the barons, who preserved their fidelity to their imprisoned sovereign. Finding he could not make a sufficient party in England, he went over to Normandy, and failing also in his attempts there, he applied to the king of France, and made a treaty with him. Philip, glad of any pretence to embroil Richard's affairs, resolved to seize on the provinces he held in France. He made himself master of Gisors, Eureux, and the country of Vexin, and laid siege to Roan; but he failed in this last attempt, being repulsed with great loss, and forced to abandon the siege. In the mean while queen Eleanor left no stone unturned to procure the liberty of the king her son, whilst Philip and John did all they could to prevail with the emperor to keep him still a prisoner. Eleanor at last had her desire, chiefly by means of the German princes, who vigorously espoused the cause of the unfortunate king before the emperor; and so Richard was set at liberty upon paying down 100,000 marks of pure silver, which the queen his mother raised in England for that purpose, and giving hostages for the payment of 50,000 more. The king was no sooner released, but he set out with all speed for the Low Countries, and embarking at Antwerp, arrived at Sandwich on the 20th of March, 1194, after having been absent from England four years, of which he had been fifteen months a prisoner. Richard was received with great demonstrations of joy by his subjects: but he did not make any long stay in England; for, having reduced the few castles that were still in the hands of John's adherents, and causing himself to be crowned a second time, he passed over into France with a considerable army, to be revenged on Philip for his late insults, and for encouraging the rebellion of his brother John. At the instance of his mother, he was reconciled to prince John at Roan, upon his making his submission; but a war commenced between the two kings, the particulars of which are but of small moment, neither of them gaining much advantage over the other. Whilst Richard was in France, a great sedition was raised in London, by one William Fitz-Osborn, commonly called Longbeard, on account of a tax

which he alleged would fall wholly on the poor, with whom he had gained great credit by affecting always to appear an advocate for them. The tumult could not be appeased without the citizens taking to arms. In the end Longbeard was taken and hanged, with nine of his accomplices. The lower class of people, when he was dead, began to revere a man that they had not spirit to relieve. They stole his gibbet, and paid it a veneration like that offered to the wood of the cross. The turf on which it stood was carried away, and kept as a preservative from sickness and misfortune; and had not the clergy withstood the torrent of popular superstition, his memory might have received honours similar to those paid at the shrine of St. Thomas of Canterbury. About this time lived the famous Robin Hood, and his associate Little John, who with their gang are said to have infested Yorkshire with their robberies. Some say he was of noble descent, and was reduced to these courses by his riot and extravagance. He never hurt any person, robbed only the rich, and spared the poor. A proclamation being issued against him, he fell sick at the nunnery of Berkeley, and desiring to be let blood, was betrayed, and bled to death. Richard, after the truce he had made with France, might have enjoyed some repose after his many fatigues, if his avarice had not put him upon an action which occasioned his death. A gentleman of Limosin, which was held of the duchy of Guienne, having found a treasure that had been hid for some ages in his grounds, Richard pretended it belonged to him as sovereign of the country. The gentleman would have given him a part; but finding the king was resolved to have the whole, he applied for protection to Vidomer, viscount of Limoges, who sheltered him in the castle of Chaluz. Richard marched into the Limosin, to lay siege to the castle. But as he was taking a turn round in order to view it, one Bertram, an archer, let fly an arrow at him from the walls, which shot him in the shoulder close to his neck. The wound, under the management of an unskilful surgeon, gangrened, so that he died of it eleven days after he received it, viz. on the 6th of April, 1199. The castle being taken before he died, and the person who shot him brought before him, he asked why he did it. The man boldly replied, it was to revenge the death of his father and brother, whom the king had slain, and that he was glad he had rid the world of one who had done so much mischief. The dying king forgave him, and ordered him his liberty, with a present of 100 shillings. But as soon as the king was dead, Marchal, general of the Flemings, caused the miserable man to be flayed alive. Thus fell king Richard, in the 10th year of his reign, and 48th of his age. Before he died he made his will, leaving his kingdom and his other dominions to his brother John, and ordered his body to be buried at Fonteverard, at the feet of the king his father, to testify his grief for his undutiful behaviour towards him. He left only a natural son, whose name was Philip, to whom he gave the lordship of Cognac, in the duchy of Guienne. He was certainly a prince of an intrepid and dauntless spirit, of unquestionable valour and courage, whence he was surnamed *Cœur de Lion*, or *Lion's Heart*. If those who have written his life have not misrepresented him, pride, avarice, and lust, were his reigning vices. It is said, that a certain priest once took the freedom to admonish him to put off those ill qualities, which were usually called his three daughters. The king told him he had been thinking to do so, and would give the first to the Templers, the second to the Monks, and the third to the Bishops. He imposed exorbitant taxes on his subjects, and extorted large sums from them by unjustifiable methods. During his whole reign, he never was above eight months in England, which doubtless was unhappy under his govern-

ment. Richard was the first king of England who bore three lions passant in his arms. He ordered that weights and measures should be the same all over the kingdom. It was during the crusades, that the custom of wearing coats of arms was introduced into Europe. The knights, cased up in armour, had no way to make themselves known and distinguished in battle, but by the devices on their shields; and these were gradually adopted by their posterity and families, who were proud of the pious and military enterprises of their ancestors. King Richard was a passionate lover of poetry; and there even remain some poetical works of his composition. In his reign the city of London began to assume a new form with respect to its government, to have a mayor, and to be divided into several corporations or societies, now termed companies. Henry Fitz-Alwin was the first mayor, who continued in that office 24 years.

RICHARD II. Upon the death of Edward III. his grandson Richard, son of the Black Prince, succeeded to the crown. He was born at Bourdeaux, and was now about 11 years old. He had three uncles, who might upon specious pretences have disputed the succession with him; but they were so far from endeavouring to supplant him, that they were the first to do him homage. Accordingly, on the 16th of July, 24 days after Edward's death, young Richard was crowned without any opposition. The truce with France was expired near three months before Edward's death. The king of France was making vast preparations to complete the expulsion of the English out of all the places they held in France; whilst at the end of the last reign, and at the beginning of this, the English seemed wholly unconcerned about the war. And so, whilst five armies were employed in different places to finish the work in France, the French made several descents upon England, burnt Hastings, Portsmouth, Dartmouth, and Plymouth, and plundered the Isle of Wight. For this the people blamed the king's uncles, who took upon them the administration of affairs till the parliament should meet; not considering that they had neither money nor forces, nor any lawful authority to raise them. The parliament met in October, and gave the regency of the kingdom to the three uncles, joining with them some bishops and lay lords. This mortified the duke of Lancaster, the eldest of the uncles, a prince of a haughty temper, who had flattered himself with the hopes of being sole regent. Whilst preparations were making to guard the coasts, and to oppose France, the king of Navarre put Cherbourg into the hands of the English, as the duke of Bretagne soon after delivered up Brest to them. These places, together with Calais and Bourdeaux, might have been of great advantage to the English, as by means of these four towns they might have invaded France four several ways: but they made not a proper use of this advantage; and Richard, towards the end of his reign, gave up Brest and Cherbourg for a very inconsiderable sum. When measures were taken in England to assist the duke of Bretagne, the French court, in order to divert the storm from their own country, (according to their usual artifice,) encouraged the king of Scotland to make a diversion on his side. He accordingly broke the truce, and took Berwick by surprise; but the earl of Northumberland drew together a body of troops, and retook it by storm. In this siege, his son Henry Percy signalized himself with such bravery and resolution, that he gained the surname of *Hotspur*. In the mean time, hostilities continued to be carried on in several places, between the French and English, without any general action, or decisive battle. Whilst the nation was involved abroad and those about the king had more regard to their own private interest than that of the public, a surprising insurrec-

tion broke out, which threatened the whole kingdom with destruction. The parliament had imposed a pole-tax, whereby all persons above 15 years old were obliged to pay 12d. a head; the monks and nuns not excepted. This tax was levied with great moderation at first; but at length, being farmed by divers persons, who having advanced such a sum to the king, were to have what they could raise by it, these farmers and their collectors levied the tax with great rigour, in order to enrich themselves. One of the collectors having demanded of a tyler at Deptford, whose name was Walter, from thence called Wat Tyler, 12d. for one of his daughters, the father refused to pay it, alleging that she was under the age mentioned in the act. The insolent collector attempting in a way not very modest to satisfy himself of the truth of this, Wat took up a hammer, and knocked out his brains. The people took his part, and promised to stand by him. Immediately the populace rose in Kent, and chose Wat Tyler for their leader; and they were soon followed by those of Essex, under the conduct of Jack Straw. To the poll-tax were added other grievances; the little care taken by those at the helm to guard the coasts against the French, notwithstanding the large sums that had been raised for that purpose; the extortion of the judges and lawyers, the oppression of the nobles, &c. These grievances being inflamed by seditious spirits, and, as some say, by the monks, who thought themselves aggrieved by the poll-tax, the people rose in great numbers, and Wat soon found himself at the head of 100,000 men. With these he marched directly for London, freeing all the prisoners as he went along. This formidable mob proceeded to the utmost extravagancies; they cut off the heads of those lords, gentlemen, judges, and lawyers, they could lay hands on; and bound themselves by oath never to own for king any whose name should be John; which was occasioned by their hatred to John of Gaunt, duke of Lancaster, who at this time was gone to the borders to negotiate a truce with the Scots. Being come to Black-Heath, Wat Tyler reviewed his army, and continuing their march towards London, took and plundered Southwark. Shortly after he entered London, the city mob opening the bridge gates to him, in spite of the magistrates. Here this enraged rabble committed the most horrid ravages, burning and plundering the houses of the judges, lords, and principal citizens. They then seized the Tower, and finding there the archbishop of Canterbury and the high treasurer, they without any ceremony or delay cut off the heads of both of them. The king and council were exceedingly distracted and alarmed at these furious proceedings, and in great perplexity what course to take to put a stop to them. At last it was resolved to offer the rebels a charter confirming the people's liberties, and a general pardon; which those of Essex accepting, returned to their homes. Wat Tyler still continued at the head of 30 or 40,000 men; and the king coming to Smithfield, sent to desire him to come and confer with him. Wat returned a haughty answer, that he would come when he thought fit. He however set forward at the head of his troops, and meeting the king in Smithfield, they had a conference together, both on horseback. He made such extravagant demands, that Richard knew not how to answer him; and now and then he would lift up his sword, as if he threatened the king. This insolence so enraged Walworth, mayor of London, who was by the king, that he struck the rebel such a furious blow on the head with his sword, as instantly killed him. The rebels seeing their leader fall, were about to revenge his death, when the young king, with a courage and presence of mind that could hardly be expected from his years, cried out aloud to them, "My friends, will you kill

your king? What, though you have lost your leader! I will be your captain, follow me." With that, turning his horse about, he put himself at their head, and marched to St. George's Fields. The rebels, imagining he had declared for them, readily followed him. When they were come thither, they presently saw a great number of citizens well armed, whom the mayor had raised, marching towards them. And thinking the whole city was coming out against them, they immediately threw down their arms, and the whole multitude was soon dispersed, without the loss of one life but that of Wat Tyler their leader. There were much the same kind of insurrections in Norfolk and Suffolk; but the bishop of Norwich, putting himself at the head of some troops, quickly suppressed them. Those in Essex began also to stir again; but the king marched against them, and defeated them. Great numbers were slain, and others were taken and executed; among whom was Jack Straw, their leader. He confessed, if they had succeeded, their intention was to kill the king, to extirpate the nobility, and the clergy, except the Mendicant Friars, to divide England into several kingdoms, to make Wat Tyler king of Kent, to abolish all the old laws, and make new ones. This formidable insurrection was in the year 1381, and did not last above a month from the beginning to the end. A marriage having been concluded between king Richard and Anne of Luxembourg, sister of the emperor Wenceslaus, she arrived in England, and was received with great pomp and magnificence, soon after the troubles were appeased. The same year the king granted a power to the bishops to imprison heretics; but the house of commons soon got it revoked. In 1385, the Scots, by the assistance of France, as well as the French themselves, were preparing again to invade England. This alarmed the court, and made them so exert themselves, that in a little time Richard was at the head of a very numerous army, some even say, 300,000 men. Though with this army he might have subdued Scotland, he made little or no use of it. Instead of pushing the Scots vigorously, who would not have been able to stand before him, he employed himself in ravaging the country about Edinburgh, whilst they slipt by him into Cumberland, and committed terrible devastations. And though he might have intercepted them in their return, he omitted to do it, and returned ingloriously into England. It must be owned, indeed, that marching with the greatest part of his army first towards the southern part of this island, he, by the intelligence which the French had of the great number of his forces, prevented the invasion from France, which was at the same time intended. Richard's chief favourites now were, Nevil, archbishop of York, Robert de Vere, earl of Oxford, whom he created marquis of Dublin, (the first who bore the title of marquis in England,) the Duke of Ireland; Michael de la Pole, son to a merchant in London, whom he made earl of Suffolk and high-chancellor; and judge Tresilian. These, by humouring his passions, got an absolute ascendant over him. That they might engross him to themselves, they inspired him with jealousy of his three uncles, especially the duke of Lancaster, persuading him that he aspired to the crown; whilst these could not without indignation see persons of obscure birth or inferior rank engross all the king's favour and confidence. These jealousies and animosities proved fatal to the king himself, who always loved those best that flattered him most, and were for justifying whatever was agreeable to his inclination. These favourites were become so odious, that when the king demanded a subsidy from the parliament, on account of another French invasion that was threatened, instead of answering his desire, they presented an address for

the removal of his favourites. Richard was exceedingly enraged at this proceeding, and said, 'That to please the parliament, he would not turn out the meanest scullion in his kitchen.' A few days after, he sent to the chancellor in an imperious manner to renew his demand of the supply. But the two houses uniting on this occasion, peremptorily refused it, unless he would first remove the favourites. Things were even upon the point of coming to a rupture, when the king, thinking better of the matter, complied. After which, the duke of Ireland's estate was confiscated by order of parliament, and the chancellor was obliged to restore all the grants the king had made him; which done, the parliament appointed fourteen commissioners to manage affairs jointly with the king. But so fickle and imprudent was Richard, that, as soon as the parliament broke up, he recalled his old ministers, and caressed them more than ever; who now made use of all their arts to be revenged on their enemies. The duke of Gloucester, the youngest of the king's uncles, who had acted vigorously against them, was the chief object of their resentment; whom they endeavoured to get poisoned, but he escaped for that time. The remaining part of this reign was nothing but confusion, and a series of arbitrary measures. The ministers formed a design of making the king absolute, which Richard was very well pleased with. 'Twas agreed that he should raise an army, to terrify the duke of Gloucester, and the other lords his associates; as, the earls of Arundel, Warwick, Nottingham, and Derby, which last was eldest son to the duke of Lancaster. Then a parliament was to be called, which was to be wholly at the king's devotion, and none to be returned but such as were set down in his list. For this purpose, he sent for all the sheriffs and judges to Nottingham, and communicated to them his design. The sheriffs refused to comply: but the judges were not so scrupulous as to what, was referred to them. Being asked, whether the king might not turn out the 14 commissioners appointed by parliament, and annul what other acts he pleased; they replied, That the king was above the laws. And some through servile flattery, others compelled by menaces, signed this opinion. The king then issued out commissions for levying an army; but so few were willing to serve him, that he was forced to desist. And all he gained by this was, that by discovering his designs, he increased more and more the hatred of the people. The duke of Gloucester and the other lords, alarmed at these proceedings, and knowing that the chief aim of the court was their destruction, resolved to take arms; and, as they were in great credit with the people, soon raised an army of 40,000 men. This threw the king into great perplexity, but he thought the best way was to amuse them by fair promises, whilst the duke of Ireland went and raised an army in Wales; which he soon did, but being met by the earl of Derby, in Oxfordshire, was defeated, and forced to fly into Holland. From thence he went into Louvain, where he died about three years after. In his baggage, which was taken, was found a letter from the king, ordering him to march with all speed to London, and promising to live and die with him. It was also discovered that he designed to make up matters with France at any rate, in order to have the assistance of that crown to reduce his subjects to obedience. Richard's measures being thus defeated, he took shelter in the Tower, and the lords immediately marched their army to London. They demanded a conference with the king, which in the circumstances he was in, he durst not refuse. They upbraided him with the Nottingham plot, and all his other measures to destroy them, and to make himself absolute. He seemed much affected, and shed tears at this remonstrance; and it was agreed, that he should meet

them the next day at Westminster, in order to settle with him the government. But they were no sooner gone from the tower, than he altered his mind, and sent them word he would not meet them. Hereupon they let him know, that if he did not come, they would choose another king. Frightened at this declaration, he not only came, but consented to the banishment of his favourites. As to the judges, they were taken off the bench, and sent to the Tower. The parliament meeting on Feb. 1380, several persons were impeached of high treason. Some were banished, and had their estates confiscated. The chief justice, Sir Robert Tresilian, and some others, were hanged at Tyburn. After this a general pardon was passed for both parties, the king renewed his coronation oath, and all the lords repeated their oaths of allegiance to him. During these transactions, the duke of Lancaster was in Spain, endeavouring to possess himself of the crown of Castile, which he claimed in right of his wife, eldest daughter of Peter the Cruel. At his return the king invested him with the duchy of Guienne, not out of any affection for him, but with a view of having him at a distance. Though matters had been thus made up, the unhappy temper of the king soon threw all in confusion again. Being now come of age, he was resolved to take the government into his own hands; when it soon appeared that he was not at all disposed to rule with moderation according to the laws, but that he was fully resolved to follow the opinions and maxims of his late favourites. His queen being dead, he married Isabella, daughter of Charles VI. of France, and made a dishonourable truce with that crown for 28 years. The dukes of Lancaster and York, seeing how matters went; quitted the court; and the duke of Gloucester, who had taken the freedom to upbraid the king, his nephew, on several occasions, was treacherously seized, hurried over to Calais, and there smothered between two feather beds. The earls of Warwick and Arundel were apprehended and sent to the Tower. The king now took more timely and effectual methods to have a parliament at his devotion. He changed all the sheriffs, and the magistrates of cities and boroughs, and suffered none to continue in place, but such as would be subservient to his will. A packed parliament being by such means obtained, they stuck not at sacrificing to the king's and his minister's resentment, the first lords in the kingdom. Thomas Arundel, archbishop of Canterbury, was banished, and his estate confiscated; the earl of Warwick sentenced to perpetual exile in the Isle of Man. This parliament, so agreeable to Richard's mind, was adjourned to Shrewsbury, though in those days the parliament usually sat but one session. Here they established such maxims as were destructive to liberty and the constitution. They approved the opinion for which Tresilian and other judges had been condemned. Accordingly the judges, who attended during the session, decided, "That when the king proposed any affair in parliament, it was high treason to go upon any other business before the king's was dispatched. Thus this scandalous parliament, by humouring the king in every thing, was only hastening his ruin. So many great men being either dead or banished, and the parliament having given their sanction to his arbitrary power, Richard now thought himself above all restraint, and minded nothing but his ease and pleasure; whilst his ministers, wholly intent upon their own private advantage, let the affairs of the nation go to wreck. To shew what lengths the king and his ministers went to raise money, 17 counties were condemned of treason for taking arms under the late duke of Gloucester, notwithstanding the general pardon; and to save their estates, were forced to give blank bonds, to be filled up with what sum the king pleased; and every one bound himself under

great penalties, by what was inserted in these bonds, to stand by the statutes of the Shrewbury parliament. Such tyrannical proceedings could not fail of making the nation very uneasy. And in the midst of the general discontent, a rebellion happening in Ireland, the infatuated king went over in person with his troops to quell it. He was no sooner gone, but a conspiracy began to be formed in England, to deprive him of his crown. The malecontents, after several consultations, resolved to call in the duke of Hereford, or Lancaster, who was now in France; and to that end wrote to the archbishop of Canterbury, who was also there, to communicate their design to him, promising to assist him to the utmost of their power. The duke laying hold of this opportunity to try his fortune, got a few ships of the duke of Britagne, and embarking with the archbishop of Canterbury, and a small number of men, set sail, and hovered some time about the coast of England, to see if the people would declare for him. As soon as it was known that he was on the coast, they began to take arms in several places. Upon this the duke landed in July, 1399, near Revenspur in Yorkshire, where he was presently joined by the earl of Northumberland, and Henry Percy his son, with some troops; and the people flocked to him so from all parts, that in a few days he saw himself at the head of 60,000 men. The duke of York, whom the king had left regent, a man not much disposed for action, and the rest of the council, hereupon left London, and repaired to St. Alban's, which they had no sooner done, but the city declared for the duke. Soon after, the earl of Wiltshire, and the rest of Richard's ministers, thinking themselves not safe where they were, left the duke of York, and retired to Bristol Castle; and the duke, finding it impossible to stem the torrent, withdrew to his own house. The duke of Lancaster first marched to London, where the citizens received him with the greatest demonstrations of joy and affection, as their saviour and deliverer. He then proceeded directly for Bristol, and laying siege to the castle, where the ministers were retired, became master of it in four days; when he caused the earl of Wiltshire, and some other of Richard's counsellors, to be beheaded, to satisfy the multitude, who were exceedingly enraged against them. And soon after the duke of York, his uncle, came in to him. Whilst these things were doing, the contrary winds hindered the king for some weeks from having any news from England. At last, when he was informed of the duke his cousin's descent, instead of coming over himself with his forces, he sent the earl of Salisbury before him to levy troops; which he did in Wales and Cheshire, to the number of 40,000. But having continued in arms for some time, and the king not appearing, they dispersed and returned home. Soon after the king arrived, and when he found how matters stood, and that all the nobility and people had declared against him, he was in the utmost consternation, and knew not which way to turn himself. At last he withdrew privately from the army, and went and shut himself up in Conway Castle, in Wales. The duke of Lancaster being marched to Chester, Richard, in the extremity he was in, thought it best to throw himself upon his enemy's generosity, and even offered to resign his crown, provided he would spare his life, and allow him an honourable pension; and then went and conferred with the duke at Flint. From hence they set out both for London, where Richard was presently conducted to the Tower; and the duke having caused him to call a parliament, the day before it met, he repaired to the Tower, with a great many lords, and there Richard delivered up the crown and sceptre, and signed an instrument, confessing himself unworthy and unfit to govern the kingdom any longer; which instrument

of resignation was the next day approved of in parliament. They then drew up several articles of accusation against him, upon which he was solemnly deposed, much in the same manner as Edward II. had been. The throne being thus vacant, the duke of Lancaster, as had been agreed, rose up, and claimed the crown; and it was unanimously resolved, Sept. 30, 1399, that he should be proclaimed king of England and France, and lord of Ireland; which was done accordingly the same day. Thus ended the unhappy reign of Richard, in its 23d year. He seemed to be a prince of generous inclinations in his younger years, but afterwards being corrupted by flattery, grew excessively full of himself; most profusely expensive in pomp, and show, and diversions; assuming, arbitrary, cruel, and inflexible; which losing him the affections of his subjects, in the end, by a sudden and surprising revolution, lost him his crown. He had no issue by either of his two marriages. See Henry IV. for the account of his death.

RICHARD III. (surnamed Crook Back, duke of Gloucester) was proclaimed king on the 20th June, 1483, by the name of Richard III. and was solemnly crowned, together with his queen, on the 6th of the following month. In the mean time, he appointed the lord John Howard earl marshal, and created him duke of Norfolk; his son Thomas Howard, earl of Surry; William Berkley, earl of Nottingham; and the lord Lovel, one of his chief confidants, viscount Lovel, on whom he likewise conferred the office of chamberlain. He also released from confinement the archbishop of York, and the lord Stanley; and taking doctor Morton, bishop of Ely, out of the Tower, committed him to the custody of the duke of Buckingham, who sent him to Brecknock castle in Wales. Richard enjoyed the crown, which he had obtained by such unjust and cruel methods, but two years and two months; which whole time was spent by him in contriving methods to support himself on the throne; and by his enemies, in plots and conspiracies to pull him down; in which they at last succeeded, and at the same time deprived him both of his crown and life. As he could not think himself safe whilst his two nephews, the young king, and his brother the duke of York, were yet living, he resolved on the wicked expedient of dispatching them out of the way; which was accordingly done soon after his coronation. The two innocent children were still in the Tower, the government of which he had given to Sir Robert Brackenbury, one of his creatures. He chose to be absent from London whilst the hellish design was executed, that he might be the less suspected; and set out with the duke of Buckingham to visit several counties. Being come to Gloucester, he sent express orders to Brackenbury to put the two young princes to death. Brackenbury, more conscientious than Richard imagined, humbly desired to be excused. Upon which he sent him a written order, by sir James Tyrrel, requiring him to deliver up to the said Tyrrel the keys and government of the Tower for one night only. Brackenbury obeyed; and Tyrrel brought in two ruffians, Miles Forest and John Dighton, whom he had hired to perpetrate the horrid fact. In the dead of the night, when the princes were asleep, they entered the chamber, and rushing upon them, stifled them both in their bed, and then buried them under a little staircase. This, Tyrrel confessed, who was executed in the next reign. In 1674, some bones were found there, supposed to be theirs, which Charles II. caused to be put in a marble urn, and removed to Westminster Abbey. From Gloucester king Richard set out for the north, to quell some disorders in those parts; and coming to York, was crowned there a second time, in the beginning of Sept. At the same time, he created Edward, his

son, prince of Wales, who was then ten years old. Having got rid of his nephews, and taken measures for renewing the foreign alliances, he endeavoured to make those his friends whom he most suspected, by giving them considerable posts and employments, particularly the office of lord steward of the household to the lord Stanley (who had married Margaret, countess of Richmond, mother of the earl, who was still in Bretagne.) Richard now thought himself very secure: but at this very time a conspiracy was forming, which, though it proved unsuccessful at first, in the end completed his ruin. The duke of Buckingham, who had been the chief instrument in placing Richard on the throne, was at the head of this conspiracy. He thought himself neglected by Richard, or, at least, not rewarded in proportion to the service he had done him. It is said, the king had broke his word with him, with regard to some lands he had promised to give him. However, he retired from court exceedingly disgusted, meditating nothing but revenge, and soon began to concert measures with Morton, bishop of Ely, his prisoner in Wales, how to dethrone the usurper whom he had lately set up. After several conferences, and thoroughly understanding one another, the scheme they fixed upon was to set Henry earl of Richmond on the throne. In this project they were sure of having all the friends of the house of Lancaster on their side, Henry being the only relict of that family. And in order to engage the Yorkists, it was thought necessary, that Henry should promise to marry the princess Elizabeth, eldest daughter of Edward IV. Matters being thus concerted, the first step that was taken was, by a trusty messenger, to acquaint the countess of Richmond with their design; who came heartily into it, and found means privately to impart it to the queen dowager, in her sanctuary, who readily gave her consent that Henry should marry her daughter. This done, they each of them engaged their most faithful friends in the plot, and these drew in others; which indeed was no hard matter, as the usurper was universally hated by the nation. The countess then sent two trusty persons into Bretagne, to inform the earl her son of what was doing in his favour, and to invite him over. His condition there seemed not very promising for such an undertaking. But upon the duke of Bretagne's promising to assist him, he sent word to the countess his mother, that he should be ready to come over in October. Though the conspirators took all imaginable care to conceal themselves, yet Richard had some confused intimations of a plot; and beginning to suspect the duke of Buckingham, ordered him to court; but he peremptorily refused to come, declared against the king, and took up arms, drawing together the forces he and his adherents had privately listed in Wales, and marched towards the western counties, in order to join his friends who were ready to rise there, and where the earl of Richmond designed to land. But the duke being stopped in his passage by a dreadful inundation of the Severn, which lasted six days, his whole army dispersed, and he being left with only one servant, went and concealed himself in the house of one Banister, to whom both he and his father had been great benefactors. Nevertheless, upon Richard's publishing a proclamation offering a very great reward for apprehending him, he was basely betrayed by Banister to the high sheriff of Shropshire, and soon after lost his head. About the same time, the earl of Richmond appeared on the coast of England, and was like to have fallen into the hands of his enemies; but he luckily escaped, and sailed back to Normandy, and from thence to Bretagne, to wait for a more favourable opportunity. In the mean time, Richard proceeded with severity against the conspirators, putting many of them to death, and gave an extraordinary commission to

Sir Ralph Ashton for that purpose. Among others, Sir William Collingburn, a Wiltshire gentleman, was hanged, drawn, and quartered, for abetting the earl of Richmond's project, and for writing the following satirical rhyme on Richard and three of his favourites:

"The Cat, the Rat, and Lovel the dog,
"Rule all England under a hog."

Alluding to Catesby, Ratcliff, and Lovel, who bore a dog for his arms, as one of Richard's supporters was a wild boar. But many, to escape the king's severity, fled into Bretagne, to the earl of Richmond; among whom was Thomas Grey, marquis of Dorset, son to king Edward's queen. The storm being thus in appearance blown over, king Richard thought fit to call a parliament; which meeting on January 23, 1484, and being wholly devoted to the king, made no scruple to declare the issue of Edward IV. illegitimate, to confirm Richard's irregular election, and recognize his pretended right to the crown. They then passed an act of attainder against the earl of Richmond, and all his adherents. But it was very happy for his mother, the countess, that nobody discovered her having any hand in the plot. The earl of Richmond had many English lords now with him, who had escaped to Bretagne, after the late disappointment, and assured him, that the nation in general were his friends; and the duke of Bretagne promised to continue his assistance. But here he was soon in great danger. For the duke being grown old and infirm, his prime minister, Landais, one of very mean extraction, now governed all in his name; and made himself so odious to the nobility, and all the people of Bretagne, that to support himself against them, he sought foreign assistance, and believed he had a good opportunity of receiving it from king Richard, on condition of delivering the earl of Richmond into his hands. Nothing could be more agreeable to Richard, and a negociation was actually carried on between this hated king and equally hated minister, for this purpose. In the mean time, the earl knew nothing of all this; but the bishop of Ely, who had made his escape, and, though abroad, had good spies about Richmond, advertised him of the danger he was in. Upon which, with great difficulty, he escaped in disguise from Bretagne, and repaired to the court of Charles VIII. king of France, who had succeeded his father, Lewis XI. The generous duke of Bretagne was angry with his minister for giving the earl any cause of uneasiness, and permitted all the English to follow him; and not long after, Landais, for all his insolent proceedings, met with his deserved reward on a gibbet. The earl was very civilly treated at the court of Charles VIII. who at length promised him some assistance, not so much out of regard to him, as to cause new troubles in England. Here also he had the satisfaction to see the earl of Oxford come to him, who had been imprisoned by Edward IV. in the castle of Hammes, in Picardy, but had now prevailed on the governor and garrison to declare for the earl of Richmond. Richard had intelligence that something was also contriving against him in England, but could not discover by whom. After some time, he found out that what was carrying on in favour of the earl, was chiefly grounded on his having promised to marry the princess Elizabeth. To prevent him, therefore, he resolved to marry her himself. In order to this, by various plausible pretences, particularly by promising to secure the crown to the princess after his death, as the prince of Wales was now dead, and he had no other child, he so wrought on the queen dowager, that she delivered her five daughters into his hands. Then he took care to get rid of Anne, his queen, daughter of the great earl of Warwick, either by causing her to die with grief and vexation by his ill treatment, or

by actually poisoning her. She would have been more pitied, if she had not married the murderer of her former husband, who was Edward, prince of Wales, son to Henry VI. Richard now made his addresses to the princess, his niece, but found her absolutely inflexible. In the mean time, as he grew every day more odious, many lords and gentlemen went over to the earl of Richmond, and offered him their services; others did the same, to avoid being sacrificed to his suspicions; and those who staid at home, waited only for an opportunity to declare against him. All circumstances now concurring, the earl set sail from Harfleur, on the 31st of July, 1485, with only 2000 men, which France had lent him, together with the ships to transport them. On the 6th of August he landed at Milford Haven, and marching towards North Wales, was joined by Rice ap Thomas, with a considerable body of Welch troops. As the earl was of Welch extraction, that country in general readily favoured his design. In a few days he arrived at Shrewsbury, where the inhabitants readily received him, and Sir George Talbot brought him an aid of 2000 men. The lord Stanley, and his brother sir William, raised forces, as if it had been for the king, but had given private assurance to the earl that they would join him at a proper opportunity; which they did after the two parties were engaged, and were by that means the chief cause of the earl's success. King Richard having heard of the earl's landing, ordered all his forces to be drawn together at Nottingham, resolving to go in person and fight him. And the earl being no less desirous to decide the quarrel with one blow, resolved to go and meet Richard. In his march he was joined by Sir Walter Hungerford, Sir Thomas Bouchier, and several others, who deserted the king. The two armies met near Bosworth in Leicestershire, and the battle was fought on the 22d of August, 1485. The earl of Richmond was at first in danger of being worsted, when the lord Stanley joining him with 5000 men, and his brother with 2000, the king's army was entirely routed after a fight of two hours, in which he gave signal proofs of his valour and courage. In the heat of the battle, espying the earl, he rode furiously to attack him, and killed Sir William Brandon, the earl's standard-bearer, who stood in his way, and threw Sir John Cheney to the ground, who had taken the former's place. When he saw the day was lost, he rushed into the midst of his enemies, and was slain. It is very likely he was betrayed, and that some great men, who staid with him, held secret intelligence with the earl of Richmond. It is said, that on the very morning of the battle, before it began, the following lines were found fixed on the duke of Norfolk's tent door, who was slain fighting for Richard:

"Jockey of Norfolk, be not so bold:

"Dicky thy master is bought and sold."

Sir Richard Ratliff was also slain; and the perfidious Catesby, being taken prisoner, was executed at Leicester. Thus fell king Richard, aged about 34 years, who, excepting his unjustifiable methods to get and keep the crown, may be reckoned no bad king. He took care to suppress vice, and promote sobriety and virtue, and had a great regard to the due administration of justice, except where his crown was concerned. Lord Verulam says, he was in military virtue approved, and a good law maker. He founded the college of Heralds, and made them a corporation. He was certainly endowed with great parts and abilities, which would have made him a truly great man, if they had been rightly applied. His boundless ambition made him aspire to the crown, and it was for the sake of that only, that he was guilty of all that treachery, dissimulation, and cruelty, which justly renders his memory detested. His body was found stript naked, covered with blood and dirt, and in that condition was

thrown across a horse, with the head hanging on one side, and the legs on the other, and carried to Leicester; where it was interred. He was the last king of the Plantagenet race, who had swayed the sceptre ever since Henry II.

RICHES, *s.* [*richesses*, Fr.] money or possessions. A splendid or sumptuous appearance.

RICHLY, *ad.* in a splendid, wealthy, plenteous, or abundant manner. Truly; used in an ironical sense.

RICHMOND, a village in the county of Surry, with a royal palace, where the kings of England formerly resided. It has a very fine park, with delightful gardens, and is visited by a great number out of curiosity. It is 12 miles W. of London. Inhabitants, 5219.

RICHMOND HILL, its summit is a most delightful spot, commanding a beautiful, luxuriant, and diversified prospect (deservedly celebrated by the poet, "who sung the seasons and their change," by Dr. Smollet, and other writers of genius, "sensibly alive to the beauties of nature") of the "Enchanting Vale of Thames," of the royal palaces, with magnificent seats, glittering towns, charming pleasure grounds, hills, groves, swelling lawns, meadows, pasture grounds, corn fields, &c. &c. on its banks. The landscape from this favourite situation exhibits a picture of the most elegant simplicity; nature decorated with the greatest neatness, the most exquisite embellishments of rural scenery; in short, an elysium, charming the eye with indescribable variety. It takes in a view, more or less distant, of the city of London, of Windsor Castle, Hampton Court, Highgate, with other parts of Middlesex and Surry.

ROME, a famous city of Italy, founded 750 years before the birth of Christ. It was formerly three times as large as it is at present, and is now one of the largest and handsomest cities in Europe. It has 28 gates, 300 towers, and as many churches, six bridges over the Tiber, and about 150,000 inhabitants. There are a great many monuments of the ancients; such as baths, obelisks, amphitheatres, cirques, co-

lums, mausoleums, aqueducts, fountains, catacombs, pagan temples, and triumphal arches; besides a prodigious number of fine statues. The pope has three superb palaces, namely, that of the Vatican; a summer-house on Mount Cavallo; and the third is the palace of the Lateran, near the church of St. John, where they crown the popes. St. Peter's church is the largest in all Christendom; and is encrusted within and without with marble; it is 840 feet in length, 725 in breadth, 300 in height, and 2465 in circumference; 24 popes have died since its foundation; and it has cost twenty-three millions of crowns. In the great square before this church is an obelisk of granite, 80 feet in height without the pedestal, which is 82 feet high. The library of the Vatican is the largest and most complete in the world. Rome is divided into fourteen wards, called Rione; and the Castle of St. Angelo is sufficient to keep the whole city in awe: it is built near the river Tiber, is flanked with five bastions, and defended by a great number of cannon. There are a great number of magnificent palaces, the most remarkable of which are those of Farnese and Borghese. Rome is very well supplied with water by their magnificent aqueducts and fountains; and there is plenty of all sorts of provisions; with a great variety of wine; but a price is set on every thing by the magistrates. Paul wrote an excellent Epistle to the Romans; in which, after assuring them of his regard for them, he describes the deplorably corrupt state of all men by nature, whether Gentiles or Jews, and the impossibility of justification before God by works of our own, &c. Rome is seated on the river Tiber, which runs through a part of it, and is 600 miles S. E. of Paris, 410 S. S. W. of Vienna, 900 S. E. of London, 875 S. by E. of Amsterdam, 750 N. RU'SSIA, the empire of, is a large country, partly in Asia, and partly in Europe, bounded on the N. by the Frozen Sea; on the S. by Great Tartary, the Caspian Sea, and Persia; on the E. by the Sea of Japan, and on the W. by Poland and Sweden. There were three countries that had the name of Russia; namely, Red Russia; White Russia, which comprehended part of Lithuania; and Black Russia, which included the governments of Kaluga, Moscow, Tula, Rezan, Voledimir, and Yaroslaf; and hence his im-

perial majesty takes the title of Emperor of all the Russias. The seas of Russia are the Baltic, the White Sea, the Frozen Ocean, the Black Sea near the frontiers of Turkey, and the Caspian Sea. There are also five large rivers, namely, the Nieper, or Boristhenes, which runs between Lithuania and Poland; the Wolga, which runs through the middle of the country, and falls into the Caspian Sea; the Don, which after several turnings runs into Little Tartary, and falls into the sea of Asoph; the Dune, which running northward falls into the White Sea; and the Oby, which running north falls into the Frozen Ocean. It may easily be conceived that a country of such vast extent must lie in different climates, and that the soil must be very different. The most fertile part is near the frontiers of Poland; insomuch that the inhabitants are able to supply their neighbours with corn; the N. part is not only more cold, but more marshy, and overrun with forests inhabited chiefly by wild beasts. Besides domestic animals, there are wild beeves, rein-deer, martens, white and black foxes, weasels, ermines, and sables, whose skins make the best furs in the world. In Russia there are also large quantities of cotton and silk, with which they make all sorts of stuffs; the other merchandises are skins, furs, Russia leather, talc, tallow, hemp, Russia cloth, honey, wax, and almost all the merchandise of China, India, Persia, Turkey, and some European countries. The inhabitants in general are robust, well-shaped, and of pretty good complexions; they are great eaters, and very fond of brandy. They were formerly the most ignorant brutish people in the world; but are now making a rapid progress in every social and elegant improvement and refinement. Their religion is that of the Greeks, and they depended formerly on the Greek patriarch, who resided at Constantinople. The church is governed by a patriarch, and under him there are four metropolitans, and eight archbishops. The sovereign of Russia is absolute. The ordinary revenue of this vast empire is 20,000,000 of rubles, which is partly drawn from contributions, partly from duties on merchandises, and partly from farms. The orders of knighthood are that of St. Andrew, St. Catherine, and St. Alexander Newski, which are all of late institution. The punishment of their criminals is very barbarous, nor have they always the privilege of a fair trial, for they extort confessions by racks and tortures. This empire, exclusive of its acquisitions from the Turks, and from Poland and Sweden, forms a square whose sides are 2000 miles each. Petersburg is the capital. The population of the whole empire is about 42 millions.

S is the eighteenth letter, and fourteenth consonant, of our alphabet. In the beginning of a word, *s* has invariably its natural and genuine sound; in the middle of it, it is sometimes uttered with a stronger appulse of the tongue to the palate, like *z*; as *rose*, *prose*, *rosy*, *easier*, *miser*, *nosel*, *resident*, *busy*, &c. In the end of monosyllables it sometimes sounds like *s*; as in *this*, *thus*, &c. and sometimes like *z*; as in *as*, *has*, *is*, *his*, &c. and generally where *es* stands in verbs for *eth*, as *gives*. In some words it is silent, as in *isle*, *viscount*, &c. At the end of words it is often doubled, where-

by they become hard and harsh; as in *brass, kiss, loss, mass, trespass, &c.* In Writing or Printing, the long *f* is sometimes used in the beginning and middle of words, and the short *s* at the end. In Abbreviations, *S* stands for *societas*, or *socius*; as, *R. S. S.* for *regiæ societatis socius*, i. e. fellow of the royal society. In Medicinal Prescriptions, *S. A.* signifies *secundum artem*, i. e. according to the rules of art. Used as a numeral, *S* anciently denoted seven. In Books of Navigation, *S.* stands for south; *S. E.* for south east; *S. W.* for south west, &c.

SA'DDUCEES, an heretical sect among the Jews, opposite both in principles and every thing else to the Pharisees,

They were so called, say some, from *SADOCK*, the supposed founder of their sect; or, according to others, from *PTV*, Heb. (*tsdek*) a word signifying *justice*. They held the most impious tenets in religion. They denied the resurrection of the dead, and even a future state; affirming, that the human soul perished with the body. They utterly denied the existence of angels, and of all spirits except of God. This dangerous and wicked heresy, as many learned men think, was occasioned by their wilfully mistaking the doctrine of their master *Sochæus*, who used to press upon his disciples the disinterested love of virtue, insisting, that men ought to serve God, not as mercenary slaves do their masters, through fear, and for their own advantage, but for his own sake, and for pure love of virtue, without any expectation of reward. This doctrine, harmless in itself, led them to conclude, though falsely, that their master had absolutely denied any state of future rewards. In consequence of their other principles, they denied likewise the providence of God, or that he concerned himself in any sense with the affairs of men. These atheistical principles rendered them justly odious to the people. How they could deny a divine providence is very unaccountable, since they received as inspired writings the Pentateuch, or five books of Moses, which are one continued history of the exercise of such a divine interposition in the affairs of the world.

SATURDAY, *s.* [from *sater*, a Saxon idol, and *dæg*, Sax. a day] the last day of the week.

SATURITY, *s.* [saturitas, Lat.] fulness.

SATURN, *s.* [Saturnus, Lat.] in the Newtonian Astronomy, is one of the superior planets. To the naked eye he appears less bright than any other planet, (the Georgium Sidus excepted,) on account of his great distance from us, but as seen through a good telescope, he is the most elegantly adorned body in the system. His mean distance from the sun is 954,072 of those parts of which the earth's distance is 100,000, which is about 900,700,000 English miles,

as deduced from the transit of Venus on June 3, 1769. By moving at the rate of about 22,000 miles every hour, he completes his immense circuit round the sun in 29yrs. 164d. 7h. 21m. 50s. but his sidereal revolution is 12d. 7h. 14m. 52½" longer. The time from one of his conjunctions with the sun, as seen from the earth, to the next, is 378d. 2h. 8m. 8s. His diameter is 10¹/₁₀ as great as the earth's; consequently he contains 1030 times as much matter. Dr. Herschel has discovered that he turns round his axis at the prodigious rate of about 24,500 miles every hour, in 10h. 16m. 0½s. therefore his year contains about 25,140 of such days. The rotation is performed in the same way as that of the earth upon her axis. He appears, like the other superior planets, to be direct, retrograde, or stationary, according to his aspect with the sun, as seen from the earth; which proves that the sun, and not the earth, is the centre of his orbit. The greatest number of days he can be retrograde, in a synodic revolution, is 141, in which time the angle of retrogradation is about 7°. He does not move in the plane of the earth's orbit, but is inclined thereto 2° 29' 50", intersecting the ecliptic in two opposite points called his nodes, which, on August 21, 1784, were posited in 21° 50' 8½" of Cancer and Capricorn, according to Mr. Bugge's observation of the planet's passage through his descending node at that time. They move 55' 30" in 100 years. His eccentricity is 53,640, and greatest equation of his orbit 6° 26' 42". The place of his aphe- lion, anno 1800, was in 29° 4' of Sagittarius, having a progressive motion of 1° 50' 7" in 100 years. This planet, like Jupiter, has parallel streaks called belts, apparently on his surface; but that they are not so, is evident from their change- ableness: some suppose them to be vehicles similar to our clouds, and designed for the like purposes; but of this no- thing certain can be said. Saturn, according to Dr. Her- schel, is encompassed with two concentric rings, which, like the moon, are opaque, receiving their light from the sun, and reflecting it on the planet. These rings are inclined 30° on the orbit of Saturn, intersecting it in two opposite points called the nodes of the rings, which are placed in about 17° of Virgo and Pisces. The rings, in a Saturnian year, are constantly carried parallel to themselves, similar to the earth's axis, and consequently the sun shines on the northern half for near 15 years without setting, and *vice versa*. The rings, considered as one, being a broad circular arch, having, in the opinion of Dr. Herschel, a spherical or spheroidal edge, is invisible, except through very powerful telescopes, when Saturn is about its nodes, on account of its thin edge being directed to us; but the more the planet is removed from them, the more open it appears. It is the most open when the planet is in 17° of Gemini and Sagittarius. Dr. Herschel computes the diameter of the larger ring to be 204,883 miles, and the distance of the two rings 2839 miles. The rings are equally distant from Saturn on every side, and the outer one has a revolution round its axis in 10h. 32m. 15½s. But these rings are not the only light reflected on the planet in the absence of the sun; he has likewise 7 satellites, or moons, constantly moving round him as their centre, so that there is no part of this huge planet but is constantly enlight- ened by one or more of these moons. They all move so nearly in the plane of the rings, the fifth excepted, that the difference cannot be perceived by our best telescopes. Mr. Cassini places the node of the fifth satellite in 5 S. 5° upon the orbit of its primary. From the discovery of Herschel that the satellites of Jupiter move round their axes in the time they move round their primary, we may infer that those of Saturn have the like motion.—The periodical revolutions and dis- tances of these satellites from the body of Saturn, expressed in semidiameters of that planet, and in miles, are as follows:

Sat.	Periods.					Distances in		Diam. of Orbit.
						Semi- diam.	Mes.	
1	1d	12h	18'	27"	5 $\frac{3}{8}$	876,000	1' 27"

SCOTLAND, the kingdom of, is the north part of the island of Great Britain, which is now united to England, and both together make but one nation. It is bounded on all sides by the ocean, except the S. where it is separated from England by the river Tweed; towards the E. by Cheviot hills and the river Esk, and Solway Frith towards the W. It is generally reckoned 380 miles in length, from Aldermouth head, near the isle of Mull, to Buchaness, and 190 in breadth where it is broadest. Besides the main land, there are 300 islands belonging to Scotland, some of which are very considerable. These are called the Western Islands, the Orkneys, and the Schetland Islands. The air is generally wholesome, though colder than that of England; but it is purified by the winds, which are pretty strong and frequent. In the northern part the days in summer are very long. Here are many rich and fruitful plains, though what is called the Highlands is full of mountains and heaths. They do not want wheat, but the grain mostly cultivated is oats, as it will grow in the mountainous parts. The productions of Scotland are much the same as in England, though not in so great plenty. They have mines of several sorts, particularly of lead, with quarries of free-stone for building; so that the principal towns are constructed with nothing else. They have mines of very good coal, great quantities of which are brought to London, and is known by the name of Scotch coal. The fisheries in the surrounding seas are of great national importance, and will become a real source of wealth to the nation, when increasing commerce shall enable the inhabitants to form roads, erect villages, and open canals in the remote parts of the country. Scotland was an independent kingdom till James VI. was called to the throne of England; and in the reign of queen Anne, one of his successors, both kingdoms were united under the name of Great Britain. Sixteen peers are elected to represent the nobility, and 45 commoners to represent the counties and boroughs, in the same parliament with that of England. There are five universities in Scotland, viz. St. Andrew's, Glasgow, Edinburgh, New Aberdeen, and Old Aberdeen. Scotland is divided into 34 counties, and Edinburgh is the capital. The established religion is the Presbyterian. There are few Roman Catholics, nor are the Episcopalians numerous. Scotland contained, in 1821, 2,092,014 inhabitants, being an increase, since 1811, of 286,326.

SICILY, an island in the Mediterranean Sea, almost in the form of a triangle, bounded by the sea, and separated from the kingdom of Naples by a narrow strait, called the Faro di Messina, from the city of Messina which is seated on it. This strait is about 5 miles in breadth, and in it are the famous shelves called Scylla and Charybdis, so much celebrated by the Greek and Latin poets; but which have been long since removed by an earthquake. Sicily is about 165 miles in length, and 112 in breadth; and its produce is corn, wine, oil, silk, and excellent fruits. The two kingdoms of Naples and Sicily are under the same climate, and the productions are much the same; only Sicily abounds much more in corn. It is said to contain one million of inhabitants, who in general have a very bad character. Don Carlos became king of the Two Sicilies in 1736, in consequence of the treaty of Vienna; but on the death of the king of Spain, in 1759, Carlos succeeded to that crown, and his third son, Ferdinand, became king of the Two Sicilies. The seat of government is at Palermo. The oppressions of the clergy and nobility were the cause of much misery to the inhabitants, till the year 1812, when by means of the British, they acquired a form of government on the plan of the constitution of Great Britain. Mount Ætna, now called Gibello, the famous volcano, is in Val di Demona.

SOMERSETSHIRE, a county of England, bounded on the N. W. by the Bristol Channel; on the N. by Gloucestershire, from which it is divided by the Avon; on the E. by Wiltshire, on the S. E. by Dorsetshire, and on the S. W. by Devonshire. Its length, from N. E. to S. W. is about 65 miles, and its breadth from E. to W. about 45. It is divided into 42 hundreds, which contain 3 cities, (Bristol being included) 28 market towns, 475 parishes, and 355,314 inhabitants; and sends 18 members to parliament. The air, in the lower grounds, is universally mild, and generally wholesome. The principal rivers are the Parret, Ivel, Chew, Axe, Thone, Brew, Exe, Frome, and Avon. The Mendip hills afford abundance of coal and minerals; and Cheddar is celebrated for its cheese. The best goose feathers for beds come from the Somerset marshes; the unfeeling inhabitants, however, often pluck the poor birds while yet living. Red and yellow ochre are found here, and cider is a common product; it has also a consider-

able share in the manufacture of fine cloths, druggets, shalloons, knit stockings, &c.

SO'MERTON, a town of Somersetshire, with a market on Tuesday. It was formerly a considerable place, and the county took its name from hence. It is at present pretty large, with a market considerable for corn, provisions, sheep, and cattle; and is 13 miles S. of Wells, and 123 W. by S. of London.

SOUL, *s.* [*saul*, Sax. *sael*, Dan. *saal*, Isl. *siel*, Belg.] the immaterial substance which animates our bodies. Various have been the opinions of men concerning the substance of the human soul. The Epicureans thought it a subtle air, composed of atoms or primitive corpuscles. The Stoics maintained it was a flame, or portion of heavenly light. The Cartesians made thinking the essence of the soul. Others hold that man is endowed with three kinds of soul, viz. the rational, which is purely spiritual, and infused by the immediate inspiration of God; the irrational, or sensitive, which being common to man and brutes, is supposed to be formed of the elements; and the vegetative soul, or principle of growth and nutrition, as the first is of understanding, and the second of animal life. A vital and active principle. Spirit or essence. Inward power. A person. Spirit; fire; grandeur of mind.

SOUND, *a.* [*sund*, Sax.] healthy; not morbid; not diseased; not hurt; hearty. Right; not erroneous, applied to knowledge. Stout, strong. Fast or profound, applied to sleep.

SOUTH MOLTON, a town of Devonshire, with a market on Saturday. It is a corporation, containing several inns, and manufactures of white serges and felts. It is 177 miles W. by S. of London.

SOUTHWARD, *ad.* towards the south. Used substantively, for the southern regions; as, "Countries are more fruitful to the southward." *Raleigh*.

SOUTHWARK, a town of Surrey, which may be considered as part of the metropolis, being seated on the opposite side of the Thames, and joined to it by means of two bridges, and under the jurisdiction of the corporation of London. A part of it also forms one of the city Wards, named Bridge Ward Without, and an alderman is chosen to govern it. It is called the *Borough*, by way of distinction, and is a large and populous place, participating considerably in the commerce of London. The bishop of Winchester had formerly a palace here, with a park; when there were 18 brothels along the Bankside, licensed by that prelate, under certain regulations confirmed by parliament. It is divided into two parts, the Borough Liberty, governed by the lord mayor; and the Clink, or Manor of Southwark, under the jurisdiction of the bishop of Winchester, who, by his steward, keeps a court-leet and a court of record on the Bankside. A Court of Conscience is also established here. Southwark contains 6 parishes, a Roman Catholic chapel, many places of worship for the Dissenters of various denominations, and several charitable foundations, particularly St. Thomas's and Guy's Hospitals, together with the Magdalen Hospital; the Asylum for Female Orphans; the Freemason's Female School; the Philanthropic Reform; the Asylum for the Blind; the New Bedlam, &c. Here are also the Surrey and Cobourg theatres; the King's Bench and Marshalsea prisons; the county Bridewell; and the county gaol, with a sessions-house adjoining. The number of inhabitants, about 73,000.

SOUTHWELL, a town in Nottinghamshire, with a market on Saturday. It is an ancient place, with some peculiar privileges, and has a collegiate church, and the ruins of a grand palace, demolished during the civil wars, which belonged to the archbishop of York. It is 13 miles N. E. of Nottingham, and 129 N. W. by N. of London.

SOUTHWEST, *s.* the point between the S. and W.

SOUTHWOLD, commonly called *Swole*, a sea-port town in Suffolk, with a market on Thursday. It is a corporation, has a handsome church with a high steeple, and some trade with small vessels. It is 20 miles S. of Yarmouth, and 105 E. of London.

SPA'CIOUSNESS, *s.* roominess; wide extension.

SPADE, *s.* [*spad*, Sax. *spade*, Isl. and Belg.] a broad shovel used in digging. A deer three years old. In Cards, wherein the four suits represent the four states in a kingdom, the nobility were represented by the ends of lances or spikes. The Spaniards, however, represent them by the *espadas*, i. e. swords instead of spikes, and our ignorance of the design of the inventor, as well as of the Spanish language, has occasioned our representing the points of this suit broader, and calling them by the name of *spades*.

SPAD'ILLE, *s.* [Fr.] at ombre and quadrille, the ace of spades.

SPAD'DLE, *s.* a little spade.

SPA'GYRIST, *s.* [coined by Paracelsus, from *spaher*, a searcher, Teut.] a chemist. Adjectively, chemical.

SPAIN, a considerable kingdom of Europe, bounded on the N. by the Bay of Biscay; on the N. E. by the Pyrenean Mountains, which separate it from France; on the E., S., and S. E. by the Mediterranean, and the Straits of Gibraltar; on the S. W. by the Atlantic; and on the W. by Portugal and the Atlantic. It is about 700 miles in length, and 500 in breadth, and contains the provinces of Old and New Castile, Andalusia, Arragon, Estramadura, Galicia, Leon, Catalonia, Granada, Valencia, Biscay, Asturias, Murcia, and Upper Navarre; some of which have been separate kingdoms. The air is dry and serene, except during the equinoctial rains, but excessively hot in the southern provinces in summer. The vast mountains, however, that run through Spain, are very beneficial to the inhabitants, by the refreshing breezes that come from them in the southernmost parts, though those in the N. and N. E. are in the winter extremely cold. The soil is very fertile; but there are large tracts of uncultivated ground. The produce of the country is fine wheat, barley, saffron, honey, silk, saltpetre, salt, barilla, and even sugar-canes; it also produces oranges, lemons, prunes, citrons, almonds, raisins, figs, dates, pomegranates, olives, &c. and its wines are in high esteem. Wolves are the chief beasts of prey that infest Spain. The wild bulls, which are caught in Andalusia, have so much ferocity, that bull-fights were formerly the most magnificent spectacle the court of Spain could exhibit; this barbarous amusement, however, is now, in part, exploded. The domestic

animals are horses that are remarkably swift, mules, asses, horned cattle, (which are but few) sheep, &c. The wool of the latter is superior to any in Europe; and the best is that of Old Castile. Spain abounds in minerals and metals, cornelian, agate, jacinth, loadstones, turquois stones, quicksilver, copper, lead, sulphur, alum, calamine, crystal, marbles of several kinds, porphyry, the finest jasper; and even diamonds, emeralds, and amethysts, are found here. Anciently it was celebrated for gold and silver mines, but since the discovery of America, no attention has been paid to them. The principal rivers are the Douro, Tajo, Guadiana, Guadalquivir, Ebro, Gualdalaviar, Minks, and Segura. Spain, which in the times of the Goths and Moors contained between 20 and 30 millions of people, is now but thinly inhabited; for by the census taken in 1803, including the Balearic islands, the number of souls was only 10,351,075. The indolence and pride of the natives make them disdain to stoop to handicraft trades, so that the greatest part of the necessary artisans are French. The persons of the Spaniards in general are tall, their complexions swarthy, and their countenances expressive. The women are small and slender, and their beauty chiefly reigns in their novels and romances. The established religion of Spain is popery, and here the inquisition (first commenced in 1477) reigned in all its horrors, till it was suppressed, first by the Cortes in 1811, and ultimately by Ferdinand VII. in 1821. Spain has 44 episcopal sees, and 24 universities. Spain, originally the most free, became one of the most despotic kingdoms in Europe; and so continued till the people, roused to action by the invasion of the French, and aided by the absence of the royal family, who, in 1808, were decoyed by the emperor Napoleon into France, took the power into their own hands, revived their Cortes, or parliaments, which had lost their influence, and formed a free constitution. When Napoleon had got the Spanish royal family into his power, he proclaimed his brother Joseph king of Spain, at Bayonne, and sent him to assume the government at Madrid, which was already in the possession of a French army. The Spaniards, however, were averse to the change; they immediately appointed a supreme junta of government, who, in 1810, summoned the Cortes, or representatives of the people, to join them at Cadiz; and this assembly was subsequently removed, first to Seville, and at length to Madrid. In the mean time the supreme junta obtained the assistance of Great Britain, and an extensive warfare was carried on with the invaders. The campaigns of 1811 and 1812 of united Spanish, Portuguese, and British forces, under lord Wellington, were marked with variable success; but after the battle of the Pyrenees, in 1813, few of the French remained in Spain; and the allied armies passed the Bidassoa into France. On the downfall of Napoleon in 1814, king Ferdinand VII. was restored; but his immediate conduct excited general disgust and surprise: he annulled the constitution of the cortes, imprisoned some of the leading members, put others to the torture, banished others, re-established the former mode of government, and extended over all ranks the rigours of despotism. Discontent and mutiny on the part of the nation were the consequence. Insurrections broke out at times in different parts of the kingdom; but it was not till 1820, that they assumed an aspect sufficiently imposing to convince the king that he held his government as a trust for the good of his people. In the close of that year, the army became mutinous, and Ferdinand was obliged to change his measures, and to accept the constitution which the Cortes had framed. The country, however, is very far from being in a state of tranquillity; and a new convulsion seems every day ready to break out. The king of Spain, besides his European kingdom, has, or rather had, a great part of America; but most of the southern provinces have declared their independence, as has also

Mexico in the northern continent; and Louisiana and the Floridas he has been obliged to cede to the United States. In the West Indies he is sovereign of Cuba, the largest island in that quarter; in the South Seas, he is master of many rich islands, particularly the Philippines; and in Africa he possesses several places, as Ceuta, Oran, &c. Madrid, the capital of Spain, stands in lon. 354. W. lat. 40. 25. N. The heir to the crown of Spain always bears the title of Prince of Asturias.

SPA'LDING, a neat town of Lincolnshire, with a market on Tuesday. It is seated on the Welland, and from the canals in the streets, it resembles a Dutch town. Much hemp and flax is grown in the neighbourhood; and it has a good carrying trade in corn and coals. It is 20 miles N. by E. of Peterborough, and 97 N. of London.

STAR, *s.* [*steorra*, Sax. *sterre*, Belg.] a general name for all heavenly bodies, which, like so many brilliant studs, are dispersed through the whole heavens. The stars are distinguished, from the phenomena of their motions, &c. into fixed and erratic or wandering stars; these last are again distinguished into the greater luminaries, viz. the sun and moon; the planets or wandering stars, properly so called; and the comets. As to the fixed stars, or simply stars, they are so called because they seem to be fixed, or perfectly at rest, and consequently appear always at the same distance from each other. Various have been the conjectures concerning the nature of the fixed stars: but that which supposes them to be suns enlightening other worlds, appears to be the best founded, from the following considerations: That they are at immense distances from our earth is evident from their almost insensible parallax, which is too minute to be accurately ascertained, amounting to no more than a very few seconds; whence the distance of the nearest, by trigonometry, is found to be, at the least, some hundreds of times farther removed from us than Saturn. That their respective magnitudes are amazingly great is demonstrable from their being visible at such a vast distance; and that they shine by their own, and not a borrowed light, is manifest from their great lustre at such an immense distance from our luminary of day; for if you compare the faint light of Saturn with the brilliancy of Sirius, (which is a great number of times more distant from the sun than the former,) we shall be convinced that our sun is not the source of light to the latter. Their apparent diameters are not so great as was formerly thought, being found not to exceed a second of a degree; which may be easily proved from their almost instantaneous disappearance behind the disk of the moon at the time of an occultation, their whole body immersing in less than two seconds, whereas the moon employs that time in moving over 1' of a degree. Their re-appearance from behind the moon has also been observed to be equally quick. Now, to suppose a star, of not more than a second in its visible diameter, (yet by its radiancy appearing to the naked eye much larger,) to be illuminated by the sun, when removed at such an amazing distance from him, is the greatest absurdity. *Falling Stars*, in Meteorology, are fiery meteors, which dart through the sky in form of stars; being occasioned by a nitro-sulphureous matter, the common cause of all such meteors. Also the

pole-star. A mark. An asterisk used by Printers. In Heraldry, it is a charge frequently borne on the shield, and the honourable ordinaries, in figure of a star. It is also a badge of honour worn by the Knights of the Garter, Bath, and Thistle.

STAVE, *s.* a metrical portion. A staff.

STAVES, the plural of **STAFF**.

STAVESACRE, *s.* a plant, called also larkspur.

To **STAY**, *v. n.* [*staen*, Belg.] to continue in a place, or in the same state; to wait; to stop or stand still. Used with *on* or *upon*, to rest or confide in. Actively, to stop, to repress; to delay, to obstruct; to keep from departing. To prop, used with *on* or *up*; from *estayer*, Fr. **SYNON.** The common idea of *stay* and *remain* is a cessation of progression. Their difference consists in this; that to *stay* seems to have less duration than *remain*.

STAY, *s.* [*estaye*, Fr.] continuance in the same place; a stand or stop; a fixed state; a prop or support. Among Mariners, ropes which support the masts, and keep them from falling. Station; fixed anchorage, from *stade*, Sax. In the plural, bodice; a kind of stiff waistcoat, worn by women, and laced.

STAYED, *part. a.* fixed; settled; serious. See **STAYED**.

STAYLACE, *s.* a lace with which women fasten their bodice.

STAYMAKER, *s.* a maker of women's stays.

STEAD, *s.* [*sted*, Sax.] a place, room, or post, occupied by another. After *stand*, use; help, or service. Compounded with *bed*, the frame on which it stands. *Stead* or *sted*, in the names of places, comes from *sted*, or *styd*, Sax. a place; but if it be situated on a river, from *stada*, Isl. *stathe*, Sax. a shore, or station for ships.

To **STEAD**, *sted*, *v. a.* to help, assist, advantage, support. To fill the place of another. Obsolete.

STEADILY, *ad.* without tottering, shaking, or altering; without irregularity or variation.

STEADINESS, *s.* [*stedignysse*, Sax.] the quality of being easily moved, or disconcerted; consistent conduct; constancy, firmness.

STEADY, *a.* [*stedig*, Sax.] firm; constant; regular. Among Sailors, keeping the ship constant in her course.

STEAK, [*styck*, a piece, Isl. Sax. and Erse] a piece of meat to be fried or broiled; a collop.

To **STEAL**, *v. a.* [preter. *stole*, part. pass. *stolen*; *stelan*, Sax. *stelen*, Belg.] to take away what is another's privately; to gain or effect in a secret or imperceptible manner; to thief; to purloin. Neuterly, to withdraw secretly; to pass silently; to be guilty of taking what is another's, without his knowledge or notice; to practise theft.

STEALER, *s.* one who steals; a thief.

STEALTH, *s.* the act of taking what belongs to another without his knowledge or notice; theft; the thing stolen. *By stealth*, signifies clandestinely, or secretly, and is sometimes, like *steal*, used in a good sense.

STEAM, *s.* [*steme*, Sax.] the vapour arising from any boiling or hot liquor, or from any thing moist.

To **STEAM**, *v. n.* [*steman*, Sax.] to smoke or vapour, to send up vapours; to pass in vapours.

STEAM-ENGINE, *s.* an engine actuated by the alternate excitement and condensation of steam, and applied to various branches of labour.

STEAMINESS, *s.* emission of vapour.

STEAN, or **STEEN**, *s.* [*stana*, Sax.] a factitious vessel of clay or stone; a jar; an urn.

To STEEP, *v. a.* [*stippen*, Belg.] to soak long in liquor; to macerate; to dip; to imbue.

STEEPLE, *s.* [*stepel*, or *stypel*, Sax.] By *steeple*, *spire*, and *tower*, are meant a high building raised above the main edifice; but *steeple* is more general; *spire* and *tower* more particular. *Steeple* implies the turret of a church, be it in what form soever. By *spire* is understood a steeple rising taper to the top. By *tower* is implied a square steeple. *Spire* and *tower*, then, are certain kinds of *steeples*; but in most cases where there is a *spire*, there is also a *tower*, from which it rises; and both together constitute the *steeple*. *Steeple* is applied only to churches. *Tower* and *spire* are often made use of with respect to other large edifices.

STEEPNESS, *s.* abrupt declivity; great descent.

STEER, *s.* [*styre*, *steor*, Sax.] a young bullock.

To STEER, *v. a.* [*stieren*, Belg. *steoran*, or *styrán*, Sax.] to direct or guide in its passage. Neuterly, to direct a course at sea. To conduct himself.

STEERAGE, *s.* the act of guiding a vessel in its course; that which guides any thing in its course; regulation; management; the stern or hinder part of a ship.

STEERSMAN, or STEERSMATE, *s.* one that steers or guides a vessel in its course; a pilot; one who chiefly conducts the affairs of a state; a prime-minister.

STEGANOGRAPHIST, *s.* [from *στεγανός* and *γράφω*, Gr.] he who practises the art of secret writing.

STEGANOGRAPHY, *s.* [from *στεγανός* and *γράφω*, Gr.] the art of secret writing by characters or cyphers known only to persons that correspond with each other.

STELLIONATE, *s.* [*stellionat*, Fr. *stellionatus*, Lat.] in Law, a kind of crime which is committed by a deceitful selling a thing for otherwise than it really is; as if a man should sell that for his own estate which is the property of another.

STEM, *s.* [*stemma*, Lat.] a stalk or twig. A family; generation; pedigree; genealogy; race; progeny. The prow or fore-part of a ship, from *stammen*, Swed.

To STEM, *v. a.* [*stemma*, Isl.] to oppose a current; to check; to keep back.

STENCH, *s.* [from *stencan*, Sax.] a stink; a bad smell. Dryden has used it for a good smell: "Clouds of sav'ry stench involve the sky."

To STENCH, *v. a.* to scent with a bad smell. To stop; to hinder to flow: used corruptedly for *staunch*.

STENOGRAPHY, *s.* [from *στένος* and *γράφω*, Gr.] the art of writing in short hand; brachygraphy.

STENTORIAN, *a.* [from *stentor*, the Homeric herald, whose voice was as loud as that of fifty men] loudly speaking or sounding.

STENTOROPHONIC, *a.* [from *stentor*, and *φωνή*, a voice] loud; uncommonly loud.

To STEP, *v. n.* [*stappen*, Belg. *stappan*, Sax.] to move by a single change or motion of the foot; to advance suddenly; to trace backwards or forwards in the mind; to take a short walk: to walk gravely, slowly, or resolutely.

STEP, *s.* [*stap*, Belg. *stap*, Sax.] motion by moving one foot before another; a stair; a round of a ladder; the space passed by a single remove of the foot; progression; one remove in climbing; act of advancing; a small space; the print of a foot; gait, manner of walking; action, or instance of conduct. In the plural, passage or walk.

STEP, in Composition, signifies one related to another only by marriage; from *steop*, Sax. of *stepan*, Sax. to deprive, or make an orphan; hence we meet with the words *step-daughter*, or *step-son*, as well as *step-mother*; that is, a daughter or son that are orphans, or have lost their own mother; and a person who by marriage is the mother of another that was an orphan, or had lost his or her mother by death.

STEPHEN, earl of Bulloign, son to the earl of Blois, by Adela, the Conqueror's fourth daughter, though he had taken the oath of allegiance to Maud, daughter of Henry I. in case he died without male issue, found means to supplant her, and to get the crown placed upon his own head. As he lived with the king his uncle in England, his good qualities gained him his affection to a high degree; so that he took pleasure in heaping favours on him, never imagining that he would attempt to set himself up in prejudice of his daughter. However, after prince William's death, Stephen, by the assistance of his brother Henry, bishop of Winchester, began to take measures to secure the crown to himself, but so secretly, that the king his uncle suspected nothing of the design. Being in Normandy with king Henry in his last illness, as soon as the king was dead he came over himself to forward his project by his presence. The bishop of Winchester had already gained over the archbishop of Canterbury and the bishop of Salisbury; and these three prelates had influence enough over all the rest of the clergy to bring them to declare for Stephen. This did the business, and so much the easier, as Maud was out of the kingdom; and such of the barons as were not of Stephen's party, seeing the bent of the clergy, durst not oppose the design. And so Stephen was declared king, and crowned 24 days after Henry's death, being 31 years old, 1135: and the bishops and nobles did not stick to break the oath they had thrice taken to Maud. In order to gain this important point, Stephen had been obliged to promise great things to the clergy and people, and that he would grant them more privileges than ever they enjoyed under the Norman kings. And as he was not without his fears from Maud and Geoffrey her husband, to secure the affections of his subjects, he, soon after his coronation, convened a general assembly at Oxford, in which he signed a charter, acknowledging his being elected king by the clergy and people; confirming all the liberties, privileges, and immunities of the church, and consenting that all ecclesiastical causes and persons should be tried by the clergy; promising not to meddle in any manner with the temporalities of vacant bishoprics, or estates belonging to ecclesiastics; abolishing all the game laws enacted since the conquest, and all the forest laws; and reviving the ancient Saxon laws. He moreover abolished Danegelt, which had been taken away by Edward the Confessor, but restored by the Norman kings. The king, to humour the barons, and thinking thereby to be the better secured from any attempts of the empress Maud, or any foreign invaders, permitted them to fortify their castles, and to build others

upon their estates; so that in a little time there were above 1000 fortified castles in the kingdom. Stephen began his reign in peace; but the fair scene was soon changed to a most furious and bloody civil war, which overspread all parts of the nation, and continued almost through his whole reign. In 1137, the Welsh made an irruption on the frontiers, and carried off a considerable booty; and in a battle near Cardigan, the king's troops were beaten, and above 3000 slain on the spot. At the same time David, king of Scotland, invaded the northern counties of England, took Carlisle and Newcastle, and advanced as far as Durham. Stephen marched against him with a very numerous army; but this war was soon ended in a treaty of peace. It broke out again, indeed, more than once, the Scotch king taking advantage of the confusion in England, to renew his incursion; but being defeated in a great battle by Thurstan, archbishop of York, and king Stephen, after having reduced his rebellious barons, marching into the north to chastise that monarch for his late insult, David, not caring to run the hazard of another battle, sued for peace; and Stephen thought fit to agree to it. Robert, earl of Gloucester, natural brother to the empress, was at the head of the discontented barons who revolted, because the king had not rewarded them as they thought they deserved for placing him on the throne. The earl, thinking matters ripe, went over to acquaint the empress, and wrote an abusive letter to Stephen, upbraiding him for the breach of his oath to Maud, and for drawing him into the same crime. To this he added a manifesto, wherein he treated the king as an usurper, and declared war against him. Stephen, without returning him any answer, confiscated his estate. The empress's party gained ground exceedingly; the earl of Gloucester came over, and got possession of Bristol, and the revolt of the barons was like to have been general; so that Maud was invited over, whom they promised to own as their sovereign. But Stephen supported himself with such undaunted courage and resolution, that he crushed this dangerous insurrection for the present; and the earl of Gloucester had no other way to take but to go and press the empress to come over, in order to put new life into her party. The bishops, knowing how much the king was obliged to them for his crown, extended their power to such a degree, amassed such immense wealth, and became so excessively proud and haughty, that the king grew jealous of them, and resolved, but impolitically, considering his situation, to humble them, and took vigorous methods for that purpose, seizing the castles and treasures of several who had rendered themselves most obnoxious. This brought almost the whole clergy upon his back; and even his brother the bishop of Winchester turned against him, under pretence of standing up for the rights of the church. By this means a storm was raised, which with some intermission, continued for several years. For the clergy's faction became so strong, that most of the lay lords came over to them, and the people generally every where deserted the king, and declared for the empress; so that none stuck to him but only a few of the barons, his foreign favourites, and his army of Flemings, Bretons, &c. which served him faithfully, though they were but ill paid. At this favourable juncture the empress Maud, with her brother the earl of Gloucester, came over in the year 1139, from which time a cruel civil war ensued. King Stephen, in the midst of all, behaved with the greatest resolution, intrepidity, firmness, and constancy of mind, by which means he at last weathered the raging storm; but not without being first brought as low as it is possible to conceive a sovereign prince to be. For after several other sieges, in 1140, the earl of Gloucester came so suddenly upon him, as he was besieging Lincoln, that a battle could not be avoided.

Both sides fought with equal bravery for some time, but at last the royal army was totally routed and put to flight. The king was left almost alone, and on foot, in the field of battle, and defended himself with amazing valour even to the last extremity. His battle-axe was broke by the force of his blows, and afterwards his sword, scarce any thing but the hilt remaining in his hand; when he was knocked down on his knees with a stone, and a knight ran in, seized him by the helmet, and presented his sword to his throat, threatening to kill him if he would not surrender; which he still refused to do to any but the earl of Gloucester, who conducting him to the empress, she ordered him to be confined in Bristol castle, where, after he had been some time, he was even laid in irons. Never did any one bid fairer for the crown than the empress Maud did at this time. All England deserted the imprisoned king, except London and the county of Kent, where he had still some friends, by the means of the queen his spouse, Eustace his son, and William d'Ypres his favourite. The Earl of Anjou at the same time got Normandy to acknowledge Maud for their sovereign. Thus Stephen's affairs seemed every where desperate: and the more so, as the empress, by promising the bishop of Winchester, then legate, the disposal of all church preferments, had gained him over to her party, who a little before had turned against her, and espoused the interest of the king his brother. But now this treacherous prelate having called a council at Winchester, by his private intrigues with the clergy, got them to choose Maud for their queen, and proceeded so far as to excommunicate all who adhered to the king. The Londoners at last giving way to the times, thought it expedient to declare for the empress, and preparations were even making for her coronation. But her haughty, imperious, and disobliging temper, with which she treated persons of all ranks, soon undid all again. She refused the Londoners the only thing they petitioned for, and which her father had promised, viz. to revive the laws of king Edward; which impolitic conduct drew upon her the ill-will of the citizens. She even disobliged the bishop of Winchester, by haughtily denying his request to confirm to his nephew Eustace the titles of earl of Mortagne and Boulogne. The consequence was that he became her utter enemy, and as he had set her up, resolved now to use his utmost efforts to pull her down. He first by his emissaries got the Londoners to declare against her, and even brought them into a plot to seize her person, which she narrowly escaped, and leaving the city in a great fright, put herself at the head of her troops, attended by the earl of Gloucester, and marched to Winchester in order to seize the legate, but in vain. He slipped out at a gate on the other side of the town, and went and drew his friends together. The Kentish men having joined the Londoners, Stephen's queen, prince Eustace, and William d'Ypres, headed them, and marched with all expedition to Winchester, where the empress had scarce time to get into the castle. Here she was besieged, but found means to march out with her troops, which were closely pursued by the king's, whilst the rest of the army was advancing to surround them. In the pursuit, the earl of Gloucester, intent on saving the empress, was himself taken prisoner, and conducted to Rochester. This procured king Stephen his liberty; for Maud, who had a great affection for the earl her brother, and could not well do without him, was obliged to exchange him for the king. Soon after the legate called a council at Westminster, where he excommunicated all Maud's adherents, as before he had those of the king his brother. Thus Stephen regained his liberty, 1141. But the war between him and Maud continued for several years, during which the empress's affairs visibly declined: till

at last the brave earl of Gloucester being dead, she despairing of standing her ground much longer, about the year 1147 retired to Normandy, and left Stephen once more master of the whole kingdom. He then endeavoured to secure the crown after his death to his son Eustace, and even to get him crowned beforehand, but did not succeed in the attempt. After the departure of Maud, king Stephen was contriving how to repair the mischiefs the kingdom had suffered by so long a war. But he soon found a new rival in prince Henry, the eldest son of Maud, who was 16 years old, and of an enterprising genius. Having prepared matters, he landed in England with a considerable force, in 1152, and was immediately joined by several barons, who put into his hands 30 fortified castles. And now a second civil war, as furious as the first, was like to break out, and the two armies were just upon the point of engaging, when by the good offices of some of the nobility on each side, in a conference between the king and Henry on the opposite banks of the river Thames, near Wallingford, a truce was agreed upon; which being several times renewed, at last ended in a treaty of peace, (which was facilitated by prince Eustace's death) by which Stephen was to enjoy the crown during life, and after his death Henry was to succeed him as his lawful heir. Soon after, Stephen performed the ceremony of adopting the young prince. Thus peace was restored, to the universal joy of the nation, and Stephen again applied himself to repair the miseries the war had occasioned; but death put a stop to his generous designs, which took him out of the world eleven months after the treaty with Henry, viz. on Oct. 25, 1154, in the 50th year of his age, and 19th of his reign. He was buried in the abbey of Feversham, which he had founded, near queen Maud his wife, only daughter and heir to the earl of Boulogne, and Eustace his son, who both died 1153. Stephen was a prince of great courage, fortitude, and activity; and might have reigned with the approbation of his people, had he not been harassed by the efforts of a powerful competitor, which obliged him to take such measures for his safety as were inconsistent with the dictates of honour, which indeed his ambition prompted him to forego in his first endeavours to ascend the throne. His necessities afterwards compelled him to infringe the charter of privileges he granted at his accession; and he was instigated by his jealousy and resentment, to commit the most flagrant outrages against gratitude and sound policy. His vices as a king seem to have been the effects of the troubles in which he was involved; for, as a man, he was brave, open, and liberal; during the short calm that succeeded the tempests of his reign, he made a progress through the kingdom, published an edict to restrain all rapine and violence, and disbanded the foreign mercenaries who had preyed so long upon his people. But his character has been roughly handled, on account of the little regard he expressed for the clergy, and his usurpation of the throne from the immediate heir of blood.

STERCORA'CEOUS, *a.* [*stercorosus*, Lat.] belonging to dung; partaking of the nature of dung.

STERCORA'TION, *s.* [from *stercora*, Lat.] the act of dunging; the act of manuring with dung.

It is said to contain 22 cities, 95 towns, 338 castles, 15 convents, and 200,000 inhabitants. Though it is a mountainous country, yet there is a great deal of land fit for tillage, and the soil is so good that the inhabitants never are in want of corn. It contains mines of very good iron, whence the arms made here are in great esteem. The women differ greatly from the Austrians, and are very plain and downright. They have all swellings in their throats, called bronchocoeles. The men are also very simple, and are very zealous worshippers of the Virgin Mary. They delight to sit at home, in the chimney corner, never troubling their heads about foreign affairs. The chief town is Gratz.

STIRIOUS, *a.* [from *stiria*, Lat.] resembling icicles.

STIRLING, an ancient town of Scotland, the capital of Stirlingshire, seated on the S. side of the Frith of Forth, on a hill, which, rising from the E. terminates abruptly in a steep basaltic rock. On this rock is an ancient castle, which was often the residence of the kings of Scotland, but is now converted into barracks. The outside of this palace, is richly and curiously adorned with various grotesque figures. From the castle is a fine view of the windings of the Forth, which are so numerous, that the distance from Stirling to Alloa is above 20 miles by water, although only four by land. The church of Stirling is a magnificent Gothic structure, which serves for two separate places of worship. In this town and its neighbourhood are flourishing manufactures of carpets, as also of coarse shalloons and cottons; but that of tartans is on the decline. Stirling is commodiously seated, being a pass between the N. and S. parts of Scotland, but with such a difficult navigation of its river, that only small vessels can come up to the town. It is 30 miles N. W. of Edinburgh, inhabitants about 6000.

STIRLINGSHIRE, a county of Scotland, bounded on the N. and N. E. by Perthshire and Clackmannanshire, on

STOCKHOLM, the capital of Sweden, in a situation remarkable for its romantic scenery. It is very long and irregular, being built on seven small rocky islands, from one of which the city takes its name, (between the Baltic and the Maelar lake) besides which, it contains two peninsulas. Between these several parts of the city a communication is formed by means of bridges. A variety of contrasted and beautiful views are formed by numerous rocks of granite, rising boldly from the surface of the water, partly bare and craggy, and partly dotted with houses, or feathered with wood. The harbour is an inlet of the Baltic; the water, of a blackish colour, is of such depth that ships of the largest burden can approach

the quay. At the extremity of the harbour, several streets rise one above another in the form of an amphitheatre; and the palace, a magnificent building, crowns the summit. The arsenal contains many curiosities, among which are an immense number of standards, and other military trophies, taken from the Imperialists, Poles, Russians, and Danes. Except in the suburbs, where some houses are of wood, painted red, the buildings are mostly of stone, or brick, stuccoed white, and built on piles. A Royal Academy of Sciences was instituted here in 1741; here is also a Royal Academy of Painting and Sculpture. In Stockholm are manufactures of glass, china, woollen, silk, linen, &c. The inhabitants are estimated at 73,000. The court formerly resided at Upsal, but removed hither in the eighteenth century. It is 340 miles N. E. of Copenhagen, 625 N. STRUT, *s.* a gait or walk of affected grandeur.

STUART, *Charles*, (See **CHARLES I.**)—Charles I. was a prince of middling stature, robust, and well-proportioned. His hair was of a dark colour, his forehead high, his com-

plexion pale, his visage long, and his aspect melancholy. He excelled in riding, and other manly exercises; he inherited a good understanding from nature, and had cultivated it with great assiduity. His perception was clear and acute, his judgment solid and decisive; he possessed a refined taste for the liberal arts, and was a munificent patron to those who excelled in painting, sculpture, music, and architecture. In his private morals, he was altogether unblemished and exemplary. Charles, by his queen Henrietta, daughter of Henry IV. of France, had four sons and five daughters; namely, Charles James, who died in the cradle; Charles, Prince of Wales, by whom he was succeeded; James, Duke of York; Henry, Duke of Gloucester, who died after the Restoration; Mary, who espoused William of Nassau, Prince of Orange, by whom she was left a widow; Elizabeth, confined by the regicides in Carisbrook Castle, where she died of grief; Anne and Catharine, who died in their infancy; and Henrietta Maria, who was carried in her infancy by the Countess of Dalkeith into France, where she married Philip Duke of Anjou and Orleans, brother to Lewis XIV. During the peaceable period of this reign, the commerce of England increased considerably to the East Indies, Guinea, Spain, and Turkey. The colony of New England became populous; for great numbers of Puritans fled thither, in consequence of being severely treated by Laud and the high-church party. The Catholics afterwards, in order to avoid the same kind of persecution from the Puritans, resorted to America, and settled in the colony of Maryland.

STUART, Charles, (See CHARLES II.) Charles II. was in his person tall and swarthy, and his countenance marked with strong harsh lineaments. His penetration was deep, his judgment clear, his understanding extensive, his conversation lively and entertaining, and he possessed the talent of wit and ridicule. He was easy of access, polite, and affable; yet these good qualities were more than overbalanced by his weakness and defects. He was a scoffer at religion, and a libertine in morals; careless, indolent, profuse, abandoned to effeminate pleasure, incapable of any noble enterprise, a stranger to manly friendship and gratitude, deaf to the voice of honour, blind to the allurements of glory, and, in a word, wholly destitute of every active virtue. Being himself unprincipled, he believed mankind were false, perfidious, and interested: and therefore he practised dissimulation for his own convenience. He was strongly attached to the French manners, government, and monarch; and was dissatisfied with his own limited prerogative. The majority of his own subjects he despised or hated, as hypocrites, fanatics, and republicans, who had persecuted his father and himself, and sought the destruction of the monarchy. In these sentiments he could not be supposed to pursue the interest of the nation; on the contrary, he seemed to think that his own safety was incompatible with the honour and advantage of his people. Trade and manufactures, however, flourished more in this reign than at any other era of the English monarchy. Industry was crowned with success, and the people in general lived in ease and affluence. In the reign of Charles II. the arts and sciences were cultivated with good success, though they were very little encouraged by the sovereign. In this period flourished the immortal Newton, whose discoveries in nature will reflect eternal lustre on the nation that gave him birth; the learned Stillingfleet; the elegant, the rational Tillotson; besides many other excellent divines, such as Tension, Patrick, Lloyd, and Burnet, who distinguished himself by his history of the Reformation. The practice of medicine was greatly improved by the judicious Sydenham. The witty doggrelist, Butler, contributed more than any other person,

by his poem of Hudibras, to bring fanaticism into contempt. The king admired this production, yet left the author to die in obscurity. Dryden shone unrivalled in poetry; but was vitious and incorrect, from the depravity of the public taste, and the hurry in which he was obliged to write for subsistence. Otway's tragedies are celebrated above all others, for warmth and pathetic tenderness. He lived utterly neglected, and died of hunger. Even the courtiers of this reign were inspired with literary ambition. The duke of Buckingham acquired some reputation by writing the Rehearsal, to ridicule the false taste and absurdities of the dramatic writers. Rochester rendered himself famous for poignancy of satire and impurity. Whycherly displayed the genius of true comedy, though rude and licentious. The earls of Dorset, Roscommon, and Mulgrave, wrote with ease, spirit, and negligence. Halifax possessed refined talents. The writings of Sir Wm. Temple are entertaining and instructive.

STUART, Anne, (See ANNE.) Anne Stuart, Queen of Great Britain, was in her person of the middle size, well proportioned. Her hair was of a dark brown colour, her complexion ruddy, her features were regular, her countenance was rather round than oval, and her aspect more comely than majestic. Her voice was clear and melodious, and her presence engaging. Her capacity was naturally good, but not much cultivated by learning; nor did she exhibit any marks of extraordinary genius, or personal ambition. She was a pattern of conjugal affection and fidelity, a tender mother, a warm friend, an indulgent mistress, a munificent patron, a mild and merciful princess, during whose reign no subject's blood was shed for treason. She was zealously attached to the church of England, from conviction rather than from prepossession, unaffectedly pious, just, charitable, and compassionate. She felt a mother's fondness for her people, by whom she was universally beloved with a warmth of affection, which even the prejudice of party could not abate. In a word, if she were not the greatest, she was certainly one of the best and most unblemished sovereigns that ever sat upon the throne of England.

SUMATRA, a large island of the Indian Ocean, having Malacca on the N. and N. E. Borneo on the E. and Java on the S. E. It is divided into almost equal parts by the equator, extending near 6 degrees to the N. W. and about the same space to the S. W. of that line. It is 1000 miles long, and 150 broad. The Europeans trade with the inhabitants chiefly for pepper. The English have two factories on this island, Bencoolen and Fort-Marlborough, on the W. coast; from which the East-India company import more pepper than from any other country in India. Hence also are brought great quantities of the best walking-canes. The natives are of a yellow complexion, and below the middle stature; but well made: the females are for the most part ugly. The coasts are in the possession of Mahomedan princes, of whom the king of Acheen, at the N. end of the island, is the most considerable. The inland country is subject to Pagan princes, who have but little correspondence with foreigners.

SUMPTUOUSNESS, *s.* expensiveness; costliness.

SUN, *s.* [sunno, Goth. sunna, or sunne, Sax. son, Belg.] in the Newtonian Astronomy, is that bright luminary in the centre of our system which is the source of light and heat to all the planets, satellites, and comets, belonging thereto. His magnitude is immensely great, being (according to the best computation) not less than 883,000 miles in diameter; and, consequently, more than a million of times larger than our globe; a bulk so prodigious, that if all the planets and satellites of our system were united in one, it would scarcely make a globe of the 400th part of his solid contents. Though he appears to the naked eye so extremely bright and splendid, yet, when viewed through a telescope, he is seen with dark spots on his surface, which are changeable, and often vary their figure; and sometimes they are so large that they may be seen with the naked eye, with the interposition only of a smoked glass. They move from west to east, from which his rotation round his axis has been discovered to be performed in 25d. 14h. His apparent diameter varies from 32' 39" to 31' 33" according as the earth is in perihelion or aphelion at the time. There is great variety in the magnitude of the solar spots; the difference is chiefly in superficial extent of length and breadth; their depth or thickness is very small; some have been so large, as by computation to be capable of covering the continents of Asia and Africa; nay the whole surface of the earth, or even five times its surface. The number of spots on the sun is very uncertain; sometimes there are a great many, sometimes very few, and sometimes none at all. Scheiner made observations on the sun from 1611 to 1629; and says he never found his disk free from spots, excepting a few days in December, 1624. At other times he frequently saw 20, 30, and in 1625 he was able to count 40 spots on the sun at a time. In an interval afterwards of 20 years, from 1650 to 1670, scarce any spots were to be seen; and after that time some years have furnished a great number of spots, and others none at all. From these phenomena it is evident that the spots are not endowed with any permanency. Hevelius observed one that arose and vanished in 16 or 17 hours; nor has any been observed to continue longer than 70 days, which was the duration of one in 1676. Those spots that are formed gradually, are gradually dissolved; while those that arise suddenly, are for the most part suddenly dissolved. When a spot disappears, that part where it was, generally becomes brighter than the rest of the sun, and continues so for several days; on the other hand those bright parts (called *faculae*, as the others are called *maculae*) sometimes turn to spots. A *sunny place*; a place eminently warmed by the sun; any thing eminently splendid. *Under the sun*, a proverbial expression for in the world.

To **SUN**, *v. a.* to expose to the action of the sun; to warm or dry in the sun; to insolate.

SURREY, a county of England, bounded on the N. by Middlesex and a point of Buckinghamshire, on the E. by Kent, on the S. by Sussex, and on the W. by Hampshire and Berks. Its greatest length is about 37 miles, and its breadth 27. It is divided into 14 hundreds, which contain 11 market towns, (including Southwark,) 140 parishes, 650 vil-

lages and hamlets, and sends 14 members to parliament. The population was 398,658, in 1821. It is a healthy pleasant county, but from the difference of the soil in the extreme parts from that in the middle, it has been compared to a coarse cloth with a fine border: for the edge of the county on all sides has a rich soil, extremely fruitful in corn and grass, particularly in Holmesdale, and on the N. and W. parts toward the Thames; but in the interior are wide tracts of sandy ground and barren heath, and in some places long ridges of hills, with warrens of rabbits, and parks for deer. It produces corn, box-wood, walnuts, hops, and fuller's earth; and near Dorking grows a wild black cherry, of which a very pleasant wine is made, little inferior to French claret. The manufactures in starch, tobacco, gunpowder, paper, vinegar, calico printing, &c. are considerable. The principal rivers, besides the Thames, (which is the boundary of this county on the N.) are the Mole, Wey, Wandle, and Loddon. The Lent assizes are held at Kingston, and the summer assizes at Guildford and Croydon alternately.

SWE'DEN, a kingdom in the north part of Europe; bounded on the N. by Norwegian Lapland; on the E. by Russia and the Gulf of Bothnia; on the S. by the Baltic sea; and on the W. by Norway, the Sound, and the Categat; being about 1000 miles in length, from N. to S. and 350 in breadth from E. to W. It is divided into Sweden Proper, Gothland, Nordland, and Lapland. It was anciently called Scandinavia, or at least it is part of the country of that name. The climate is various: the longest day being from 18 hours 36 minutes, to several weeks' duration. At Stockholm and its surrounding province, the spring and autumn are scarcely to be perceived, for the winter continues 9 months, and the summer during the remaining three. In winter the cold is excessive, and in summer the heat is almost insupportable, the air being serene all that time. Notwithstanding this, many of the Swedes live to a great age. Those places that are fit for cultivation have hardly a foot of good earth; below it is all gravel; yet the rocks are quite covered with flowers in the summer time, and the gardens have plenty of fruits. The trees are early in blossom, because the soil is fat and sulphureous, which contributes greatly to the vegetation of plants; though the fruit has not so good a taste as in the more southern countries. The animals are horses, cows, hogs, goats, and sheep; bears, wolves, foxes, wild cats, elks, and rein-deer. Here are several sorts of fowls, particularly partridges, woodcocks, and falcons, in great plenty. The silver mines are 200 yards in depth; and though rich, the people who work them have scarce wherewith to subsist upon when the king's duties are paid. Here are also rich mines of iron and copper, and vast forests of timber-trees. The merchandise which the Swedes supply foreigners with, are boards, gunpowder, leather, iron, copper, tallow, skins, pitch, resin, masts, and all sorts of wooden utensils: and they take in return, salt, brandy, wine, linen cloth, stuffs, tobacco, sugar, spice, and paper. The inhabitants are of a robust constitution, and able to sustain the hardest labour. They are praised for their hospitality, honesty, cleanliness, and industry; and have several public schools and colleges, where arts and sciences are taught. Their houses are generally of wood, with very little art in their construction; and the roofs in many places are covered with turf, on which the goats often feed. There is no country in the world where the women do so much work; for they till the ground, thresh the corn, and row the boats on the sea. Sweden was formerly an elective monarchy, and afterwards the most limited one in Europe, till Aug. 10, 1772, when, by a very extraordinary revolution, Gustavus III. gained the most essential royal prerogatives, yet without being an absolute monarch. This prince was assassinated March 16, 1792, leaving his son Gustavus Adolphus, a minor, his heir, and his brother, the duke of Sudermania, regent of the kingdom. Gustavus attained his majority in 1796, but in 1809, he was deposed, and his uncle Charles, duke of Sudermania, was raised to the throne. This aged prince having no issue, the diet in 1810, elected prince Augustenberg for his successor; but he died or was assassinated in 1811, when they elected the French general Bernadotte, to be crown prince; who succeeded to the throne in 1818, by the name of Charles John. Finland, which constituted a province of Sweden, was invaded by the Russians in 1808, and the Swedes, after various battles were obliged to give it up, and to conclude a treaty of cession in the following year. As a compensation for this loss, they were permitted by the allied sovereigns, in 1814, to wrest Norway from the king of Den-

mark, and now hold it as an integral state under a stadtholder. The population of Sweden, in 1815, was 2,464,941. The established religion is Lutheran, and no other is tolerated: they have one archbishop, and 11 bishops. Stockholm, the capital, is in lat. 59. 21. N. lon. 18. 4. E.

To **SWEEP**, *v. a.* [preterit and part. pass. *swept*; *swapan*, Sax.] to clean or drive away with a broom or besom; to trail along the ground; to carry with pomp; to pass over with quickness; to rub over; to strike with a long stroke. Neuterly, to pass with violence or swiftness; to pass with pomp or a flowing train; to pass with an equal motion; to move with a long stroke or reach.

SWITZERLAND, or *Swisserland*, a large country of Europe; bounded on the N. by Suabia; on the E. by the Tyrol; on the S. by Savoy and Lombardy; and on the W. by France. It is about 220 miles in length, and 130 in breadth, and separated from the adjacent countries by high mountains, most of which are covered with perpetual snow. There are a great number of lakes and rivers, and some very fertile plains, which plentifully afford the necessaries of life. It is divided into 22 cantons, namely, Fribourg, Lucerne, Schwitz, Soleure, Tesino, Underwalden, Uri, Valais, and Zug, which are Catholic; Argovia, Basle, Berne, Geneva, Neufchatel, Schaffhausen, Vaud, and Zurich, which are Protestant; and Appenzel, Glaris, Grisons, St. Gall, and Thurgau, which are mixed. About the year 1300, the emperor Albert, to whom Switzerland was subject, appointed an Austrian governor, one Griesler, who, in the wantonness of tyranny, ordered the natives to reverence his hat set upon a pole; which being with a proper spirit refused by one William

Tell, a noted marksman with a crossbow, he was sentenced to be hanged, if he did not, at a certain distance, shoot an apple from the head of his own son. Tell hit the apple with one of two short arrows, or bolts, which he had provided; and being asked what the other was intended for, he answered, "For the tyrant's heart, if I had killed my son." He was ordered to prison, but escaped, and, with some others, brought about a revolution which produced the several independent states of the Helvetic nation. The mountains of Switzerland, commonly called the Alps, are a long chain of mountains, which begin at the Mediterranean Sea, and extend to the Adriatic; and if it were possible for a man to travel from one to the other, his journey would be about 500 miles. The principal lakes are those of Constance, Geneva, Lucerne, Zurich, and Neufchatel. The most considerable rivers are the Rhine, the Rhône, the Aar, the Reuss, and the Inn. The principal riches of Switzerland consist of excellent pastures, in which they breed and fatten their cattle. The inhabitants are strong robust men, for which reason they have been generally chosen by several nations for the military service. The women are tolerably handsome, have many good qualities, and are very industrious. The peasants retain their old manner of dress, and are content to live upon milk, butter, and cheese. The manufactures of Switzerland are considerable in linen, silk, cotton, and woollen, leather, hats, gloves, paper, pottery, clocks, watches, hardware, toys, &c. besides which they export butter, cheese, cattle, sheep, horses, and wine. The imports are principally grain, hemp, flax, wine, salt, and some manufactures. The inhabitants are estimated at 2,000,000.

T.

T Is the nineteenth letter and fifteenth consonant of our alphabet, the sound whereof is formed by a strong expulsion of the breath through the mouth, upon a sudden drawing back of the tongue from the fore part of the palate, with the lips at the same time open. Its proper sound is that in *tin*, *tell*, *rot*, *put*. When it comes before *i*, followed by a vowel, it is sounded like *s*, as in *nation*, *notion*, &c. except when preceded by *s*, as in *Christian*, *question*, &c. When *h* comes after it, it gives a twofold sound; one clear and acute, as in *thin*, *thief*, &c. the other more obtuse and obscure, as in *then*, *those*, *there*, &c. Among the Ancients, T, as a numeral, stood for 160; and with a dash over it, thus, $\overline{T}$, for 160,000. In Music, T stands for *tutti*, all together.

TALC, (*a* broad) *s.* in Natural History, a class of fossil bodies, composed of broad, flat, and smooth laminae, or plates, laid evenly and regularly on each other; easily fissile, according to the size of these plates, but not at all so in any other direction; flexible and elastic; bright, shining, and transparent; not giving fire with steel, not fermenting with acid menstria, and sustaining the force of a violent fire without calcining.

TALE, *s.* [*tale*, Sax.] a story, generally applied to a short narrative of some trifling and fabulous circumstance; a narrative delivered by words. A number reckoned; a reckoning, from *talan*, to count, Sax. An information or disclosure of any thing secret. *SYNON.* *Tale*, *novel*, *romance*, *story*, each imply a small history, or an entertaining relation of adventures. The first three are supposed to be fabulous, and made public; whereas the last may be either true or feigned, and told either in print, or by word of mouth; but as they carry ideas peculiar to themselves, it is my business to point them out. By the word *tale*, is meant a short, but dressed up narrative of some single adventure; *novel*, signifies an amusing history, made up of many adventures, and carried on through one or more volumes. By *romance* is understood a collection of wild adventures, in love and war. *Tales* ought to be well related; *novels*, well invented; *romances*, well carried on; *stories*, well told.

TARTARY, a country of Asia, which, taken in its utmost limits, reaches from the Eastern Ocean to the Caspian Sea, and from Corea, China, Hindoostan, and Persia, to Russia and Siberia. It is generally considered under three grand divisions; namely, Eastern, Western, and Independent Tartary. The different tribes which inhabit Eastern Tartary were formerly called Mongul Tartars, a warlike nation, who, on one hand, conquered Hindoostan, under Jenghis Khan, and on the other, subdued China in the 13th century, and reigned there for 100 years, till they were expelled in the year 1368. Chinese Tartary (which is separated from China by a great wall about 750 miles in extent) is divided into two parts, Eastern and Western. The greatest part of this country either belongs to the emperor of China, is tributary to him, or is under his protection. Independent Tartary includes all the country between Chinese Tartary and the Caspian Sea, and contains Turkestan, Great and Little Bukharia, Turcomania, Charasm, Tibet, and some countries inhabited by the Usbeks and Kalmucks. Western Tartary includes the remainder; most or all of which has been conquered by the Russians. In general, the Tartars are a robust people, have a good constitution, and are capable of undergoing hardships. They have broad faces, short chins, large whiskers, and noses even with their faces. They are dexterous in handling their sabres, and shooting with bows and arrows. The men have no other business than that of going to war,

and the women take care of domestic affairs. They are pagans; and they have a pontiff called Dali Lama.

TERRA, or **The EARTH**, *s.* [Lat.] in the Copernican System, is the third planet in order from the Sun. It is removed at the immense distance of about 95 millions of miles from that luminary, and revolves round him in 365d. 5h. 48m. 45 $\frac{1}{2}$ s. which is her tropical period; but her sidereal and anomalistic revolutions are, 365d. 6h. 9m. 11 $\frac{1}{2}$ s. and 365d. 6h. 15m. 20 $\frac{1}{2}$ s. respectively. Her diameter is about 7964 miles, and circumference 25,020; but, if seen from the Sun, she would appear under an angle of only 17", as is sufficiently manifest from the two transits of Venus in 1761, and 1769. She turns round her axis in 23h. 56m. 4s. but the natural day, or that caused by the sun, is 24 hours at a mean rate. The place of her aphelion, anno 1800, was in 9° 32' 39" of Capricorn, having a progressive motion of about 1° 49' 10" in 100 years. She has no nodes, her annual path, called the Ecliptic, being the standard by which the deviation of the other planets therefrom are measured. The eccentricity of her orbit is 168 out of 10,000 of those parts into which her distance from the Sun is supposed to be divided; and the equation of her orbit 1° 55' 52". She has also a satellite or moon revolving round her; for particulars of which, see **MOON**.—That the earth is not at rest in the centre of the universe, as many have imagined, having all the celestial bodies moving round her every day, or thereabouts, may be proved from their vast distance, and also consequent superior magnitude. (See **STAR**.) The great distance of the Sun from the Earth is so evident, as hardly to need any demonstration; for it is mathematically certain, from the two transits already mentioned, that the parallax of the Sun does not much (if at all) exceed 8 $\frac{1}{10}$ ". Nor can the determination of so small an angle be subject to any material error from the method by which it is ascertained; for it necessarily follows from the duration of the transit of 1769 being observed to be 23m. 10s. shorter at Otaheite than it was at Wardhus. Now it is not analogous to any thing we know in nature, that a body so much larger than the Earth, and at such a vast distance, as the sun necessarily must be from the smallness of his parallax, should revolve round the Earth in 24 hours; which must be the case, if he moves round her at all, for his motion can only be either apparent or real. But without admitting the Earth's annual motion, the different phenomena of the celestial bodies cannot be accounted for in any credible manner; for how much more reasonable is it to allow that the stationary and retrograde appearances of the planets are only caused by the Earth's annual motion, (especially when, allowing such a motion, they can be mathematically demonstrated to move round the Sun in orbits nearly circular,) than to suppose that the Sun, accompanied with the planets as satellites moving round him, and these planets again with their respective satellites moving round their primaries in stated periods, should all be carried round the Earth in the course of about a day! That the Earth turns round her axis is consequent upon the admission of her annual motion; but we will offer an argument in its favour drawn from the daily phenomena of the fixed stars. It is known that they constantly keep the same relative positions with respect to each other, which is a presumptive argument in favour of their being fixed bodies. They moreover all appear to make a complete circuit round the north and south poles of the heavens every 23h. 56m. 4s. which is precisely the time which the Earth takes in moving round

her axis, if she has any such motion at all. But what adds the last degree of certainty to the above arguments is, that the north and south poles of the Earth are exactly directed to the north and south poles of the heavens, the equator of the Earth to the equator of the heavens, the circles of latitude and longitude on the Earth to their corresponding ones in the heavens, &c. &c. for a proof of which take the following observation of Astronomers, that the number of degrees and minutes a fixed star is from either pole of the heavens, so many degrees and minutes precisely must be the situation of that place from either pole of the terraqueous globe through the zenith of which the said star will every day pass. Therefore the Earth has an annual motion, and likewise revolves round her axis. *Q. E. D.* **Terra Firma**, in Geography, is sometimes used for a continent, in contradistinction to islands. **Terra mortua**, or **damnata**, among Chemists, is that earthy part, or thick drossy matter, that remains after the distillation of a mineral body.

TO'ULON, a celebrated city and seaport of France, and the chief town of the department of Var. Before the revolution, it was the see of a bishop, and besides the cathedral, and other parishes, contained 9 convents, a seminary, and a college. It is divided into the Old Quarter and the New Quarter. The harbour, respecting these two quarters, is distinguished likewise by the name of the Old Port, or the Merchant Port, and the New Port. In the front of the latter is a rope-house, built wholly of free stone, 620 feet in length, with three arched walks, in which as many parties of rope-makers may work at the same time; and above is a place for the preparation of hemp. The long sail-room, the dock-yards, the basins, cannon foundry, armoury, working-houses for blacksmiths, joiners, carpenters, locksmiths, carvers, &c. are all very extensive and well contrived.—The inhabitants

were induced to surrender this city in trust to the English, in September, 1793; but the consequences were, that their new friends, in about three months, were driven out of the place with such precipitation, that of 31 ships of the line, found at Toulon, 13 were left behind, 9 only being burned there, and 1 at Leghorn; and 4 Lord Hood had previously sent to Brest and Rochfort with republican seamen, whom he was afraid to trust. Napoleon Bonaparte, late emperor of the French, first distinguished himself in this siege, at which he served as officer of artillery. The inhabitants are computed at 80,000. Toulon is situated on a bay of the Mediterranean, 43 miles S. E. of Aix, and 500 S. E. of Paris. Lat. 43. 7. N. lon. 5. 55. E.

It is surrounded on all parts by high mountains, which, however, are not barren, and the air is healthier than that of Hungary. The inhabitants have a sufficiency of corn and wine, and there are rich mines of gold, silver, lead, copper, quicksilver, and alum. It has undergone various revolutions, but, since 1722, has been hereditary to the house of Austria. The inhabitants are a mixture of Romanists, Lutherans, Calvinists, Socinians, Armenians, Greeks, and Mohammedans; to which may be added Jews and Cingars, who live in tents, and lead a vagabond life like Gypsies. Its form is nearly oval; about 400 miles in circumference. The principality is governed in the name of the prince and nobility, by the diet, which meets at Hermanstadt, the capital, by summons from the prince; the government being wholly different from that of Hungary.

TRANSIT, *s.* [*transitus*, Lat.] in Astronomy, applied to an inferior planet, when in its inferior conjunction it passes over the sun's disk like a black round spot. Also applied to the moon when she makes a near appulse to any planet or fixed star, but not so as to hide it from our view, it then being termed an occultation.

TRANSMITTER, *s.* one that transmits.

TRANSMUTABLE, *a.* [from *trans* and *muto*, Lat.] capable of being changed from one nature or substance to another.

TRANSMUTATION, *s.* [*transmutatio*, Lat.] the act of changing one nature or substance to another. Nature, Sir Isaac Newton observes, seems delighted with transmutation. Gross bodies and light, he suspects, may be mutually transmuted into each other; and adds, that all bodies receive their active force from the particles of light which enter their composition. Earth, by heat, becomes fire; and, by cold, is converted into earth again; dense bodies, by fermentation, are raised into various kinds of air; and that air, by fermentation, also reverts into gross bodies. All bodies, beasts, fishes, insects, plants, &c. with all their various parts, grow and increase out of water, and aqueous and saline tinctures, and by putrefaction all of them return into water, or any aqueous liquor, again. Farther, water exposed a while to the open air, puts on a tincture, which in process of time has a sediment and a spirit, and, before putrefaction, yields nourishment both for animals and vegetables. In Alchemy, it denotes the art of changing or exalting imperfect metals into gold or silver.

To TRANSMUTE, *v. n.* [*transmuto*, Lat.] to change one substance or matter into another.

U & V.

U Is the twentieth letter of the English alphabet. The sound is short in *burst*, *curst*, *run*, *sun*, *cub*. In some words, it is rather acute than long; as in *brute*, *flute*, *acute*, &c. It is generally long in polysyllables; as in *union*, *usage*, *secure*, *curious*, &c. but in some words it is obscure; as in *nature*, *venture*.

V, the consonant, has its sound uniform, and is never acute. It is placed before all the vowels; as in *vary*, *venal*, *voice*, *vow*, *vulture*. Though the letters *u* and *v* had always two sounds, they had only the form of *v* till the beginning of the fourth century, when the other form was introduced, it being inconvenient to express two sounds by the same letter. The letters *f* and *v* seem to have a similar sound, but are widely different, as may be observed in the words *knife* and *knives*, *life* and *lives*, *belief* and *believe*, &c. In numerals, *V* stands for five, and with a dash thus *V̄*, for 5000.

VA'CCARY, *s.* [from *vacca*, Lat.] a cow-house; a cow-pasture.

VACCINE INOCULATION, a modern discovery in Medicine, whereby the matter of a pustular eruption on the udder and teats of a cow, is found to produce a regular disease in the human frame, which renders it unsusceptible of the small-pox. It was long known to those employed in dairies, but was first brought into public notice by Doctor Jenner, of Berkeley, Gloucestershire, in 1798. The following comparative view of the natural small-pox, the inoculated small-pox, and the inoculated cow-pox, has been published by the Royal Jennerian Institution, in London.—**NATURAL SMALL-POX**, a contagious disease; for the most part violent, loathsome, and dangerous; of which it is computed that one in twelve of the human race perishes. In London 3000 annually; in

the United Kingdom 40,000!—INOCULATED SMALL-POX, also contagious; for the most part mild, but sometimes violent and loathsome; of which one in 300 is said to die. In London, about one in 100. The inoculation of the small-pox having been but partially adopted, has been the means of spreading the infection, and thus increased the general mortality.—INOCULATED COW-POX, *not contagious*; and, when properly conducted, uniformly mild, inoffensive, seldom painful, never fatal, and an infallible preventive of the small-pox; besides which, there is no medicine required, no consequent deformity or disfiguration, and no supervenient disease. The accuracy of this report is much controverted, for in some cases the vaccine matter has left diseases more loathsome than that which it professes to supersede.

VENOMOUS, *a.* [from *venenum*, Lat.] full of poison; poisonous.

VENENE, VENENOSE, *a.* [*veneneux*, Fr. from *venenum*, Lat.] poisonous; venomous.

VENENIFEROUS, *a.* [*venenifer*, Lat.] bearing poison.

VENERABLE, *a.* [*vénérable*, Fr. *venerabilis*, Lat.] to be regarded with awe or reverence.

VENERABLY, *ad.* in a manner that excites reverence.

To VENERATE, *v. a.* [*vénérer*, Fr. *veneror*, Lat.] to regard with awe or reverence.

VENERATION, *s.* [*vénération*, Fr. *veneratio*, Lat.] great respect; reverence.

VENEREAL, *a.* [*venereus*, Lat.] relating to love. Consisting of copper, called *venus* by Chemists.

VENEREOUS, *a.* [*venereus*, Lat.] libidinous; lustful.

VENERY, *s.* [*venerie*, Fr.] hunting; lasciviousness.

VENESECTIO, *s.* [*venæ* and *sectio*, Lat.] the act of letting blood; phlebotomy.

To VENGE, *v. a.* [*venger*, Fr.] to punish; to avenge. Seldom used.

VENGEANCE, *s.* [*vengeance*, Fr.] punishment, or penal retribution; avengement. To do with a vengeance, is to do with vehemence.

VENGEFUL, *a.* vindictive; retributive.

VENIABLE, or VENIAL, *a.* [from *venia*, Lat.] pardonable; permitted, or allowed; excusable.

VE'NICE, a territory of Italy, (and once a celebrated republic,) which comprehended the Dogado, Paduano, Vicentino, Veronese, Bresciano, Bergamo, Cremasco, Polesino di Rovigo, Trevisano, Feltrino, Bellunese, Codorino, and part of Friuli and Istria. The government, before its subversion by the French, was aristocratical, none having any share in it but the nobles. The doge, the chief magistrate, was elected by a majority of votes: he held the dignity for life; and his office was to marry the Adriatic sea in the name of the republic, to preside in all assemblies of the state, to have an eye over all the members of the magistracy, and to nominate to all the benefices annexed to the church of St. Mark; but in other respects his power was very limited. There were also five councils of state. This constitution

does not, however, at present exist. In May, 1797, a tumult having happened, in which some Frenchmen were killed, the city was seized, and a provisional democratic government instituted. But by the treaty of Campo Formio, in the following October, the city and territory of Venice lying to the north and west of the river Adige, were ceded, as a duchy, to Austria, in equivalence for the dominions that house had lost in the Netherlands; and the remainder of the territory was annexed to the Cisalpine republic. War having again broke out between France and Austria, the treaty of Presburg restored the duchy; and the whole of the Venetian territory was included in the new kingdom of Italy. On the downfall of Napoleon, and the general treaty of peace signed by the allied powers at Vienna, in 1815, the Venetian territories were added to the dominions of the house of Austria, under whose sovereignty they now remain.—The Venetians are lively and ingenious, extravagantly fond of amusements, with an uncommon relish for humour. They are in general tall, well made, and of a ruddy brown colour, with dark eyes. The women have fine countenances, with expressive features, and a skin of a rich carnation. The common people are remarkably sober, obliging to strangers, and gentle in their intercourse with each other.

VENICE, the capital of the above territory, is one of the most considerable places in the world. It is the see of a patriarch, and the seat of a university. According to the historians, Venice stands on 72 small islands in the Gulf of Venice. As there is no passing through this city in carriages, the inhabitants make use of a kind of boats called gondolas. There are nearly 500 bridges over the canals, the most famous of which is that called the Rialto. It is built of white marble, and has but one arch, in which its principal beauty consists, and is 90 feet from one extremity to the other. There are 150 palaces, the finest of which is that of the Doge, fronting St. Mark's Place. The cathedral church is that of St. Mark, in which they pretend to keep the body of St. Mark the Evangelist. There is also a library, in which are a number of Greek manuscripts, but none of them above 500 years old. Here are about 180,000 inhabitants. Venice is included in the province called the Dogado, and is 125 miles N. N. E. of Florence, 140 E. of Milan, and 212 N. of Rome. Lat. 45. 27. N. lon. 12. 8. E.

VENISON, *s.* [*venaison*, Fr.] the flesh of deer; game, or beasts of chase.

To **VENOM**, *v. n.* to infect with poison; to poison.

VENOM, *s.* [*venin*, Fr.] poison.

VENOMOUS, *a.* poisonous; mischievous; malignant.

VENOMOUSLY, *ad.* poisonously; malignantly.

VENOMOUSNESS, *s.* poisonousness; malignity.

VENOUS, *a.* [*venosus*, Lat.] full of veins.

VENT, *s.* [*fente*, Fr.] a small aperture or hole, by which any vapour transpires; passage from secrecy to public notice; passage; discharge. Sale, from *vente*, Fr.

To **VENT**, *v. a.* [*venter*, Fr.] to let out at a small hole or aperture; to give way to; or free from restraint; to utter; to publish; to sell; to carry to sale.

VENTER, *s.* [Lat.] in Anatomy, any cavity of the body, but particularly the abdomen. In Law, a womb, or mother.

VENTIDUCT, *s.* [*ventus* and *ductus*, Lat.] a passage for the wind.

To **VENTILATE**, *v. a.* [*ventilo*, Lat.] to fan with the wind; winnow; to examine or discuss any controverted point.

VENTILATION, *s.* [*ventilatio*, Lat.] the act of fanning, or gathering wind; the act of winnowing corn; refrigeration.

VENTILATOR, *s.* [Lat.] an instrument invented by the Rev. Dr. Hale, to extract foul, and to supply fresh air.

VENTOSITY, *s.* [from *ventosus*, Lat.] windiness.

VENTRICLE, *s.* [*ventricule*, Fr. *ventriculus*, Lat.] the stomach; any small cavity, particularly those of the heart.

VENTRILOQUIST, *s.* [from *venter*, and *loquor*, Lat.] one who speaks in such a manner that the sound seems to issue from his belly.

VENTURE, *s.* [*aventure*, Fr.] hazard; an undertaking of chance and danger; hap; chance; a stake. *At a venture*, is at hazard; without consideration or premeditation.

To **VENTURE**, *v. n.* to dare; to run a hazard. Used with *at*, *on*, or *upon*, to engage in an attempt without any prospect or certainty of security. Actively, to expose to hazard; to put or send on a venture.

VENTURER, *s.* one who ventures.

VENTURESOME, *a.* bold; daring.

VENTUROUS, *a.* fearless; daring; bold; apt to run hazards.

VENUS, *s.* [Lat.] in the Copernican System, is one of the inferior planets, and the second in order from the sun. To the naked eye she is the most beautiful and splendid of all the celestial bodies; being sometimes so bright as to cast a faint shadow of an object, and not uncommonly seen in the day-time. She moves round the sun in an orbit very nearly circular, the diameter of which is about 136 millions of miles, in 224d. 16h. 41m. 32 $\frac{1}{2}$ s. called her tropical revolution; but her sidereal, anomalistic, and synodic periods, are, 224d. 16h. 49m. 12 $\frac{7}{10}$ s.; 224d. 17h. 4m. 28 $\frac{1}{2}$ s.; and 583d. 22h. 7m. 6s. respectively. Her magnitude is nearly equal to the earth's. She turns round her axis, according to Mr. Schroeter, in about 23h. 21m. her year containing 230 $\frac{1}{4}$ of such days. The inclination of her orbit to the ecliptic, or her greatest heliocentric latitude, is 3° 23' 20"; but her greatest possible geocentric latitude, on account of her nearness to the earth, amounts to 9 $\frac{1}{4}$ °, being greatest of all in those inferior conjunctions that happen when the planet is 90° from her nodes, the earth being at the same time in her perihelion. The place of her descending node at the time of her transit over the sun's disk in 1761, was found to be in 14° 31' 52" of Gemini; and at the transit of 1769, 14° 35' 36" of the same sign; from which it appears, that her nodes have an annual motion of about 28"; but M. de la Lande, from probably more accurate elements, has fixed it at 31". The place of her aphelion, anno 1750, was in 8° 13' of Aquarius, having a progressive motion of about 4° 10' in 100 years. The eccentricity of her orbit is 51 out of 10,000 of those parts into which the earth's distance from the sun is supposed to be divided, and the equation of her orbit 48' 30". When viewed through a telescope, she is rarely seen to shine with a full face, but has phases and changes just like those of the moon, being increasing, decreasing, horned, gibbous, &c. her illuminated part being constantly turned towards the sun, or directed towards the east when she is a morning star, and towards the west when an evening star. This planet, on account of her moving in an orbit between the sun and the earth, is never seen in opposition to the former, and never recedes from him more than 47 $\frac{3}{4}$ °, called her greatest possible elongation. In her inferior semicircle she appears to move contrary to the order of the signs; the length of which retrogradation is from 42 to 44 days, according to her situation with respect to her perihelion or aphelion at the time; the quantity of the arc moved in both cases amounting to about 16°. Mr. Schroeter has discovered inequalities on her surface similar to our mountains, and also that she is favoured with a twilight for some time after the sun sets to any particular part of her globe, and before he rises to the same; from which an indisputable argument of her having an atmosphere is deduced. See Phil.

Trans. 1795. She sometimes in her inferior conjunction transits or passes over the sun like a round black spot, eclipsing a part of his disk visible to the naked eye. But this appearance is so very rare, (sometimes not once, and never more than twice, in a hundred years,) and of so great utility in determining the solar parallax, that it has engaged the curiosity and attention of most astronomers of the last century. Several were sent to various parts of the globe to observe those famous ones of 1761 and 1769; the result of which was, that the sun's parallax is about $8\frac{1}{2}''$. If Venus moved in an orbit round the sun coincident with the plane of the earth's orbit, she would traverse the solar disk every synodic revolution; but this not being the case, she can only cross it in two opposite points called her nodes, very near either of which (not more than $1\frac{1}{2}^\circ$) she must necessarily be, at the time of her inferior conjunction, for such a phenomenon to take place; so that we need not wonder at the great rarity of such appearances.—There will only happen three such phenomena before the year 2004 inclusive; the times of which we will note down, together with the distance of the planet's and sun's centres at the middle of the transit, as deduced from Mr. Halley's periods, corrected from accurate observations upon the two last transits. The first of these will take place at the ascending node on the 9th of December, 1874; the middle of which will be at about 4h. 6m. in the morning, the planet being then $13' 2''$ to the north of the sun's centre: the second also happens at the ascending node on the 6th of December, 1882; the middle being at about 5h. 13m. in the evening, the planet having then $12'$ south latitude. The third and last we shall note happens at the descending node on the 8th of June, 2004, the middle being at about 6h. 30m. in the morning, and the distance of the centres $9' 9''$, the planet being to the south. Her apparent diameter, at the time of her transit, is so large as to take almost $20'$ in entering her whole body on the sun's disk; being found to be about $58''$. The longest duration of a central transit of Venus at both nodes is 7h. 56m. according to Dr. Halley.—In the Heathen Mythology, the goddess of love and beauty. In Chemistry, copper metal. In Heraldry, the green colour in the arms of sovereign princes.

VERACIOUS, *a.* [*verax*, Lat.] observant of truth.

VERACITY, *s.* [*véracité*, Fr. from *verax*, Lat.] truth; consistency of words with facts; or consistency of deeds with words.

To **VIE**, *v. a.* [the etymology uncertain] to show or practise in opposition or competition. Neuterly, to contest for superiority. To emulate, followed by *with*.

VIENNA, the capital of the circle of Austria in Germany, and of the whole Austrian empire, where the emperor resides. The city itself is not large, and contains about 60,000 inhabitants, being limited by a very strong fortification; but the suburbs and town together are said to contain above 220,000. The streets, in general, are narrow, and in part crooked, and the houses built high; but some of the public buildings are magnificent. No houses without the walls are allowed to be built nearer the glacis than 600 yards; so that there is a circular field of that breadth all

round the town, which has a beautiful and salutary effect. Vienna contains 50 churches or chapels, and 21 convents. Provisions are brought here in great plenty and variety. Here is a sort of harbour on the Danube, where there are magazines of naval stores; and ships have been fitted out to serve on that river against the Turks. The manufactures of this city are numerous, and the trade extensive. Vienna is seated at the place where the river Vien falls into the Danube. This capital was twice ineffectually besieged by the Turks, viz. in 1589 and 1683, in which latter year the siege was raised by John Sobieski, the king of Poland, who totally defeated the Turkish army before the walls of this place: but in the present century, it has been twice taken by the French; first, on Nov. 12, 1805, without opposition, and again on May 13, 1809, after a short resistance. Latitude of the observatory of Vienna 48° 12' 36" N. lon. 16° 21' 54" E. from Greenwich.

To **VIEW**, *v. a.* [from *veu*, Fr.] to survey or look on by way of examination or curiosity; to look at; to see.

VIEW, *s.* a prospect; sight; survey; the reach of sight; appearance or show; exhibition, or display to the mind; intention or design; prospect of interest. *SYNON.* *View* and *prospect*, in my opinion, differ in this; that the former implies a sight more extensive than the latter.

UNITED PROVINCES, usually called *Holland*, are situated between 51. 20. and 53. 20. N. lat. and 3 and 7 degrees E. lon. being about 150 miles from N. to S. and 100 from W. to E. This country was formerly divided into seven provinces, viz. Zealand, Holland, Utrecht, Guelderland including Zutphen, Overysse, Friesland, and Groningen, exclusive of the islands Texel, Vlieland, Schelling, Ameland, &c. at the entrance of the Zuyder Zee. After the invasion of the French, it was divided into eight departments, (including Dutch Brabant,) each of which were subdivided into districts, and had their primary assemblies. The Seven United Provinces being in great part surrounded by the sea, lying low, and abounding in marshes, have a damp and unwholesome air. Rain and fogs are frequent; and the gout, rheumatism, and agues, are very common, and difficult of cure. The effects of human industry here are wonderful, in the dikes and dams erected for defending the country against the inundations of the sea, and in ditches, canals, mills, and sluices, for draining the marshes. The quantity of grain produced is not sufficient for home consumption; but the pastures in the marshes are so rich, that they can spare a great deal of butter and cheese for exportation. They have a good breed of sheep, whose wool is highly valued. There is turf, madder, tobacco, some fruit, and iron; but all the pit-coal and timber used in this country, and many other necessaries, are imported. A vast variety of manufactures are carried on in the provinces, and a great number of hands are employed, and much wealth is acquired, by the herring, cod, and whale fishery. The trade of this country, upon the whole, has long been declining, chiefly owing to the improvement of manufactures, trade, and navigation, in other countries. The Protestant religion here is most prevalent; but all sects are tolerated. Their principal rivers are the Rhine, the Waal, the Scheldt, the Yssel, the Leck, and the Maes. The numerous canals which are cut to drain the land, are very commodious for travelling

from one place to another in boats. The inhabitants are robust, laborious, patient, free, open, affable, pleasant in conversation, and remarkable for their cleanliness. A Dutchman is naturally phlegmatic, and slow to anger; but when heated, is not easily appeased. These provinces, after undergoing several revolutions, in November 1813 threw off the French yoke, and recovered their independence. The Stadtholder was also restored, by the unanimous voice of the people; and he now bears the title of Sovereign Prince of the Netherlands.

W.

W Is the twenty-first letter of our alphabet, and is compounded, as its name implies, of two V's. The Hebrews, Greeks, and Romans, had it not; it is peculiar to the northern nations, the Teutons, Saxons, Britons, &c. It is not used by the Italians, French, Spaniards, nor Portuguese, except in proper names, and other terms borrowed from languages in which it is originally used, and even then it is sounded like single v. This letter is of an ambiguous nature, being a consonant at the beginning of words, and a vowel at the end. It may stand before all the vowels except *u*, as in *wager*, *well*, *wife*, *worship*; and follows the vowels, *a*, *e*, *o*, and unites with them into a kind of double vowel, or diphthong, as in *law*, *crew*, *cow*, &c. It also goes before *r*, and follows *s* and *th*, as in *wrong*, *swift*, *thwart*; it likewise goes before *h*, though in reality it is sounded after it, as in *why*, *when*, *where*, *what*, &c. In some words it is obscure, as in *stow*, *shadow*, *widow*; and in others it is silent, as in *wrong*, *write*, &c.

It was incorporated with England in 1538, and sends 24 members to the British house of commons. The western part is bounded by St. George's channel and the Irish sea; on the S. by the Bristol channel; on the N. by the Irish sea; and on the E. by the counties of Chester, Salop, Hereford, and Monmouth. It contains 751 parishes, and 58 market-towns. The country is very mountainous and plentiful. In their hills are rich lead and coal mines, with quarries of free-stone. The mountains in this country are reckoned equal in height, if not higher than any in Britain; Snowden and Plinlimmon are the most celebrated. The former is 1240 yards in height. They are a brave hospitable people, and were never conquered by the Saxons. Their last prince, Llewellyn ap Griffith, lost his life in defence of his country, when Edward I. conquered it in 1283. Since whose reign, his queen being here delivered of a son, the king's eldest son has been styled Prince of Wales, and a large revenue out of this country appropriated to the principality. Among the ancient Welch was an order of men called Bards, who composed songs relating the actions of their illustrious men. The last of these, named Taliesin, lived about the middle of the 5th century, and many of his verses are still extant. Edward I. when he conquered Wales, caused all their bards to be put to death. Wales has produced many learned men in the several parts of literature; and, indeed, their genius may be put on a level with that of the best of their neighbours. It is watered with many rivers, of which the principal are the Dee, Wye, Usk, Conway, Cluyde, and Twy. Wales contains, according to the census of 1811, a population of 289,414 males, and 317,966 females; total, 607,380.

WHITEHAVEN, a large, populous, rich, and improving town of Cumberland, with a good artificial harbour defended by a long pier, containing (in 1811) 10,106 inhabitants, and employing above 300 vessels. The working of the coal mines forms the principal business of the place. These are sunk to the depth of 130 fathoms, and carried to a vast distance under the sea, where vessels of large burden ride at anchor. By these a great part of Ireland, and other places, are supplied with coal, from which the proprietor, lord Lonsdale, derives a revenue of about 16,000*l.* a year. It is 13 miles S. W. of Cockermouth, and 297 (by Cartmel) N. W. of London. Market on Tuesday.

WHITELEAD, *s.* a kind of powder, made by taking sheet lead, and cutting it into long and narrow slips, which are made up into rolls, but so that a small distance may remain between every spiral revolution. These rolls are put into earthen pots, so ordered that the lead may not sink down above half way, or some small matter more, in them: these pots have each of them very sharp vinegar in the bottom, so full as almost to touch the lead. When the vinegar and lead have both been put into the pot, it is covered up close, and so left for a certain time; in which space the corrosive fumes of the vinegar will reduce the surface of the lead into a mere white calx, which they separate by knocking it with a hammer. There are two sorts of this sold at the colour shops; the one called ceruse, which is the most pure part, and the other called *white lead*.

To WILL, *v. a.* [*willan*, Sax.] to bend our souls to the having or doing what appears to be good; to command in a positive manner; to direct; to order. It is commonly used as an auxiliary verb to express the future tense, and is distinguished from *shall*, which generally implies a command in the second or third persons, but *will* only foretells or hints that something is about to happen which depends on a person's free choice. Again, *shall* in the first person simply expresses a future action or event, but *will* promises or threatens.

WILLI, and VILLI, in the composition of names, signifies many, and is borrowed from the Saxons. Thus, *Willielmus*, *William*, from *willi*, many, and *whelm*, a helmet, or defence for the head, signifies a protector or defender of many.

WILLIAM, I. (surnamed the Bastard, or the Conqueror) was the seventh duke of Normandy from Rollo the first duke, who made an attempt upon England, in the reign of king Alfred. His father, duke Robert, brother to duke Richard the Third, was never married; but being charmed with the graceful mien of a young woman, named Arlotta (whence it is said came the word *harlot*) a skinner's daughter, as he saw her dancing with other country girls, he took her for his mistress, and by her had this William. Duke Robert, about seven years after, taking it in his head to go on a pilgrimage to Jerusalem, before his departure caused the states of Normandy to acknowledge his young son for his successor; and, dying in his journey, William accordingly succeeded him in 1035, being then about nine years of age. He met with a great deal of trouble during his minority, from several pretenders to the dukedom, as well as from the king of France, who wanted to get it into his own hands; but by his vigour and conduct, and the wisdom of those in the administration, he got the better of all his enemies, and

established himself firmly in the possession of the sovereign authority. And, in all probability, he might have passed the rest of his days in peace, if his ambition had not put him upon making new acquisitions. His having an eye to the crown of England, it is very likely, was what brought him over hither to make a visit to king Edward, his cousin, who had no children, and who then, 'tis generally thought, promised him to make a will in his favour. However, from this time he began to look upon himself as having a claim, such as it was, to be Edward's successor; and seemed resolved, if all other methods failed, to accomplish his design by force of arms. How he did this see the life of HAROLD, and his success in the memorable battle of Hastings, by which he in a manner did his business at once. The first thing he did after the battle of Hastings, was to lay siege to Dover, in order to secure his retreat in case of necessity, and to have a place from whence he might easily send for supplies from Normandy. The consternation it was in made it soon surrender; which having ordered to be more strongly forfeited, and spent some days there to forward the work, he marched with his victorious army for London. In the mean time the city of London was in the utmost confusion, some being for one thing, and some for another; nor could they by any means agree in their opinions. Among other projects, some were for placing Edgar Atheling on the throne; and the earls Edwin and Morcar, who had retired to London after the battle of Hastings, were at the head of this party. But all they could do was to prevail on the citizens to shut their gates against William, till they could fix on some resolution. The duke by this time was come to Southwark, and there encamped, and lay some days, expecting the voluntary submission of London; but on the contrary, Edwin and Morcar took this opportunity to stir up the citizens to make a sally upon the Normans; which they did, but it was easily repulsed. This made the duke sensible, it was necessary to take more rigorous methods; and, as a siege, which might have lasted a great while, would have been very inconvenient in his present circumstances, he resolved to lay hold of the consternation the city was then in, to subdue them by terror rather than by force. To this end he posted himself at Wallingford; and sent out detachments to plunder the country near London, to frighten the citizens, and to cut them off from provisions; and, at the same time, burnt Southwark to the ground. The two earls above mentioned still laboured hard for Edgar, and the majority of the people were on their side; but their measures were broken by the clergy then in London, and the two archbishops at their head, who were for submitting to the duke, and had formed a strong party among the citizens for that purpose; so that Edwin and Morcar, finding they could not prevail, retired into the North; and immediately after, the two archbishops, with the bishop of Winchester, and Edgar himself, went over to the duke, who was then at Berkhamstead; and their example was soon followed by a great many persons of distinction. But the Londoners being still unresolved, the duke drew nearer the city, as if with a design to besiege it: upon which the magistrates, despairing of being able to defend it in the midst of the present confusion, went out and met him, and presented him with the keys of the gates. And then, after holding a consultation with the prelates and nobles, who had before submitted, they waited on him in a body, and made him an offer of the crown. After an affected hesitation, he accepted the crown as their gift. William was crowned at London on Christmas-day, having first caused a fort to be built, which he garrisoned with Normans, because he still suspected the citizens.

He then solemnly swore, "To protect the church and its ministers, to govern the nation with equity, to enact just laws, and cause them to be duly observed, and to forbid all rapines and unjust judgments." What was most surprising, and saved William much trouble, which in all appearance he had still to go through, was, that as soon as it was known that he had been crowned at London, he was immediately, without any opposition, acknowledged king throughout the whole nation. William, a few days after his coronation, returned from London to Barking, where multitudes came and submitted to him, and among the rest Edwin and Morcar. He received them in the most favourable manner, assured them of his protection, and in their presence gave prince Edgar large possessions, who was so beloved by the English, that he was generally called England's Darling. Soon after he laid the foundation of a church and monastery in the place where Harold was slain, and ordered that the monastery, when finished, should be called Battle-Abbey. In the beginning of his government, he used great moderation towards the English, and expressed a tender regard for them; and the three first months of his reign passed to their great satisfaction. But this short time of tranquillity and mutual confidence was followed by jealousy, mistrust, and severity on the king's side, and frequent revolts and commotions on the people's; in which, whether the king was most to blame or the people, cannot easily be determined, by reason of the partiality of writers on each side, according as they stood affected. This, however, is certain; that the English were ill treated by this king, that he shewed great partiality to the Normans, and ruled the natives with a despotic sway, exercising many acts of severity upon them, and treating them, to all intents and purposes, as a conquered people. It is certain also, that there were many revolts, and attempts to shake off the Norman yoke; but they all proved ineffectual, and served only for a handle to yet greater acts of severity. The beginning of the year 1067 king William, without any other visible reason than to display his new grandeur among his old subjects, went over to Normandy, taking with him such English lords as he most suspected, to prevent any thing being done to his prejudice in his absence; for which reason also he placed strong garrisons of Normans in all the castles. His brother Odo, bishop of Bayeux, and William Fitz-Osborn, were entrusted with the government of the kingdom; and these sticking at no methods to enrich themselves, exceedingly oppressed the English. The Kentish men at this time attempted to recover their liberty, and called to their assistance Eustace, earl of Boloign, who, failing in his project of surprising Dover castle, retired to his ships, and left the Kentish men to the mercy of the regents. Edric Forester, an English lord, also took up arms in Herefordshire, and cruelly treated all the Normans that fell into his hands. This hastened the king's return to England, who, instead of punishing the regents, approved of their conduct, to the no small discontent and mortification of the English. In 1068, he revived the tax formerly called Danegeld, which was levied upon the poor English with all imaginable rigour. And now insurrections and revolts followed in abundance. The inhabitants of Exeter refusing to take the oath to the king, and to admit a Norman garrison, William was preparing to besiege it in form; and the citizens had no other course to take but to implore his mercy. At the earnest entreaties of the clergy he pardoned them, how much soever in his own mind he was against it; and, to keep them in order for the future, he caused a castle to be built in the city, and garrisoned

with Normans. The king sent commissioners into all parts, to enquire who had sided with Harold, and to confiscate their estates. Edwin and Morcar, provoked at this treatment of the English, revolted, and, having raised an army, were reinforced by Blethwin, king of Wales, and a good number of troops. But the king marching with all expedition against them, with a great superiority of forces, broke all their measures; upon which the two earls submitted, and were pardoned. But this act of seeming clemency to the leaders in the rebellion, lost all its effect, by his severely punishing others who were less guilty; nay, he caused several who had no hand in the revolt to be shut up in prison: which spread a terror through the nation; as did also his building castles in divers places, which, it was easy to perceive, were designed to overawe the English. There were, indeed, as may well be supposed, great animosities between them and the Normans; the latter behaving towards the English much as the Danes formerly did, and being countenanced in their insults by the king, whilst the complaints of the English were not at all regarded. The consequence was, that many murders were committed on both sides, and an edict was published purely in favour of the Normans. Morcar and several other lords, mistrusting the sincerity of the king's behaviour towards them, retired into Scotland, and prevailed upon prince Edgar to go along with them, with his mother and sisters. The king of Scotland received them with all due respect, and married Margaret, Edgar's eldest sister, from whom descended Matilda, grandmother of king Henry II. in whom the royal families of the Saxons and Normans were united. Though king William was pleased at these lords leaving the kingdom, where they had so great an influence, yet perceiving hereby how the English stood affected, he proceeded to greater acts of severity, resolving, by humbling them, to secure himself from their resentment. With this view, it is said, he forbade them to have any lights in their houses after eight o'clock at night, ordering a bell to be rung at that hour, which was called the Curfew, from *couvre feu*, i. e. cover fire; at the sound of which they were obliged, under severe penalties, to put out their fires and candles. It must be owned indeed, that this affair of the Curfew is not supported by any competent authority. But this is certain, that after the Northumberland malecontents had called in the Danes, whose general, Osborn, the king of Denmark's brother, king William bribed by large presents to go off, he shewed no mercy towards the English; but after having, for a terror to the rest, ravaged the whole country between York and Durham, so as not to leave a house standing, he removed all the English from their posts, took away their estates, seized upon all the fiefs of the crown, and gave them to the Normans, from whom are descended many of the great families at this day in England. The clergy expected great things from the king, and therefore were the most forward to submit to him, after the battle of Hastings: but they were disappointed; for William now put the church lands upon the same footing with the rest, obliging them to furnish a certain number of men for his wars, though by the charter of the Saxons they were exempted from all military service. He quartered his troops upon the monasteries, and obliged the monks to supply them with necessaries. He moreover seized upon the money and plate in the religious houses, under pretence that the rebels had concealed their valuable effects there; and deposed several bishops and abbots that he did not like, putting Normans or other foreigners in their room. In 1071, a great number of malecontents betook themselves to the isle of Ely, strongly fortified it, and chose Hereward, one of the bravest soldiers in the kingdom, for their leader. The

king was very much alarmed at this proceeding, and, marching in all haste, blocked the rebels up in the isle. They were so well fortified that he could not come at them, and had so good a store of provisions, that a long time would be required to starve them out. And so having continued the siege, or blockade, for a great while to no purpose, he bethought himself of an expedient, which did his business effectually; which was, to seize on the manors belonging to the monastery, which were without the limits of the isle. Upon this, the abbots and monks, in order to recover their possessions, delivered up the isle, and all that were in it, into the hands of the king. Hereward alone escaped; as to the rest, some had their eyes put out, or their hands cut off, and others were thrown into different prisons; among the rest, Egelrick, bishop of Durham, who had been so bold as to excommunicate the king, was starved to death in prison. The king of Scotland had taken the opportunity of the troubles in England, to invade the northern counties, which he ravaged in a cruel manner. But as soon as the affair of Ely was over, king William marched against him. The Scotch king hereupon retired into Scotland, but William followed him thither. He not being willing to hazard a battle in his own country, offered to accommodate matters by a treaty; which William agreed to, and obliged the Scottish king to do him homage. In 1073, Philip, king of France, being jealous of the greatness of king William, on a sudden invaded Normandy without any declaration of war; upon which William went over with a great army, with which he retook Mans, and the whole province of Maine; and Philip soon growing weary of the war, concluded a peace with king William. Prince Edgar, about this time, came to the king out of Scotland, implored his pardon, and submitted. The king received him very graciously, and gave him an allowance of a pound of silver a day. From this time he continued in obedience, and gave the king no farther disturbance. During the king's absence, some disgusted Norman lords formed a conspiracy to depose him, and prevent his return, and drew earl Waltheoff, the only English lord the king retained in his favour, into the plot. But he soon repenting, went over and discovered it to the king before it came to any head, imploring at the same time his pardon, which the king readily granted. Notwithstanding which, soon after his return, the earl was apprehended, beheaded, and buried under the scaffold. And many of the innocent English, who were not at all concerned in the conspiracy, were severely punished, as well as the guilty Normans. King William now enjoyed some tranquillity, but in the year 1077 more work was cut out for him abroad; for his eldest son Robert, instigated by the king of France, rebelled against him in Normandy, and endeavoured to make himself master of that duchy. William went over, and his son persisted in his opposition, and in the heat of an engagement wounded him in the arm without knowing him, and dismounted him. But when he knew it was his father, he alighted, set him upon his own horse, and submitted entirely to his mercy. William brought him with him into England, and in the year 1080, sent him against the Scots, who had renewed their incursions. But this war also ended in a treaty between the two nations, and there was nothing remarkable in this expedition but Robert's founding the town of Newcastle-upon-Tyne; about which time also king William built the famous Tower of London, to be a check upon the citizens, whom he all along suspected. Let us now see, in a few words, how William managed his domestic affairs in time of peace. He did all he could to introduce the Norman language into England, caused the Saxon laws to be translated into Norman, and published his own laws in that tongue, and commanded it to be taught in all schools.

The effect was, that in common use a third language was by degrees introduced, which was neither English nor Norman, but a mixture of both. He erected new courts of justice, before unknown to the English, and very inconvenient to them, and ordered all law proceedings there to be in the Norman tongue. He had an immense revenue; and that he might know what every man was to pay him out of his estate and effects, he ordered a general survey to be made, not only of his own lands, but of all the lands in England; as also what every man was worth in money, stock of cattle, &c. all of which were set down in a book called *Doom's-day Book*, which is to this day preserved in the Exchequer. As he was very fond of hunting, he dispeopled the country in Hampshire for above thirty miles in compass, demolished both churches and houses, to make a forest for his diversion, which was called New Forest. In short, all his actions savoured of a most absolute and arbitrary prince. William having enjoyed a tranquillity of several years, every one thought he would have ended his days in peace. But all on a sudden he makes vast preparations, goes over to Normandy, and enters upon a fierce war against France. A truce soon ensued, which was broke by an unlucky jest of king Philip. William being grown very fat and unwieldy, was passing through a course of physic, when one coming to Philip from Roan, he asked him, "whether the king of England was delivered yet of his great belly?" William being told of this, was so enraged, that he sent him word, that as soon as he was up, he would offer in the church of Notre Dame, at Paris, ten thousand lancets by way of wax-lights. Accordingly, he renewed the war with the utmost fury; but it occasioned his death: for having made great ravages, and besieged and took Mantes, he ordered it to be burnt to the ground; and in his return to Roan, having bruised the rim of his belly against his saddle, he fell into a fever, which carried him off on the 9th of September, 1087, in the sixty-first year of his age, after having reigned in Normandy twenty-two years, and twenty-one in England. He was buried in the abbey church at Caen, which he himself had founded. It is remarkable, that his death was no sooner known, than his son Henry snatched his legacy out of the Treasury; the noblemen returned to their castles; and the domestics, having robbed the household, ran away.—William's courage and policy are not to be questioned, and it is certain that he was indefatigable in executing whatever he designed. When he lay upon his death-bed, he seemed to reflect seriously on his past actions, and to view them in a different light from what he had done in the time of his health and vigour. He ordered great sums of money to be given to the poor, and to the churches, particularly for rebuilding those he had burnt at Mantes. Then ordering his chief officers to stand about his bed, he made a long harangue to them, weak as he was, wherein he talked much of the reputation he had acquired by his military achievements. Yet he could not help owning, he had unjustly usurped the crown of England, and was guilty of all the blood spilt on that occasion. And though, he said, he durst not bequeath a crown which of right was none of his, but left it to the disposal of God; yet he recommended William, his second surviving son, for his successor, and did all in his power to secure the crown to him. He had three other sons, besides William, by his wife Matilda, daughter of the earl of Flanders. To Robert, the eldest, he gave the duchy of Normandy. Richard was killed by a stag in New Forest. To his youngest son Henry he bequeathed an annuity of 5000 marks. He had also six daughters by the same Matilda; Cecily, abbess of Caen; Con-

stance, married to the duke of Bretaign; Adeliza, promised to Harold when he was in Normandy, died young; Adela, married to the earl of Blois; Gundred, to William Warren, earl of Surry; and Agatha, espoused to Alphonso, king of Galicia. From the transactions of William's reign, he appears to have been a prince of great courage, capacity, and ambition; politic, cruel, vindictive, and rapacious; stern and haughty in his deportment; reserved and jealous in his disposition. He was fond of glory, and, though parsimonious in his household, delighted in pomp and ostentation. Though sudden and impetuous in his enterprises, he was cool, deliberate, and indefatigable, in times of danger and difficulty. His aspect was nobly severe and imperious, his stature tall and portly, his constitution hardy and robust, and the composition of his bones and muscles so strong, that there was hardly a man of that age who could bend his bow, or handle his arms.

WILLIAM II. surnamed Rufus, during his father's last illness in Normandy, was concerting measures in England to secure his succession to the crown. Though it was the Conqueror's desire that he should succeed him, yet there was great danger of a party being formed against him, in favour of his elder brother Robert. But as Robert was out of the kingdom, William with the more ease accomplished his designs; and by the management of Lanfranc, archbishop of Canterbury, who had great interest among the people, both English and Normans, and had gained over the leading lords of both nations, and by the favour of Eudo the high-treasurer, he ascended the throne, and was crowned 18 days after his father's death, Sept. 27, 1087. He was surnamed Rufus, from his being red-haired, and was now thirty years old. He was remarkable for no good quality but his courage, which, however, for the most part, was more like the fierceness of a wild beast than the bravery of a hero. He was very ill-natured, and a perfect brute in his behaviour; was wholly indifferent as to religion, and had no regard for honour or honesty. He was greedy of money, but it was to squander it away upon idle expences. In fine, he had all his father's vices, without his virtues: and historians agree in representing him as bad a prince as ever sat on the English throne. These historians were indeed monks and ecclesiastics, who might be prejudiced against him for seizing the revenues of the church. However, as scarce any action of his life deserves commendation, their representations seem to be but too well founded. In 1088, a formidable conspiracy was set up against him by his uncle Odo, bishop of Bayeux. The design was to depose William, and set Robert on the throne. Several Norman lords and bishops joining in the plot, and many of the English also being prevailed on to favour it, when they thought matters were ripe, they invited Robert to come over, who promised soon to be with them. The conspirators then fortified themselves in several places, and William seemed to be in a most dangerous situation. But Robert's indolence and dilatory temper, who did not come over with his forces as they expected, gave him time to extricate himself out of this danger. He first gained over the English, then he fitted out a fleet, and marched against Odo, and the other rebels, with an army of Englishmen; took Pevensey, Rochester, and Durham, and the other places, where they had shut themselves up; broke all their measures, and entirely dispelled the threatening storm. Though William was indebted to the English for having by their means crushed the conspiracy, and though he had made them many fair promises, yet it was no sooner over, but he began to oppress them even worse than his father had done.

William seized upon the vacant benefices, and after he had stripped them of every thing he could turn into money, he sold them to the highest bidder. He seized upon the temporalities of the see of Canterbury, and kept them in his hands four years, and did the same by all the other bishoprics that became vacant in his reign. Soon after, William, to be revenged on his brother Robert for the late conspiracy, and perhaps from a desire of enjoying all his father's dominions, invaded Normandy, and made himself master of several places. Robert implored aid of the king of France, who came to his assistance; but William having found means to bribe him, he retired without doing any thing, and William proceeded to take more places, and bribed some of the burghers of Roan to undertake the delivering it into his hands. But prince Henry joining his brother Robert, saved it; for entering the city on a sudden, he seized the chief of the conspirators, and threw him headlong from a tower; which bold stroke not only preserved the capital, but, in effect, all Normandy. William soon after, in 1091, was obliged to strike up a peace with duke Robert, on this condition, among others, That upon either of the brothers dying without heirs, the survivor should succeed to all his dominions. Whilst William was in Normandy, Malcolm, king of Scotland, made an incursion into Northumberland, and William at his return resolved to revenge this insult. He artfully induced his brother Robert to come over and accompany him in this expedition, fearing he should in his absence seize on those castles in Normandy that he held by the late treaty. His army suffered greatly by several disasters in Scotland; but Malcolm, fearing the ill consequences of a war in his own country, sent William proposals for an accommodation, which were readily accepted, and the Scotch king obliged himself to pay the same homage to the king of England he had formerly done. But Robert, perceiving he was only amused by his brother to draw him into this expedition, returned home greatly disgusted. The king continued his arbitrary proceedings, and oppressed his subjects, Normans as well as English, more and more every day, which made them all wish for his death, as the only remedy to the evils they groaned under. And now they thought their wishes were going to be accomplished, for, in 1093, a dangerous distemper seized him at Gloucester, so that he himself thought his end approaching; and the fear of death made him resolve, if ever he recovered, to reform all that had been amiss in his government: being recovered of his illness, he presently forgot all his good resolutions, returned to his courses, retracted, as far as was in his power, the good orders he had given in his sickness, and even increased abuses of government, instead of correcting them. In 1094, we again find king William at war with his brother Robert in Normandy, who, as William had not performed his part of the late treaty, seemed resolved to take from him the places he held there. Being assisted by the king of France, he gained several advantages over William, who at last had recourse to his old artifice, and bribed the French king once more to draw off his forces. In order to raise money, he sent orders into England for levying 20,000 men, and to impress such as were of some substance, and did not care to leave their families. When they were just going to embark, they were discharged, upon paying ten shillings a man, which they readily did; and by this artifice William raised 10,000*l.* Robert now, in all likelihood, would have lost all his dominions, if the king had not been obliged to return on a sudden to repress the Welsh, who were ravaging Shropshire and Cheshire. At his approach, they retired among the mountains and inaccessible places, and William pursuing them too far, lost more of his men than he destroyed of the

enemy's; and all he could do was, to build the castle of Montgomery, which had been demolished. In 1096, the project of the holy war was set on foot by the pope Urban II. in which so many princes of Christendom engaged. The design of it was to recover the Holy Land out of the hands of the Saracens. The badge of those who went to it was a red cross wrought in their garments, whence they were termed Croises, and the expedition the Crusade. Robert duke of Normandy was one of the princes who engaged in it; and to defray the expenses of his undertaking, he mortgaged his duchy to his brother the king of England, for a sum of money, which William raised on his subjects by the most oppressive methods imaginable. In 1098, William rebuilt London bridge, raised a new wall round the Tower, and erected the famous Hall at Westminster, which, though so large, he found fault with, and said it was scarce big enough for a king's bedchamber. The raising money for these works was a great oppression on the subjects. Being hunting one day in New Forest, he was accidentally, or otherwise, shot with an arrow into the heart, by Walter Tyrrel, a French knight, as he was, seemingly at least, shooting at a deer; and dropt down dead immediately. Thus fell William, surnamed Rufus, from his red hair and florid complexion, after he had lived four and forty years, and reigned near thirteen, during which he oppressed his people in every form of tyranny and insult. He was equally void of learning, principle, and humanity; haughty, passionate, brutal, profligate, and ungrateful; a scoffer at religion; a scourge to the clergy; vain-glorious, talkative, rapacious, lavish, and dissolute; and an inveterate enemy to the English, though he owed his crown to their valour and fidelity, when the Norman lords intended to expel him from the throne. In return for this instance of their loyalty, he took all opportunities to fleece and enslave them; and at one time imprisoned fifty of the best families in the kingdom, on pretence of killing his deer: so that they were compelled to purchase their liberty at the expense of all their wealth; though not before they had undergone the fiery ordeal. He lived in a scandalous commerce with prostitutes, professing his contempt for marriage; and having no legitimate issue, the crown devolved to his brother Henry. He was buried at Winchester, where his tomb, somewhat raised above the ground, remains to this day. In his reign, a great inundation of the sea overflowed the coast of Kent, and covered the lands formerly belonging to earl Goodwin. These are now called the Goodwin Sands, so dangerous to ships.

WILLIAM III. of England, and prince of Orange and Nassau, born Nov. 14, 1650, had for his godfathers the States of Holland and of Zealand, the cities of Delft, Leyden, and Amsterdam. The States finding themselves at liberty, by the death of William II. resolved to remedy the inconveniences which might happen from a single governor. They appointed a general assembly to meet, in which it was resolved, That since the country was now without a governor by the death of the prince, the choice of all officers and magistrates, for the time to come, should be in the disposal of the cities; and that not only the ordinary soldiers, but even the guards of the deceased prince, should take an oath of fidelity to the States of Holland: this was unanimously carried. The conduct of Messrs. de Wits being very much disapproved, the prince was in 1672 declared general of the army of the States. At that time they were in a most distressed condition. The French carrying all before them, he immediately repaired to the army. The frontier towns and garrisons in the province of Holland fell every day into the hands of the enemy, which caused insurrections. Dort first led the way, and was followed by other cities. The conse-

quence was, that the prince was declared, in a full assembly of the States, stadtholder, captain, and admiral-general of all their forces, as well by sea as by land; and they gave him all the power, dignity, and authority, which his ancestors of glorious memory had ever enjoyed, and things then took a more prosperous turn: not long after, the two De Wits, the great enemies of the House of Orange, were torn to pieces by the people. In 1673 he took the strong town of Naerden, and by his courage and conduct obliged the French to quit Utrecht, and several considerable places where they had garrisons. As an acknowledgment of his services, the States confirmed him in the office of stadtholder, and entailed this dignity upon the heirs of his body born in lawful wedlock, in an instrument, dated February 2, 1674. The same day the states of Zealand conferred the same administration upon his highness, and declared him chief nobleman of their province. Soon after he went to Utrecht, and made some regulations in the government of that province; and the following proposition being made, 'Whether it were advisable to confer the charge of governor-general, captain, and admiral-general of the province, upon his highness, and his heirs male, lawfully begotten?' they all, *nemine contradicente*, approved the motion, and conferred that dignity upon his highness. Soon after he engaged the French at Senef, where he gained great honour by his courage and conduct, and obtained a victory after a most bloody engagement. In 1675, as an acknowledgment of his great services, the burghers of the duchy of Guelders conferred on him the honour of being hereditary governor of that province: and he reformed several abuses which had got footing during the enemy's usurpation there. On October 17, 1677, the prince embarked for England, and arrived at Norwich the 19th. On November 4, which was his highness's birth-day, he was married to the princess Mary, eldest daughter of the duke of York. In August, 1678, he attacked and defeated the duke of Luxemburgh in his quarters, near the abbey of St. Denis. In the heat of the action the prince advanced so far, that he was in great danger of being lost, had not Mons. Puwerkerk come seasonably to his relief, and killed an officer that was just going to fire a pistol at him. On June 29th, 1684, a treaty was signed at the Hague, which put an end to military operations. In 1688 king James II. of England having conducted his affairs in such a manner as apparently threatened the civil and religious liberties of the nation, a great many persons of eminence and interest in the kingdom, both clergy and laity, deemed it expedient to invite over the prince of Orange. Several of them waited on him at the Hague for that purpose: and the States General having resolved to assist him, great preparations were made for his expedition. On October 16th, he took his leave of the States, and on the 19th sailed with 50 men of war, 25 frigates, as many fireships, near 400 victuallers and transports, having about 14,000 land forces, accompanied by many of the English nobility and gentry; but was forced back by a storm. He put to sea again, November 1, and landed the 5th at Torbay, and was soon joined by many of the nobility. He advanced towards London; and king James quitting the kingdom, he was invited to London. In the mean time the lords took upon them the government of the kingdom, and agreed to address the prince of Orange to take upon him the administration of all public affairs till a convention should meet. The convention of lords and commons met, Jan. 22, 1688-9, and after some warm debates, voted, that the prince and princess of Orange should be king and queen. The princess arrived February 12, and the next day both houses waited on them, and made a solemn offer of the crown, which was accepted by the prince in the name of himself

and his wife, and the same day they were proclaimed king and queen by the names of William and Mary, such was the necessity of the times. The first thing king William did, after he had settled his privy-council, was giving the royal assent, on February 23, to a bill that had passed both houses, 'to remove and prevent all questions and disputes concerning the assembling and settling of this present parliament.' By which act the convention, which had placed the crown on the prince and princess of Orange, was changed into a parliament. From the beginning of the reign of king William and queen Mary, there was a party in the nation who disliked the new settlement, and were in continual plots to overturn it, and to restore the late king James. The king, by the advice of the commons, and being strongly solicited to it by his allies, declared war against France. The king and queen were solemnly crowned by the bishop of London, on April 11, 1689. The parliament, at the king's desire, had passed an act, 'for taking away the tax called hearth-money,' which received the royal assent on April 24. On July 24, the princess Anne of Denmark was delivered of a prince, named William, whom his majesty created duke of Gloucester. The king passed the bill of rights and accession, on December 16, agreeably to the declaration of rights when their majesties accepted the crown, with the addition of a remarkable clause, for excluding papists, and persons marrying papists, for ever, from inheriting the crown of England. The revolution in Scotland quickly followed that in England. And an act was presently passed for settling the crown upon the king and queen of England; pursuant to which their majesties were proclaimed king and queen of Scotland, on April 11, the day of their coronation in England. Then the earl of Argyle and other commissioners were sent to make a solemn tender of the crown to their majesties, in the name of the estates and kingdom of Scotland; which was done on May 11. In the mean time, the duke of Gordon, a papist, still held the castle of Edinburgh for the late king; but a vigorous siege obliged him to surrender it on June 13, upon conditions that he and the garrison should have their lives, liberties, and fortunes secured. And the earl of Dundee being slain in battle, and the forces he had raised in the Highlands dwindling away by degrees, and being at length entirely suppressed, their majesties remained afterwards in the peaceable possession of the crown of Scotland. In Ireland, Tyrconnel had secured the most important places of that kingdom, and used such violence against the protestants, that they were forced to retire to their brethren in the north; who seizing on Kilmore, Coleraine, Inniskillen, and Londonderry, declared for king William and queen Mary. The late infatuated king James now sailed from Brest with some French troops, and landed at Kinsale on the 12th of March, 1688-9. Having taken Coleraine and Kilmore after a stout resistance, he laid siege to Londonderry, on April 20; from whence, a few days after, he departed to meet his parliament at Dublin, where he passed an act to attain between 2 and 3000 protestant lords, ladies, clergymen, and gentlemen, of high-treason. In the mean time the siege of Londonderry was carried on with the utmost efforts; and the garrison under Mr. George Walker, a clergyman, and major Baker, held out with the most surprising resolution, though reduced to the necessity of feeding upon horse-flesh, dogs, cats, rats, and mice, tallow, starch, dried and salted hides, and all kinds of offal; till major-general Kirk arriving with some ships laden with provisions, which, after a long delay, he at last found means, with difficulty, to convey into the town, the besiegers, on July 31, thought fit to raise the siege. The garrison of Inniskillen, at the same time, did wonders; particularly

the day before the siege of Derry was raised, they advanced near 20 miles to meet about 6000 Irish, and defeated them, killing and drowning near 3000, though themselves were not above 2000, and had but about 20 killed and 50 wounded. King William having passed an act for putting the administration into the hands of the queen whenever he should be out of the kingdom, in June, 1690, landed with a gallant army in Ireland, and on July 1, fought the ever memorable battle of the Boyne, wherein, though he had the misfortune to lose the brave duke of Schomberg, then 82 years old, yet he gained a complete victory over the French and Irish army, and obliged king James to retire to Dublin, and make all the haste he could back to France. King William, the following Sunday, entered Dublin in triumph, and went to St. Patrick's church to return thanks to God for his victory; and arriving in England the beginning of September, he sent the earl of Marlborough to carry on the reduction of Ireland; who took Cork and Kinsale with such expedition, that he was again at Kensington on October 28. The next year, 1691, the intrepid English, under the brave general Ginckle, and other valiant commanders, made themselves masters of Baltimore, with incredible bravery passed the Shannon amidst the fire of the enemy, and took Athlone, and fought the glorious battle of Aghrim on July 12, wherein 4000 Irish and their general St. Ruth were slain; which was soon followed by the surrender of Galway, and lastly, that of Limerick in October (where Tyrconnel died, as it were of grief, on August 14,) by which an end was put to the Irish war, and all Ireland was reduced to the obedience of king William and queen Mary. In England, the king dissolved the convention parliament, on February 6, 1689-90, and a new parliament met on March 20. In the mean time, the French king was pushing his conquests in the Netherlands and other parts, which made it necessary for king William to go over to the famous congress at the Hague, in the beginning of the year 1691, in order to animate the confederate princes and states. The French were so far beforehand with the allies, that they took the strong city of Mons this year, and Namur in the year following; after which was fought the battle of Steenkirk, (king William commanding the confederate army himself, as he did every year during the war,) in which, though the French remained masters of the field of battle, yet king William so bravely disputed the victory, that they had scarce any thing else to boast of, the loss being nearly equal on both sides. The king was no sooner gone abroad in 1691, but the Jacobites resumed their favourite scheme, in concert with France, for restoring the late king James. But the vigilance of queen Mary and the government again disconcerted their measures. The parliament meeting towards the end of the year, passed a bill for the frequent calling and meeting of parliaments, commonly called the Triennial Bill; but the king, by the advice of his ministers, refused his assent, as he did also the next year to a bill touching free and impartial proceedings in parliament, being in the nature of what is now called a Place-bill; which so displeased the commons, that they resolved, that whoever advised the king not to give the royal assent to that act, was an enemy to their majesties and the kingdom. However, the parliament insisting upon the Triennial Bill, he thought fit to pass it in 1694, which gave general satisfaction. Our loss at sea was this year very considerable. For the whole Brest fleet, on June 19, fell upon Sir George Rooke's squadron, which had a fleet of near 100 merchant ships, bound for the Straits, under its convoy, whilst it was separated from the main fleet, which should have conveyed it out of danger, and took, burnt, or sunk, four of the greatest Smyrna ships, three Dutch men of

war, and one English, and near 80 other merchant ships. Our honour at sea was in a great measure retrieved this year. The king returned on November 9. On December 28, queen Mary died of the small-pox, to the inexpressible grief of the nation. She was king James's eldest daughter, and died in the 33d year of her age, having reigned near six years jointly with the king her husband. On March 5, she was most solemnly and magnificently interred in Henry VII.th's chapel. In the beginning of the year 1695, the parliament made a strict inquiry into several abuses and corruptions. In this session also the bad state of the silver coin was first taken into consideration, which by clipping and adulterating had been reduced near half in value, to the great detriment of trade, and embarrassment of the public revenue. The remedying of this grievance was not perfected till the next parliament, when all the silver money was ordered to be called in and recoin'd, and the loss to be borne by the public. This gave rise to Exchequer bills, or paper-money, which were no sooner set on foot, but the scandalous practice of false endorsement began; for which Mr. Charles Duncomb and Mr. Knight were expelled the house, and committed to the Tower, and Mr. Burton to Newgate. Bills were ordered to be brought in to punish them; which passed the commons, but were thrown out by the lords, who being equally divided upon Duncomb's bill, the duke of Leeds gave the casting vote for rejecting it. In 1695, the English fleet, under lord Berkely, spread terror along the coast of France, bombarded St. Maloes, and some other towns; and in return, Villeroy, by the French king's order, bombarded Brussels. On the 12th of January, a double plot was about that time discovered, to assassinate the king and invade the kingdom. Many of the late king James's emissaries came over from France, and held consultations with papists and Jacobites here, how to murder king William; and after several debates on the time, place, and manner of putting their horrid design into execution, they at last agreed to assassinate his majesty in his coach, on some day in February, 1695-6, in a lane between Brentford and Turnham Green, as he returned from hunting. But happily the whole plot was discovered by Mr. Pendegrass, the very night before it was to be executed; which was confirmed by Mr. de la Rue, another of the plotters, and afterwards by captain Porter, and others of them, who came in upon the proclamation for apprehending the conspirators. At the same time there was to be an invasion from France, for which purpose king James was to come to Calais, and the troops, artillery, and stores, were immediately ordered to be embarked; but by the news of the assassination plot having miscarried, and the speedy sending a formidable fleet under admiral Russel, this other part of the design was frustrated; and Calais was not long after bombarded by the English. When the parliament met, December 3, 1696, the king told them in his speech, that considering the circumstances of affairs abroad, it was his opinion, that England could not be safe without a land force; which clause the commons did not like, as if it were designed to recommend a standing army in time of peace. And so after long debates they resolved, That all the land forces raised since September 29, 1680, should be paid and disbanded. Yet, to shew their affection to his majesty, they resolved, on December 20, That 700,000*l.* per annum be granted to him for the support of the civil list. The parliament continued sitting till July 5, 1698, and then was prorogued, and two days afterwards dissolved. In this session the new East India company was established, the merchants having agreed to advance 2,000,000*l.* to government at 8 per cent. The old company offered to raise 700,000*l.* at 4 per cent.; but this

was rejected; though they were afterwards continued a corporation, and the two companies united. On December 6, 1698, the new parliament met, in which, though the king expressed his desire of having a good body of land forces kept up, yet the commons resolved, that all the land forces, exceeding 7000 for England, and 12,000 for Ireland, (all his majesty's natural-born subjects,) should be forthwith paid and disbanded. This made the king very uneasy; but when he saw the parliament in earnest, he complied with a good grace. He would fain have kept his Dutch guards that came over with him at first; but not being able to move the parliament, he with complaisance submitted, and sent them away; which gave great satisfaction to his people. In June, 1699, the king went over to Holland, and returned in October. The parliament met on Nov. 16, and in this session were great debates about the Irish forfeited estates, resuming the grants which the king had made of several of them to his ministers and favourites, and applying all to the use of the public. The commons, in April, 1700, to carry their point, tacked the bill of resumption to the land-tax bill: which occasioned great heats between the two houses, the lords making amendments which the commons would not agree to; when the king, fearing the consequences, sent a private message to the lords to pass the bill without any amendments, and on April 11, prorogued the parliament. The king went over again to Holland in July this year; and on the 29th, unhappily for England, died that hopeful young prince the duke of Gloucester, son to their royal highnesses the prince and princess of Denmark, being about ten years old. The king of Spain dying towards the end of the year, the duke of Anjou was declared king of Spain by the French king his grandfather. And the French, at the same time, overrunning the Spanish Netherlands, both king William and the States were obliged to own the duke of Anjou's title, in order to gain time. His majesty, soon after his return, dissolved the parliament, and at the same time, to please those now distinguished by the name of the Church-party, made some alterations in his ministry. The new parliament meeting in February 1700-1, the commons chose Robert Harley, esq. their speaker. The king, in his speech on the death of the duke of Gloucester, having recommended to them a further provision for the succession of the protestant line, after him and the princess, both houses came into it; and on June 12, 1701, his majesty passed the famous act for the further limitation of the crown, and better securing the rights and liberties of the subjects; whereby the crown was further limited to the princess Sophia, electress dowager of Hanover, and her protestant heirs. She was granddaughter to king James I. by his daughter Elizabeth, queen of Bohemia, and grandmother to his majesty king George II. His majesty went again to Holland in July, where he made a speech in the assembly of the States, on the posture of affairs in Europe; which had a good effect. The English nation was now divided into parties, for and against a war, the old and new ministry, and the house of commons, (which had occasioned the famous Kentish petition, and Legion letter, in which the last commons were treated with great scurrility, and even menaces.) But the death of the late king James, on Sept. 5, at St. Germain's, and the French king's declaring thereupon the pretended prince of Wales king of these realms, gave a new turn to people's minds, and made them all unite in a firm adherence to his majesty, and the utmost abhorrence of the indignity put upon him and the nation by the French king. His majesty returned about the end of October, and having dissolved the parliament, called another to meet December 30. The commons again chose Mr. Harley their speaker, and the

king made a most excellent speech to both houses on the present posture of affairs, the late insolent step of the French king, the dangers that threatened Europe, by his placing his grandson on the throne of Spain, and the alliances he had made for obviating those dangers; to which both houses returned the most satisfactory addresses. And soon after, the commons addressed his majesty, that it might be an article in the several treaties of alliance, That no peace should be made with France, till his majesty, and the nation, have reparation for the indignity offered by the French king, in declaring the pretended prince of Wales king of England, Scotland, and Ireland. They then voted 40,000 land forces, and as many for the sea-service. In the midst of these vigorous resolutions, the king, who had been declining in his health for some time, on February 21, 1701-2, fell from his horse, as he was hunting, and broke his right collar-bone: which, joined with his former indisposition, held him in a languishing state till the 8th of March, when, with great composedness and resignation, he expired. During his illness, the royal assent was given by commission to an act for attainting the pretended prince of Wales of high-treason; and another for the further security of his majesty's person, and the succession of the crown in the protestant line, &c. Thus died the heroic king William III. in the 52d year of his age, having reigned thirteen years, three weeks, and two days. William III. was in his person of the middle stature, a thin body, and delicate constitution, subject to an asthma and continual cough from his infancy. He had an aquiline nose, sparkling eyes, a large forehead, and a grave solemn aspect. He was very sparing of speech; his conversation was dry, and his manner disgusting, except in battle, when his deportment was free, spirited, and animating. In courage, fortitude, and equanimity, he rivalled the most eminent warriors of antiquity; and his natural sagacity made amends for the defects in his education, which had not been properly superintended. He was religious, temperate, generally just and sincere, a stranger to violent transports of passion, and might have passed for one of the best princes of the age in which he lived, had he never ascended the throne of Great Britain. But the distinguishing criterion of his character was ambition. To this he sacrificed the punctilios of honour and decorum, in deposing his own father-in-law and uncle; and this he gratified at the expense of the nation that raised him to sovereign authority. He aspired to the honour of acting as umpire in all the contests of Europe; and the second object of his attention was, the prosperity of that country to which he owed his birth and extraction. Whether he really thought the interests of the continent and Great Britain were inseparable, or sought only to drag England into a confederacy as a convenient ally, certain it is, he involved these kingdoms in foreign connections, which have ever since been productive of incalculable evils. In order to establish this favourite point, he scrupled not to employ all the engines of corruption, by which the morals of the nation were totally debauched. He procured a parliamentary sanction for a standing army, which now seems to be interwoven with the constitution. He introduced the pernicious practice of borrowing upon remote funds; an expedient that necessarily hatched a brood of usurers, brokers, and stock-jobbers, to prey upon the vitals of their country. He entailed upon the nation a growing debt, and a system of politics big with misery, despair, and destruction. To sum up his character in a few words: William was a fatalist in religion, indefatigable in war, enterprising in politics, dead to all the warm and generous emotions of the human heart, a cold relation, an indifferent husband, a disagreeable man, an ungracious prince, and an imperious sovereign.

WILLING, *a.* inclined, or not averse to do any thing; consenting; desirous; favourable; pleased; ready or condescending; chosen.

WILTSHIRE, an English county, 52 miles in length, and 38 in breadth; bounded on the W. by Somersetshire; on the N. by Gloucestershire; on the E. by Berkshire and Hampshire; and on the S. by Dorsetshire and Hampshire. It contains 304 parishes, 24 market towns, and sends 34 members to parliament. The principal rivers are the Willey, the Bourne, the two Avons, the Tems, the Kennet, the Duril, the Nadder, and the Were. The air is generally good, though sharp upon the hills and downs in winter, but milder in the vales and bottoms. The North part is hilly, the S. level, and the middle full of downs, intermixed with bottoms, wherein are rich meadows and corn-fields. The soil of the vales is very rich. The beautiful downs in the south yield the finest pastures for sheep. This county is noted for fine cheese, and its manufacture of broad cloth. Here is a famous trench, which runs from E. to W. and is visible for many miles. The common people will have it to be the work of the devil, but it was probably the boundary of the West Saxon monarchy. Salisbury is the principal town. The inhabitants of this county in 1811 amounted to 91,560 males, and 102,268 females.

WILY, *a.* full of stratagem; sly; cunning; mischievously artful; tricking.

X.

X Is the twenty-second letter of our alphabet, and a double consonant. Neither the Hebrews nor ancient Greeks used it, but expressed it by its component parts *cs*. Neither have the Italians this letter, but express it by *ss*. X begins no word in the English language, but such as are of Greek original, and we find it in few words but what are of Latin derivation, as *perplex*, *reflexion*, *defluxion*, *axle*, &c. We often express this sound by single letters; as in *backs*, *cracks*, *necks*, &c. by *ks*, in *brooks*, *breaks*, *rocks*; by *cc*, in *access*, *accident*; by *ct*, in *action*, *unction*, &c. The English and French pronounce it *cs* or *ks*. In Numerals, it expresses 10, and as such, seems to be made of two V's placed one over the other. When a dash is over it, thus, $\bar{X}$, it signifies 10,000.

Y.

Y is the twenty-third letter of our alphabet; its sound is formed by expressing the breath with a sudden expansion of the lips, from that configuration by which we express the vowel *u*. It is one of the ambigenal letters, being a consonant in the beginning of words, and placed before all vowels, as in *yard*, *youth*, *York*, &c. but before no consonant. At the end of words it is a vowel, and is substituted for the sound of *i*, as in *try*, *fry*, *cry*, &c. In the middle of words it is not used so frequently as *i*, unless in those derived from the Greek, as in *chyle*, *empyreal*, *type*, &c. although it is admitted into some pure English words, as in *dying*, *crying*, *prying*, &c. Y was much used by the Saxons, whence it is found for *i* in the English writers. Y is also a numeral, signifying 150, and with a dash over it thus, $\bar{Y}$, 150,000.

YACHT, YATCH, or YACHT, *yaut*, *s.* a small ship, generally used in conveying state passengers.

YAM, *s.* a plant cultivated by the inhabitants of the American islands, for feeding their negroes, and the white people make puddings of the roots, when ground to a sort of flour.

YARD, *s.* [geard, Sax.] inclosed ground belonging to a house; a measure containing three feet, settled by Henry 1. from the length of his own arm. Long pieces of timber fitted across the masts, and used as supports for sails.

YARDWAND, *s.* a measure of a yard.

YARE, *a.* [gearwe, Sax.] ready; eager; dexterous. "You shall find me *yare*." *Shak.* Not in use.

YARMOUTH, *Great*, a considerable sea-port of Norfolk, seated on the river Yare, by means of which it has the export and import trade of Norwich, and various places in Norfolk and Suffolk; 22 miles E. of Norwich, and 124 N. E. of London. Its foreign trade is chiefly to the Baltic, Holland, Portugal, and the Mediterranean. It also sends ships to the Greenland fishery. The home fishing is carried on at two seasons, that for mackarel in May and June, and that for herrings in October and November. Of these last, 50,000 barrels are generally taken and cured in one year. Yarmouth is much frequented in the season as a place for sea-bathing. The town consisted, in 1811, of about 1500 houses, containing 17,977 inhabitants; and there are a few pretty wide streets, and a spacious market-place. A lofty steeple here serves as a landmark for those at sea; but whichever way it is viewed it appears crooked. Off the mouth of the harbour is a bar, which prevents the entry of ships of large burden; and the Roads, east of the town, with the dangerous sands and banks of the offing, are much frequented, though noted for frequent shipwrecks. Market on Wednesday and Saturday.

YARMOUTH, a borough and sea-port of the Isle of Wight, seated on the N. W. part of the island, 8 miles N. N. W. of Newport, and 99 S. W. of London. Market on Friday.

YARN, *s.* [gearn, Sax.] wool spun into threads; woollen thread.

To YARR, *v. n.* to growl or snarl like a dog.

YARROW, *s.* a plant, of which there are two species, viz. the bastard pellitory, and milfoil.

YARUM, or *Yarm*, a town in the North Riding of Yorkshire, seated on the river Teese, over which there is a handsome stone bridge, 36 miles N. of York, 245 N. by W. of London. Market on Thursday.

YAWL, *s.* a boat or small vessel belonging to a ship.
To **YAWN**, *v. n.* [*geonan*, Sax.] to gape; to open wide; to express longing by gaping.

YAWN, *s.* the act of gaping; oscitation.

YAWNING, *a.* sleepy; slumbering; drowsy.

YAWS, *s.* a common distemper in Guinea, and hot climates, which sailors call the pox. In Sea language, a ship makes yaws when she does not steer steady.

YAXLEY, a town in Huntingdonshire, 14 miles N. of Huntingdon, and 77 N. by W. of London. Market on Tuesday.

YCLEPED, *e-klept*, *a.* [part. pass. of *clepe*, to call, from *clepan*, Sax.] called; named; termed; denominated.

YE, *pron.* the nominative plural of *thou*, used when speaking to more than one person.

YEA, *ad.* [*ea*, or *gea*, Sax.] yes; truly. It is sometimes used emphatically for, not only so; but more than so. "From these Philippinæ are brought costly spices, *yea*, and gold too." *Abbot*.

To **YEAN**, *v. n.* [*eanian*, Sax.] to bring forth young, applied to sheep.

YEANLING, *s.* the young of sheep.

YEAR, *s.* [*gear*, Sax.] a system, or circle of several months, or a space of time measured by the revolution of some celestial body in its orbit. A *solar year*, consists of 365 days, 5 hours, 48 minutes, 45½ seconds. A *lunar year* is less than the *solar* by 11 days, and consists exactly of 354 days, 8 hours, 48 minutes, and 36 seconds, and is the year now used by the Turks. The *civil year*, is that which each nation has contrived to compute time by, and generally consists of whole days; the *common civil year* consists of 365 days, and the *Bissextile*, or *leap year*, consists of 366 days, and has one day more than the common, viz. February 29, which is called the intercalary day.

YEARLING, *s.* a beast a year old.

YEARLY, *a.* happening every year; lasting a year. Adverbially, once a year; annually.

To **YEARN**, *v. n.* [*earnan*, Sax.] to feel a strong sympathy, affection, or tenderness; to be affected with internal uneasiness. Actively, to grieve; to vex; to affect with sympathy. "It would *yearn* your heart to see it." *Shak*. The last sense is obsolete.

YEAST, *s.* [*gest*, Sax.] the foam of beer in a state of fermentation; barm.

YELK, *s.* [from *gealewe*, yellow, Sax.] the yellow part of an egg; commonly pronounced, and often written, *yolk*.

To **YELL**, *v. n.* [*yle*, Isl.] to make a horrible cry through sorrow or agony.

YELL, *s.* a cry expressive of horror.

YELLOW, *a.* [*gheleuwe*, Belg. *gealewe*, Sax. *giallo*, Ital.] of a bright colour resembling gold.

YELLOWWEY, *s.* a plant with a naked divided stem, and yellow blossoms. It is also called small swine's succory.

YELLOWHAMMER, *s.* a bird.

YELLOWISH, *a.* approaching to yellow.

YELLOWNESS, *s.* the quality of being yellow.

YELLOW, *s.* a disease in horses. When the gall-pipe is stopped up, that matter which should be turned to gall is carried back into the blood, and tinctures it with yellow; so that the eyes, inside of the lips, slaver, and all the parts of the horse that are capable of shewing the colour, appear yellow.

YELLOWWEED, *s.* a genus of plants of which there are two British species, viz. the wild woad, or dyer's weed, and base rocket.

To **YELP**, *v. n.* [*gealpan*, Sax.] to bark or make a noise like a hound in pursuit of its prey.

YEOMAN, *s.* the highest degree among the plebeians of England, next in order to the gentry. Yeomen are pro-

perly freeholders, and use their own land. Also, a title of office in the king's household, between an usher and a groom. *Yeomen of the guards*, are foot-guards that attend the king's person, dressed after the manner of Henry the Eighth's time.

YEOMANRY, *s.* the collective body of yeomen.

YEOVIL, or *Ivel*, a town in Somersetshire, seated on the river Ivel, 4 miles S. of Ilchester, and 121 W. by S. of London. Here is a manufacture of leather gloves. Market on Friday for corn, cheese, hemp, flax, and provisions.

To **YERK**, *v. a.* [See **JERK**] to move or throw out with a spring.

YERK, *s.* a spring or quick motion.

To **YERN**, *v. a.* See **YEARN**.

YES, *ad.* [*gise*, Sax.] a term used to imply consent, assent, or affirmation, opposed to *no*. It is also used emphatically, for even so; not only so, but more. "Yes, you despise the man to books confin'd." *Pope*.

YESTER, *a.* [*ghister*, Belg.] being on the day preceding the present. "Whom *yester* sun beheld." *Dryd*. Seldom used, unless in composition.

YESTERDAY, *s.* [*gistandæg*, Sax.] the day last past; the day immediately preceding the present. Adverbially, on the day last past.

YESTERNIGHT, *s.* the night last past. Adverbially, on the night last past.

YET, *conj.* [*gyt*, or *get*, Sax.] nevertheless; notwithstanding; however. "Yet these imperfections being balanced by great virtues." *Dryd*.

YET, *ad.* beside; over and above; more than has been mentioned. "This furnishes us with *yet* one more reason." *Atterb*. Still; without any alteration. "While they were *yet* heathens." *Addis*. Once more. "Yet, yet, a moment." *Pope*. Used with a negative before it, at this time, or so soon. "Thales being asked when a man should marry, said, Young men not *yet*, old men not at all." *Bacon*. At least; hitherto. It denotes increase or extension to the sense of the words to which it is joined. It is used as a kind of emphatical addition to a negative, importing even; after all. "If any man neglect his duty, his fault must not be ascribed to the rule appointed, neither *yet* to the whole church." *Whitgift*.

YEW, *s.* a tree that grows naturally in England, and is of great use to form hedges for the shelter of exotic plants. It grows best in a moist loamy soil, and bears transplanting even when old. The wood is converted into bows, axle-trees, spoons, cups, cogs for mill-wheels, and floodgates for fish-ponds, which hardly ever decay.

To **YIELD**, *v. a.* [*geldan*, to pay, Sax.] to produce; to afford; to give as a due; to allow. "I *yield* it just." *Milt*. Used with *up*, to resign or surrender. Neuterly, to submit as conquered; to comply; to admit or allow; to give place to as an inferior in excellence, or any other quality.

YIELDER, *s.* one who yields.

YOKE, *s.* [*yeoc*, Sax.] the bandage placed on the neck of a draught horse. Figuratively, a mark of servitude; bondage; slavery. A link, chain, or bond. A couple or pair. A piece of wood placed on the shoulders, by means of which two pails are carried at once. *Yoke of land*, in our ancient customs, was so much land as two oxen could plough in a day.

To **YOKE**, *v. a.* to fasten to a carriage by a yoke. To join or couple with another. "Cassius, you are *yoked* with a lamb." *Shak*. To enslave or subdue. "He *yoketh* your rebellious necks." *Shak*.

YOKEFELLOW, or **YOKEMATE**, *s.* a companion in labour. "Yokefellow in arms." *Shak*. A mate; fellow.

YOLK, *s.* the yellow part of an egg. See **YELK**.

YON, **YOND**, **YONDER**, *ad.* and *a.* [*geond*, Sax.] at a distance within view.

YORE, or **OF YORE**, *ad.* [*geogara*, Sax.] long; of old time, or long ago. "He hath polluted oft and yore." *Spen.*

YORK, a city of Yorkshire, of which it is the capital, with an archbishop's see. It is seated on the river Ouse, and is generally counted the second city in England, though now surpassed in wealth and population by many of the more modern trading towns. It is certainly a very ancient place, and has undergone various revolutions; but is still a large and beautiful city, adorned with many fine buildings, both public and private; is very populous, and inhabited by gentry and wealthy tradesmen. It contains about 30 parish churches and chapels, besides its cathedral or minster, which is a most magnificent structure. It is divided by the river into two parts, which are united by a stately stone bridge of five arches. The eastern part is most populous, the houses standing thicker, and the streets being narrower. It is surrounded by a strong wall, on which are many turrets, or watch-houses; and there are four gates, and five posterns. It is a city and county of itself, enjoys large privileges, sends two members to parliament, and has the title of a duchy. It is governed by a lord mayor, 12 aldermen, and other officers; and its county contains 36 villages and hamlets. It is 65 miles S. by E. of Durham, 81 E. of Lancaster, and 195 N. by W. of London. Markets on Tuesday, Thursday, and Saturday.

YORKSHIRE, an English county, bounded on the E. by the German Ocean; on the N. by the county of Durham; on the W. by Westmoreland and Lancashire; and on the S. by Derbyshire, Nottinghamshire, and Lincolnshire. It is the largest county in England, being 115 miles in length, from E. to W. and 90 in breadth from N. to S. It contains 563 parishes, 60 market towns, and sends 30 members to parliament. The principal rivers are the Tees, that divides this county from Durham; the Swale, the Youre, the Nyde, the Ouse, the Warf, the Aire, the Calder, the Derwent, the Dun, and the Hull; besides the great river Humber, which is made up of many rivers. The air is generally temperate, but pretty cold on the tops of the hills, and on the borders of Durham. The soil in some places is very fruitful, in some barren, gravelly, and stony, and in others moorish, miry, and fenny. It is divided into three Ridings, the North, West, and East; besides which there is a fourth division, called Richmondshire, as also Cleveland, Craven, and Holderness, which are all included in the three Ridings. In so extensive a county the productions must be various, as well as the manufactures; and there are mines of iron, lead, and coal. York is the capital. The population of this county, in 1811, was as follows: viz. East Riding, 81,205 males, 86,148 females; N. Riding, 77,505 males, 80,699 females; W. Riding, 321,651 males, 331,351 females; total, 978,559.

YORK, NEW, one of the United Provinces of North America. It is bounded on the E. by Massachusetts Bay; on the N. by Canada; on the S. by New Jersey; and on the W. by Delaware River. It produces corn, abounds in cattle, and has a good breed of horses; and the inhabitants are much employed in fisheries. They export a great deal of dried and salted fish to Europe; as also logwood, train-oil, and whalebone.

YORK, NEW, a city of N. America, capital of the above state. It is seated at the S. W. point of the island, at the confluence of Hudson and East Rivers, and is about four miles in circumference. The situation is both healthy and pleasant. Surrounded on all sides by water, it is refreshed by cool breezes in summer, and the air in winter is more temperate than in other places under the same parallel. York Island is 15 miles in length, and hardly one in breadth. Except that of Rhode Island the harbour of New York,

(which admits ships of any burden,) is the best of the United States. A few houses here are built after the old Dutch manner, but the English taste has prevailed almost a century. In time of peace, more commercial business is done here than in any other port in the United States. The number of inhabitants in 1820, was 123,706. Lat 40. 43. N. lon. 74. 5. W.

YOU, *pron.* [*yow*, the accusative plural of *thu*, thou, Sax.] This word is used when we speak to more than one; but by custom has been applied by way of ceremony, even when we address a single person. It is sometimes used indefinitely for any person, in the same sense as *on*, Fr. "But as *you* come near it, *you* see nothing but a long heap of heavy disjointed clods." *Addison*.

YOU'GHALL, a considerable town of Ireland, in the county of Cork. It has a very commodious harbour, and a fine, well-defended quay. It is seated at the mouth of the river Blackwater, 25 miles N. E. of Cork.

YOUNG, *a.* [*yeong*, Sax. *jong*, Belg.] not born many years; being in the first part of life. Figuratively, ignorant, unexperienced. Applied to vegetables, newly grown.

YOUNG, *s.* the offspring of animals collectively.

YOUNGISH, *a.* somewhat young.

YOUNGSTER, or **YOU'NKER**, *s.* [the first word is only used] a young person: a word of contempt.

YOUR, *pron.* [*eower*, Sax.] belonging to you. It seems to be rather the genitive plural of *yower*, from *ge*, you, Sax. and on that account is seldom used but when we speak to more than one, unless when we compliment a person; and in that sense it is that we add the *s* final, a sign of the genitive singular, more particularly so when the substantive goes before, or is understood. "'Tis managed by an abler hand than *your's*." *Dryd.* "It is *your's* to transmit." *Pope*.

YOURSELF, *pron.* [from *your* and *self*] you, exclusive of any other.

YOUTH, *s.* [*yeoguth*, Sax.] that part of life which is between childhood and manhood, generally reckoned from 14 to 28; adolescence; a young man. Young men, used collectively.

YOUTHFUL, *a.* young; suitable to youth; vigorous; playful.

YUCK, *s.* [*jocken*, Belg.] the itch.

YULE, *s.* [*yeol*, *geol*, or *yehul*, Sax.] the time of Christmas, or Christmas-tide.

YUX, *s.* [*yeox*, Sax.] the hiccough. It is sometimes pronounced *yex*.

Z.

Z Is the twenty-fourth letter, and nineteenth consonant of our alphabet; the sound of which is formed by a motion of the tongue from the palate downwards and upwards to it again, with a shutting and opening of the teeth at the same time. This letter sounds like the hard *s*, though some reckon it a double consonant, having the sound of *ds*; but to this others object, since we often double it, as in *puzzle*, *muzzle*, *guzzle*, &c. Among the ancients, Z was a numeral, signifying 2000, and with a dash over it, thus, *Z̄*, it signified 2000 times 2000, or four millions. It is placed before all vowels, as in *zany*, *zeal*, *zinc*, *zodiac*, *Zurich*; but before none of the consonants, except *l*, as in *puzzle*, *guzzle*, &c.

ZACHARIAH, or **ZECHARIAH**, a canonical book of the Old Testament, containing the predictions of Zechariah, the son of Barachiah, and grandson of Iddo. He is the eleventh of the twelve lesser prophets. He entered upon the prophetic office at the same time with Haggai, *i. e.* about 527 years before the Christian æra, and was sent to

the Jews upon the same message, to reprove them for their backwardness in erecting the temple, and restoring divine worship; but especially for the disorder of their lives and manners, which could not but derive a curse upon them. This prophet is the longest and most obscure of all the lesser prophets, his style being interrupted, and without connection.

ZA'FFER, **ZA'FFAR**, **ZA'FFIR**, or **ZA'FFRE**, *s.* in Chemistry, the name of a blue substance, of the hardness of stone, and generally supposed to be a native fossil; but really is a preparation of cobalt, *i. e.* the calx of that mineral mixed with powdered flints, and wetted with water.

ZAHARA, or *The Desert*, a vast country of Africa, stretching from near the Atlantic Ocean on the W. to Barca and Nubia on the E. and from Biledulgerid on the N. to Nigritia and the river Senegal on the S. It comprehends a space of about 600 miles from N. to S. and 1800 from W. to E. The inhabitants are a mixture of wandering nations, proceeding from Arabs, Moors, Portuguese refugees, &c. subject to a number of petty princes. The commodities are camels, horned cattle, horses, dates, the fat and feathers of ostriches, and the gum Senegal.

ZANGUEBA'R, a country of Africa, little known, situated on the eastern coast, between lat. 2. 0. N. and 18. 0. S. The inhabitants are partly of the Romish faith, and partly Mahometans, but mostly Pagans. The Portuguese trade with the natives for slaves, ivory, gold, ostrich feathers, furs, wax, and drugs.

ZANTE, an island on the coast of the Morea, in the Mediterranean sea. It is about 24 miles long, and 12 broad, is a very fertile spot, and is noted for producing currants.

ZAINY, *s.* a person who endeavours by odd gestures and expressions to excite laughter; a merry-andrew, or buffoon.

ZA'RNICH, *s.* a solid substance in which orpiment is found. It approaches to the nature of orpiment, but without its lustre and foliated texture. The common kinds of *zarnich* are green and yellow.

ZEAL, *s.* [*ζῆλος*, Gr. *zelus*, Lat.] a passionate ardour or affection for any thing, person, or cause.

ZEALAND, one of the United Provinces of the Netherlands, is separated by the sea on the N. from the isles of S. Holland; by the Scheldt on the E. from Brabant; by the Hont from Flanders; and on the W. it is bounded by the German ocean. It comprehends 8 islands, 3 of which are pretty large. Their names are Walcheren, Schowen, S. Beveland, N. Beveland, Tolen, Duyveland, Wolfersdike, and St. Philip. There are likewise 6 or 7 others, of little importance. The inhabitants defend themselves from the encroachments of the sea by their dykes, which, at the bottom, are generally 25 German ells in breadth, and are so wide at the top, that two carriages may pass abreast. In high tides and stormy weather, the waves, however, often force a passage, and even flow over them. The inhabitants in general are extremely wealthy, being maintained by their plentiful fisheries, and trade with foreign nations. The soil is fruitful in these islands, but the air unhealthy for strangers, though not for the natives.

ZEALAND, NEW, lies between 34 and 48 deg. south latitude, and between 106 and 180 degrees east longitude. It consists of two large islands, separated by a strait, about 5 leagues broad, called Cook's Straits. The inhabitants are robust, of a dark complexion, fierce and warlike.

ZEALAND, an island of Denmark, in the Baltic, of a triangular form, and about 300 miles in circumference. It is bounded on the N. by the Scaggerack; on the E. principally by the Sound; on the S. by the Baltic; and on the W.

by the Great Belt. The coast is much intersected with large bays; and within the country are several lakes, which, together with the rivers, abound in fish. In most parts is plenty of wood, except towards the centre of the island, where turf is generally used for fuel. It is the largest of the isles of Denmark, and exceedingly fertile, producing grain of all sorts, and in great plenty, and abounding with excellent pasture. It is particularly famous for its breed of horses. Copenhagen, the capital of Denmark, is seated on the east shore of this island, in lat. 55. 41. N. and lon. 12. 35. E.

ZE'ALOT, *s.* [*ζηλωτης*, Gr.] one that espouses any cause with great ardour or passion; a bigot; generally used in dispraise.

ZE'ALOUS, *a.* espousing any cause with passion.

ZE'ALOUSLY, *ad.* with passionate ardour.

ZE'BRA, *s.* the wild ass, an extremely beautiful animal, transversely striated, or party-coloured, and about the size of a common ass; it is a native of many parts of the East.

ZE'CHIN, *s.* [from *ZECIA*, in Venice, where the mint is settled for coinage] a gold coin worth about nine shillings sterling.

ZED, *s.* the name of the letter z. Figuratively, a crooked person, formed like the letter Z. A worthless insignificant person.

ZEDOARY, *s.* [*zedoaire*, Fr.] a spicy plant, somewhat like ginger in its leaves, but of a sweet scent.

ZE'MBLA, NOVA, a large island lying in the Northern Ocean, to the N. of Russia, from which it is separated by the Strait of Waigate, about 500 miles in length, and from 100 to 200 in breadth. It was first discovered by the English in 1553. Its inhabitants are chiefly wild beasts, particularly white foxes, bears, elks, reindeer, and rabbits; yet a few human beings have been seen here at times. Lat. 71. to 78. N. lon. 53. 45. to 72. 49. E.

ZEND, a book containing the religion of the Magians, or worshippers of fire, who were disciples of the famous Zoroaster. This book was composed by Zoroaster during his retirement in a cave, about 626 years before Christ, and contained all the pretended revelations of that impostor.

ZE'NITH, *s.* [Arab.] the point in the heavens, directly over one's head, opposite to the Nadir.

ZEPHANIAH, a canonical book of the Old Testament, containing the predictions of Zephaniah the son of Cushi, and grandson of Gedaliah; being the ninth of the twelve lesser prophets. He prophesied in the time of king Josiah, about 626 years before Christ, a little after the captivity of the ten tribes, and before that of Judah; so that he was not contemporary with Jeremiah.

ZEPHYR, or **ZEPHYRUS**, *s.* [*zephyrus*, Lat.] the west wind; poetically applied to any calm, soft, or gentle wind.

ZEST, *s.* the peel of an orange squeezed into wine; a relish or taste superadded to any thing. The woody thick skin quartering the kernel of a walnut.

To **ZEST**, *v. a.* to heighten by an additional relish.

ZETETIC METHOD, *s.* [from *ζητέω*, to seek, Gr.] in Mathematics, the method made use of to investigate or solve a problem.

ZEUGMA, *s.* [*ζεύγμα*, Gr.] a figure in Rhetoric, wherein an adjective or verb, which agrees with the next word, is likewise applied to one or many more remote.

ZIGZAG, *a.* having many short turnings; turning this way and that.

ZINGIBER, or **ZINZIBER**, *s.* [*zingiber*, Lat.] ginger.

ZINK, or **ZINC**, *s.* a very remarkable fossil substance resembling bismuth, but of a blue colour, and is really the

lapis calaminaris, and has the same effects on copper, by turning it into brass.

ZO'CLE, *s.* in Architecture, a small sort of stand or pedestal, being a low square piece or member, serving to support a busto, statue, or the like, that needs to be raised; also a low square member serving to support a column instead of a pedestal, base, or plinth.

ZO'DIAC, *s.* [*ζωδιακός*, from *ζῳδιον*, Gr. *zodiacus*, Lat.] in Astronomy, is a broad circle, whose middle is the ecliptic, and its extreme two circles parallel thereto, at such a distance from it, as to bound or comprehend the excursions of the moon and planets. It is divided into twelve portions, called signs, and those divisions or signs are denominated from the constellations which anciently possessed each part; but the Zodiac being immoveable, and the stars having a motion from west to east, those constellations no longer correspond to their proper signs, whence arises what we call the precession of the equinoxes.

ZONE, *s.* [*ζώνη*, Gr. *zona*, Lat.] in Geography, is a division of the terraqueous globe with respect to the different degrees of heat or cold found in the different parts thereof. The earth is divided into five unequal parts called zones, viz. the torrid, two temperate, and two frigid. The torrid zone comprehends all those parts of the earth that lie within the two tropics, the breadth being $46^{\circ} 56'$; the north temperate is bounded by the arctic circle on the north, and the tropic of Cancer on the south, being $43^{\circ} 4'$ in breadth. The south temperate extends from the tropic of Capricorn on the north, to the antarctic circle on the south, and is exactly of the same breadth with the former. The north frigid takes in all those parts of the earth comprehended within the arctic circle, having the north pole on the centre, and is $46^{\circ} 56'$ in diameter. The south frigid comprehends an equal portion of the earth with the former, having the south pole in the centre. A circle; circuit; circumference.

ZOO'GRAPHER, *s.* [from *ζῳον* and *γράφω*, Gr.] one who describes the nature, properties, and forms of animals.

ZOO'GRAPHY, *s.* [from *ζῳον* and *γράφω*, Gr.] a description of the forms, nature, and properties of animals. "We are thereby conducted into *zoography*," *Grew*.

ZOO'LOGY, *s.* [*ζῳον* and *λόγος*, Gr.] the science of animals. Artedi observes, that this makes one of the three kingdoms, as they are called, of natural history; the vegetable and mineral being the two others; in these, however, there is this difference made by writers, that while vegetables and minerals are treated of together, as all of a piece in each, the subjects of *Zoology* are divided; and it is made to compose, as it were, several kingdoms. The subjects of it are accordingly divided into six several families. 1. The airy quadrupeds. 2. The birds. 3. The amphibious animals, such as serpents, lizards, frogs, and tortoises. 4. The fishes. 5. The insects. And, 6. That lowest order of animated beings, the zoophytes.

ZOO'PHYTE, *zo-o-fite*, *s.* [*ζωόφυτα*, from *ζῳον* and *φύω*, Gr.] a vegetable or plant which partakes both of the nature of plants and animals.

ZOO'PHORIC, *a.* [*ζωοφόρος*, from *ζῳον*, an animal, and *φέρω*, to bear, Gr.] bearing an animal. A *zoophoric column*, in Architecture, is that which bears or supports the figure of an animal.

ZOO'PHORUS, *s.* [from *ζωοφόρος*, Gr.] the frieze of a column, or that part which is between the architrave and cornice; so called from the ornaments resembling animals carved upon it.

ZOO'TOMIST, *s.* [from *ζῳον* and *τέμνω*, Gr.] a person who dissects animals.

ZOO'TOMY, *s.* [from *ζῳον* and *τέμνω*, Gr.] the dissection of the body of beasts; called likewise *comparative anatomy*.

ZUG, one of the cantons of Switzerland; bounded on the E. and N. by that of Zurich; on the W. by that of Lucern, and the free provinces; and on the S. by that of Schweitz. The inhabitants are Roman Catholics; and it is divided into three parts, one of which is the town of Zug, and the others the villages about it, which comprehends the assemblies, namely, Bar, Mentize, and Val Egeric. It is rich in pasturage; and has plenty of various kinds of stone fruit, as well as walnuts and cheshuts.

ZUIDER-ZEE, a great bay of the German ocean, which extends from N. to S. in the Netherlands, between Friesland, Overysse, Guelderland, and N. Holland.

ZU'INGLIANS, a branch of the ancient Christian reformers, or Protestants, so called from their author Huldric Zuinglius, a divine of Switzerland, who soon after Luther had declared against the church of Rome, and being then minister of the church of Zurich, fell in with him, and preached openly against indulgencies, the mass, the celibacy of the clergy, &c. but differed from Luther about the Eucharist.

ZU'RICH, *The Canton of*, is one of the 13 cantons of Switzerland, and the first in rank, being about 50 miles in length, and 30 in breadth. It is bounded on the N. by the Rhine, which separates it from the canton of Schaffhausen; on the S. by that of Schweitz; on the E. by Thurgaw and the county of Tockenbourg; and on the W. by the canton of Zug, and the free provinces. The soil is fertile in corn, produces all sorts of fruits, and there are some vineyards, as well as rich pastures. This canton is well peopled, the inhabitants are very laborious, and have a famous manufactory in crapes. They were the first that embraced the Reformation, and the noted reformer Zuinglius was born here.

ZU'RICH, the capital of the above canton, is situated at the northern extremity of the lake of Zurich, and is one of the best-built cities in this country, with a population of about 12,000 inhabitants. It is 40 miles S. E. of Basle. Lat. $47^{\circ} 20'$. N. lon. $8^{\circ} 35'$ E.

ZY'GOMA, *s.* [*ζύγωμα*, Gr.] in Anatomy, is a bone of the head, otherwise called *os jugale*, being no single bone, but a union or assemblage of two processes, or eminences of bones; the one from the *os temporis*, the other from the *os male*: these processes are hence termed the zygomatic process, and the suture that joins them together is denominated the zygomatic suture.

ZYGOMATIC, *a.* See **ZYGOMA**.

ZYMO'MA, *s.* [*ζύμωμα*, Gr.] any thing which promotes or causes fermentation.

ZYMOSIMETER, *s.* [*ζύμωμα* and *μέτρον*, Gr.] an instrument proposed by the ingenious naturalist Swammerdam, to measure the degree of fermentation occasioned by the mixture of different matters, and the degree of heat which those matters acquire in fermenting; as also, the heat or temperature of the blood of animals.

ZYTHO'GALA, *s.* [*ζύθος* and *γαλα*, Gr.] a beer posset, a drink recommended by Sydenham to be taken after a vomit.

Z. Z. a character made use of by the ancient physicians to signify myrrh, and by the moderns to signify ginger.

OF THE

CONSTITUTION AND GOVERNMENT

OF

GREAT BRITAIN.

ONE of the most useful branches of knowledge, and of which no Briton should be ignorant, is that of the Constitution of his native country. This is absolutely necessary in a nation where all are politicians, and where all are governed only by those laws which they or their fathers, either personally or by their representatives, were instrumental in forming.

The Government of England was founded on principles of liberty; its Constitution is the work of a brave and wise people, who, considering that all power was derived from them, and was to be subservient to their happiness, committed it into the hands of the three states, who were to be a mutual support, and a mutual check, to each other, and yet so ordered, that the interest of each is best promoted by each confining itself within its proper bounds.

The King, who is here invested with the highest prerogative, has all the honours and all the splendour of majesty, and is only limited where power might become tyranny, and where he might be capable of injuring either himself or his people. By this means, we reap all the advantages, without any of the evils, of a monarchical government. "A king," says a noble author, "has a divine right to govern well. A divine right to govern ill, is an absurdity; and to assert it is blasphemy." The king of England has the power of doing good in its fullest extent. This is the only power that can give him true dignity and distinguished honour; for it is not the least diminution of his glory, that he is confined from doing what would tarnish his reputation, and render him infamous to posterity: on the contrary, this is a circumstance that renders him truly great, and raises him above all the tyrants of the earth: "Our king," says a modern patriot, "in the trust and dignity of his office, transcends all other kings and emperors on the globe, as far as we excel all other subjects in liberty; so that he may not unjustly be called a king of kings, while most of the mighty monarchs of other nations are no more than the masters of some herds of slaves." The king of England receives all his honour, power, and authority from the laws; and therefore, at his mounting the throne, he binds himself by a solemn oath to make them the rule of his conduct, and before he receives one oath of allegiance, is obliged to swear to observe the great charter of the English liberties, and thus, at his coronation, renews the original compact between the king and his subjects. He then becomes the head of the state, the supreme earthly governor, and is himself subject to none but God and the laws,

to which he is as much bound to pay obedience as the meanest subject. Though he has not the power of making laws, yet no law can be enacted without his consent; and though the execution of them is always entrusted to his care, he cannot seize the property of the most inconsiderable man in his dominions, except it be forfeited by law. On the contrary, the subject may, without the least danger, sue his sovereign, or those who act in his name, and under his authority; he may do this in open court, where the king may be cast, and be obliged to pay damages to his subject. He cannot take away the liberty of the least individual, unless he has by some illegal act forfeited his right to liberty; or except when the state is in danger, and the representatives of the people think the public safety makes it necessary that he should have the power of confining persons, and seizing their papers, on a suspicion of guilt; but this power is always given him only for a limited time. The king has a right to pardon, but neither he nor the judges, to whom he delegates his authority, can condemn a man as a criminal, except he be first found guilty by twelve men, who must be his peers or his equals. That the judges may not be influenced by the king, or his ministers, to misrepresent the case to the jury, they have their salaries for life, and not during the pleasure of the sovereign. Neither can the king take away or endanger the life of any subject without trial, and the persons being first chargeable with a capital crime, as treason, murder, felony, or some other act injurious to society; nor can any subject be deprived of his liberty for the highest crime, till some proof of his guilt be given, upon oath, before a magistrate; and he has then a right to insist upon being brought, the first opportunity, to a fair trial, or to be restored to liberty on giving sufficient bail for his appearance. If a man is charged with a capital offence, he must not undergo the ignominy of being tried for his life, till the evidences of his guilt are laid before the grand jury of the town or county in which the fact is alleged to be committed, and not without twelve of them agreeing to find the bill of indictment against him. If they do this, he is to stand a trial before twelve other men, whose opinion is definitive. In some cases, the man (who is always supposed innocent till there is sufficient proof of his guilt) is allowed a copy of his indictment, in order to help him to make his defence. He is also furnished with the pannel, or list of the jury, who are his true and proper judges, that he may learn their characters, and discover whether they want abilities,

or whether they are prejudiced against him. He may, in open court, peremptorily object to twenty of the number,* and to as many more as he can give any reason for their not being admitted his judges, till at last twelve unexceptionable men, the neighbours of the party accused, or living near the place where the supposed fact was committed, are sworn to give a true verdict according to the evidence produced in court. By challenging the jury, the prisoner prevents all possibility of bribery, or the influence of any superior power; by their living near the place where the fact was committed, they are supposed to be men who know the prisoner's course of life, and the credit of the evidence. These only are the judges, from whose sentence the prisoner is to accept life or death; and upon their integrity and understanding, the lives of all that are brought in danger ultimately depend, and from their judgment there lies no appeal: they are therefore to be all of one mind, and, after they have fully heard the evidence, are to be confined without meat, drink, or candle, till they are unanimous in acquitting or condemning the prisoner. Every jurymen is, therefore, invested with a solemn and awful trust. If he, without evidence, submits his opinion to that of any other of the jury, or yields in complaisance to the opinion of the judge; if he neglect to examine with the utmost care; if he question the veracity of the witnesses, who may be of an infamous character; or, after the most impartial hearing, has the least doubt upon his mind, and yet joins in condemning the person accused,—he will wound his own conscience, and bring upon himself the complicated guilt of perjury and murder. The freedom of Englishmen consists in its being out of the power of the judge on the bench to injure them, for declaring a man innocent, whom he wishes to be brought in guilty. Were not this the case, juries would be useless; so far from being judges themselves, they would only be the tools of another, whose province it is not to guide, but to give a sanction to their determination. Tyranny might triumph over the lives and liberties of the subject, and the judge on the bench be the minister of the prince's vengeance.

These are the glorious privileges which we enjoy above most nations upon earth. Juries have always been considered as giving the most effectual check to tyranny; for in a nation like this, where a king can do nothing against law, they are a security that he shall never make the laws, by a bad administration, the instrument of cruelty and oppression; were it not for juries, the advice given by father Paul, in his maxims of the republic of Venice, might take effect in its fullest latitude. "When the offence is committed by a nobleman against a subject," says he, "let all ways be tried to justify him; and if that is not possible to be done, let him be chastised with greater noise than damage. If it be a subject that has affronted a nobleman, let him be punished with the utmost severity, that the subjects may not get too great a custom of laying their hands on the patrician orders." In short, were it not for juries, a corrupt nobleman might, whenever he pleased, act the tyrant, while the judge would have that power which is now denied to our kings. But by our happy Constitution, which breathes nothing but liberty and equity, all imaginary indulgence is allowed to the meanest as well as the greatest. When a prisoner is brought to take his trial, he is freed from all bonds; and though the judges are supposed to be counsel for the prisoner, yet, as he may be

incapable of vindicating his own cause, other counsel are allowed him: he may try the validity and legality of the indictment, and may set it aside, if it be contrary to law. Nothing is wanting to clear up the cause of innocence, and to prevent the sufferer from sinking under the power of corrupt judges, and the oppression of the great. The racks and tortures that are cruelly made use of in other parts of Europe, to make a man accuse himself, are here unknown, and none punished without conviction, but he who refuses to plead in his own defence.

But after all this, does the king lose any part of his real dignity, by not having the power to interfere, to rob and murder, at pleasure? No, his honour results from the safety of his subjects, and the godlike power of diffusing only happiness, by a strict observance of the laws, and in sometimes softening the rigour of them with mercy. The royal prerogative consists in the right of declaring war and making peace; in giving his assent to such new laws as he apprehends will be for the good of his subjects, and withholding it, when he believes that they will be hurtful: he is invested with the power of assembling, adjourning, proroguing, and dissolving the Houses of Parliament, and consequently of putting a stop to the consultations of both, when he believes that they are acting inconsistent with the rights of each other, and the good of the community. He has the liberty of coining money. He is the fountain of honour; but though he gives nobility, their independence is secured by his not having it in his power to take it away. He has the right of commanding the army, and the militia is under his control. His person is sacred; and a subject, for a single act of treason, not only loses his life, but his heirs are deprived of his estate. He is allowed a Privy Council, to assist him with their advice; and the persons of those members of which this council is composed, are also sacred. He has the supreme power in all causes, ecclesiastical as well as civil, by which the clergy are divested of all dominion over the conscience, which is wisely left to Him to whom it properly belongs—to that God, who alone can search the heart;—and by this means persecution is prevented, and religious liberty secured.

In every kingdom, and in every state, there are always persons distinguished by birth, riches, and honours; advantages which give them such a considerable weight in the government, that were they to be confounded with the multitude, they would have no interest in supporting liberty; for as most of the popular resolutions would be made to their prejudice, the public liberty would be their slavery. The share they are therefore allowed in the legislature, is in proportion to the interest they have in the state; and from hence it is that they form a body of nobles, that has a right to put a stop to the enterprises of the people, to counterbalance the right which the people enjoy, of putting a stop to their encroachments.

The Legislative power is committed to these two bodies, to that of the nobles, and that of the representatives of the people, each of which have separate views and interests. But here there is this essential difference; for while the individuals who compose the House of Commons enjoy their power but for a limited time, and can only be restored by new powers given them by their constituents, the privileges enjoyed by the members of the House of Lords are in their own nature hereditary. And this is the more necessary, as their high prerogatives render them subject to popular envy, and consequently their privileges must, in a free state, be always in danger. The only disadvantage that can possibly arise from this is, that as their power is

* The party may challenge thirty-five in case of treason, and twenty in case of felony, without shewing any cause, and as many more as he can assign cause against.

hereditary, they might be tempted to pursue their own interest, to the prejudice of the public; and, therefore, to prevent this, where they might receive the greatest pecuniary advantages from being corrupt, as in the case of granting supplies, they have only the power of refusing, while the Commons alone have that of enacting.

The great, we have already said, are always exposed to popular envy; and therefore, were they to be judged by the people, they might be in the greatest danger from their judges; they would then want the privilege of being tried by their peers, a privilege enjoyed by the meanest subject. They are therefore not to be tried by the ordinary courts of judicature, but by that part of the legislature of which each is a member. As all human compositions must be defective, and the best laws in some instances too severe; and as the national judges are mere passive beings, incapable of moderating either the force or rigour of the laws, this part of the legislature is here, as well as in the former case, a necessary tribunal, to whom it belongs to moderate the law. In their decisions, they give not their opinions upon oath; but each laying his right hand on his heart, gives his verdict upon the single testimony of his honour. Thus are the lords invested with every outward mark of dignity, and with all the privileges necessary to maintain their rank in all its splendour; and yet are so limited, that they have not the power to encroach upon the rights and liberties of the inferior subjects.

But while the privileges of the lords are preserved, and other wise purposes answered by their having a share of the legislative power, the privileges of all inferior persons are secured by every man's having, either in person or by his representative, a share in the legislature, by which means no laws can be enacted or repealed, without the consent of the representatives of the majority of the nation. Thus the liberties of the commons are as strongly secured as the royal prerogatives, or as the privileges of the lords. The commons are the guardians of the public liberty; they are the deputies sent up from all quarters to make such laws as shall best promote the interest of the whole collective body. And though they have not the power of examining the meanest subject upon oath, yet they can search into the conduct of the highest peer in the realm, and, in the name of the people, impeach the favourite or minister of the king. They can call the judges to an account for the mal-administration of their office, and bring all those to justice who make an ill use of their power. Thus the commons are the grand jury of the nation; but as it would be improper that those who are impeached in so high a court should be tried by a lower, which might be intimidated and overawed by the power of the commons, therefore, to preserve the dignity of the peers, and the security of the subject, those whom they impeach are tried by the lords, whose superior dignity sets them above all influence, and who have neither the same interests nor the same passions.

Thus our happy Constitution consists of three states, each of which has separate privileges, each is a check upon the other, and yet each is equally dependent. The first, which is the executive power, has the privilege of assembling, adjourning, proroguing, and dissolving the two legislative bodies: because these are supposed to have no will, except when they are assembled; and when they were assembled, if they had the right to prorogue themselves, they might never be prorogued; they might encroach on the executive power; they might become despotic, and even one of these might destroy the liberties of the other. But as the executive power might make an ill use of this

privilege, by never assembling the legislative, it is rendered dependent on these bodies, by their holding the sinews of government in their hands, and the granting the necessary supplies only from year to year. The king, indeed, has a power to raise what forces he pleases; but the representatives of the people, who grant the supplies, can only determine what number he shall be enabled to pay.

But while the representatives of the people have thus the important charge of watching over the preservation of our liberties, our trade, and our property, what care ought every county, city, and borough to take, to chuse such only as are qualified for performing this important task; for chusing such whose integrity will render them superior to the temptation of a bribe, whose wisdom is capable of managing our interests, and whose greatness of soul will make them think that they can never do too much for their country, and for their constituents. He who parts with his vote, and for a lucrative or selfish consideration, is instrumental in chusing one whom his conscience disapproves, and who is unqualified or corrupt, is a *fool* and a *madman*; is unworthy the name of a freeman, since he, as much as is in his power, sells himself and his country, and can never have the least reason to complain, if he should live to see this happy Constitution overturned, and our liberty and all our privileges destroyed.

Having thus given a view of the British Constitution in general, we shall now present the reader (by way of supplement to it) with a general sketch of the Government of England. The reader will find some few particulars, respecting our Courts of Justice, and Ecclesiastical Government, interspersed under different heads in various parts of the DICTIONARY. It was thought, however, that the very few repetitions it may occasion, will be amply compensated by the comprehensive but complete view this sketch will afford the young reader, of the internal Government of these kingdoms.

OF THE ECCLESIASTICAL GOVERNMENT, AND COURTS.

The Convocation formerly, at least, had the principal part of the Ecclesiastical Government; for this is a national synod of the clergy assembled together, to consider of the state of the Church, and to call those to an account who have broached new opinions inconsistent with the doctrines of the Church of England. But in a late reign, they having been thought to proceed with too great severity against the delinquents of this kind, they have not been permitted to sit any long time since. However, they are called together at the same time as the parliament, by the authority of the king, who directs his writs to the archbishop of each province to summon all bishops, deans, archdeacons, &c. to meet at a certain time and place. The Convocation consists of one proctor sent from each cathedral and collegiate church, and two from the body of the inferior clergy of each diocese. The Upper House in the province of Canterbury consists of the archbishop, who is president, and twenty-two bishops; and the Lower House is composed of all the deans, archdeacons, and proctors, as above; in all, one hundred and sixty-six. The archbishop of York may likewise hold a convocation at the same time.

King Henry the VIIth's chapel at Westminster is generally the place of meeting for the province of Canterbury; and York for the province of York. The first business of the Lower House is to chuse a prolocutor, who is presented to the Upper House by two of the members; one of them

making a speech in Latin, and the prolocutor another; to which the archbishop returns an answer in the same language.

Under these two archbishops there are twenty-four bishops; that is, twenty-one in the province of Canterbury, and three in the province of York. These have all the title of lords, on account of the baronies annexed to the bishopric; and they take place of all other barons, as well in parliament as in other assemblies. The first of these is the bishop of London, who is dean of the episcopal church of that province; the next is Durham, and then Winchester; but all the rest take place according to the seniority of their consecrations.

The business of a bishop, according to the episcopal order, is to ordain priests and deacons, to consecrate churches and burying places, and to administer the rites and ceremonies of confirmation.

The jurisdiction of a bishop relates to the probate of wills; to grant administration of goods to such as die intestate; to take care of perishable goods when no one will administer; to collate benefices; to grant institutions to livings; to defend the liberties of the church; and to visit his own diocese once in three years. Besides these, there are many other particulars which our room will not permit us to mention.

The Court of Arches is the most ancient consistory of the province of Canterbury, and all appeals in church matters are directed to this court. The processes run in the name of the judge, who is called dean of the arches; and the advocates who plead in this court must be doctors of the civil law. The Court of Audience has the same authority as this, and the archbishop's Chancery was formerly joined to this. The Prerogative Court is that wherein wills are proved, and administrations taken out.

The Court of Peculiars, relating to certain parishes, have a jurisdiction among themselves for the probate of wills; and therefore are exempt from the bishop's Courts. The See of Canterbury has no less than fifty-seven of these Peculiars.

The Court of Delegates is so called, because it consists of commoners delegated or appointed by the royal commission; but it is no standing court.

Besides these, every bishop has a court of his own, which is held in the cathedral of his diocese, and is called the Consistory Court. Likewise, every Archdeacon has his Court, as well as the dean and chapter of every cathedral.

OF THE PARLIAMENT OF THE UNITED KINGDOM.

This august body consists of two Houses, one of which is called the House of Lords, and the other the House of Commons. Before the union of Scotland, the House of Lords consisted of the spiritual and temporal Peers of England; and the House of Commons of 513 knights, burgesses, and citizens. But since the union, there are sixteen Peers of Scotland added to the House of Lords, and 45 Commoners to the House of Commons. The first of these are chosen before the sitting of every new Parliament, by the Peers of Scotland, out of their own body. In the year 1801, the union between Great Britain and Ireland took place, and the first parliament met on the 22d of January.—Ireland sends 4 spiritual and 28 temporal lords, and 100 commoners, to meet in the Imperial Parliament. The whole number of members in the House of Commons is 658.

The design of Parliaments is, to maintain the Constitu-

tion, to support the dignity of the crown, and to keep inviolable the privileges of the people. They are also to raise subsidies, to make laws, and to redress all public grievances. The power of calling a Parliament, and of adjourning and proroguing the same, is entirely lodged in the sovereign.

The sitting of the Parliament is appointed by the king's proclamation, with the advice of the privy council; and in choosing a new one, writs are issued out by the Lord Chancellor to the lords to appear at the time and place appointed. Writs are also sent to the sheriffs of every county, commanding them to summon the electors, to chuse as many knights, citizens, and burgesses, in their respective counties, as are to sit in the House of Commons. The writs for Scotland are directed to the privy council, for summoning the 16 Peers, and for electing 45 members.

No judge, sheriff, or clergyman, can be elected; and no gentleman can be elected for a county unless he has 600*l.* a year; nor for a city or borough, unless he has 300*l.* a year. Formerly Parliaments met at different places in the kingdom; but of late they assemble at Westminster, at what was formerly called St. Stephen's chapel.

When the king comes to Parliament, the Usher of the Black Rod is ordered to call the Commons up to the House of Lords, where they stand without the bar, and the king commands them, by the lord Chancellor, to chuse one of the members for their speaker, and to present him such a day. The choice being made by a majority of votes, at the day appointed he is presented to the king in the House of Lords, between two members, for his approbation. The lord Chancellor, or keeper for the time being, is always speaker for the House of Peers. Since the Reformation, no Roman Catholic can sit in either House, till he has first taken the oaths.

Though the number of the House of Commons is so great, yet 300 are commonly reckoned a full House; and there can be no business done if there are less than forty. At the first meeting of the Parliament, they always appoint standing grand committees, for privileges, elections, grievances, trade, and religion.

The chief business of the Parliament is to revive and abrogate old laws, and to make new ones; but whenever a new law is proposed, it must be first put in writing, and then it is called a Bill; but the Commons only have the power of introducing money-bills. Before any bill can pass into a law, it must be read three several times in each House, except a bill of indemnity, which requires only once reading. The leave of the House must be obtained to bring in any private bill, and the House must be acquainted with the substance of it, either by motion or petition. After it has been read the first time, the speaker recites an abstract of the bill, and puts the question whether it shall be read a second time or not. But if a bill comes from the House of Lords, so much favour and respect is shewn, that if it be spoken against in the first reading, the speaker puts the question for the second reading before it is rejected, if that should be the case. Bills are seldom read twice the first day, unless upon very extraordinary occasions, that require the utmost expedition. Upon the second reading, if none speak against the bill, and several for it, the speaker may put the question for engrossing it.

When debates arise upon the second reading, and they are over, the House commonly calls for committing the bill to the committee of the whole House, or to a select committee. Sometimes it may happen, the bill may be re-committed before the speaker puts the question for engrossing. After a bill has been engrossed, it is to be read

a third time in order to have it passed. But when any debate happens, after it is over, the speaker holds the bill in his hand, and says, "As many as are of opinion that this bill should pass, say *yes*; and as many as are of the contrary opinion, say *no*." Upon which he informs the House, whether the *yea's* or *no's* have it. But when the thing is doubtful, two tellers are appointed for each side, one to number the *yea's* and the other the *no's*; however, the question is first put, which of these shall go out of the House, and this is called *dividing* the House. After the numbering them is over, the tellers declare to the speaker the number of *yea's* and *no's*; upon which all return to their places. If the *no's* have it, the bill is said to pass in the negative. But if it passes in the affirmative, they order it to be sent to the House of Lords for their concurrence.

When a bill is sent by the Lords to the Commons, they send none of their members, but only masters in Chancery, who deliver the bill to the speaker. When there is a disagreement in the Houses about a bill, a conference is demanded, which is held in the painted chamber. In voting in the House of Lords, they begin with the lowest baron, and so proceed to the highest peer; who each for himself says *content*, or *not content*; and if the voices are equal, the negative carries it. After an adjournment of either House, they may resume the business they were upon; but after a prorogation they cannot, for then the session is ended. Every one knows, that after a dissolution of the old Parliament, a new one must be elected, in the manner mentioned above.

OF THE COURTS OF JUSTICE.

The Courts of Justice, sitting at Westminster, are open four times a year; that is, at Easter, Trinity, Michaelmas, and Hilary terms. There are four Courts, namely, the Courts of Chancery, King's Bench, Common Pleas, and the Court of Exchequer; not to mention that of the Duchy of Lancaster, because that only takes cognizance of all the causes relating to the revenue of this Duchy, which has long been annexed to the crown; the chief Judge of this Court is called the Chancellor of this Duchy.

The Court of Chancery is a court of equity, and designed to relieve the subject against cheats, breaches of trust, and other oppressions, to temper the rigour of the law. However, the remedy has often proved worse than the disease, on account of the length of time before the cause has been determined. The chief Judge is the lord Chancellor, or lord Keeper; and the form of proceeding is by bills, answers, and decrees: and the witnesses are examined in private; however, it must be observed, that the decrees of this court are only binding to the persons of those concerned in them; for they do not affect their lands and goods; and consequently, if a man refuse to comply with the terms, they can do nothing more to him than send him to prison. This Court is not like others, which have no power except in term-time, for this is always open; and if a man be sent to prison, the lord Chancellor, in any vacation, can grant a Habeas Corpus, if he sees there is reason so to do. He may also at these times grant prohibitions.

The lord Chancellor has twelve assistants, called Masters in Chancery, whose business is to take affidavits or depositions upon oath, concerning any matter for which an oath is required by the rules of the Court; and they have an office in Chancery-lane. They also examine accounts depending on this Court, of which they make their report in writing. Besides these, there are several masters extraordinary, to take affidavits in the country.

The Master of the Rolls is the principal of the twelve, and he has the custody of all charters, customs, commissions, deeds, and recognizances; which being made on rolls of parchment, gave occasion to his name, and the repository of them is called the Rolls; here all the rolls are kept since the beginning of the reign of Richard III. This is a great officer, and usually hears causes in Chancery, when the Chancellor himself is absent. He keeps a Court at the Rolls, where he hears and determines causes that come there before him; he has the gift of the Six Clerks Offices, and those possessed of them are next in degree to the Masters in Chancery. Their business is to enrol all patents, commissions, licenses, pardons, and other instruments that pass the Great Seal. When the Master of the Rolls sit in the House of Lords, his place is next the Lord Chief Justice of England, upon the second wool-sack. Besides what is said above, the Court of Chancery has the power of sending out commissions for charitable uses, and inquiring into all the frauds and abuses which have been committed in the disposal of all charities throughout the kingdom, and can oblige the trustees to perform their trust, according to the intent of the respective donors. Under the Six Clerks there were formerly sixty, but now there are ninety; and these, with their under-clerks, perform the business of their office.

The Court of King's Bench is the highest Court in England, in common law, except the House of Lords in Parliament. All pleas are brought into this Court between the king and the subject, such as treasons, felonies, breach of peace, and any kind of oppression. This Court has also the power to examine and correct the errors of the Judges and Justices of England, in their judgments and proceedings: this not only in pleas of the crown, but in those that are really personal and mixed, except only in the Exchequer. There are four Judges belonging to this Court, the chief whereof is styled the Lord Chief Justice of the King's Bench; and, according to an act of parliament lately passed, all Judges are to hold their places, notwithstanding the demise of the Crown, but with the same restriction as formerly; that is, while they do nothing to occasion the forfeiture of their places. None can be a Judge in this Court except a Serjeant at Law. All matters of fact, relating either to civil or criminal causes, are determined in the Court of King's Bench by a jury.

The Court of Common Pleas is so called, because the pleas usually here debated are between subject and subject. None but Serjeants at Law may plead in this Court; and here all civil causes real and personal are usually tried, and real actions are pleadable in no other Court. Likewise, no fines can be levied, or recoveries suffered, except in this Court at Westminster, at a Judge's chamber, at the assizes, or by a special commission out of Chancery. There are four Judges also belonging to this Court, the first of whom is called Lord Chief Justice of the Common Pleas.

The Court of Exchequer consists of two Courts, one of which tries causes according to law, and the other according to equity. The Court of Equity is held in the Exchequer chamber, before the Lord Treasurer, the Chancellor of the Exchequer; the Lord Chief Baron, and the three Barons of the Exchequer; besides a cursitor Baron. But the two first sit very seldom, and the five last almost always. Here are tried all causes relating to the King's revenue, namely, such as relate to accompts, disbursements, customs, and fines imposed. All judicial proceedings according to law are only before the barons; but the Court of Equity is held as above.

There are assizes and sessions held in the different counties of England, for the more easy distribution of justice; and the assizes are Courts kept twice a year. The twelve Judges are commissioned by the king for this purpose, and this they call, going the circuit. At these assizes all civil and criminal causes may be determined: the first is called Lent assizes, soon after Hilary term; and the other called the Summer assizes, after Trinity term. There are six of these circuits, besides those in Wales, in which principality two distinct judges are appointed; and both in England and Wales all causes are determined by a jury. The jury are chosen by the sheriff of the county, and they are only directed in points of law by the judges.

The commitment of malefactors is generally made by a Justice of the peace, who examines witnesses to the fact upon oath. If the evidence is plain, he makes a mittimus, and sends the malefactor to the county gaol, where he continues till the next assizes or sessions.

There are Justices of the Peace in every county, designed to keep the peace thereof: and such of them as the king is supposed to have greater confidence in, are called Justices of the Quorum; because in their dedimus's there are these words, *quorum A. B. unum esse volumus*; the meaning of which is, that no business of consequence must be transacted, unless with the concurrence of one of these. Their office is to call before them, examine, and commit to prison, all thieves, murderers, vagabonds, and all disturbers of the peace, of what kind soever.

The Quarter Sessions are so called from the meeting of the Justices every quarter of a year, at the shire or other chief town in their respective counties, where they have the power of trying all criminal causes in the same manner as at the assizes, though they commonly confine themselves to facts of a lesser degree of guilt.

There is a Sheriff appointed for the execution of the laws in every county, except Westmoreland and Durham, who is nominated by the king every Michaelmas term. His office is to execute the king's mandates, and all writs directed to him out of the king's courts. He also impannels juries to bring causes and criminals to trial, and is to take care that the sentences both in civil and criminal affairs be duly executed. He appoints an under sheriff, stewards of courts, bailiffs of hundreds, constables and jailors, and has many men in rich liveries, to attend him on horseback at the reception of the judges, and during the assizes.

The office of high-constable, petty-constable, head-borough, or third-borough, is to execute the warrants and orders of the justice of the peace; but the high-constable only disperses them upon some occasions to the petty-constables.

Every city and corporation in England may chuse their own magistrates, which may be either a mayor, or a bailiff, with aldermen, common-councilmen, or capital burgesses; and these regulate all affairs which immediately belong to their respective corporations. Likewise some cities have counties, and a power of trying all malefactors taken in

their counties; but this is seldom undertaken without the assistance of one or more of the twelve judges. Some of these officers during their magistracy are justices of the peace: these are commonly the mayor and an alderman or two; but they cannot exercise their power out of their own liberties.

The lord lieutenants and deputy lieutenants had formerly a more considerable power and influence than they have at present, and they are chosen by the king himself out of the principal peers of this kingdom. Their business was to arm, array, and form companies, troops, and regiments; and the men so raised were called the militia. But this having been seldom done, on account of the standing forces kept continually in pay, these forces became in a great measure useless. However, it having been found necessary, during our last war with France, to have a militia properly regulated and disciplined, for the defence of the country against all foreign invasions, an act of parliament was made, by which they are put under new regulations, and in consequence whereof a new militia has been actually raised in all parts of the kingdom. The officers are to be men of fortune, and the private men to be raised by balloting. This has put the kingdom into such a state of defence, that we can now venture to send our regular forces abroad upon any emergent occasion; and it is not improbable but these last, in times of peace, will become entirely useless.

Besides the Courts already mentioned, there are Court-Leets, and Court-Barons, which properly belong to the lords of the manors, who appoint stewards to hold them in their name. The first is a court of Record, it being reputed the king's court, because its authority is derived from the Crown. It is kept twice a year, and in it inquiry may be made of riots, and other criminal matters; but all great offences must be certified to the Justices of assize.

A Court-Baron is incident to every manor, though the other is not so, and so called from the lord of the manor, who was anciently styled Baron; all tenants belonging to the manor are summoned to this Court; here part of them are sworn for a jury, and here the steward sits as judge. The jury is directed to inquire after the decease of copyholders and freeholders, and to bring in their next heir, and also of the encroachments of any tenant. Likewise here they make orders and laws among themselves, with a penalty for transgressors, payable to the lord of the manor. There are also Sheriffs' Courts, and Hundred Courts, held every month in all parts of England, where small causes are determined. A Court of Conscience has been long held in London, for recovery of small debts under forty shillings; there have been some erected in Westminster, and other out-parts about London; as also in several towns in the country; and it is thought, from time to time they will be erected elsewhere. The officers called bailiffs of the hundred, and other bailiffs and sergeants, are appointed by the sheriff to execute writs, to distrain goods, and to summon to the county sessions and assizes.

The lord Chancellor has two assistants, called Masters in Chancery, whose business is to take and certify depositions upon oath, concerning any matter for which an oath is required by the rules of the Court; and they have an office in Chancery-lane. They also examine accounts depending on this Court, of which they make their report in writing. Besides these, there are several masters extraordinary, to take affidavits in the country.

TRADE AND COMMERCE.

NAVIGATION in this kingdom was formerly much neglected, notwithstanding its many advantages. While we were strangers to navigation, our country was thin of people, because we lived as it were upon the main stock. We had, indeed, a few staple commodities, and a very few manufactures, which were sold to foreigners at their own rates. But when navigation began to flourish, and we had vessels of our own, the face of affairs soon changed; we brought home the product of their countries at a small expense, in comparison to what they cost us formerly; and we disposed of our own at much higher rates.

The extent to which the commerce of this country has expanded, appears astonishing, when it is considered how great a portion of the materials of its manufactures are of foreign produce; and the many duties with which the increase of the national expenditure has loaded most articles of foreign trade. The natural advantages arising from the situation of this country, its formidable navy, and extensive colonial possessions, particularly in the East Indies, have favoured and protected its commercial intercourse; while the accumulated capital of individuals has gradually enabled them to give very considerable credit to their customers, which of late years, while some of the principal European powers have been in a very unsettled state, has been of much importance in increasing the commerce of Great Britain. In the reign of Edward III. the countries with which England had commercial intercourse were chiefly France, Spain, Portugal, Lombardy, Flanders, Brabant, and Germany. The total value of all the commodities exported in one year, was reckoned at £294,184, and of all the imports at only £38,970; sums that are considerably less than the value of the goods now frequently entered in one day. The exports consisted of wool, of the value of £277,606; leather, £96; and cloths, £16,260. The imports were, cloths of the value of £11,083; wax, £815; wine, £3841; linen cloth, mercery, and grocery, £22,943. The policy of the times was by no means calculated to encourage trade; our merchants were very jealous of foreigners participating in their commercial profits, though it was to such persons they were indebted for the little knowledge of trade they possessed: and the government being at times still more jealous in this respect than individuals, many injudicious restrictive laws were made; among others, an act passed in 1429, prohibiting persons from selling merchandise to aliens, except for ready money. It was however, soon found necessary to repeal this prohibition, and permission was then given to sell to aliens, upon giving not more than six months credit. Charles II. imposed a duty of 5 per cent. on goods exported as well as imported, on domestic manufactures as well as on foreign merchandise, and double taxes on all goods when exported by aliens. In 1672, however, the duties payable by aliens on the exportation of British manufactures were repealed. This salutary principle was still more extended in 1700, by removing the imposts on every kind of woollen goods exported, and on corn, meal, and bread. It was, however, by the law "for the further encouragement of manufactures," passed in 1722, that every one was allowed to export, duty-free, all kinds of merchandise, the produce of Great Britain, except a few particular articles; while drugs and other commodities used for dyeing, were also permitted to be imported duty free.

The following statement shews the total amount of the Imports and Exports of Great Britain, on a just average:—

Year.	Imports.	Exports.
1700	£4,956,975	£6,034,724
1710	4,321,717	6,713,246
1720	6,054,800	8,132,669
1730	7,273,342	10,808,213
1740	7,270,743	10,822,696
1750	7,429,739	12,877,129
1760	8,877,145	14,253,377
1770	11,910,778	14,138,469
1780	11,663,214	13,337,562

During the last thirty years, it appears that the amount of the Imports has more than doubled, and the amount of the Exports has increased in a still greater proportion.

The following table exhibits the state of the Imports and Exports for the year 1805, and will give the reader some idea of the value of goods exported to, and imported from, the different Countries to which we trade:

	Imports.	Exports.
Denmark and Norway	£1,071,579	£5,172,066
Russia	2,527,078	1,646,475
Sweden	269,161	159,597

The vast extent of the Foreign Commerce of Great Britain will be further illustrated by the following statement

of the whole number of merchant vessels, the amount of their tonnage, and the number of men and boys usually employed in navigating the same:

By the act imposing a duty on all sea assurances, as well as by the act for establishing the convoy duty, the extent and value of the foreign trade of this island has been more clearly ascertained than heretofore, and it appears that the capital employed in commerce cannot be less than £80,000,000: the annual profit derived from it has been variously estimated; but according to the best authority, it appears, in the year 1797, to be about £10,500,000 per ann.

A more correct opinion may be formed of the trade of Great Britain by the following statements:

In one year, from Dantzic were entered inwards, 204 ships; two-thirds of which were British, containing 43,005 tons, and 2,294 seamen.

From other Prussian ports, 1,579 ships; one half of which British, containing 263,558 tons, and 11,613 seamen.

From Hamburgh, 88 ships; three-fourths of which British, containing 16,742 tons, and 805 seamen.

From Denmark and Norway, 1,536 ships; two-fifths of which British, containing 252,409 tons, and 13,944 seamen.

From the Russian ports, 1,123 ships; 1,110 of which British, containing 241,809 tons, and 10,674 seamen.

From the Swedish ports, 425 ships; one-fourth of which British, containing 64,043 tons, and 3,756 seamen.

The exports to Germany consist of cottons, woollens, hardwares, pottery, malt liquors, sugar, rum, coffee, tobacco, &c. Russia is supplied from England with West India produce, British manufactures, and with various East India goods. The principal exports from Russia to England, are hemp, flax, coarse linens, coarse woollens, hides, leather, tallow, timber, furs, iron, potash, corn, bristles, bed feathers, quills, &c. Britain exports to Sweden much of the produce of the East and West Indies, and a variety of the finer manufactures. Salt is an article of great exportation to the Baltic. Denmark takes goods nearly of the same species with those sent to Russia and Sweden.

The number of vessels employed in the Greenland whale and seal fisheries, and from Davis's Straits, amounted to 102 ships, containing 30,591 tons, and navigated by 3,976 seamen; these cargoes of the ships consisted of whale oil and fins, seal skins, and a few bear skins.

From Spain and the Canaries, the number of ships entered inwards into Great Britain, were 359; two-thirds of which were British, containing 49,644 tons, and 2,717 seamen.

From Portugal and Madeira, 456 ships; four-fifths of which British, containing 68,444 tons, and 3,610 seamen.

The exports to Portugal consist almost wholly of British produce and manufactures; and the imports, of wines, fruit, indigo, cotton wool, and bullion.

To Venice and Trieste, in the same year, about 20 ships only were employed. The goods usually imported are currants, silks, cream of tartar, glass beads for the East and

West Indies, whisks of rue weed, sponge, and some Levant drugs, cotton, and oil. The exports, are pilchards and red herrings, salmon, salted tripe, tin, lead, alum, woollens, hardware, sugar, pepper, &c.

From Malta, were entered inwards 22 ships, all British, containing 6000 tons, and 327 seamen.

From Turkey, 27 ships, all British, containing 5150 tons, and 277 seamen.

Our exports to the Mediterranean consist of woollens, cottons, hardware, &c. watches in great numbers, toys of various sorts; and a great variety of English goods are taken in exchange by the Moors on the southern coast for valuable raw materials of African produce.

From the western coast of Africa, 36 ships, from Barbary 9, and from the Cape of Good Hope 4, all British, containing 9152 tons, and 696 seamen. The principal articles brought from thence, are ivory, gold dust, gum, dye woods, &c. &c. The exports are our own manufactures, especially hardware, gunpowder, lead, iron, toys, brandy, &c.

From the West Indies were entered inwards 582 ships; 566 of which were British, containing 173,722 tons, and 9,514 seamen. The quantity of raw sugar only imported from British plantations, was 3,615,363 cwt.; the East Indies, 62,408 cwt.; and from foreign plantations, 134,853 cwt.

The exports to North America are in British manufactures only, such as woollens, cottons, linens, hardware, pottery, books, &c. The goods imported are chiefly unmanufactured American produce, such as corn, tobacco, rice, timber, staves, pitch, tar, turpentine, pot and pearl ash, raw cotton, &c.

The trade to South America has become of much importance of late years, and promises, should the Spanish colonies obtain their independence, to be of incalculable advantage to this country.

From the East Indies the imports are tea, raw cotton, silk, stuffs, saltpetre, opium, indigo, salt, wax, rice, pepper, musk, frankincense, cocoa, fruit, cinnamon, sandal wood, ship-timber, cardamoms, spice, gold, silver, rubies, pearls, diamonds, dying-drugs, and muslins of every sort. Europe alone purchases from the East India Company 24 million pounds of tea annually. The amount of the East India Company's sales in England, for India and China goods, was, in 1804, £5,866,073.

By the Red Sea considerable quantities of British and East India goods are exported into Arabia and Abyssinia; and by the Persian Gulf, the woollens and hardwares of Britain find admission into the provinces of Persia.

The English fishery on the coasts of Newfoundland employs 4000 seamen, and the cod fishery 5000 more. This extensive fishery, and the coal trade from Newcastle, &c. is the real nursery for British seamen.

The most considerable of the Companies which have arisen in this country for the purposes of Commerce, are the following:

1. That which goes by the name of the *Hamburgh Company*. They were originally called Merchants of the Staple, and afterwards Merchant Adventurers. They were first incorporated in the reign of king Edward I. in 1296, and obtained leave of John, duke of Brabant, to make Antwerp their staple or mart, where the woollen manufactures at that time flourished. The staple was afterwards removed to Calais, and from that to other places; and, in the reign of queen Elizabeth, to Hamburgh.

2. The *Russian Merchants*, in the reign of queen Mary, who were empowered to trade to all lands, ports, and places, in the dominions of the Emperor of Russia.

3. *The Eastland Company*, formerly called Merchants of Elbing, a town in Polish Prussia, being the port they mostly resorted to in the infancy of their trade. They were incorporated the 21st of the reign of Elizabeth, and empowered to trade to all places within the Sound, except Narva, the only Russian port at that time in the Baltic.

4. *The Turkey or Levant Company*, also erected in the reign of Elizabeth, and their privileges confirmed and enlarged by King James the First, being empowered to trade to the Levant, or eastern part of the Mediterranean, particularly to Smyrna, Aleppo, Constantinople, Cyprus, Alexandria, &c.

5. *The East India Company*, incorporated about the 42d of queen Elizabeth, in 1600, and empowered to trade to all countries to the eastward of the Cape of Good Hope, exclusive of all others. But about the year 1698, application being made to parliament by private merchants, for laying this trade open, an act passed empowering every subject of England, upon raising a sum of money for the support of the government, to trade to these parts. Upon which a great many subscribed, and were called the New East India Company. But the Old Company being masters of all the forts on the coast of India, the New Company found it their interest to unite with them, and trade with one joint stock, and have ever since been styled the United East India Company. The trade to the East Indies has very lately, in a great measure, been thrown open to the country.

6. *The Royal African Company*, was incorporated in the 14th year of the reign of Charles the Second, and empowered to trade from Sallee in South Barbary, to the Cape of Good Hope, and to erect forts and factories on the western coast of Africa for that purpose. This trade was laid open by act of parliament in 1697, and every private merchant permitted to trade thither, upon paying towards the maintenance of the forts and garrisons.

7. *The Canary Company*, also incorporated in the reign of Charles II. in 1664, and empowered to trade to the seven islands, anciently called the Fortunate, but now the Canary islands.

8. *The Hudson's Bay Company*. Their charter was granted in 1670. It is in the hands of eight or ten persons, who make an advantageous trade by exporting woollen goods, haberdashery wares, knives, hatchets, &c. and in return for which bring back skins, beaver, and furs.

9. *The South Sea Company*, established in the 9th year of the reign of queen Anne, and vested in the sole trade to and from all lands and kingdoms on the east side of America, from the river Oronoko to the southern part of Terra del Fuego, and from thence to the northernmost part of America on the west side.

10. *The Sierra Leone Company*, was instituted in the year 1791. The general object of this Company was the introduction of civilization into Africa, for effecting which they proposed to establish a secure factory at Sierra Leone, with a view to a new trade in produce, chiefly with the interior of the country.

However injurious Companies incorporated with exclusive privileges may at this time be reckoned to the nation in general, yet it is certain that they were the general parents of all our foreign commerce; private traders being discouraged from hazarding their fortunes in foreign countries, until the method of traffic had been first settled by joint-stock companies. But since the trade of this kingdom and the number of traders has increased, and the methods of assurance of shipping and merchandise, and the navigation to all parts of the world, have become familiar

to us, experience has shewn, that the trade of the nation has advanced in proportion as these monopolies have been discouraged; all restrictions of trade whatever having been found manifestly hurtful.

The value obtained in foreign markets, for the goods or manufactures which a nation exports, repay the labour of procuring or manufacturing them, with a profit to the master manufacturer and to the exporting merchant; and this value being invested in foreign produce, which on importation affords a further profit to the merchant, it is evident that the transaction, while it supports individuals, makes a real addition to the wealth of the country, by the greater value of the returns imported, beyond that of the goods exported. Commerce, therefore, while it is the means of procuring a mutual interchange of conveniences between distant countries, and of extending knowledge and civilization over every part of the globe, contributes essentially to the strength and influence of the countries by which it is encouraged. Superficial views on subjects of political economy have inclined princes and statesmen to the opinions, that wealth consisted principally in gold and silver, and that those metals could be brought into a country which had no mines, only by the balance of trade, or by exporting to a greater value than it imported; commerce has therefore experienced public encouragement, and agreeable to the principles on which its value has been estimated, the principal regulations have consisted in restraints upon importation, and encouragements to exportation. The duties and restrictions imposed by one country, either from the view of encouraging its trade and manufactures, or for the purpose of rendering commerce a source of public revenue, have, however, only created similar returns from other states, and the commerce of Europe has become a complicated system of high duties, drawbacks, prohibitions, and bounties, attended with much unnecessary expense, and holding out continual temptations to fraud and evasion. The impolicy and injustice of many of the existing restraints has been shewn by Dr. Adam Smith and others, and the prevalence of just sentiments of the reciprocal advantages of freedom of trade will render future commercial arrangements more liberal and beneficial.

The practice of exchanging goods, wares, money, bills, and other articles of value, with the view of advantage or profit, is generally distinguished into *foreign trade*, or the export and import of commodities to and from other countries, and the internal or *home trade*, or that which is carried on within the country; which two branches, however, are rather distinct in appearance than reality; for a very considerable portion of the internal trade, arising from manufactures carried on to supply foreign markets, could not subsist without foreign commerce, while a large part of the returns for manufactures sent abroad, being articles for consumption, or raw materials which are converted to use in the different manufactures, depends upon our internal trade, so that the one supports the other, and by their mutual connection and dependence, the foreign and the domestic trade of Great Britain have risen together to their present unparalleled height. Manufactures are the arts by which natural productions are brought into the state or form in which they are consumed or used. The principal manufactures are those which fabricate the various articles of clothing; as, the woollen-manufacture, the leather-manufacture in part, the cotton-manufacture, the linen-manufacture, and the silk-manufacture; others supply articles of household-furniture, as the manufactures of glass, porcelain, earthenware, and of most of the metals in part; the iron-manufacture furnishes implements of agriculture, and wea-

pons of war; and the paper manufacture supplies a material for communicating ideas and perpetuating knowledge.

The enhanced value of raw material by manufacture has been illustrated by the following remarks: "One hundred pounds laid out in wool, and that wool manufactured into goods for the Turkey market, and raw silk brought home in return, and manufactured here, will increase that one hundred to five thousand pounds; which quantity of silk-manufactures being sent to New Spain, would return ten thousand pounds; which vast improvement of the first hundred pounds, becomes, in a few years, dispersed amongst all orders and degrees, from the prince to the peasant. Thus, again, a parcel of iron-stone, which when taken from its natural bed, was not worth five shillings, when made into iron and steel, and thence into various manufactures for foreign markets, may probably bring home to the value of ten thousand pounds; for steel may be made near three hundred times dearer than standard gold, weight for weight. Twenty acres of fine flax, when manufactured into the dearest and most proper goods for foreign markets, may, in return, bring what may be worth ten thousand pounds; for an ounce of the finest Flanders thread has been sold in London for four pounds, and such an ounce made in Flanders into the finest lace, may be here sold for forty pounds; which is above ten times the price of standard gold, weight for weight.

Manufactures had begun to flourish in different parts of Europe, long before they were attempted in Britain; the few articles of this description which were in request, being obtained in exchange for wool, hides, tin, and such other produce as the country in a very uncultivated state could supply. In 1337, it was enacted, that no more wool should be exported; that no one should wear any but English cloth; that no cloths made beyond seas should be imported; that foreign clothworkers might come into the king's dominions, and should have such franchises as might suffice them. Before this time, the English were little more than shepherds and wool-sellers. The progress of improvement since the establishment of manufactures in this country, has in most instances been remarkably great, particularly of late years, in consequence of an increased knowledge of the properties of various materials, vast improvements in all kinds of machinery, and the great capitals invested in most of the different branches. The value of British manufactures exported to all countries, on an average of six years, ending with 1774, was £10,342,019; the American war suspended for a time an important market for several of our manufactures, in consequence of which the total amount exported had fallen in 1781 to £7,633,333, and on an average of six years, ending with 1783, was £8,616,660. During the peace which followed, the export-trade rapidly revived, and, in the year preceding the war with France, had attained to a magnitude beyond all former example; it was checked a little by the mercantile embarrassments in 1793; but a few years after, the unsettled state of several of the principal European powers threw many additional branches of foreign trade into the hands of our merchants, and carried the export of our manufactures to a much greater extent, and as far as it can be ascertained, under the *ad valorem* duties, or computed at the average current prices of the goods, it amounted in the year 1804 to £40,349,642, and in 1805 to £41,068,942.

The balance of trade in favour of this country has usually been estimated from the excess of the exports beyond the imports, and a comparatively small amount of the latter has been always considered highly desirable. This is a con-

cise mode of determining a very important point: but it is certainly very erroneous; for, in this view, the whole of the imports are considered as if they were paid for; whereas, in fact, a very large part of the imports never require to be paid for at all, and instead of tending to draw money out of the country, ought to be considered as an annual accession of wealth. This particularly refers to the imports from India, as far as they are purchased by the territorial revenues of that country, or by the private capitals of individuals acquired there; to such proportion of the imports from the West Indies as are remittances from the income of individuals residing here; and to the profits arising from fisheries carried on in different parts of the world by subjects of this country ordinarily residing here. Besides the evident impossibility of making this distinction in the account of imports, the custom-house statements, both of the imports and exports, are totally inadequate to shew even their comparative amounts, as almost every article of merchandise is there rated at a value entirely different from its present actual value; but even if these accounts of the export and imports were far better adapted to shew on which side the balance really lies than they are, it will be easily proved that all the statements founded on them, in which the annual gain of the country from trade is exhibited by the excess of exports, must be inaccurate. Suppose the merchants of this country to purchase, for exportation, on their own account, British manufactures to the amount of £20,000,000; the net proceeds thereof in the countries to which they are exported, after paying all charges, cannot be considered as less than £22,000,000; and this sum being invested in foreign produce, and imported into this country, will amount, after repaying the duties and all expenses, to at least £24,000,000, returning the merchants the capital they had originally advanced, with a profit of 20 per cent. Here is an evident gain to the country of £4,000,000, because the goods brought into it exceed in value those which are sent out, by this sum. Will those who discover the commercial profits of the country in a small amount of imports, pretend that the advantage of the merchants, or of the state, would have been greater, if the imports received in return for the twenty millions sent out had been only of sixteen millions value?

Respecting Commerce, we shall add the following aphorisms from Willich's Domestic Encyclopædia; which, he observes, appear to be fully established by the evidence of ancient history, as well as from the nature and complexion of some recent events:

1. That though commerce doubtless tends to improve the intellectual faculties of man, and renders him more skilful in the various ornamental arts, but especially those of war and luxury; yet at the same time it creates a thirst of power and riches, which by no means contribute to his moral perfection.
2. That opulence, acquired by the rapid succession of fortunate events in commercial speculation, does not stimulate the mind to humane and virtuous actions, in so beneficial a manner as the slow and honest acquisitions of the artist and husbandman.
3. That large fortunes arising from commercial channels, constitute a rich, but not a wealthy nation; because those individuals who have amassed property by bold enterprises, are more prone to apply their money to the support of political and financial schemes; while the industrious cultivator of the soil, or manufacturer, will be disposed to promote the more useful and permanent objects of national importance, namely, those of rural and domestic economy.

A Free Inquiry into the Origin and Antiquity of Letters.

BY THE ABBOT ANSELM,

Member of the Royal Academy of Inscription and Belles Lettres at Paris.

NOTWITHSTANDING it would be a concern of no small importance, to be capable of rightly informing you at what particular time the *Art of Writing*, or *Use of Letters*, was first found out; yet I must ingenuously acknowledge my insufficiency to resolve so abstruse, so mysterious a secret. All that I shall pretend to is, to collect, out of various conjectures, those opinions on so critical a topic, to which some of the most learned and judicious Antiquarians have paid a more than ordinary deference and regard.

Nothing doubtless could be of greater service, nothing could possibly be more entertaining to human life, than an ability of recollecting what was past, and of giving an established being, as it were, to the sentiments of the soul, by virtue whereof we might transmit them down to the latest posterity, without the least variation.

This, one would imagine, indeed, Nature might have prompted mankind to have accomplished; and yet, it must be allowed, it was an arduous task, a discovery of the last importance.

We are sensible, however, as profound as the secret was, it has been found out; and it is self-evident, that custom, from its being first brought to light, not only received, but established and confirmed it.

Such authors as give the least antiquity at all to the Invention of Letters, ascribe the honour of it to Moses. Others, however, will not admit that it could ever possibly be discovered by any human penetration, by any dint of thought, how profound, how deep soever; and for that reason give God alone the glory of it; and peremptorily insist, that the Knowledge of Letters had never been found out to the final dissolution of all things, had not the Almighty condescended to have written the Decalogue, or Ten Commandments, on two Tables of Stone, with his own right hand, in which are interspersed (as they very shrewdly observe) all the letters in general of the Hebrew Alphabet, the Teth only excepted.

And on what reasons that conjecture is grounded, we shall remark by the bye; though we cannot allow them to be conclusive.

Thus far we will admit, indeed, that the Art of Letters was known only by a few, and but very little practised, before the Law was delivered to Moses upon Mount Sinai; and we will farther admit, that divers nations have been, time immemorial, without it; and this has been the main, if not the sole occasion, of those confused and absurd accounts that we find, not only in the ancient stories of those nations, but in the religion and genealogies of their gods.

These concessions, however, are no convincing evidence, that the Art of Letters was altogether unknown; that Moses had no Manuscripts, no Historical Memoirs, in his custody, which had been preserved, as an invaluable treasure, with the utmost care and circumspection, in the families of his predecessors.

Now those who peremptorily assert, that the Art of Let-

ters was a human, and not a divine invention, and that we are indebted to the superior knowledge and profound penetration of Moses for that inestimable blessing, produce the following arguments to strengthen their conjecture:

Moses, say they, never quotes any book prior to his Law; that not the least hint is given either of Letters, or the Art of Writing, in such places, where, had it been discovered at all, due notice had doubtless been taken of it: and again, that if the commemoration of former great and heroic actions has been preserved, such Memoirs, or Historical Accounts, could have been transmitted to their descendants no otherwise than by word of mouth, or, in other terms, by oral tradition.

How plausible, or how convincing soever, this argument may possibly be to the abettors of that opinion, I shall not take upon me to determine; yet there are some very eminent and learned Antiquarians, who strenuously oppose it; and insist, that Moses himself has quoted a book anterior to his own Pentateuch: for in the xxist chapter of his book of Numbers, (after having given a succinct account of the several places where the children of Israel had pitched their tents, in the wilderness which was before Moab,) he proceeds thus; "Wherefore it is said in the Book of the Wars of the Lord, what he did in the Red Sea, and in the brooks of Arnon, and at the stream of the brooks that goeth down to the dwelling of Ar, and lieth upon the border of Moab."

Now, though it must be granted that many of the most judicious Literati are much divided in their opinions concerning that Treatise, as being a work of which but very few have the least transient idea; yet St. Austin imagines, in his Commentaries on the book of Numbers, that it was not the composition either of any Patriarch or Prophet, but written by those very nations themselves that had been conquered by their enemies, and looked upon that war so fatal to them, as to deserve the title that it bore. And then that great author goes on, and tells us, That when Moses makes mention of that book, he bestows no greater authority upon it, than St. Paul has given to a Grecian Poet, when he had quoted a short passage from his works: this, however, notwithstanding the gloss that is put upon it, is, in our humble opinion, a self-evident proof, that that treatise was written long before the birth of Moses.

Furthermore, those who insist, that we are indebted to Moses for the Invention of Letters, pretend, that not the least notice is taken of this art, in divers circumstances of such moment and importance, as that, had there been any prior knowledge of it, it is highly probable they would have been committed to writing. When Abraham, say they, sent Eliezer into Mesopotamia, to settle and adjust the marriage articles between Isaac and Rebekah, not one line was written; no credentials had that faithful servant to shew from his master, even on so solemn an occasion. Again, say these advocates for Moses, when Isaac had those wells dug

up, which the Philistines had filled with earth and stones; we have no other account of that remarkable occurrence than this, That after they were opened by his orders, he gave them the same name that his father had done before him. Again, say they, when the patriarch Jacob had erected, at Beth-el, the stone which he had made use of as a pillow in commemoration of his vision in that place, there is not the least account of any inscription having been made upon it.

Once more: When Joseph's brethren, say they, went down into Egypt, as we find it recorded in the xliid chapter of Genesis; and when Joseph sent for his dearly beloved brother Benjamin, as we find that affecting circumstance told in the xliid chapter of the same book; not a word was written, either from the son to the father, or *vice versa*, on so momentous an occasion. And, from this presumption, the admirers of Moses infer, that Letters, or the Use of Writing, was not known in those days. But, with submission, these plausible arguments seem to me to be no ways conclusive.

Job lived, it is universally allowed, long before Moses had any existence; and his History must, in all probability, have been written long before Moses composed his Pentateuch.

Some, however, deny that the last conjecture is just; for, if that had been matter of fact, say they, Moses would never have omitted such an illustrious example of patience to the incessant murmurs and complaints of his discontented Israelites. Nay, farther, it is imagined that Job laboured under his severe afflictions even at that very time when the Israelites were under Egyptian bondage; for there is not so much as one word mentioned either of the law or of the prophets, in the long dialogues which passed between Job and his most miserable comforters, styled his friends; neither is there, indeed, the least hint concerning the one or the other, throughout the long conference which God Almighty vouchsafed to hold with that most upright, though distressed, prince.

To the above allegation our reply is this: It would be very presumptuous to fix the time when that history was written, or by whom; though it be received as canonical, and consequently as composed by Divine inspiration. For it is mere conjecture, and nothing more, that some ascribe it to Moses; some again ascribe it to the prophet Isaiah; and others, with more probability, to king Solomon, who, it is well known, was thoroughly versed in dialogical discourses and prudential maxims.

It is universally allowed, likewise, that he was master of the most sublime poetry, and no stranger to the style of the Arabians, as may rationally be presumed from his conversation with the queen of Sheba.

It cannot, I think, be fairly denied, however, but that Job was acquainted with the Art of Writing, or the Use of Letters, and the various methods that in his time were made use of in engraving on both lead and stone:—for, in the xixth chapter of that book, is the following very remarkable expostulation: “Oh that my words were now written! Oh that they were printed in a book! that they were graven with an iron pen and lead in the rock for ever!”

Now, he could not, doubtless, have talked in this style, or expressed himself in such direct terms, had the Use of Letters, or the Art of Writing, been absolutely unknown in his days.

But to proceed: The knowledge of this Art must needs be very ancient; since the apostle St. Jude takes particular notice of the book of Enoch, who was the seventh Patriarch after Adam, and prophesied of these, says the inspired penman; that is to say, of those false teachers, against whom he had before pronounced his anathema, in the 11th verse:

“Woe unto them!” says he, for they have gone in the way of Cain, and ran greedily after the error of Balaam for reward, and perished in the gainsaying of Core.” And, after this, he quotes the following very remarkable passage from the book of Enoch, in the 14th, 15th, and 19th verses:—“And Enoch also, the seventh from Adam, prophesied of these; saying, Behold, the Lord cometh with ten thousand of his saints, to execute judgment upon all, and to convince all that are ungodly among them, of all their ungodly deeds, which they have ungodly committed, and of all their hard speeches, which ungodly sinners have spoken against him. These are murmurers, complainers, walking after their own lusts; and their mouth speaketh great swelling words, having men's persons in admiration, because of advantage.” And Tertullian is of opinion, that the book of Enoch was either preserved in the Ark, or restored by Noah, who was perfectly well acquainted with the contents of it.

Now, though we are ready to acknowledge that the book of Enoch, thus quoted by St. Jude, is not canonical: yet we humbly conceive, it is a proof sufficient for our present purpose; since it is agreed, that not only that book, but divers others cited in the book of Kings, were not received either by the Jews or Christians (as St. Austin assures us) as canonical, for no other reasons, but because they were so very ancient; because many faults might probably have crept into them through the succession of ages; and, lastly, because we cannot be satisfactorily assured, that they were the authentic works of those holy men whose names they bear.

As this book in particular, however, as well as divers others, are quoted by the inspired penmen of the sacred Scriptures, it cannot be fairly denied, but that they are very old; and from thence we conceive, it may justly be concluded, that the Use of Letters, or the Art of Writing, was well known before the publication of the Pentateuch by Moses.

Josephus assures us, that we are beholden to the children of Seth for the science of Astronomy; and because Adam had given them previous notice, that the world would in time be dissolved by water and fire, they were so solicitous lest their favourite science should be lost before men might have sufficient time to become masters of it, that they were determined to erect two columns or pillars, one of brick and the other of stone, on each of which the learning they had acquired was accurately engraven; that in case the deluge should destroy the former, the latter, however, might possibly stand its ground, and transmit to posterity those useful and important articles, which they had inscribed upon it with such unwearied diligence and application. And to this account Josephus adds, that in his time one of those pillars was actually to be seen in Syria.

Though there are some learned men, who deny this to be matter of fact, because it is very uncertain whether the children of Seth were ever inhabitants of Palestine, or not; yet it proves thus far, that even from that time, the art of Engraving, or Inscription, was in some measure known; though not carried to that pitch of perfection as it afterwards was in the land of Egypt.

Vossius proposes the following shrewd question: “If the Use of Letters, or the Art of Writing, says he, had not been known before the Decalogue was delivered to Moses, which way could the Israelites have read the law, as they were obliged to do by divine command?”

Those who insist that Moses was the first inventor of Letters, argue from what St. Austin asserts, that Moses appointed masters to teach them.

But we freely appeal here to the impartial and unprejudiced reader, whether such a weak answer as that is sufficiently convincing against Vossius's inquiry? and whether those masters, whom St. Austin supposes only to be appointed by Moses, be any proof at all, that there were no such things as Characters, nor any such Art as that of Writing known before the two Tables of Stone were engraved by the finger of God, or, indeed, before Moses himself was born?

And forasmuch as all the people were obliged, not only to read the law, but to transcribe it likewise, a great many masters must inevitably be wanted for the instruction of every man, as they are, even at this day, absolutely necessary to qualify mankind for the most easy sciences, and for such affairs as are of the least moment and importance.

All that can be said, in short, amounts to no more than this, namely, That the use of Letters was but very little known amongst a nation, whose principal employment was husbandry, and who were unacquainted with any other profession than that of a shepherd.

It is an established notion amongst the Greeks, that they are indebted to the Phœnicians for their knowledge of Letters.—Herodotus assures us, that the Ionians gave the title of Diphteria to all their books, because they were written upon goat-skins; and that they called all Letters Phœnician, because it was a received opinion amongst them, that one Cadmus had brought them out of the country of Phœnicia. And here we cannot forbear introducing the subsequent beautiful passage, extracted from Lucan's Pharsalia:

*"Phœnices primi, famæ si credatur, ausi
Mansuran rudibus vocem signare figuris;
Nondum flumineas Memphis contexere biblos
Noverat; et saxis tantum volucresque feræque
Sculptaque servabant magica animalia linguas."*

Thus accurately paraphrased by the late ingenious Mr. Rowe:

*"Phœnicians first, if ancient fame be true,
The sacred mystery of Letters knew;
They first, by sound, by various lines design'd,
Express'd the meaning of the thinking Mind;
The pow'r of Words by Figures rude convey'd,
And useful Science everlasting made."*

From this passage it is evident, that the Egyptians, long before the common way of writing was found out, were accustomed to inscribe upon rocks the figures of a great variety of brutes; a dumb sort of language, to which arbitrary meanings were ascribed.

Moreover, Quintus Curtius, having occasion to expatiate on the celebrated city of Tyre, assures us, that the Phœnicians were the first inventors of Letters, and the first that ever communicated the knowledge of them to others.

However, whether that be absolutely fact or not, it must be allowed, that Letters were very ancient among them; for Tully peremptorily insists, that Greece had Poets before Homer; and Eusebius gives us a long Catalogue or List of ancient Authors, whose works were never transmitted down to us; such, for instance, as Linus, Philamon, Thamus, Amphion, Orpheus, Musæus, Epimenides, and divers others, too tedious here to enumerate.

Those Letters, which Cadmus had taught the Greeks, were carried, it is supposed, into Italy, by one Evander, an Arcadian. And thereupon Petrus Crinitus, who flourished in the year 1304, and was pupil to one Politanus, in his Poems on Education; and Lilius Giraldus, who lived in the fifteenth century; and Vossius likewise; quote the following verses, which were found in an old manuscript: namely,

*"Primus Hebræas Moses exaravit Literas:
Mente Phœnices sagaci condiderunt Atticas:
Quas Latini scriptitamus edidit Nicostrata."*

That is to say, Moses was the Inventor of the Hebrew Characters;

The Phœnicians taught the Greeks their letters;

And Nicostrata (who was the mother of Evander) was the first that introduced them among the Italians.

We are assured likewise, by Pliny, that Cadmus bestowed Sixteen Letters, or Characters, upon the Greeks; that the ancient Ionic Letters bore a near resemblance to those made use of by the Phœnicians, and that those Ionic Characters were nearly the same with those made use of by the Latins.

And Scaliger, in his Critical Remarks on Eusebius, peremptorily asserts, that the Assyrian and Phœnician Letters bear a very near affinity to the Samaritan Characters, which were made use of by the Jews in general, before the Babylonish captivity.

But be that as it may, we may boldly assert, that the Knowledge of Letters was very ancient in Egypt. If we may credit Diodorus Siculus, he tells us, that the Egyptians laid claim to that grand, that important Invention, which some insist was beyond the power of Man to contrive, (as we have hinted before;) but then they themselves acknowledge, that it was long after they had made use of living Animals to express their thoughts.

That the Art of Writing was very ancient amongst them, is very evident; for Tacitus informs us, that one Germanicus paid a visit to ancient Thebes, where incontestable marks of its former grandeur and opulence were even then to be read in Egyptian Characters, engraved on obelisks for that purpose. On them were inscribed the several important articles here undermentioned; namely, first, The tribute which was annually paid by the inhabitants; secondly, The weight of their gold and silver; thirdly, The number of their horses and their arms; fourthly, The ivory and perfumes that were peculiarly devoted to the service of their temples; and lastly, The taxes or imposts that were laid on all kinds of grain in particular, and on every commodity in general, either imported or exported.

It must be confessed, that he could not read them himself, but they were explained to him by an ancient Priest; for, according to Diodorus Siculus, none but the Egyptian Priests could interpret such inscriptions.

Now all this is, in our humble opinion, a proof, beyond all contradiction, of the great antiquity of the Use of Letters and the Art of Inscriptions.

To conclude: We are assured by Valerius Maximus, that Pythagoras, when he visited Egypt, made himself master of their Characters, by the instruction of more Egyptian Priests than one; and that having consulted several books, which were intrusted to their care, he found the history of a great number of ages comprehended in them.

SHORT ESSAY

On the Origin and Antiquity of the English Tongue;

And its Superior Excellence to any other Modern Language.

AS all Languages in general have their infancy, their nonage, and their state of perfection, like all the polite Arts and Sciences, to the knowledge whereof we attain in process of time, and by slow degrees; so, by the same slow and almost imperceptible gradations, they lose their pristine beauties; they fade, they droop, they decay, till at length they sink into perpetual oblivion.

This is a truth too self-evident to be denied; for the Gothic language, to which the English tongue owes its existence, is now no more, and altogether unknown; and the Saxon, which succeeded it, is grown so obsolete, so darkly expressed, and hardly to be understood, that only a few of our British virtuosi, whose taste or genius naturally leads them to make their researches into the arcana of antiquity, can form the least adequate idea of its beauties.

However, notwithstanding we natives of England owe our Mother tongue to the Goths: yet the ancient Britons, our truly heroic ancestors, who were first possessed of these our happy islands, spoke a language widely different from ours, before they were conquered by Julius Cesar, being a people we now call the Welsh, and may, with propriety enough, be looked upon by us as the Aborigines of Britain: since CESAR himself acknowledges, in the fifth Book of his universally admired Commentaries, "that they were the inhabitants of its interior parts; and the language, which was first spoken there, had a quite different origin from ours; though from whence it had its source, we confess ourselves at a loss to determine."

No sooner, however, had Cesar and the Romans in general abandoned the British Islands, but our ancestors, in their distress, gave an invitation to the Saxons to aid and assist them against the Scots and Picts, who had not only greatly harassed and perplexed them, but had actually invaded their country.

By the assistance of the Saxons, it is true, those enemies, whose frequent incursions they so much dreaded, were totally defeated; but then, soon after that glorious conquest was gained, those false friends, whom they so highly respected and caressed, played the ungrateful part; and not only turned their arms upon their benefactors, but were so successful in their treacherous proceedings, that the unconquered part of those Britons were reduced to the necessity of flying to the mountains of Wales for shelter and protection, insomuch that the Welsh Language was no longer understood in these our British Islands: and the Saxon only universally prevailed.

It is morally impossible to trace out the form of that language, when it was first introduced into England,

that is to say, so far back as the year 450; for at that time the Saxons were a people so barbarous, so illiterate, and artless, that some of our Antiquarians have much doubted whether they ever had any established Alphabet for the instruction of their youth. Neither have we any just grounds to imagine, that they ever made any considerable proficiency in the study of the arts and sciences, till an hundred and thirty years afterwards; at which time St. Austin came amongst them, with the praise-worthy view of prevailing on them, if possible, to embrace the Christian faith: and met with success beyond his warmest expectations.

After this their happy conversion, indeed, they began to apply their minds to study, and by slow degrees improved themselves in polite literature; insomuch that about one hundred and thirty years afterwards, one bishop Eadfride, who was at that time universally admired for his unaffected piety and sanctity of manners, wrote a well-received Comment on the inspired Writings of the four most holy Evangelists.

In the year 871, Alfred the Great came to the crown of England, when the Danes were in the very heart of his dominions, and all the sea-ports were filled with their fleets. After divers battles with various success, finding himself at last overpowered by numbers, he was reduced to the necessity of dismissing his very attendants; and having committed his wife and children to the care of some of his most loving and loyal subjects, he went in disguise to the little island of Athelney, in the county of Somerset, and there lived concealed for some years.

During that long inter-regnum, as he was not only one of the greatest and most pious princes upon earth, but the best scholar of the age in which he lived; it is a received opinion, and in all probability it was fact, that he translated the Saxon Homilies in that rural recess, and composed divers other books of devotion for the religious improvement of his subjects, which were soon published after his happy restoration, though not with his majesty's name prefixed.

In the year 900, we are informed that a translation of the Gospels made its first appearance; but by whom the elaborate and praise-worthy undertaking was accomplished, the learned and judicious antiquarian, to whom we are indebted for our most essential remarks, has not made mention of his name.

In the year 1066, the Saxon government ended by a very remarkable battle between Harold the Second, and William the Bastard, then duke of Normandy, in which no less than sixty thousand of the British were slain. Upon

this total defeat the ancient inhabitants of this island withdrew into *Wales*, where they preferred barren mountains with the possession of liberty, to the most fertile plains of *England*.

Soon after this revolution, the *Saxon* language began to lose its ancient form, and grow out of repute, and, by slow degrees, to exhibit some traces of the *English* Language, as it now stands; notwithstanding, but a very few *Norman* words were adopted for near an hundred years after the Conquest.

About the year 1130, several compositions, both in prose and verse, made their appearance in public; upon the perusal whereof, notwithstanding the language was greatly altered, both in its constructions and terminations, yet it still, with propriety enough, might be termed the *Saxon Tongue*.

In the 13th century, however, a sort of Language, partly *Saxon* and partly *English*, was introduced; at which time the miscellaneous writings of one *Robert of Gloucester* were held in high esteem.

Among many other fugitive pieces, he inserted a poetical encomium on King *Alfred*, which at that time was received with universal applause.

In the 14th century, one Sir *John Mandeville*, who was a very learned gentleman, and an able and experienced historian, obliged the public with an accurate and elaborate account of his own travels.

Hitherto our language was widely different from that spoken at present: two great poets, however, flourished in this century; namely, Sir *John Gower* and *Geoffrey Chaucer*; though the former published some few poetical pieces first, yet the latter is for the most part styled the *Father* of all the *English Bards* that succeeded him. If the account given of him by *Leland* may be relied on, "he was not only a very facetious poet, but an acute logician, a great philosopher, a profound mathematician, and a pious divine:" but how that last part of his character may be fully vindicated, I shall not presume to determine; since there are too many of his *Tales*, which, though facetious and entertaining, are not, in my humble opinion, over instructive; since some of them can scarcely be read without a blush. And the late Lord *Roscommon* has made the following very just observation; namely,

"Immodest words admit of no defence;
For want of decency is want of sense."

In 1468, one *Caxton* brought the art of Printing into *England*, and (amongst other books) published one, entitled *Recuyel of the Historyes of Troy*.

About two and twenty years afterwards he published a translation of the *Boke of Eneydos*, composed by *Vyrgille*. The preface or introduction to which plainly shews, that the readers in those days were highly disgusted with the innovations which were then made in the *English Language*.

About the year 1500, the celebrated Sir *Thomas More* made a flourishing figure in the *English* court; and by many authors has been highly applauded, as the politest and most accurate writer of the age in which he lived.

In the year 1558, *Thomas Sackville*, then earl of *Dorset*, published several fugitive pieces, and was universally admired, not only for the elegance of his style, but the beauty of his compositions.

In 1573, one *Ralph Lever* published a treatise, intitled, the *Art of Reason*; and not long after him the celebrated Sir *Philip Sidney* wrote his *Arcadia*, which is universally allowed to be the most entertaining and instructive novel

that ever appeared in public, at that time of day. He likewise published an accurate translation of *Philip Lord Mornay du Plessis Marly's* unanswerable defence of the *Truth of the Christian Religion*; which, in his time, met with the universal approbation of the public, which it justly deserved.

About the year 1509, that is to say, in the beginning of king *Henry the VIII.*'s reign, one *William Tindal* published a Translation of the *New Testament*; but soon after one *Cuthbert Tonsal*, then bishop of *London*, sent a very severe prohibition of it to the archdeacon of his diocese, with his reasons annexed.

In the 17th century, however, Sir *Francis Bacon* was the first author whose style was capable of entertaining and instructing the readers of the present age. To him succeeded *Milton*, *Waller*, *Algernon Sydney*, lord *Clarendon*, &c. &c. who made great improvements upon his style. We are indebted, however, to Messrs. *Dryden*, *Addison*, *Budgell*, *Steele*, *Swift*, and *Pope*, for the inimitable beauties with which our language shines at present; and by whom, I humbly conceive, it was carried to its *acmé*, or utmost pitch of perfection.

To conclude: As the present undertaking is immediately calculated for the service of such *English* readers as are supposed to be unlettered, and not so happy as to have had the benefits and advantages of a very liberal education; it would be foreign to our purpose to embellish this *short Essay* with any ancient quotations, to shew the gradual improvements of our *English authors* in their style, according to the state of our language at their respective periods.

Having thus said all we think absolutely necessary, and consistent with our intended brevity, we shall proceed to the last topic proposed; namely, the excellency of the *English Language*.

Now its beauties are most conspicuous in the four particular articles here undermentioned; that is to say, it is free and easy; and, in short, more sweet and harmonious, and by consequence preferable, to any living language whatsoever.

Its freedom and facility, in the first place, is demonstrable, since it is in a great measure exempt from that multiplicity of cases and inflexions, which clog or encumber almost all others, and render them for that reason extremely intricate, difficult, and abstruse. Our *Adjectives* being all invariable, make the concordance with their *Substantives* remarkably plain and easy: our *English Pronouns*, likewise, are not half so confused and perplexed as either those of the *Latin* or the *French*. And scarce any thing can more easily be conquered than the Conjugation of our *English Verbs*: besides, our language is burdened with no such thing as *Verbs reciprocal*, which render the *French Tongue* in particular very dark and obscure; and very often discourage foreigners from the study of it.

To illustrate its copiousness, very little need be said, since it is too manifest and self-evident to be denied; for besides the ancient *Dutch*, which the *English* retain in the *Saxon* monosyllables, the literati of *England*, like so many industrious bees, have collected the quintessence of divers foreign languages, and rejected their refuse or dross: by which artful management, and their assiduity, they have improved their mother-tongue to that prodigious degree, that all such foreigners as have an adequate idea of the genius of it, are perfectly charmed to observe, that neither their own, nor any other language whatsoever, can stand in competition with it; and at the same time, to find

a great variety of their own terms so happily transplanted and blended with it, that they seem to thrive better in *England* than in their native soil.

And whereas the *French* is too much limited and constrained, and through its over-niceness is grown in some measure barren, spiritless, and insipid; the *English*, on the other hand, is become prodigiously copious and luxuriant through its innate power of making such *Compounds* and *Derivatives* as are very comprehensive, emphatical, and proper to contract any expression into a narrow compass; it must be allowed, that neither the *Greek* itself, nor the *Latin*, can compound or join many words together in a more agreeable manner, which is one of the most shining beauties that any language can possibly boast of. In a word, there is no sentiment or thought that can be expressed in a greater flow of words, or with more propriety and a better grace, than in the *English Tongue*.

As to its energy or significance, there is scarce any variety that any other nation can boast of, but what the *English* have almost with equal happiness made its own. With what propriety has the celebrated Lord Bacon taught us to speak all the terms of art in our mother-tongue, which was looked upon as impracticable, till we saw it actually carried into execution! What inimitable pieces of oratory or elocution, of our own growth, have we seen published within these few years! and what collection of poems bears a more sublime sense, is more manly and majestic, more strong and nervous, than what has been exhibited to the public by those universally admired poets, Mr. Milton, Mr. Addison, and Mr. Pope!

As to its harmony and sweetness, it must be confessed, that the *Italian* abounds with vowels, as the *Dutch* does with consonants; which renders the first too effeminate, and the last too rugged and uncouth; whereas the *English* has, through a happy intermixture, the advantage of them both. We cannot but allow that the *Italian* language is peculiarly delicate, soft, and pleasing to the ear; but then it glides along like a purling stream. The *French*, doubtless, is very nice and courtly; but then it has too much in it that savours of effeminacy and affectation. The *Spanish*, it is true, is very solemn and majestic; but then it is too apt to be stormy and tempestuous, and carries a kind of terror along with it. The *German* is very manly indeed, but then it is harsh and unpolite; whereas the *English*, by judiciously borrowing a little here and a little there, from each of them, gives strength of consonants to the *Italian*, the full and perfect sound of syllables to the *French*, the variety of terminations with much gentler accents to the *Spanish*, and dissolves the *Dutch* consonants with greater facility and ease.

Now what can possibly be wanting to the perfection of that language, where substance and solidity combine with pleasure; where copiousness unites with delicacy, beauty with majesty, and expedition with gravity and sedateness?—And such, doubtless, is the composition of the *ENGLISH*.

That all these advantages are inherent in our mother-tongue, all foreigners, in general, are become at length highly convinced; and notwithstanding, indeed, in former days, they spoke of it with an air of indifference at least, and looked upon it with an eye of contempt; yet as those groundless prejudices are now removed, they stand in admiration at the sound of it.

The principal objection that some hyper-critics have urged against it, are these two: namely, it being a language compounded of divers others; and its being subject and liable to frequent variations. The former, however, is so very natural to all languages in general, that we have never heard hitherto of any one entirely free from it, the *Hebrew* only excepted, as some say; but whether that be the real fact or not, we ingenuously acknowledge our inability to determine. The *Latin* language has a great mixture of that which was spoken by the *Greeks* and *Goths*; the *French* is a composition of *Latin*, *Dutch*, and the ancient *Gallie*; the *Spanish*, of *Latin* principally, with some spice, or smattering, of the *Gothic* and *Morisco*; and the *German* itself, though by some peremptorily insisted upon to be an original, has some savour of the *Roman* empire, and its neighbouring nations.

As to its being subject to various changes and mutations, this objection is altogether as groundless as the former: for it is universally allowed, that all languages, as well as kingdoms, have their infancy and age, their perfection and decay.

I shall now conclude this succinct account, this transient view only of the excellency of our mother-tongue, with the observations of two very judicious critics, who, though masters of divers languages, hold our *English* tongue in the highest veneration.

“As the *English* language,” says the first, “is at this present juncture arrived at so great a pitch of perfection, is so very copious and expressive, by the accession of the life and spirit of divers other tongues with which it is blended, it were greatly to be wished, that a stop might be put to that boundless practice of naturalizing foreign words, of which the *English* seem too extravagantly fond; and that for the future all neological and factitious terms should be laid aside, except some few that might possibly be introduced with judgment and precaution.”

“Was the *English* nation,” says the last, “but contented with making improvements on that grain which they have already, without overstocking themselves by importations from foreign ports, and putting their language in a perpetual ferment, it would contribute greatly to its future credit and reputation.”

And, to confess ingenuously, it is our humble opinion, that there is already as much in it as is any ways useful or necessary; and as much, in a word, as the *English* soil is capable of bearing.
